thereby on the profits of sugarcane cultivation in India. Statements have been made in newspapers and periodicals that this increasing import of sugar at very low prices under the stimulus of the competition between the produce of Mauritius and the bounty-aided sugars of Europe is injuring the sugar industry of India by lessening the internal demand for, and reducing the price of, Indian sugars; that it will result in sugarcane being less and less grown in India, and in the impoverishment of the agriculturist in many places to the extent that the land revenue assessments and the canal revenues will be endangered.

2. The Government of India have no clear evidence before them that the increasing sugar imports have had, or are tending to, such serious consequences. The area under sugarcane in the different provinces has not declined of late years, nor in recent revenue or settlement reports have any observations regarding the unprofitableness of the industry been noticed. The extent to which the refined sugars from abroad compete in the Indian markets with the coarse sugars ordinarily manufactured by native processes, and tend to supplant the latter, is uncertain. There is probably an increasing demand for sugar in India for domestic consumption and for spirit distilling and sweetmeat making, and as the sugarcane area has not expanded of late years, it may be that the increasing imports have not been in excess of the necessary demand, and that the price of Indian sugars has, notwithstanding these imports, been maintained. Lastly, the question whether sugar prices in India have fallen in recent years is one on which it is difficult on existing materials to pronounce, owing to the many varieties of sugar sold in Indian markets, and the failure of the published price returns to clearly distinguish between them.

3. The subject, connected as it is with the sugar bounty question, appears to the Government of India to be of sufficient importance to be specially investigated, and I am to ask that, with the permission of the Governor in Council / His Honour the Lieutenant-Governor, inquiries may be made as to the effect of the competition of imported sugars on the cultivation of sugarcane in ________, on the profits of such cultivation, and on those of the sugar industry; also as to the possibility of any falling off in the land or canal revenues in consequence of the abandonment of sugarcane cultivation. I am to ask the results of the inquiry may be communicated to the Government of India.

4. A statement showing the imports of sugar into India during the last three years as given in the Trade and Navigation Returns is appended. According to the article on sugar in the *Dictionary of Economic Products* (Volume VI, page 346) the area under sugarcane in India is about 2,500,000 acres, and the outturn, in coarse unrefined sugar, about 2,500,000 tons. The value of this crop at Rs. 100 a ton may approximately be put at Rs. 25,00,00,000. The value of the imports of sugar in 1897-98 is returned at Rs. 4,70,87,904. The imports of sugar thus bear a considerable proportion, as regards value, to the sugar production of the country.

No. 5.

Dated 6th September, 1898.

From—C. E. P. VANSAGNEW, Esq., Vice-Chairman, Chamber of Commerce, Madras,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I have the honour to forward herewith a duplicate copy of a letter which has this day been despatched to the Madras Government for submission to the Government of India.

Dated 6th September, 1898.

From— C. E. P. VANSAGNEW, Esq., Vice-Chairman, Chamber of Commerce, Madras,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

The Sugar Bounty Conference held at Brussels in June having failed to attain the object for which it was assembled, this Chamber feels bound to reiterate the opinion that it expressed in the last paragraph of its letter to you, dated the 19th March 1898, namely, that under such circumstances "countervailing duties are India's only weapon of defense." The imposition of such duties, it may be remarked, would be in accordance with the views of the British Delegates who attended the Conference. (*Vide* their Report to the Marquess of Salisbury, dated Brusseis, the 27th June 1898) :

* * * * * * *

"It seems clear that in the circumstances there are at present but two methods of securing the suppression of the bounty system—

"(1) by coming to some arrangement for such modifications or limitations in the French and Russia. systems as may be acceptable to the other sugar-producing States, in return for the suppression of their bounties; and

"(2) by the conclusion of a Convention between a certain number of the sugar-producing States providing for the total suppression of sugar bounties within their dominions, and engaging that they will either impose countervailing duties on, or prohibit the entry of bounty-fed sugar coming from States which cannot be induced to become parties to the Convention."

The first alternative having now been shown to be unattainable, it only remains for the second alternative to be acted upon The Chamber would be glad to learn that the Government of India will take steps in this direction without delay.

Dated 13th September, 1898.

From—W. B. WISHART, Esq., Secretary to the Chamber of Commerce, Upper India,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

In terms of paragraph 4 of No. 136, T., dated 30th April 1895, and No. 137 T. of same date, I beg to send herewith copy of letter addressed by this Chamber to Government, North-Western Provinces and Oudh, regarding the effect of the unrestricted importation of bounty-fed sugar on the sugar-cane industry of India.

Dated 12th September, 1898.

From—W. B. WISHART, Esq., Secretary to the Chamber of Commerce, Upper India,

To—The Secretary to the Government of the North-Western Provinces and Oudh, Financial Department.

With reference to this Chamber's letter of the 17th March last and in connection with a further representation on the same subject from the Madras Chamber of Commerce, to the Government of India, Finance and Commerce Department, dated 6th instant (copy enclosed), I am directed by the Committee of this Chamber to solicit that His Honour the Lieutenant-Governor and Chief Commissioner may be pleased to see fit to urge upon the Government of India the pressing necessity of instituting without delay countervailing duties on all subsidised sugar imported into the country.

As pointed out by the Madras Chamber the Conference held at Brussels having failed in its object, the levy of countervailing duties now constitute India's only weapon of defence. This fact is emphasized in the report submitted to Secretary of State by the Brussels Delegates present at the Conference, *vide* the following extract therefrom :—

"The market of the United States is already rendered unprofitable by this means (countervailing duties) to all bounty-fed sugar. All the Continental sugar-producing States, by means of Customs duties and internal legislation, reserve the entire supply of the home market to the home producer of sugar; and the English, *and to a rapidly increasing extent the Indian, market thus becomes essential for the surplus production of the European countries.* Any steps by which these markets might be closed to bounty-fed sugar must therefore have a decisive effect in securing the speedy abolition of the bounty system."

* * * * * * *

"If no solution can be obtained, it is possible that a still worse state of affairs may result by the increase of bounties in various countries."

That the sugar-refining industry in India must perish at very early date, unless protected against the unfair competition which it has now to face, is unquestionable, but were further evidence needed as to this fact, the attached statement extracted from the official "Accounts relating to the Trade and Navigation of British India" should suffice. This shows that in 1888-89 the value of sugar importad amounted approximately to 1¼ crores of

rupees and that of " All other articles of food and drink " to about $5\frac{3}{4}$ crores; further during the ten years under review the increase in sugar imported has gone on without interruption till it has reached $4\frac{3}{4}$ crores, while the value annually of " All other articles of food and drink ' imported has remained practically stationary, the greatest variation being a minim um of approximately $5\frac{1}{3}$ crores worth in 1890-91 as against 6 crores in 1897-98.

Extract from accounts relating to the Trade and Navigation of British India.

Dated 17th September, 1898.

From—W. B. WISHART, Esq., Secretary to the Chamber of Commerce, Upper India,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

In accordance with paragraph 4 of G.O. No. 136 T., dated 30th April 1895, and No. 137 T. of same date, I am directed to submit herewith copy of a supplementary letter, dated 16th instant, addressed by this Chamber to the Government of the North-Western Provices and Oudh in connection with the effect of the unrestricted importation of bounty-fed sugar on the sugarcane industry of India.

Dated 16th September, 1898.

From—W. B. WISHART, Esq., Secretary, Chamber of Commerce, Upper India,

To—The Secretary to the Government of the N.-W.P. and Oudh, Financial Department.

In continuation of this Chamber's letter of the 12th instant, I am directed to forward herewith a statement showing the relative quantities of refined sugar imported into, and exported from, Cawnpore from 1st January 1894 to 31st August 1898.

From this it will be seen that the annual volume of the export trade has not fallen off, but that this fact is only due to the large and increasing extent to which imports into the town of native refined sugars are being displaced by those of foreign—mostly bounty-fed—sugars. The net average consumption of refined sugar in the Municipality of Cawnpore is estimated at 10 seers per head per annum, but it is unnecessary to take this factor into consideration as it does not represent, roughly speaking, more than the outturn of the local English refineries.

Import of Sugar into Cawnpore from Calcutta, Bombay, and all other places during each month of the year from January 1894, as compared with the corresponding months of the following years, viz., *1895 to*

No. 637, dated 15th February 1899.

From—The Chief Secretary to the Government of the North-Western Provinces and Oudh,

To—The Secretary to the Government of India, Department of Revenue and Agriculture.

I am directed to acknowledge the receipt of your Circular No. 15—48-3, dated 31st October 1898, regarding the effect which the increasing imports of refined sugar from Europe and from the Mauritius into India have exercised, or are tending to exercise, on the market for and the price of Indian sugars, and thereby on the profits of sugar-cane cultivation in India. The importance of the question has also been pressed upon the Lieutenant-Governor's notice by the Upper India Chamber of Commerce as well as by communiactions from other sources, and during his cold weather tour, which took him through many of the principal cane-producing districts in the Meerut and Rohilkhand Divisons, His Honour made enquiries on the subject from cultivators and merchants interested in the trade.

2. The Director of Agriculture was also instructed to make a careful enquiry into the whole subject, and I am now to forward, for the information of the Government of India, a copy of a full memorandum drawn up by the Officiating Director. This memorandum which takes account of all the aspects of the case and all the interests concerned, is so complete and so much in harmony with the Lieutenant-Governor's own views as to leave him little to add in forwarding it to the Government of India.

3. The question that first suggests itself for examination is one that is susceptible of accurate statistical investigation. It is whether, as a matter of fact, up to the present there has been any such decrease in the area under sugar-cane as would show that the importation of the cheap foreign article had begun to affect the production of the local staple. Unfortunately, however, while the facts are sufficiently clear, the inferences to be drawn from them are rendered doubtful by the impossibility of determining at the present time how far the variations that have occurred are due to the exceptional agricultural conditions of recent years.

4. From the diagram referred to in paragraph 8 of the memorandum it appears that in the decade preceding the late famine there had, on the whole, been a very considerable expansion in the area under cane, which reached its maximum limit in 1895-96, just before the famine. There was then in the two following years a decline, which can only be attributed to the disastrous seasons. In 1898-99 there has been a slight recovery.

5. The inference to be drawn from the recovery depends entirely on the question whether it was or was not as great as might be expected after the effects of the famine had passed away. The Director has little hesitation in answering this question in the negative, but the Lieutenant-Governor is not disposed at the present stage to consider this view to be fully established. It is true that the area in 1898-99 was below the average of the six years before the famine and much below the figures of 1895-96, but it was above the average of the decade preceding the famine. The Director suggests that this latter average is affected by the figures of earlier years, when cultivation of cane had not reached what he considers to be now its normal standard; but His Honour is not certain that a standard has yet been attained, and though the Director's inference is probable, he would not base conclusions on it. While, however, the figures for the Province as a whole may fail to afford conclusive proof of the Director's inferences, one significant fact in support of them emerges on an examination of the statistics in detail. The map attached to the memorandum shows that the area under sugar-cane was less than the figures of the ten years' average in by far the greatest part of the Province. The falling-off was, it is true, more than counterbalanced by a large increase in the two tracts in the north-east and north-west of the Province where the cultivation of sugar-cane is most profitable. But it is significant that where the profits from the industry are least, there the falling-off of cultivation was greatest. The diminution of profits had its natural effect in a lessened area under the crop. The increase in Gorakhpur may be pointed to as an exception to this statement, but in that part of the country there is not the same production of refined sugar as elsewhere, and it is the trade in refined sugar that is most directly affected.

6. Allowing for the difficulty of determining the causes of the ascertained variations in cultivation, the inferences to be drawn from the memorandum may be stated as follows :

(1) There has been a substantial decrease in the acreage under cane in those parts of the Province where the margin of profit on the cultivation is least, this decrease being probably due to the competition of bounty-fed sugar. Further experience is, however, required to arrive at certain conclusions in this respect.

(2) Foreign sugar does not as yet compete with *gur*, but it is now competing with refined sugar for home consumption, of which article it has seriously reduced the exports. It has also already caused the closure of numerous refineries, while it has seriously endangered the stability of others. The Director gives statistics showing that 120 refineries have stopped working, but his figures on this point are incomplete. He has since informed the Lieutenant-Governor that no less than 60 have been closed in a part of the district of Azamgarh alone, of which no account is taken in his memorandum.

(3) The price of refined sugars has been reduced about 12 per cent. in five years; and this decline has had a general lowering effect on all sugar prices.

(4) The closing of refineries must lead to a contraction in the acreage under sugar. This reduction might, if the refining industry were destroyed, reach a maximum of 250,000 to 300,000 acres. Such a reduction in the acreage under a valuable and paying crop would cause far-reaching injury to landlords tenants, and the labouring population, and might affect the well-being of the rural classes to an extent that would produce serious discontent in the sugar-cane-growing regions. The stability of the Government revenue would be affected, not indeed directly, because the land revenue assessments are not ordinarily made on the special or crop rents that are in some places paid for land let out for a cane crop, but because the reduction of the profits of a valuable crop would impair the rent-paying capacity of the tenants, and thus cripple the resources of the landlords.

(5) The information available points to the probability of the further cheapening of the production of bounty-fed sugar in the future, to its importation in increasing quantities, and to the further under-selling of the native refiners.

(6) It is of much more importance to these Provinces to preserve their sugar industry on the basis of present arrangements than to have a cheap foreign sugar supplied to the consumers of the refined article.

(7) There is no prospect of native processes being so improved that refineries could hold their own against the foreign competition assisted by bounties.

7. While the Lieutenant-Governor thinks that further experience is necessary—possibly the current year's experience will suffice—to the formation of a clear and precise judgment as to the effects of the importation of foreign sugar on the indigenous industry, he is inclined to infer from the facts which have been stated above that in all probability the foreign competition has already begun to affect the native sugar industry; that it has probably already affected the cultivation of cane in the central and eastern districts; and that it is likely to produce continued and increasing injury both to the sugar industry generally and to the agricultural and labouring population of the cane-producing districts. This injury is undoubtedly the result of the bounty system, which enables foreign sugar to be profitably sold at a price below its cost of production and below the cost of manufacturing sugar in this country. It is submitted that the system is an arbitrary interference with the operation of the general laws of value, and that the removal of such a hindrance to freedom of exchange should be recognised as one of the duties of Government. The most satisfactory solution of the difficulty would be the abolition of bounties by international agreement, but there appears to be no probability that this consummation will be secured in any reasonable time, and the only alternative left to the Government is to protect itself by the imposition of countervailing duties. The effect of countervailing duties on the people of these Provinces would be precisely the same as an abolition of the bounties; in both cases the hindrance to free exchange on the basis of the cost of production price would be removed; and the price of the commodity would be left to be determined in accordance with the cost of production and the laws of supply and demand. The abolition of bounties has been generally admitted to be desirable, and action towards that end has already been taken by the Imperial Government. If, then, abolition should be impossible, the interests of this country would seem to call for the adoption of the alternative course. Sir Antony MacDonnell recognises that the interests of producers are in this matter necessarily opposed to those of consumers, but he considers that in this country, in which, as the Famine Commission has just shown, the labouring population are in a depressed condition, and in which refined sugar is a luxury mostly consumed by the well-to-do, the injury caused by unfair competition in an important agricultural product is far greater than the corresponding advantages which this country derives; and therefore that the effect of the bounties on the Indian sugar industries should be neutralized if their abolition cannot be secured.

No. 387—XIII-57, dated 9th February 1899.

From—W. H. MORELAND, Esq., Officiating Director of Land Records and Agriculture, North-Western Provinces and Oudh,

To—The Chief Secretary to the Government of the North-Western Provinces and Oudh.

I have the honour to forward the memorandum on the sugar question called for in G. O. No 670—I-727B., dated April 7th, 1898. The information required by G. G. O. No. 15—48-3, dated October 31st, 1898, has been included as directed in G. O. No. 3590—I-727B., dated November 16th, 1898.

2. Should the memorandum be printed, I request that ten copies may be supplied to me for use in further enquiries into the subject.

Memorandum on the probable results of increased imports of foreign sugars.

INTRODUCTORY REMARKS.

In G. O. No. 670—I-727B., dated the 7th April 1898, the preparation of a memorandum was ordered to show, as far as information might be available, the extent to which im-

gar, both beet root and cane-sugar, was occupying the markets of these Provinces. port was also required of statistics showing fluctuations in the imports and exports of gar, crude or refined, and of the areas of cane under cultivation in the Provinces, and an enquiry into the comparative prices of imported and home-grown sugar.

2. Subsequently G. O. No. 3590—I-727B., dated the 16th November 1898, directed that the memorandum should include the information called for by the Government of India in G. G. O. No. 15—48-3, dated the 31st October 1898. The information called for in this reference was as to the effect of the competition of imported sugars on the cultivation of sugarcane, on the profits of such cultivation, and on those of the sugar industry; also as to the possibility of any falling-off in the land or canal revenues in consequence of the abandonment of sugar-cane cultivation.

3. This memorandum has therefore to furnish answers to both references, and as the subject-matters of the two overlap, it has not been found possible to follow the order in which the subjects of enquiry were prescribed. I have accordingly arranged the memorandum in the following order :

I.—An examination of the statistics of cane cultivation in these Provinces.

II.—An enquiry into the home production of sugar.

III.—An examination of the statistics of imports and exports.

IV.—A study of the comparative prices of home and foreign sugar.

V.—An enquiry as to the extent to which foreign sugars are occupying the markets of the Provinces.

VI.—The effect of foreign competition on the profits of cultivation.

VII.—The effect of foreign competition on the profits of manufacture.

VIII.—An enquiry whether a decrease in cultivation is to be expected.

IX.—The probable results of a decrease in cultivation on the well-being of the people.

X.—The probable effects on the revenue.

XI.—Conclusion.

4. It may be well to explain at once that our trade statistics do not enable us to distinguish between cane and beet-sugar; and such a distinction is the less necessary because the people of the country do not recognise it. It never occurs to them that the foreign sugar can be made of anything else than sugar-cane, and if they are told that beet-root is used, their incredulity is obvious. A more important defect in the statistics is that they do not distinguish between home and foreign produce. The only way out of this difficulty is to treat the imports from the seaport towns as foreign sugar, and to class all other imports as home production. This is the course adopted and justified by the Cawnpore Chamber of Commerce in their letter of March 17th, 1898, and I have followed it throughout this memorandum.

5. The statistical information contained in this memorandum has been obtained from the various Departments concerned. The other information has been collected from a great variety of sources : much of it is the result of enquiries made in all the principal centres of the industry by the Assistant Director, Saiyid Muhammad Hadi, M.R.A.C., who has taken up the question with great thoroughness and ability. A note embodying the results of his earlier enquiries is already, I understand, in the hands of Government.

I.—THE STATISTICS OF CANE CULTIVATION IN THESE PROVINCES.

6. The statistics of cane cultivation from 1886-87 to 1898-99 are given in Appendix I. These figures are in general supplied by the patwaris; but it sometimes happens that the patwaris in some districts are engaged in survey operations and are unable to furnish the actual figures. In such cases it is usual to repeat the figures for the previous year so as to give an approximate total for the whole of the Provinces. The area affected in any year by these interpolations is not so great as to materially alter the provincial total, and the matter is only mentioned here because the accuracy of the detailed figures might otherwise be called in question. In the appendix such assumed figures are marked by brackets.

7. The long period during which the cane occupies the land renders it necessary to explain that the year given in the appendix is that in which the crop is harvested : thus, the area shown under the year 1895-96 is that which was sown in the spring of 1895 and harvested in the spring of 1896; that is, during the agricultural year 1895-96. Similarly, the crop shown under the year 1898-99 is that which is being cut at the time of writing.

8. The first point to consider is what period shall be adopted for the calculation of the normal area. In the diagram opposite the black line shows the annual cane area of the Provinces : the red line is the ten years' average from 1886-87 to 1895-96. There is no suspicion that the area in the latter year (the largest on record) was depressed by foreign imports, so the period to be selected will include it; the figures for the subsequent years require examination as it has been alleged that the decrease in them is due to the competition of foreign sugar. I regard the period of ten years as too long, because it is clear that cultivation was extending during this time, and to take the average of the whole would

result in an understatement of the falling-off which is apparent. It would ordinar[illegible] desirable to take at least five years, but I prefer in this instance to take six, as the blue line in the diagram shows maxima and minima in alternate years, and consequently a fair average cannot be deduced from an odd number of years. I have therefore selected the six years 1890-91 to 1895-96 as the most suitable period, and have shown the average for it (amounting to 1,270,160 acres) by a blue line in the diagram.

9. The area sown in 1896-97 fell below this average by 56,131 acres, or 4·4 per cent. This fall could not be due to competition of foreign imports, because this competition had not begun in the spring of 1896, when this crop was sown. The decrease is in fact just what the figures of past years would suggest: a fall was to be expected after the large rise in the previous year, and if the fall is greater by a few thousand acres than might have been foreseen, the reason is to be found in the local scarcity prevailing in Pilibhit and elsewhere at the time (the spring of 1896) when this crop was sown.

10. The crop sown in the spring of 1897 showed a further fall, and was 9·6 per cent. below the normal. This is not surprising, for at seed time almost the whole province was suffering from acute famine, and cultivators naturally put a larger proportion of their irrigable land under food-crops. On the other hand, the increase in imports was not at that time so marked as to affect the cultivators' calculations. When the whole *rabi* area was below the normal by about 24 per cent., when prices of grain were at least double the ordinary figure, and when cultivators' food stocks were running low, it is a matter for surprise that the cane area did not fall still further, and there is no need to look for other causes for the fall that took place.

11. It will be seen that the year 1898-99 is the first in which the competition of imported sugar could be expected to result in a decrease in the area of cane cultivation. Apart from this competition, it would have been expected that the cane area would rise to something like the figures of 1895-96; but no such rise has taken place. The total for the province (including certain assumed figures) is 1,227,881 acres, an increase over 1897-98 of 79,782 acres (7 per cent.), but falling below the normal average by 42,279 acres, or 3·3 per cent. It is thus on the whole considerably below what might have been expected.

12. The different position in different districts is this year very marked, and requires a detailed consideration of the figures; this will be found later on, as it could not be given here without anticipating some of the conclusions arrived at in subsequent sections.

13. Before leaving the cultivation statistics it will be well to show the relative importance of the cane crop to each division. As far as the area goes, this is shown in the following table:

DIVISION.	Average cultivated area in the six years 1890-91 to 1895-96.	Average area under sugar-cane in the same period.	Percentage of cane to total cultivation.
	Acres.	Acres.	
Meerut	4,414,801	253,831	5·7
Agra	3,753,555	59,091	1·6
Rohilkhand	4,390,924	301,422	6·9
Allahabad	5,209,170	34,374	0·66
Benares	2,783,191	156,761	5·6
Gorakhpur	4,103,117	197,394	4·8
Kumaun (Tarai)	200,801	4,958	2·5
Lucknow	4,172,548	128,603	3·1
Fyzabad	4,580,952	133,726	2·9
Total, North-Western Provinces and Oudh	33,609,059	1,270,160	3·8

The crop is most important in Rohilkhand, Meerut, Benares, and Gorakhpur; least so in Agra and Allahabad, Oudh occupying the middle place in the table. Of all districts it is most important in Meerut, where the acreage averages more than a lakh: it is between half a lakh and a lakh in Muzaffarnagar, Bareilly, Bijnor, Moradabad, Shahjehanpur, Jaunpur, Gorakhpur, and Azamgarh: in other districts the acreage is below 50,000.

II.—THE HOME PRODUCTION OF SUGAR.

14. Before examining the statistics of imports and exports it is desirable to get some idea of the amount of sugar actually produced in the provinces. An enquiry of this kind

is beset with considerable difficulty, and the figures in the following table must not be considered as more than a first approximation:

Division.	Normal area under cane in acres.	Normal outturn of *gur* per acre in maunds.	Normal outturn in maunds.
Meerut	253 831	31	78,68,761
Agra	59.091	21	12,40,911
Rohilkhand	301,422	29	87,41,238
Allahabad	34,374	24	824,970
Benares	156,761	30	47,02,830
Gorakhpur	197,394	29	57,24,426
Kumaun	4,958	27	133,866
Lucknow	128,603	28	36,00,884
Fyzabad	133,726	28	37,14,328
TOTAL ...	1,270,160	...	36,582,220

In this table the normal area is taken as the average of six years, as explained in the preceding section. The outturn of *gur* per acre has been calculated after consideration of all available materials. These consist partly of determinations made from time to time by Settlement Officers and former officers of this Department, but mainly of experimental cuttings carried out in recent years under the supervision of the Assistant Director. It has been necessary to consider the variation arising from the heterogeneous nature of some of the divisions: Meerut, for instance, includes the districts of Dehra Dun and Aligarh, the former more similar in conditions to the north of Rohilkhand or the Tarai, the latter approximating in sugar-producing capacity to the districts of Agra and Etah. Allahabad again includes all classes of land from the rich sugar soil north of the Ganges, to the Bundelkhand districts where sugarcane is almost unknown. In all such cases the average outturn has been calculated with due regard to the area occupied by the crop in each class of soil.

15. The outturn given is, if anything, lower than experimental figures would warrant: in cases of doubt I have taken the lower of two possible figures, as for the purposes of this memorandum it seems more important not to exaggerate the home production. The low outturn estimated for the Agra Division may perhaps give rise to criticism; it is the mean of several recent experiments conducted with great care, it is slightly above the figure given by experiments made some years ago, and its lowness is *à priori* justified by the sandy nature of the soil and the poor varieties of cane commonly grown in this division.

16. In fixing on *gur* as the standard of outturn I have not overlooked the fact that a large quantity of cane is used in the production of *rab*, as an intermediate process in preparing refined sugars, and a lesser quantity is devoted to the manufacture of the raw sugar known as *shakkar*. *Gur* is taken as the standard because most of the cane is grown for its preparation, and it is assumed, for statistical purposes, that all the cane-juice is made into *gur*.

17. Before accepting the normal outturn at the figure given in the table, one deduction is necessary. A certain proportion of the land under cane is occupied by the *paunda* variety, which in these Provinces is not generally used for the manufacture of sugar, but is eaten as a fruit: the area devoted to this variety cannot be ascertained, but it is a small proportion of the whole, and after allowing for it and for possible errors in the estimate, I think the production of the Provinces in ordinary years may be taken as equivalent to 3,50,00,000 maunds of *gur*, worth from eleven to twelve crores of rupees.

18. The outturn of the years 1896-97 and 1897-98 fell considerably below this standard. In the former year the area occupied by the crop was below the normal by 4·4 per cent. The outturn (harvested in January and February 1897) was distinctly inferior, and despite an excellent yield in the Meerut Division was not more than three-quarters of the average in the Provinces taken as a whole. Taking these two factors into consideration, the produce of this year was about ten million maunds below the normal. The crop of 1897-98 was 9·6 per cent. below the average in area, but the outturn was good, so that the deficiency in this year was about three million maunds. In the two years combined the deficiency was about 13 million maunds.

19. It is much to be regretted that nothing is known as to the amount of refined sugar produced in the Provinces. The best estimate I can give is that about one-fifth of the raw sugar produced is refined, and four-fifths consumed in its natural state. This estimate (it is little better than a guess) is founded on what is known of the consumption of sugar among the people. The Upper India Chamber of Commerce estimate that the amount refined is

one-third of the whole. I am not aware that they have better grounds for their opinion than I have for mine, and I dare say the truth lies between us. In this connection, the fact should be emphasized that the markets for raw and refined sugar are separate: this is a matter of custom and taste, and I do not assert that they must be separate, but merely that they are so at present. No matter how cheap refined sugar is, the great majority of the people will continue to use *gur*, and will not substitute refined sugar for it. The imports of foreign refined sugar do not therefore immediately threaten our whole home production, but only our home refining industry, leaving the demand for three-fourths or four-fifths of our production unaffected.

III.—STATISTICS OF IMPORTS AND EXPORTS.

20. The statistics of imports and exports for the North-Western Provinces and Oudh are given in Appendix II, which is compiled from figures by the various Railway Administrations, the year running from April to March. The classification of this appendix into "raw" and "refined" sugar is not exactly in accordance either with European or Native usage: the former treats as "refined" only that sugar which has undergone a special refining process; the latter regards all sugar as one class in contradistinction to the "raw" products *gur*, *rab*, and *sirab*. As has just been pointed out, it is essential for the purposes of the present enquiry to distinguish clearly between "sugars" and crude products, since the markets are entirely distinct; and accordingly I have used the terms "raw" and "refined" in this sense. The classification in Appendix II does not altogether agree with this usage, because in it cheap low-grade sugars are occasionally treated as "raw." It has been impossible to obtain figures showing the essential distinction from all the Railways concerned; but the inferences which are drawn later on from the statistics of inland trade are so rough that they will not be very materially affected by the difference. As regards the imports from seaport towns, however, it is of the utmost importance to make the distinction clear, in order to see whether they are threatening only our refining industry or are affecting also the much larger market for "raw" sugar. I have ascertained that, with the exception of an insignificant amount of *gur* received from Calcutta, the whole of the imports from seaport towns classed as "raw" consists of sugar, and consequently competes not with our *gur* market, but with our refining industry. So far, then, there is no sign of any foreign competition in the *gur* market, and I do not expect to see it take place, at least in the immediate future; though it is conceivable that the stress of competition might ultimately drive the Mauritius planters to attack this large market. A palatable *gur* could hardly be made from beet.

21. Transferring, then, the "raw" sugars received from seaport to the head of "Refined sugar," the figures in the appendix may be summarised as follows:

Class of sugar.	Period.	Exports.	Imports.	Net exports.
		Mds.	Mds.	Mds.
Raw sugars	Average of 11 years 1886-87—1896-97	38,85,484	2,11,413	36,74,071
	1897-98.	40,15,723	3,43,442	36,72,281
	Difference ...	+1,30,239	+1,32,029	—1,790
		or 3·4 per cent.	62·5 per cent.	...
Refined sugars ...	Average of 11 years 1886-87—1896-97	4,66,082	91,317	3,74,765
	1897-98.	4,01,186	3,45,344	55,842
	Difference ...	—64,896	+2,54,027	—3,18,932
		or 13·9 per cent.	or 278·2 per cent.	or 85 per cent.

This summary shows the general course of trade in these Provinces and the departures from it in the year 1897-98. As regards "raw" sugar, the Provinces are large exporters, the imports being relatively insignificant, and the net export last year was almost exactly equal to the average. We are exporters on balance of refined sugar also, the average of 11 years being 3,74,765 maunds. But this balance almost disappeared in 1896-97, our exports fell off by 14 per cent, and our imports increased by 278·2 per cent., so that our net exports fell by no less than 85 per cent. It is this sudden rise in imports which has brought the subject into prominence.

22. If we count three maunds of *gur* as equal to one maund of refined sugar, our total net exports in terms of *gur* average about 48 00,000 maunds; or allowing for river traffic (which has not been registered until quite lately and is not included in these figures, but shows a considerable net export), we may put our the exports at about five million maunds or one-seventh of our total production. This estimate is of course very rough, and is given

merely as an illustration of the relative importance of the amount exported to that consumed at home.

23. The next table shows our imports according as they come from other parts of India or other countries; it is calculated on the assumption that whatever we import from seaport towns comes from outside India: the justification of this assumption has been already stated. As to the country of origin, we have no information; but I believe that on the whole rather more than half the total now comes from Germany and Austria, and the balance from Mauritius, these three countries contributing practically the whole supply. Until recent years, I believe Mauritius was almost the sole source, and beet sugar did not appear in any quantity till about 1890. In this table the imports are given for convenience in thousands of maunds:

CLASS OF SUGAR.	Source of imports.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.
Sugars competing with native refined sugar.	Foreign imports ...	51	52	43	32	161	103	42	84	62	116	92	344
	Inland imports ...	66	2	8	18	12	3	7	16	6	2	1	2
Sugar competing with native raw sugars.	Foreign imports ...	...	...	...	...	...	...	...	...	...	...	...	...
	Inland imports ...	280	151	154	216	215	189	219	262	157	236	246	343

From these figures it will be seen that the imports competing with our raw sugar for consumption have on the whole kept very steady: there was a sudden rise in 1897-98, but it was practically covered by a small increase in exports, and was due probably to short stocks in particular localities arising from the deficient home produce in the preceding seasons. Our total imports of refined sugar also kept very constant with the exception of heavy imports in 1890-91. The average for the first five years amounts to about 70,000 maunds, and for the five years ending with 1896-97 to 80,000 maunds. During this period, however, sugar made abroad had entirely displaced sugar made in other parts of India, so that our whole imports are now derived from foreign countries. In 1897-98 these imports more than trebled, and the amount imported in that year represents rather more than one million maunds of raw sugar: that is to say, if no sugar had been imported, we should have had to increase our cane area by from 35,000 to 40,000 acres to supply consumption.

24. In order to bring the information as much to date as is possible, I give below a table showing the imports and exports for the six months, April to September 1898, compared with the same period in the preceding year. The foreign "raw" imports have been transferred to the head "refined":

	Whence exported or to where exported.	EXPORTS.		IMPORTS.		NET.		REMARKS.
		1897.	1898.	1897.	1898.	1897.	1898.	
		Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	
Refined sugar	Seaports	1,790	4,632	1,59,044	1,65,710	1,57,254	1,61,078	Net import.
	Rest of India ...	1,65,243	3,36,069	878	1,538	1,64,365	3,34,531	Net export.
	Total ...	1,67,033	3,40,701	1,59,922	1,67,248	7,111	1,73,453	Ditto.
Raw sugar ...	Seaports ...	3,517	5,854	...	...	3,517	5,854	Net export.
	Rest of India ...	10,79,123	13,74,608	1,13,302	1,09,985	9,65,821	12,64,633	Ditto.
	Total ..	10,82,640	13,80,462	1,13,302	1,09,985	9,69,338	12,70,477	

It will be seen that the imports of refined sugars from places outside India show a further rise from the abnormal figures of 1897, the rise in the six months amounting to over 4 per cent. Our exports, both raw and refined, were also increasing; we had more raw sugar to export owing to a good crop, and the increase in refined is due, I believe, to some dealers' stocks being forced on the market. But no inferences can be drawn from the

figures of such a short period except that the foreign imports show no signs of diminishing.

25. The explanation of the great expansion in imports of foreign sugar is for two reasons outside the scope of this memorandum. In the first place, I have not been asked for it; and in the second place, no adequate explanation of a phenomenon affecting the whole country can be drawn from the affairs of a single province. I have seen the following theories advanced to account for the rise: (1) unloading on the Indian market of bounty-fed sugar unsaleable elsewhere; (2) an abnormally good crop of beet flooding the European market; (3) and unexpectedly good crop of Mauritius sugar after arrangements had been made to supply the expected deficit by imports of beet; (4) the effects of the alteration in the currency law; (5) a short home outturn of sugar due to famine.

As regards the first three theories, I have nothing to say except that they are each relevant to the facts observed in these Provinces. The discussion of the fourth is obviously impossible in this memorandum. As regards the fifth, I have shown that in 1896-97 and 1897-98 the outturn of home-grown sugar was considerably short of the normal, and despite the reduction in consumption attributable to the famine, it is probable that some local imports were necessary to supply the defect.

26. In the absence of full knowledge of the foreign and colonial markets, I do not express my adherence to any of these theories. It seems not improbable that more than one of the causes enumerated—possibly all of them—have contributed to the result; but it is really immaterial what theory is adopted, for the important question for these Provinces is whether the foreign producers can continue to lay down sugar in our markets at the prices now ruling. What I have to say on this question will be found in section VIII.

IV.—THE PRICES OF HOME AND FOREIGN SUGARS.

27. It is very difficult to give any trustworthy figures comparing the prices of home and foreign sugar. The quality of the home sugars varies within very wide limits, and it requires expert knowledge to pronounce that any particular sample of home sugar is of the same grade as the imported stuff. The following table gives the best figures I have been able to obtain: it shows the wholesale prices (lowest and highest) ruling in the Cawnpore market in January of each year for two well-known kinds of home sugar and for such imported sugar as was being offered in the market. The prices are in rupees per maund of 48½ seers, the weight in which business is always transacted. The figures have been obtained from *The Merchant*, a weekly commercial paper published at Cawnpore:

Description of sugar.	1893.	1894.	1895.	1896.	Average, 1893-96.	December 1898.
Dhoba Azamgarh	11·8 to 12·0	13·0 to 14·0	11·0 to 12·0	11·8 to 13·0	11·12 to 12·12	11·0 to 11·4
Shahjehanpur *desi*	10·8 to 11·0	13·0 to 14·0	12·0 to 13·8	12·8 to 13·0	12·0 to 12·14	10·0 to 11·12
"Bombay" sugar	14·0 to 14·8	14·0 to 15·0	12·0 to 13·2	12·0 to 13·0	13·0 to 13·14½	...
Mauritius sugar	...	...	...	...	...	10·0 to 10·2
Beet sugar	...	...	...	...	...	10·2 to 11·4

The first two sugars in this table are made in these Provinces, and are representative respectively of the standard manufacture of the Eastern districts and the Rohilkhand Division. It will be seen that the prices now are materially lower than on the average of the years from 1893 to 1896.

28. During the years 1893-96 beet sugar does not appear in the quotations, and the only foreign sugar quoted is that called "Bombay" sugar. This was, I understand, cane-sugar imported from Mauritius. The drop in Mauritius sugar is then very marked, amounting to about 25 per cent. The foreign sugars, both cane and beet, were selling in December as low as the inferior qualities of home sugar for which quotations are given.

29. The next table shows the prices of three varieties of home-made sugar: the figures have been obtained from a merchant on whose accuracy I can rely:—

Description of sugar.	Prices per maund (48½ seers).				
	In 1894-95.	In 1895-95.	In 1896-97.	In 1897-98.	In 1898-99.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs A. P.
Shahjehanpur *khand*—					
No. I	13 8 0	13 8 0	12 12 0	12 8 0	12 0 0
No. II	13 0 0	13 0 0	12 8 0	12 0 0	11 8 0
No. III	12 0 0	12 0 0	11 0 0	10 0 0	10 8 0
Phulpur *pakki chini*—					
No. I	13 0 0	12 12 0 and 13 4 0	12 5 0	12 2 0	11 8 0
No. II	12 0 0	12 0 0	11 4 0	11 4 0	11 0 0
No. III	11 8 0	11 8 0	10 8 0	10 4 0	10 0 0 and 9 0 0
Shahganj *pakki chini*—					
No. I	12 8 0	12 12 0	12 0 0	11 12 0	11 8 0
No. II	12 0 0	12 0 0	11 0 0	11 0 0	11 0 0
No. III	11 8 0	11 8 0	10 8 0	10 4 0	10 0 0 and 9 0 0

The Shahjehanpur *khand* is typical of the produce of Rohilkhand; the *pakki chini* of Phulpur and Shahganj is representative of the manufacture of the Benares and Gorakhpur Divisions. Here, too, it will be seen that the prices show a great falling-off, and that all except the very poorest classes are undersold by beet sugar.

30. Other figures could be given, but I consider these sufficient as the wholesale trade of the Provinces is practically one market, and prices vary little in different localities. So far as I can judge, the manufacturer last year received from 10 to 12 per cent. less for his sugar than he was accustomed to.

31. As to retail prices, I can give no figures for the foreign sugars, mainly for the reason that their use is largely clandestine, as will be explained in the next section. It is too early in the season to say how prices will vary this year.

32. Before leaving the subject of prices, it may be of interest to give the London prices of the beet sugar. In the following figures, the prices are per cwt.:—

Description.	January 1893.	July 1893.	January 1894.	July 1894.	January 1895.	July 1895.	January 1896.	July 1895.	January 1897.	July 1897.	January 1898.	July 1898.
	s. d.	*s. d.*	*s. d.*	*s. d.*	*s. d.*	*s. d.*	*s. d.*	*s. d.*	*s. d.*	*s. d.*	*s. d.*	*s. d.*
Beet-root—												
German, 75 per cent.	12 0	16 0	10 3	9 9	6 4	7 6	8 6	8 0	7 6	6 9	7 6	7 6
Beet-root—												
German, 88 per cent.	14 5	18 7	12 3	12 3	8 6	9 6	11 0	10 0	9 4	8 6	9 4	9 3

It will be seen that prices were very low at the time when the large imports into these Provinces commenced: they had been as low for a short period in 1895, when, however, exchange was much lower than has lately been the case.

V.—THE EXTENT TO WHICH IMPORTED SUGARS ARE OCCUPYING THE MARKETS OF THESE PROVINCES.

33. The following quotation from a note by Saiyad Muhammad Hadi, M.R.A.C., the Assistant Director of this Department, will show clearly the extent to which imported sugars are occupying the markets of these Provinces:—

"*Khandsaris* (*i.e.*, native manufacturers of sugar) and such cultivators as usually convert their *gur* or *rab* into refined sugar in their own little refineries generally complain of harm being done to their trade by the free import and rapidly-increasing consumption of imported refined sugars in the country.

"I have not come across a single *khandsari* who could distinguish the beet sugar from the imported cane-sugar, and neither the *khandsaris* nor the native wholesale dealers know the difference between these two kinds of imported sugars. In the Eastern districts and Oudh all imported refined sugars go under the name of '*Moris-ki-shakkar*,' which is obviously a corruption of the term 'Mauritius sugar'. In all other places including Cawnpore, which is the chief centre of trade in foreign sugars, the two kinds of sugar are popularly known as '*Bambai-ki-shakkar*', or the 'Bombay sugar'. Indeed I have failed in inducing even the Cawnpore dealers who import beet sugar in considerable quantities to believe that sugar could be manufactured from beet, and that the article they were selling was really sugar extracted from beet-root.

"It is also a fact that imported cane-sugar (refined) is being largely sold and consumed along with beet sugar. As no distinction can be made by dealers or consumers, between the two kinds of foreign sugar, the harm alleged to have been done to the trade in native refined sugar is not attributed merely to the advent of beet sugar, but to that of imported sugars in general.

"Generally speaking, the common cultivator who produces and sells raw sugar is not aware of the injurious effects on the native sugar trade of the increasing imports of beet sugar. Prejudice against all refined sugars (not *chini*, *i.e.*, ordinary native refined sugar) including Rosa and Kashipur exists to a certain extent, both among Muhammadans and Hindus. The former use them more freely than the latter; but if they were absolutely certain that bone-black is used for refining these sugars, they would certainly abstain from consuming them. There is, however, no inquisitive tendency among the Muhammadans in this particular, and they therefore use the foreign refined sugar without any scruples. Among the Hindus some societies have been formed in smaller towns, such as Bareilly, Shahjehanpur, and Partabgarh, which have altogether prohibited their co-religionists from making use of these sugars, and in these places the *halwais* (*i.e.*, confectioners) have been compelled, under the penalty of permanently losing their Hindu customers, not to introduce these sugars in the manufacture of sweetmeats. In the larger cities of the North-Western Provinces and Oudh the use, so far, of the foreign refined sugars in the Hindu kitchen or for the preparation of sweet drinks is insignificant. Such sugars are used to a very considerable extent by *halwais* in preparing sweetmeats. In Meerut, Lucknow, Agra, and Cawnpore at least 60 per cent. of the sugar used by the confectioner is of foreign origin. Jams, preserves, electuaries, and fruit syrups are now made chiefly with foreign sugars in all large towns. In Benares, which is an important religious centre of Hindus, a few *halwais* abstain from using foreign sugars, and others pretend to do so in order to please their customers, although in reality they secretly make use of the imported sugars which impart a superior appearance to the sweets they make. Foreign sugars are not used by Hindus or by *halwais* in villages, but they are used by Muhammadans.

"I was most astonishingly struck this year with the extent to which the foreign sugars appeared to me to have taken the place of *chini* for making *sarbat* in the Muharram festival in several small localities.

"Foreign refined sugars are not uncommonly used by *halwais* for 'adulterating' (improving) inferior native sugars and furnish them with a source of practising fraud. A *halwai*, for example, buys second class *kachchi chini* and mixes it, say, with equal weight of powdered Bombay sugar. The mixture looks equal or superior to the ordinary first grade native *chini*. He sells the mixture easily at a high price to people who abstain from the Bombay sugar.

"*Misri* (*i.e.*, a native refined sugar distinguished by the size of its crystals) is similarly prepared with 'Bombay sugar' and exposed for sale as 'native *misri*', which is a far more expensive article. In Cawnpore the *halwais* have begun to manufacture *bura* (*i.e.*, another form of native refined sugar) from foreign sugar, and the *bura* thus prepared is of course very superior in quality.

"So long as the foreign sugars sell at their present price, it is almost impossible to prevent the *halwai* from using them, because (1) he saves the time, trouble, and expense of clarifying (native sugars are always clarified before being used in sweetmeats); (2) the sweetmeats made with foreign sugars are very fascinating in general appearance.

"Foreign sugars are undoubtedly deficient in respect of sweetness as compared with native sugars. One-and-a-quarter seer of 'Bombay sugar' would impart the same degree of sweetness to rice cooked with it as one seer of *chini*. This is, however, an advantage to the *halwai* in one way, because in making sweetmeats with *khoya* (*i.e.*, milk coagulated by boiling), such as *pera* and *barfi*, he can put more of 'Bombay sugar' and less of *khoya* without making them too sweet, than if he were to use *chini* as the sweetening agent: and *khoya* is twice as dear as sugar."

34. These remarks—the result of an exhaustive enquiry—show that imported sugars have succeeded in getting a footing in our markets despite the obstacles presented by the prejudices of the people. Since these remarks were written it has been ascertained that beet sugar is sold regularly in many smaller towns, such as Budaun, Bara Banki, Jaunpur, Partabgarh, Rae Bareli, and Kasganj; it is not therefore only the larger towns that are affected, but practically the whole market of the Provinces.

35. It will be seen that the prejudice against the use of bone-black in refining is not sufficient to prevent the consumption of foreign sugars in forms where the foreign origin is concealed. Nor can even the modified protection which exists at present be counted on in the future. Bone-black or animal charcoal is, so far as I am aware, still used for refining purposes in all the Continental works; but it is a troublesome and expensive material, and efforts have for some time past been made to devise a substitute. These efforts are likely

to be successful; in fact, I learn from a hand-book on the industry, published in Paris last year, that it is confidently anticipated that the use of bone-black will shortly be superseded by a new chemical process in which the purifying agent is hydrogen peroxide—a preparation to the use of which no prejudice can attach.

36. It is a somewhat striking fact that the existing prejudice has fastened exclusively on the use of the bone-black; for in making beet sugar it is usual to clarify by the use of bullocks' blood—a process which might be expected to give rise to even greater prejudice in the eyes of Hindus. However, in no case is it to be expected that the native refiner will receive permanent material protection from religious prejudices.

VI.—THE PROFITS OF CULTIVATION.

37. Before considering the effect of foreign imports of sugar on the profits of cultivating the cane, it is necessary to get some idea of the cultivators' profits. This is a very difficult matter, and the figures which I give below cannot, from the nature of the case, be more than a rough average estimate:—

DIVISION.	Average acreage under cane.	Average profit per acre, with *gur* at Rs 3-4-0 per maund.	Total profit.
	Acres.	Rs. A. P.	Rs.
Meerut	253,831	30 0 0	76,14,930
Agra	59,091	7 0 0	4,13,637
Rohilkhand	301,422	20 0 0	60,28,440
Allahabad	34,374	16 0 0	5,49,984
Benares	156,761	15 0 0	23,51,415
Gorakhpur	197,394	12 0 0	23,68,728
Kumaun	4,958	19 0 0	94,202
Lucknow	128,603	18 0 0	23,14,854
Fyzabad	133,726	18 0 0	24,07,068
Total, N.-W. Provinces and Oudh ...	1,270,160	...	2,41,43,258

The average profit per acre has been calculated on the following basis. The outturn is taken in terms of *gur* at the amount given in section II of this memorandum, and the *gur* is valued at Rs. 3-4-0 per maund. From the income thus calculated are deducted the outgoings for seed, rent, cultivation, and boiling, the average cost of which items has been from time to time determined by this Department. The balance is the profit per acre. On these figures it may be said that the cash profit made by cultivators in the Provinces is something over two crores of rupees in an ordinary year. The crop is of most importance in Meerut and Rohilkhand, and after them in Oudh, Benares, and Gorakhpur. Its value in Agra and Allahabad is comparatively little. The figures for the Kumaun Division are very small, because the cane can be grown only in a small portion of the Naini Tal District: in this small area its importance is great.

38. The extraordinary divergence in the rate of profit will no doubt attract attention: the high figure for Meerut and the low figure for Benares, Gorakhpur, and Agra are such as to give pause to the statistician; and I have ventured to give them only after a long and careful examination of the foundations on which they rest. The high figure for Meerut is due to a combination of various causes, among which may be mentioned the large output resulting from good soil and good cultivation, the cheapness of irrigation, and the low cost of cultivation arising from the superior implements and cattle in use The low rate of profit in the Agra Division is due mainly to the low yield, which (as already remarked) is to be attributed to unsuitable soil and poor varieties of cane. In Benares and Gorakhpur the cost of irrigation is very high and the methods of cultivation are expensive.

39. These estimates assume that all labour is paid for in cash; and no other exact method of calculation is possible. But what makes the crop so profitable to the industrious cultivator is that most of this labour is performed by himself and his family, and his profits are accordingly higher than those just given by the considerable amount thus earned as wages. In addition to this, it must be remembered that work on this crop comes just at times when ordinary field work is slack; an opportunity is thus provided for profitable labour when it would otherwise be wanting.

40. If we assume that the cultivator uses nothing beyond his own labour and capital throughout the whole process, *i. e.*, that he owns the necessary bullocks and implements,

has free use of a well, owns a crushing mill and boiling plant, that he and his family prepare the ground, plant, cultivate, water, pick, clean, crush, and boil without any outside assistance, his profit (including wages) would be increased by from R25 to R60 an acre. This case is perhaps almost as rare in practice as the converse, where he is supposed to hire everything; and the cash return of the crop lies somewhere between the two estimates, differing from cultivator to cultivator and varying over the Provinces from R30 to R90 on the acre. I know of no crop which grown on the same scale would yield such profits, and there is little doubt of the correctness of the general opinion in this matter.

41. It is obvious then that no particular price of raw sugar can be assigned as the limit of profitable cultivation. A fall to R2-8-0 per maund would annihilate the profit of those cultivators who hire all their implements and labour; while some might be content with their earnings (there would be no profit in the strict sense), if they sold their *gur* for half this sum. The price of *gur* at the time of writing shows a marked fall from the figures of the past few years; but it is too early in the season to draw any inference from this fact. All that can be said is that as the price falls the profits of all cultivators will diminish, and that those will be the first to abandon the crop who pay large sums in wages, while those who employ fewest labourers will be able to hold on longest. The probability of a fall in the price of raw sugar will be shown in the two following sections.

VII.—THE PROFITS OF MANUFACTURE.

42. If it is difficult to estimate the profits of the cultivator, it is not more easy to calculate those of the refiner or *khandsari*, who buys raw sugar or cane-juice from the cultivator and converts it into *chini* or *khand* (which are classed as native refined sugar) and *shira* (molasses). The further stages by which the high class sugars (such as *misri*) are produced are really branches of the confectioner's art, and I do not propose to consider them.

43. For the refiner or *khandsari* I am in possession of figures showing the estimated profits in several districts; but such estimates are of necessity highly conjectural, and it will be sufficient to state generally that the profits average about 10 per cent. when prices stand as they did last season, refined sugar being about R9 per maund of 40 seers (or R10-14-0 per maund of 48½ seers), and the raw sugar used in the manufacture at R3, which is equivalent to *gur* at R3-4-0. The profits depend almost entirely on the prices of the raw material and the finished products; for the cost of raw material is about five-sixths of the outlay.

44. On the whole, then, as far as prices show, the native refiner cannot say that his profits per cent. have vanished, though they are not by any means above the ordinary run of profits when it is remembered that they include earnings of the refiner's own work. But the truth seems to be that the prices of home sugar are not true market prices. Much foreign sugar has (as already shown) displaced the home product, and refiners have therefore been unable in many cases to sell their stock. Thus it was found in June last that about four-fifths of the season's produce of refined sugar in Rohilkhand was still on the refiners' hands. They could not dispose of it at the prices ruling, and if they had thrown it on the market they must have depressed prices so far that no profit at all would have been left. Enquiries just made show that a considerable proportion of last year's stock is even now in the refiners' hands, though the new season's work has begun. Some investigations I have lately made in the Etah District show that here, also, some of last year's stocks are still on hand where they have not been got rid of at ruinous prices. Thus the prices I have quoted for native refined sugar are not prices at which the refiners can sell their whole stock, but have been maintained only by holding large stocks off the market. This of course cannot be done indefinitely, and there is no doubt whatever that if foreign sugars continue to be sold at the present prices, a large number of refineries will be closed, and the demand for raw sugar will fall off accordingly.

45. The following facts reported by the Assistant Director show that the ruin of refineries has begun. In Partabgarh three factories out of 32 have been closed, in Benares two out of 55, and in Jaunpur 32 out of 535. In Sultanpur 14 factories have been closed: and in Ghazipur and Gorakhpur 37. That is to say, 120 refineries were closed in the eastern half of the provinces during last season. In Rohilkhand actual closures were not discovered; but a large number of factories were found to be on the verge of ruin.

46. I need not refer here to the evidence given by the income tax returns except to point out that the losses incurred will not affect the assessments of 1898, but only those of 1899, and that the full effect will not be visible in that year.

VIII.—THE POSSIBILITY OF A DECREASE IN THE CULTIVATION OF SUGARCANE.

47. The conclusions arrived at in preceding sections give the necessary material for discussing this the most important subject of this memorandum. We have seen that the foreign imports have so far had a most injurious effect on the business of the native refiner, but that they have not competed directly with the form of sugar in which the larger portion of the local production is consumed.

48. The loss of profits in the refining trade must necessarily tend to reduce the area under the crop. Its action would ordinarily proceed in the following way. Refiners will buy less raw sugar: the lessened demand for raw sugar will cause a fall in its price: the cultivators receiving less money for their produce will get less profit and where their profit is already small, some of them will find the business less profitable than the growth of other crops: they will therefore reduce the area under cane; this process will go on till the produce of the reduced area will not be more than sufficient to meet the reduced demand, when the price of raw sugar will be readjusted at a point lower doubtless, than the former equilibrium—which will yield a profit that the cultivators think adequate. The result of this process will be that where, as until lately, we grew enough cane to supply our markets with raw and refined sugar, we shall, when things have settled down, grow enough to supply our markets with raw sugar and with a much lesser quantity of the refined article.

49. It is obvious that this procses will take some time, and that the full effect on cultivation will not be produced in one or two years; but there is a trade custom which will in some parts of the country materially accelerate the process. It is usual for the *khandsari* (refiner) to give advances to cultivators to meet the heavy cost of growing the cane, the juice when ready being made over to him at a fixed price. Some *khandsaris*, who in any year find their business unprofitable, will probably decrease the amount of their advances, and the decrease in cultivation will begin to appear in the next season.

50. The statement made in paragraph 48, that the loss of profits must necessarily tend to reduce the area under the crop, involves two assumptions deserving of special notice. In the first place, it is assumed that the trade in foreign sugar pays, and will continue to pay, at the prices now prevailing. This assumption is permissible as it appears from the latest returns that the trade continues to expand; but it is at variance to some extent with those theories (enumerated in paragraph 25) which regard the foreign imports as an altogether temporary phenomenon. Without entering on a discussion of these theories, the following facts may be mentioned as indicating that the price of beet sugar in free markets is more likely to fall than to rise:

(1) It is commonly said—and with good reason—that the Continental Powers are more likely to increase bounties than to reduce them, so long as the remaining free markets of the world do not impose countervailing duties.

(2) The United States are beginning to produce beet sugar on a considerable scale. There is an enormous area in the States fit for growing beet, and my latest information is that nine factories are profitably at work and that large capital is being sunk in others. American papers which I have seen look forward to the time when America will export beet sugar after providing for the whole wants of her population; and the Director of the Chemical Division of the United States Agricultural Department wrote in 1897 that "the demand for sugar promises to be the salvation of American agriculture." These forecasts may be too sanguine; but it is obvious that the extension of the industry in the States will affect the price of beet sugar in all markets. It will also directly affect cane sugar, for Mauritius still exports a large quantity to America, and if that market is lost, will probably try to sell more in India, thereby increasing competition.

(3) Efforts are being made to resuscitate the West Indian cane sugar industry by the introduction of the latest machinery and the application of fresh capital: if they succeed, competition will be still further accentuated.

(4) The process of beet sugar manufacture is not yet perfect, and efforts are being constantly made to improve it in various directions. As an instance, I may refer to the possible supersession of the bone-black process, to which reference has already been made. Any fall in the expenses of production due to improved processes must necessarily give the Continental manufacturer an increased advantage in our markets.

On the other side, I know of no cause which is likely to raise the price of foreign sugar, unless such action is taken by the consuming countries as to lead to an abolition of the bounties.

51. The second assumption is that cultivators and manufacturers in these Provinces will not so improve their processes as to enable them to meet foreign competition on more equal terms. This assumption is justified by all the experience of this Department. It is true that improvements are possible in almost every stage of the process; but it is not by any means certain what processes are best suited to the country and the people. Enquiries having some bearing on this matter have been going on for some time; but the accumulation of results is a slow process when the native producers stand aside and leave the whole work to Government Departments. And when improved processes have been devised, their introduction among the people takes a far longer time; so that the trade would be ruined before the new processes could obtain a footing. If by the imposition of countervailing duties time were given for new processes to be worked out and introduced, it is possible that we might so strengthen our position as to be ready ultimately to meet foreign competition even aided by bounties on more equal terms; but with competition already active, and new processes still in embryo, the result cannot be doubtful.

52. Subject then to these assumptions, there is a reasonable degree of certainty that the area under cane must decline. It is difficult to assign any limit to the possible decline. If foreign manufacturers should compete successfully with our production of *gur*, it is possible that the area under sugar-cane would be very materially reduced; but, as I have already said, I do not expect this competition to arise. If, on the other hand, the competition is limited to our refined sugar, the decrease in cultivation may possibly extend to, but cannot exceed, that proportion of the total area which is devoted to the production of sugar for refining. I have already explained that no information can be given at present as to this proportion; the best guess I can give is something between one-fifth and one-fourth of the total, or say 250,000 to 300,000 acres as the limit.

53. Two general propositions may be stated regarding this decrease: it will not occur uniformly in all parts of the Provinces, and its full extent will not be manifest at once. The considerations affecting the distribution of the decrease are as follows:

(1) The decrease will on the whole be greatest where the cash profits are least.

(2) The decrease will on the whole be greater where much of the labour is paid for in cash, and less where the cultivator and his family do most of the work.

(3) The decrease will on the whole be greater where refining is a recognised business than where most of the *gur* is consumed unaltered.

The first and second considerations follow directly from what was said in section VI, regarding the cultivator's profits. It is obvious that when the cultivator comes to decide whether or not he will plant sugar-cane, he will be influenced largely by the profits made by himself or his neighbours during the past year: and these profits depend at any given price of *gur* on what I have called the "cash profits" added to the earnings of the family. When, then, the price of *gur* falls, profits will tend to disappear first where the earnings of the family are relatively small; and where the proportionate earnings of the family are equal in the cases compared, the total profits will vary with the cash profit. The third consideration also is a direct deduction from the circumstances; where refining is practised on a large scale, the cultivators will be affected directly by the refiner's demand for raw sugar, and will quickly feel any decrease in it; on the other hand, where there are few refiners, their demand will not have the same importance, and production of *gur* will be continued to meet the consumer's demand.

54. A decrease, then, in cultivation will be unevenly distributed over the Provinces: the Meerut Division will be least affected, having high profits and comparatively little refining. The Benares Division (including the Azamgrah District) will perhaps suffer most, as profits are low and the refining industry is most important. South Oudh and the Agra and Allahabad Divisions will be rather less affected: and North Oudh and Gorakhpur will suffer comparatively little. It is difficult to say what effect may be expected in Rohilkhand: the refining industry is most important about Bareilly and Shahjehanpur; but, on the other hand, the crop is fairly profitable. Probably, Rohilkhand would show a decrease in cultivation; but it would not be serious. No inference can be drawn as regards any large area from the second consideration: the proportion of home to hired labour does not, so far as I know, vary greatly from district to district, and the consideration becomes important only when attention is given to the danger of decrease in particular villages.

55. As regards the second proposition, it is necessary to consider the effect of (1) village and (2) trade custom. Village custom will tend to retard decline in cultivation; that is to say, where cane cultivation is carried on as a matter of course by many cultivators, they will be slow to change their habits on the result of one or two unprofitable years, but where the cultivation is confined to a few of the more enterprising villagers, there will be less inertia, and falling profits will produce a more rapid effect. The trade custom is that which I have already mentioned of advances given by refiners to meet the cost of culivation. Where it is in force, cultivation should respond rapidly to fluctuations in refiners' profits.

56. Taking the two propositions together, a decrease in cultivation due to foreign competition with refiners would be most marked in the first instance in the Agra, Allahabad, and Benares Divisions and in the district of South Oudh. It would be distinct in Rohilkhand, and would hardly extend to the districts north of the Gogra. The Meerut Division would not be affected for some time, if at all.

57. Having now stated the limits of possible decrease in the Provinces, and the localities where it may be expected to occur, it remains to examine the figures for 1898-99, the consideration of which was postponed in paragraph 12. It may be repeated that this year would in the ordinary course have shown a large rise above the average, and therefore comparison with the average understates decreases and overstates increases. This most important qualification should be borne in mind during the discussion that follows.

58. Leaving out of account six districts for which no figures are available, and the hill districts (Garhwal and Almora) where cane is not grown, the following table compares the area of cane in 1898-99 with the averages of (1) the 10 years 1886-87 to 1895-96; (2) the six years 1890-91 to 1895-96. I have already given my reasons for preferring the short period average; but in the case of several districts it is vitiated by the number of interpolated figures, and it becomes necessary to use the long period average. This course

tends to obscure the effect of the general rise in cultivation between 1886 and 1896, and therefore decreases are again understated and increases overstated:

DISTRICT.	Area in 1898-99.	Average of ten years 1886-87 to 1895-96.	Difference.	Percentage.	Average of six years 1890-91 to 1895-96.	Difference.	Percentage.

(a) Six years' averages vitiated by interpolations.

Out of these 40 districts the area under cane falls below the average in 28, the deficiency amounting to 91,211 acres; the remaining districts show an aggregate increase of 71,212 acres, so that on the whole these 40 districts are just 20,000 acres below the 10 years' average in a year when the area would be expected to rise well above it. These facts suggest that some general cause has been at work to reduce the area under the crop.

59. A glance at the accompanying sketch map shows that the districts with increased cultivation lie in two groups on the north-west and north-east of the Provinces. The first is made up of the Meerut Division (excluding Dehra Dun) with the adjoining districts of Muttra and Bijnor. Bijnor with its small increase (6½ per cent.) occupies an intermediate position between the high increases on the west and the decreases on the south and east. The Muttra figures are very small, and there is probably some special cause there to account for the high percentage of increase The north-east group comprises Gonda, Basti, Gorakhpur, Balia (nominal increase), and Fyzabad; with a small increase (6 per cent.) in Sultanpur, which fits in with no theory. The rest of the Provinces show a considerable decrease, except in the case of Etah where the area is just about normal. I have ascertained that the total cultivated area in this district extended very largely during the year, and much of the cane crop was grown on the recovered fields; but for this fact there would have been a larger decrease.

60. An examination of the map shows that it is not unlike a map showing the incidence of the recent famine: there are the prosperous districts on the north-east and north-west, the general depression over the rest of the Provinces, and the acute depression in Bundelkhund and round Lucknow. Such a resemblance can hardly be accidental, and it suggests that even now the figures show the influence of famine. The last mentioned districts had (to go no further back) no kharif in 1895: a bad rabi in 1897: and a good 1897 kharif: so that when the time came for deciding whether to grow cane, there had been only one good harvest to replenish food stocks, and it is quite conceivable that many cultivators put off growing cane till they should have a better stock of necessaries. There was also some difficulty in getting cuttings for seed, where the area had been very small in the previous year. On the other hand, cultivators probably at that time needed a crop to give a good cash return, and this would have tended to extend the cane area.

61. This, then, is one possible cause for the decrease this year. But it must be noted that the decrease can also be regarded as the result of a decline in refiners' profits, for its distribution is very much what has been predicted a few paragraphs back as the result of that cause. There is a marked increase in Meerut: a small but distinct decline in the Rohilkhand districts for which we have figures: a decline nearly everywhere else except north of the Gogra, and in one or two exceptional districts.

62. There are, then, two possible causes: my opinion is that both of them have contributed to the result; that the very marked decrease in Bundelkhund and in the neighbourhood of Lucknow is due largely to the after effects of the famine, but that a part of the decrease in these localities, and a larger part of it elsewhere, marks the beginning of the decline which is expected on theoretical grounds as the result of increased imports. This, however, is at present an opinion only: the two causes can be tested only by the figures for future years. If the decrease was due to the famine, the recovery in this and the following year should be very marked: if the famine had no effect on the 1898 area, there should be now little or no recovery. My conclusions, therefore, are that a decrease in cultivation is sure to result, and that the process has probably begun, but proof of its existence is not yet complete. A supplementary note will be prepared as soon as the areas for the present year can be ascertained.

IX.—THE RESULTS OF A DECREASE IN CANE CULTIVATION ON THE WELL-BEING OF THE PEOPLE.

63. In order to estimate the effects on the revenue of a decrease in cane cultivation, it is necessary to state its effects on the well-being of the people. I have therefore prepared the following summary of the probable results on the classes of the community who are more particularly concerned.

64 The consumers of refined sugar, *i.e.*, the upper and upper middle classes, will get what they want at a lower price than before. This follows necessarily from the assumption that the decrease in cultivation is due to a fall in price of the refined article. Refined beet sugar is on the whole at least as good an article as the stuff locally manufactured. It is generally said to be deficient in sweetening power, but on the other hand it is much cleaner and purer. The great mass of the people who consume only raw sugar will not benefit.

65. The manufacturers of refined sugar will lose their business. Their specialized capital will be lost, as well as their knowledge and technical skill.

66. The individuals or firms, European and native, who have invested large capital in crushing mills which are let out for hire, will also lose some of their business, and some of their capital will be rendered useless.

67. The cultivator will lose the extra profits which he obtains from the crops; he will lose also an opportunity for the remunerative employment of the labour of his family.

68. The landowner will lose in rent—directly, where he now levies a special rent on the crop, or where its loss leads to a reduction in the rent of land that is specially suited for growing it; indirectly, by the impoverishment of the cultivator, who will be less able to pay his rent in unfavourable seasons.

69. Of all classes it is perhaps the agricultural labourer who will suffer most; for decrease in cane cultivation means a decreased demand for labourers at a time when the demand for other field work is very slack. This must mean that where cultivation falls off extensively the labourers will get work for fewer days in the year than is at present the case, and fewer days' work means fewer days' pay. It is also noticeable that, as I have tried to show in paragraph 41, the chief decrease in cultivation will take place on that land where most hired labour is employed. I would lay special emphasis on this point; for, while manufacturers and land owners can always make their grievances heard, the labourer has no machinery for agitation, and must suffer in silence.

70. It is not altogether irrelevant to point out briefly some effects on the social life of the people which may be produced by a large decline in cane cultivation. There are almost innumerable social and religious customs bound up with the cultivation, the loss of which would appreciably diminish the happiness and brightness of village life; and might under certain circumstances give rise to a feeling of uneasiness or discontent that the mere money loss would be powerless to create. In particular, the mendicant class will be sufferers; for special charities are by custom incumbent on the owner of a good cane crop, and these special charities are among the principal resources of the mendicant community.

X.—THE RESULTS OF A DECREASE IN CULTIVATION ON THE REVENUE.

71. If the cultivation of sugarcane falls off, the land and canal revenue may be affected; while the income tax will be affected by the ruin of the refining industry. There may also be some effect on the excise revenue as the supply of molasses for distilling will fall off, but this need hardly be discussed in detail.

72. First as to the land revenue. Here it is necessary to distinguish between old and new settlments. The former will not be appreciably affected, for though the rent-paying power of the cultivators, and consequently the revenue-paying power of the landowners, will be diminished, the ordinary progress of the country will be found to have so increased the landlords' resources that as a rule they will be able to bear the loss. Special cases may of course occur where the loss of this crop will prove to be the proverbial last straw, and will precipitate the ruin of an embarrassed proprietor; or where a village contains a large area of low lying heavy soil good for cane growing, but unfitted for other crops; but there is no likelihood of any general breakdown of settlements. The loss in such cases will come in when the settlement is revised in the ordinary course: the possible enhancement will be seriously diminished by any marked decrease in the area under cane, but no forecast can be given of the amount that will be lost.

73. Next as regards the more recent settlements. These have been made on the basis of actual rentals, and I believe I am correct in saying that as a rule special crop rents on cane have not formed a large portion of the accepted rental. Where rents are already high, as in parts of Southern Oudh, the loss of the crop may lead to their reduction; but I should not expect this to occur on such a scale as to render any revision of assessment necessary. The real effect will be to diminish the margin which has been left for the landowner, and to impoverish the cultivator: so that there will be greater difficulty in collecting the revenue; and when bad seasons come, the need for remissions and suspensions will be increased.

74. It must, however, be remembered that the Benares Division, which may be expected to show a large proportion of any decrease that occurs, is held under permanent settlement, and there should be little effect on the revenue, disastrous as a decrease would be to the small cultivators who hold so much land under the privileged tenants. Leaving this Division out of account, the risk of loss would appear to be greatest in the southern districts of Oudh.

75. Thus the effect on the land revenue of any such decrease in cultivation as is likely to occur will be mainly indirect. With the income tax the case is different; here the direct loss can be measured by the amount of tax at present paid by the sugar-refiners, diminished by whatever these people may be expected to earn in other occupations. In estimating this offset it must be remembered that the aggregate amount of capital in the trade is considerable, and some of it is specialized in forms which are not available for other purposes, while much is likely to be lost before business is finally abandoned. I do not give the amount of tax paid by the industry as the return in which it is shown is confidential.

76. In order to estimate the loss of canal revenue, the following figures have been calculated from material supplied to me by the Irrigation Department:

Canal.		Average sugar-cane area watered, 1891-94 to 1893-96.	Average rate per acre.	Revenue.	Average rate of rabi irrigation per acre.	Revenue of area in column 2 if watered at rabi rates.
1		2	3	4	5	6
		Acres.		Rs.		Rs.
Ganges Canal ...	...	116,491	6	6,98,946	2·65	3,08,701
Lower Ganges Canal ..	...	23,499	6	1,40,991	2·35	55,223
Eastern Jumna Canal ...	...	49,214	6	2,95,284	2·73	1,34,354
Agra Canal	...	6,187	6	37,122	2·67	16,519
Betwa Canal ...	...	502	6	3,012	2·39	1,200
Dun Canal	...	1,045	6	6,270	2·21	2,309
Rohilkhand Canal ...	..	13,612	2·4	30,627	0·67	9,120
Bijnor Canal... ...	...	2,657	2·4	5,978	0·95	2,524
Total	...	213,207	...	12,18,233	...	5,29,950

The average area of cane irrigated is calculated for three years from the date of enhancement in the rates charged on the larger canals. In these years the average area was 213,207 acres which brought in Rs. 12,18,233 of revenue If this land had been under ordinary crops and had been irrigated in one rabi season out of the two needed for sugar-cane, the revenue would have been Rs. 5,29,950, showing a loss of Rs. 3·2 per acre. If two rabi crops were taken in successive years the income would be Rs. 10,59,900 and the loss per acre about Rs. 0·7. In practice some of the land would yield two rabi crops and some one, so the loss would be something between Re. 1 and Rs 3 an acre, and might be roughly estimated at Rs. 2. As already shown, the decrease in cultivation would affect the Meerut (revenue) Division less than any other part of the Provinces; and as the irrigation from the Eastern Jumna and most of that from the Ganges Canal lies in this Division, the canal-irrigated area under sugar-cane would on the whole fall much less rapidly than the total cane area of the Provinces. The yearly loss, if the crop was entirely discontinued, would be about four lakhs; if cultivation decreased by one-fourth, the loss would be one lakh. I do not think there is any likelihood of its reaching this figure unless the *gur* market be interfered with.

XI.—CONCLUSION.

77. The result of this inquiry, then, is that the imports of foreign sugar threaten the home refining industry, and, through it, one-fourth or one-fifth of our cultivation. It cannot be considered proved that a decline in cultivation has already begun; but there are strong indications that this is the case Should the decline ensue, there will be little direct effect on the revenue; but the economic result to the people, and especially to the labouring classes, will be disastrous, and the impoverishment of the people must react on the revenue. The only classes who would appear to benefit by the change are the confectioners who use foreign sugars clandestinely, and are enabled, if so minded, to cheat their customers; and the upper or upper middle classes who get an advantage so small that probably they scarcely perceive it. It is this distribution of the benefits and the drawbacks that puts these Provinces on an entirely different footing from the United Kingdom, where the benefits of cheap sugar extend to the very poorest classes, and only a few refiners or capitalists suffer. So far as these Provinces are concerned, there could be no practical objection to contervailing duties on all sugars on which a bounty has been given; this would not exclude Mauritius sugars, which alone would not force down prices so as to ruin the refiners. Even though the danger of loss to the country is not so great as some writers have assumed, there is no reason why we should incur any loss at all when there is a remedy at hand the application of which will cause no serious injury to any class of the community.

These remarks, it should be understood, are based on a consideration of the circumstances of these Provinces; possibly there may be some parts of India where cheap sugar is an important gain to the community as a whole; but, so far as I can judge, the economic gain resulting from bounty-fed foreign sugar in these Provinces is infinitesimal, and the economic loss is likely to be widespread and serious.

W. H. MORELAND,

Officiating Director.

APPENDIX I.

Showing the area under sugar-cane cultivation in the Districts of the United Provinces from 1886-87 to 1892-93 in acres.

NOTE.— —indicates net imports. + indicates net exports.

No. 1462, dated 23rd February 1899.

From—J. W. P. MUIR-MACKENZIE, Esq., I.C.S., Secretary to the Government of Bombay, Revenue Department,

To—The Secretary to the Government of India, Department of Revenue and Agriculture.

Letter from the Chamber of Commerce, Bombay, dated 25th November 1898.
Memorandum from the Survey Commissioner and Director of Land Records and Agriculture, No. 3658-A., dated 10th December 1898, and its accompanying report of the Deputy Director of Agriculture, Bombay Presidency, No. 526, dated 5th idem.
Letter from the Chamber of Commerce, Karachi, dated 6th December 1898.
Memorandum from the Commissioner of Customs, Salt, Opium and Abkari, No. 750, dated 12th February 1899, and its accompanying report of the Collector of Land Revenue, Customs and Opium, Bombay.

With reference to your letter No. 15—483, dated 31st October 1898, requesting that the Government of India may be furnished with information as to the effect which the increasing imports of refined sugar from Europe and from Mauritius into India have so far exercised, or are tending to exercise on the market for and the price of Indian sugars, and thereby on the profits of sugar-cane cultivation in India, I am directed to forward copies of the papers, specified in the margin, showing the results of the inquiries made by this Government on the subject.

2. The reports submitted by Messrs. Mollison and Morison show that the importations of European sugars during recent years were altogether abnormal, and that they neither lowered the price of Indian refined sugar consumed in the Bombay Presidency nor checked the cultivation of the cane, or the production of unrefined sugar to which practically the whole of the cane produced in the Presidency is devoted. On the other hand, the production of refined sugar in this Presidency is so far on too insignificant a scale to merit consideration. The two classes of sugar appeal to two very different classes of consumers and are used for more or less totally different purposes.

3. The Chamber of Commerce, Bombay and Karachi, are clearly of opinion that in the interests of trade countervailing duties against European sugar are uncalled for. It should, however, be remembered that the firms which constitute these Chambers are more or less connected with the trade in foreign (including Mauritius) sugar either as shipping owners or agents, or as importers or agents for importers, whilst the trade in Indian sugar, whether Gul, refined or other, is in the hands of Native traders and middlemen.

4. On the whole, His Excellency the Governor in Council is of opinion that neither the commercial nor the agricultural interests of this Presidency are injuriously affected by the increasing imports of refined sugar, or call at present for the imposition of countervailing duties upon that part of the imported sugar, the export of which to this country is aided by bounties.

No. 526, dated 5th December 1898.

From—J. W. MOLLISON, Esq., Deputy Director of Agriculture, Bombay Presidency,

To—The Under Secretary to the Government of Bombay, Revenue Department (through the Survey Commissioner and Director, Land Records and Agriculture, Poona).

In reference to your No. 7340—123-Confidential, dated 16th November 1898, with accompanying papers, I have the honour to submit the following memorandum.

During the ten years ending 1897-98 there have been from year to year considerable variations in the sugar-cane area of the Presidency. The variations are exhibited for each division in tabulated Statement A. In the first year of the decade the total area was most extensive. It dropped suddenly in the following year by nearly 25 per cent. It kept more or less at this standard for four years. It again rose suddenly in 1893-94, increased slightly in the following year, and rapidly declined up to 1897-98. In the Poona District, which is an important one, I believe that there has been a considerable extension of area in 1898-99, and that the total figures for the year 1898-99 for the Presidency when available will show a considerable rise over 1897-98.

In the eleven years up to 1898-99, I estimate that the total areas expanded abnormally in three years, dropped abnormally in one year, and showed only a moderate degree of variation in the other years. I cannot, from personal knowledge or from statistics at hand, show in definite terms the cause or causes of the variations in area. But I think it can be shown conclusively that foreign imports of refined sugar have had no influence in lowering the rates of Gul or on the area under cultivation. Areas have varied from year to year owing to the insufficiency of rainfall or water-supply, or on account of high and low prices for Gul; and in the year of abnormally low area, 1897-98, the reduction was unquestionably due to extended cultivation of irrigated fodder and food-grain crops, consequent upon scarcity induced by famine in the previous year. In the famine year itself the reduction in area was not great, because the crop of that year was mostly planted before famine declared itself. The Deccan crop, which is much the most important one in the Presidency, is planted mostly between November and April. Sugar-cane needs much water, particularly during the hot weather. Cultivators know with certainty, at the time of planting, whether canal or well water is likely to be scant or sufficient during the following hot weather and the sugar-cane area contracts or expands in accordance. If there is prospective deficient water-supply, other irrigated crops, taking four or five months from seed time to harvest, are substituted.

Table B exhibits Presidency imports and exports and the balance of sugar, refined and unrefined, for the ten years ending 1897-98. The balance of imports over exports represents quantities used in the Presidency in addition to indigenous productions. It will be noticed that the balance in the case of refined sugar has risen with a certain degree of steadiness from year to year, and it is important to determine why there should be a steadily increasing demand.

Gul (crude-sugar), as produced in the Bombay Presidency by the native method of boiling, has for native crockery and for cheap sweetmeats a special value of its own and commands especially during the monsoon months retail rates which are often as high, or nearly as high, as the rates of the best refined imported sugars. It would be impossible to produce *profitably* from the Bombay sugar-cane crop refined sugar of superior class, even if treacle or other by-product could be utilized in the most profitable manner possible. Refineries at Poona and Gandivi (Baroda Territory), equipped with all modern appliances, have proved unprofitable undertakings. I dare say numerous reasons might be given for this. A conclusive reason, however, is that with average rates for Gul it is more profitable to make Gul than refined sugar. The indigenous native method of obtaining moist brown sugar from semi-liquid, not fully-boiled, Gul by placing the Gul in large wicker baskets and allowing the treacle to drain away is still followed to a limited extent in the Presidency, but not nearly to the same extent as formerly. The moist sugar, when drained free of treacle, is exposed in the sun and trampled under the feet of coolies to dry it and separate the granules. There is a demand by ultra orthodox Hindus for brown sugar made in this way and the few shopkeepers, who sell it charge higher rates for it than for imported Mauritius sugar of somewhat similar appearance—present rates for brown Mauritius sugar being Rs. 23-8-0 per palla of 120 seers (Poona seer equals 76 tolas), and for Kolhapur sugar Rs. 27 per palla.

The increasing foreign imports of refined sugar in the Bombay Presidency more than meet the diminished local production of moist sugar and the diminished rail imports from other parts of India. The increasing foreign imports of refined sugar, owing to cheapness and perhaps also owing to a higher standard of living of an increased population, find extended use for household purposes and in the production of superior descriptions of sweetmeats. The habit of tea-drinking has extended to villages in out-districts, and there is no doubt that villagers who used sugar on rare occasions formerly now use it much more freely and oftener.

I quote as follows from a note prepared in the office of the Survey Commissioner and sent to me with statistical information :—

" Imported refined sugar is largely used in the manufacture of sweetmeats. All milk sweetmeats, such as *pedhas*, *barphi*, *basundi* and *shrikhand*, are made with refined sugar. Sugared parched-gram, cashew nuts and cardamom-seeds are all made with refined sugar, as also *bundi*, *jilbi*, and other finer kinds of sweetmeats. In all these sweetmeats imported refined Mauritius or beet sugar is used. The Kolhapur brown sugar and the Bengal soft white sugar (known as Benares sugar) have long been driven out of the market by the Mauritius sugars. At present imported beet sugar is preferred to the Mauritius sugar by the manufacturers of sweetmeats for the following reasons and is sold at a slightly dearer rate :

" (*a*) The packing of Mauritius sugar weighs about three seers, while allowance is made only for a seer and a half The packing of beet sugar weighs one seer and allowance is made for that weight.

" (*b*) The beet sugar is brighter in appearance than the Mauritius sugar, and hence there is less loss in preparing *pank* or *bhura* from the former than from the latter.

" In the manufacture of native sweetmeats sugar is hardly used without some preliminary process. It is used either in the form of *pank* or *bhura*. *Pank* is sugar clarified by boiling with water and inspissated. *Bhura* is *pank* dried and powdered with a wooden mallet. On the other hand, beet sugar is not much esteemed by the middle class and rich natives. It is believed to lack sweetness and the blue tinge (or rather iridescence) is not liked. It is believed by the people to be due to the use of indigo in the process of refining. Soft white China sugar, called Dupeta, is much esteemed and it sells dearer by Rs. 3 to Rs. 5 per palla. The Mauritius sugars stand next in their estimation.

" The sweetmeat manufacturers use Gul in the manufacture of inferior kinds of sweetmeats such as *gudhani*, *revdis* and *sabnya*. These sweetmeats command a large sale among poor classes and are hawked about in streets and are kept for sale by every road-side sweetmeat seller. These sweetmeats are also made with sugar to suit more refined taste."

Turning again to table B, it will be seen that the balance of imports over exports in the case of unrefined sugar varies greatly from year to year The Presidency needs in all years more Gul than it produces. If this table is compared with table A which shows variations

in area from year to year, it will be seen at once that in a year of diminished area and of diminished outturn, the deficiency is made good by increased imports—the imports being chiefly railborne from other parts of India. In years of diminished area and diminished outturn in the Presidency, the wholesale rates for Gul rise considerably even at seasons when the markets are over-stocked (the whole produce of a district is sold by the producers in a period of three or four months), and these higher rates no doubt induce imports from other parts of India when such are required.

The wholesale rates got by the producers, especially in the Poona District where the area is large, are generally much less than those at which middlemen or dealers sell to the retail shopkeeper. Within the last three years, I have known Gul at Poona to vary in price from Rs. 10 to Rs. 24 per palla, and within a few days the price often rises or falls Re. 1 or Rs. 2 per palla. These rapid variations are entirely due to speculation and combination amongst middlemen. The producer is forced to sell his Gul daily as he produces it, because he has no means of storage except for small quantities.

Table C exhibits variations in market prices of Gul and of refined sugar at important centres in each month for three years, 1895-96 to 1897-98. Refined sugar is cheapest, of course, in Bombay and for obvious reasons dearest at Karwar. Unless in exceptional instances, there is little or no variation from month to month. The 1897-98 rates are cheapest, but are not much less than those of the other two years.

If the prices quoted for Gul are examined, great variations are apparent. The monsoon month rates are much the highest. This is partly due to difficulties in storage and loss by drainage of treacle. The rates at other seasons vary, because of forced sales by cultivators and over-stocked markets. The diminished area in 1897-98 was responded to by a rise in prices in all districts. The Poona wholesale rates were in 1895-96 and 1896-97 generally unprofitably low, lower than in previous years; and if the low rates had continued, cultivation would have permanently decreased, because canal irrigation is more costly and manure much dearer than in out-districts.

The inferences that I draw from the variableness of the rates of Gul and the steadiness of rates for imported refined sugar are: that the price of sugar has no effect on the price of Gul, and that foreign imports have yet had no effect on sugar-cane cultivation in the Presidency.

I quote again as follows from the note prepared in the Survey Commissioner's office:

"Gul has a distinct demand; it is considered to have a relish of its own and is on that account used in certain dishes. It is also believed to be sweeter than sugar and therefore it is cheaper to use it. It is also cheaper to use in cooking, because it requires a less quantity of ghee. Thus the variation in the price of refined sugar does not materially affect the price of Gul. This is well illustrated by the current prices of the brown Mauritius sugar and Gul. The rate for the former quoted a week ago was Rs. 23½, while that for the latter was Rs. 24 per palla.

"Owing to the cheapening prices of sugar it takes the place of Gul in such dishes as can take both Gul and refined sugar and where refined sugar was not used on account of its high prices; but such displacement of Gul is comparatively small. Cheapening of the prices of refined sugars has extended their use. Such sugared dishes as were beyond the means of poor people are now occasionally enjoyed by them."

Statistical information for Sind similar to that given for the Presidency is shown in tables A (1), B (1), C (1). As far as I can discern, the tabulated figures indicate that the imports of foreign refined sugars have in no way affected the price of Gul, the trade in Gul or the area under sugar-cane cultivation. The sugar-cane area in Sind is small and the province chiefly depends for sugar on imports. The imports of refined sugar are mostly by sea and such have trebled between 1888-89 and 1896-97. Imports of unrefined sugar are chiefly by rail and show only trifling variations during the ten years ending 1897-98. The balance of import over export, *i e.*, the amount retained or used in the province, has in the case of refined and unrefined sugars varied considerably from year to year. The largest amount of refined sugar was retained in 1891-92. In the same year the least amount of unrefined sugar was retained. In 1893-94 the total quantity of refined sugar, imported by sea, was nearly all re-exported by rail. In this year heavy imports of unrefined sugar were mostly retained for use in the Province.

In the three years, 1895-96 to 1897-98, the prices of refined sugar at important centres have, as in the Presidency, remained fairly steady from month to month with a slight tendency towards lower prices in the last year. In the case of unrefined sugar, the rates have, as in the Presidency, been very variable from month to month with a decided tendency to higher rates in the last year.

In paragraph 4 of Government of India Circular letter No. 15—48-3, Department of Revenue and Agriculture, dated 31st October, an estimate is made of the gross outturn of coarse unrefined sugar for India. The outturn is put at one ton per acre and the value at Rs. 100 per ton. This is an under-estimate for the Bombay crop, both as regards outturn and value. A very ordinary crop of sugar-canes will yield two tons per acre of crude sugar, and that yield is considerably under average for this Presidency. Probably 3 tons per acre would be nearer the mark. A portion, however, of the Bombay crop is used for raw eating and not made into Gul. It should, I think, be noted that if Gul is worth less than Rs. 13

per palla wholesale, or, say, Rs. 120 per ton, crops producing less than 3 tons per acre would not be likely to be profitable in the Presidency, because the costs of cultivation are extremely heavy. Canal water in the Poona District costs Rs. 40 per acre. Irrigation by a lift from wells would be still more costly. The "sets" planted are worth Rs. 40 or 50 per acre. The item for manure is heaviest of all. A profitable application in the Poona District costs Rs. 150 or more per acre, but where available in out-districts would cost much less. The cost of tillage, harvesting and Gul-making will, in any district, exceed Rs. 100 per acre.

In concluding this memorandum, I think, I ought to refer incidentally to the results of experiments in sugar-cane cultivation, directed by the Agricultural Department, Bombay. These are fully described in Agricultural Ledger No. 8 of 1898. The most important conclusions arrived at from these experiments are :

(*a*) That there are superior and inferior varieties of cane in general cultivation, and that under suitable condition the superior varities might replace the inferior varieties, thereby increasing outturn without enhancing cost.

(*b*) That certain manures which are indigenous and within the means and reach of ordinary cultivators can be more profitably employed than those in ordinary use. Such can be used as substitutes or as auxiliary supplies, in either case increasing outturn and reducing cost.

(*c*) That the three-roller iron mill made by native firms in Poona is not only a labour saving machine, as compared with other mills still extensively used, but is much more effective at work. On comparison with the time-honoured wooden mill the extraordinary fact was disclosed that the wooden mill left unexpressed juice, which the Poona mill could express, sufficient to yield 2,000 lbs. per acre of Gul in the case of a good crop.

(*d*) The experiments and enquiry further proved that superior methods of cultivation could in many places be adopted, that common methods of sugar-boiling can be improved and that the Gujarat method of storing Gul in earthenware pots should be more general, thus enabling Gul to be stored without loss by drainage or otherwise and thus equalizing rates at all seasons.

I believe that the general application of the improvements suggested under (*a*), (*b*), (*c*), (*d*) would do more to advance the profitable cultivation of cane in India than any protection which a tax on imported sugar could afford.

No. 3659-A., dated 10th December 1898.

Endorsed by the Acting Survey Commissioner and Director, Land Records and Agriculture, Poona.

Forwarded with compliments with reference to Government Memorandum No. 7341—124-Confl., dated 16th ultimo.

2. The undersigned begs to express his general concurrence in the main results, and to intimate that the report required by Government Resolution No. 7422, dated 19th idem, will be submitted when the information called for is received.

A.

Dated 25th November 1898.

From—F. N PATON, Esq., Secretary, Chamber of Commerce, Bombay,

To—The Secretary to the Government of Bombay, Revenue Department.

I am directed by the Committee of the Bombay Chamber of Commerce to acknowledge the receipt of your letter No. 7423, dated 19th—22nd November 1898, relating to the effect of increasing imports of refined sugar on the market for, and the price of, Indian sugars.

The question has been considered in Committee; but the members are unanimously of opinion that while it is evident that the extensive importation of exceptionally cheap sugar must tend to lower the price obtained for all other sugars, the importation of refined sugar from Mauritius and from countries in which bounties are given operates principally to supply deficiencies in local production, and does not to any serious extent affect the prices paid by the mass of the people for the unrefined sugar principally used by them.

No. 269, dated 6th December 1898.

From—C. H. CHETHAM, Esq., Secretary, Chamber of Commerce, Karachi,

To—The Under-Secretary to the Government of Bombay, Revenue Department.

I have the honour by direction of the Managing Committee to acknowledge receipt of your letter No. 7423, dated 19th November 1898, forwarding, for the opinion of the Chamber, a copy of a Circular letter from the Secretary to the Government of India, Department of Revenue and Agriculture, No. 15—48-3, dated 31st October 1898, on the subject of the effect of increasing imports of refined sugar on the market for, and the price of, Indian sugars. I am directed to inform you thereon that Committee are of opinion that restrictions on the importation of beet sugar are not called for for the following reasons:—

(a) That it is not shown that the extent of the sugar industry in India has suffered in any way.

(b) That in the opinion of the Committee, the increase in the import of beet sugar is largely due to an increased consumption of sugar by the natives of India.

(c) As very little cane sugar is grown in this province, the Committee have had no opportunity of ascertaining the effect of imported sugar on the working of sugar plantations.

(d) The Committee are of opinion that the imposition of a duty on a cheap and wholesome food commodity so largely used would be a retrograde step.

No. 750, dated 12th February 1899.

Memo. from—J. POLLEN, Esq., Acting Commissioner of Customs, Salt, Opium and Abkari, Bombay,

To—The Under-Secretary to the Government of Bombay, Revenue Department.

In submitting Mr. Morison's note with reference to Government Resolution No. 7422, dated the 19th November 1898, the Acting Commissioner would add that he has himself made further enquiries and finds that the Bengal or Benares sugar (which now sells in the Bombay market at the rate of Rs. 24 for six maunds, *i.e.*, about 16 per cwt.) is, and has been, so very little used that it hardly deserves to be taken into consideration for purposes of market comparison with Mauritius or other refined foreign sugars. This particular kind of Bengal sugar is not always easily obtained and is, the Commissioner understands, used only on important ceremonial or religious occasions by strictly orthodox, or specially scrupulous persons who dread even the suspicion of the presence of bone-dust or other contaminating substance in the semi-sacred article.

2. In the first paragraph of his memorandum the Collector states that he has taken Bengal No. 1 as the sample, because there is practically no production of refined sugar in this Presidency, and later on (in paragraph 6) he says that it is not believed that recent foreign imports are affecting the local production of refined sugar in this Presidency. It is clear that no foreign imports can affect a thing that is practically non-existent, but what Mr. Morison probably means is that recent imports have not affected the efforts being made to produce refined sugar at Poona.

3. The sugar made at Poona seems to be able in its small way to hold its own against the imported article even at the present low prices of the latter, and the Poona manufacturer asserts that, if he were not prevented by Abkari Administrative precautions from using the waste or non-crystallizable matter of his mill in making rum, etc., he could undersell foreign refined sugar even if reduced to still lower prices per cwt. than at present.

4. It would seem, however, that owing to the extent to which jagri (unrefined sugar) is used by villagers and others, there is not very much up-country demand for the refined article—home-made or foreign. It is said that three-fourths of the Indian sugar produced in India is consumed as raw sugar.

5. Taking everything into consideration, the conclusions Mr. Morison has arrived at are, the Commissioner considers, sound. It is the Mauritius sugar that is holding the market against the continental bounty-fed product, and there is nothing whatever to show or lead to the belief that continental sugars, bounty-fed or otherwise, are threatening the sugar cultivation of this Presidency with extinction.

6. While the bulk of the people persist in using jagri, *i.e.*, raw or unrefined sugar, the cultivation of sugarcane in India will continue to flourish, and Mauritius and Continental sugars may be allowed to continue the fight for the possession of the refined sugar market without injuriously affecting the interest of the Indian cultivation in any way. And, after all, the interests of the ryot are the interests that it is chiefly desirable to safeguard. The town-population can take care of itself.

7. In conclusion it may be noted that a large quantity of unrefined Indian sugar finds its way annually to the United Kingdom, and attention might also be drawn to the fact that Government Revenue benefits to the extent of Rs 19,00,000 a year as customs duty on imported sugars.

Mr. Morison's note on the effect of the increasing imports of foreign sugar on the market for, and price of, Indian sugar.

1. The first point to be noted is that, in spite of the increased imports of foreign sugar, there has been no fall in the price of Indian *refined* sugar. The following statement shows, for the last ten years, the total imports of sugar into India, and the average prices during each year, of Indian and foreign refined sugar:—

Year.	Amount of sugar imported.	Average market price per cwt.	
		Bengal No. 1.	Mauritius No. 1.

Bengal No. 1 is taken as the sample of Indian refined sugar, as there is practically no production of refined sugar in this Presidency It is not possible to give the variations in the price of *unrefined* sugar, there are so many local varieties and there are no reliable statistics in this office to draw upon for the purpose.

2. The statement shows that, instead of falling, the price of Indian *refined* sugar shows a tendency to rise, having been higher in 1898 (the year of heaviest imports of foreign sugar) than at any other time during the last ten years. The fact seems to be that the large imports of sugar from the continent in 1898, while lowering the price of Mauritius sugar, have not made any appreciable difference in the demand for Indian refined sugar, but that for the last 25 years foreign sugar (especially from Mauritius) has been gradually supplanting Indian refined sugar, and that the heavy imports of last year will not create any new conditions of things, but merely continue what has been going on for long.

3. The heavy imports of German, Austro-Hungarian sugars during the past two years seem to be due to exceptional circumstances of a more or less temporary nature. The beet crop of 1896-97 was very full and the price of the raw material the lowest on record. The recent Dingley Tariff in America put some restrictions on the import of continental sugar into the United States. Then there was the fear, which was ultimately not fully confirmed, of the Mauritius crop of 1897 being a poor one; this led merchants in Bombay to indent largely for European sugar and tempted German and Austro-Hungarian merchants to consign large quantities to India in the hope of realising good prices. The drought of 1896 in India had also no doubt caused fears of small local production, which would lead merchants to indent for sugar from abroad.

4. From a consideration of these circumstances, it does not seem probable that the abnormal imports of 1898 will continue. Shipments seem bound to fall considerably as these exceptional causes are removed, and it will probably be found that Mauritius sugar, which has taken the place of Indian sugar in Bombay for the last 25 years, will keep out Continental sugar to a great extent. It is better in quality and is not likely to give way to these latter, unless there is a much larger difference in price in favour of the Continental sugars. As a matter of fact, there has been no forward business done in European sugar for the last three months, whereas large shipments of Mauritius have already commenced to arrive.

5. These large imports of cheap sugars, first from Mauritius and now from Europe also, are doubtless creating a large demand for refined sugar, especially in towns. Large classes of people, such as ordinary mill-hands and other operatives in Bombay, who a few years ago seldom indulged in sugar except as a luxury on rare occasions, now use it in tea and coffee daily, and doubtless the same is the case in towns up-country. The old religious prejudice against foreign sugar is dying away; it is still, however, strong enough to continue a considerable demand for the dearer Indian refined sugar.

6. Though the information available on the subject in this office is limited, it is not believed that these recent foreign imports are affecting the local production of refined sugar in this Presidency. As stated above, Mauritius sugar has for many years almost entirely supplied the Bombay market, and the production of refined sugar in this Presidency has never been large. The experiments made at Poona in 1894-95, though apparently giving satisfactory results, do not appear to have resulted in any practical effort being made in the direction of increased production. It is also a fact that many of the Bengal Sugar Manufacturing Companies have not paid dividends for the last 3 years, *i.e.*, from before the heavy imports from the continent began.

7. How far these cheap foreign sugars will take the place of Indian *unrefined* sugar, there is nothing in the trade records on the conditions of the people of Bombay to show. But the fact that the imports from Mauritius have been going on increasing for several years seems to show that India does not possess special advantages for the cultivation of sugarcane or the manufacture of sugar, and that the apprehended falling off in sugar cultivation, if it does actually take place, would relieve capital which could find other more profitable employment, while the rivalry between Mauritius and the continent will cheapen sugar for the Indian consumer besides bringing in a considerable revenue to Government. The usual arguments in favour of free trade, which need not be repeated here, appear to apply with great force to the present case, and the imposition of any countervailing duty, or other restrictions on the import of sugar, would in the undersigned's opinion, be a mistake. The great rise in the sugar imports in 1898 may be a reason to make a searching enquiry into the causes which have operated adversely against the growth of the Indian industry during the past 30 years, but would not warrant the imposition of an artificial restraint on the importation of these cheap Continental sugars.

No. 97 Agri.—714 R., dated 23rd February 1899.

From—F. MONAHAN, Esq., Officiating Secretary to the Chief Commissioner of Assam,

To—The Secretary to the Government of India, Department of Revenue and Agriculture.

With reference to the Revenue and Agriculture Department Circular No. 15—48-3, dated the 31st October 1898, regarding the effect of the increasing imports of refined sugar on the market for, and price of, Indian sugars and thereby on the profits of sugarcane cultivation, I am directed to submit, for the information of the Government of India, copy of a letter No. 537, dated the 21st February 1899, and enclosures, from the Officiating Director, Department of Land Records and Agriculture, Assam, communicating the result of his enquiries on the subject. It will be seen that the area under sugarcane in the Brahmaputra Valley has remained stationary in recent years, while in the Surma Valley it is believed to have decreased considerably, and that these results are attributed partly to the increased importation of refined and unrefined sugar from Bengal. It is not known, however, what proportion of the refined sugar imported from Bengal is the produce of foreign countries. The Chief Commissioner does not apprehend any falling off of land-revenue in consequence of the abandonment of sugarcane cultivation in this province.

No. 537, dated 21st February 1899.

From— L. J. KERSHAW, Esq., Officiating Director, Department of Land Records and Agriculture, Assam,

To—The Secretary to the Chief Commissioner, Assam.

In reply to your Memorandum No. 405 Agri.—5522 R., dated the 29th November 1898, on the subject of the effect of increasing imports of refined sugar on the market for, and

price of, Indian sugars, and thereby on the profits of sugar-cane cultivation, I have the honour to state that the only answer to the questions raised by the Government of India can be ascertained from an examination of two statements which I append—the first showing for the past 17 years for each plains district of the province the area under sugar-cane, and the second showing for the same period the annual imports of sugar (refined and unrefined) into the Surma and Brahmaputra Valleys. The exports of sugar from Assam are insignificant and may be excluded from consideration.

Although a comparison of the figures of 1881-82 with those of 1897-98 would seem to justify certain conclusions, the absence of anything like a gradual increase from year to year render the accuracy of these conclusions open to some doubt.

2. While in the Brahmaputra Valley, the area under cane has not only not expanded, but exhibits of late years a tendency, though not a marked tendency, to contract the imports of sugar, both refined and unrefined, have risen enormously since 1881-82. In that year 11,564 maunds of refined and 28,849 maunds of unrefined sugar were imported as against 37,705 maunds of refined and 47,556 of unrefined sugar in 1897 and 1898. During the past few years, however, the imports of refined sugar have remained fairly constant at (in round numbers) 35,000 maunds and of unrefined sugar at roughly half a lakh of maunds and show no marked tendency to increase.

This development (out of all proportions to the increase in population) in the import trade of refined sugar since 1881-82 coupled with the stationary nature of sugar-cane cultivation, forces one to the conclusion that the spread in the use of refined, in place of unrefined, sugar has affected, though perhaps to no very marked extent, the prospects of sugar-cane cultivation in the Province. Unfortunately, our trade statistics afford no information as to what proportion of the refined sugar imported into the Province is foreign, and what Indian and for this reason any answer to the question raised by the Government of India is impossible.

3. Taking the area under cane in the Brahmaputra Valley (including Goalpara) at 20,000 acres and the imports of unrefined sugar at 50,000 maunds, the amount available for consumption (calculating the produce of an acre at 1,500lb.) is roughly 34 million pounds. *The average consumption per head is, therefore, 13 lb. Applying the reverse calculation to the Surma Valley, where the area under cane is unknown, some curious results are obtained.

The imports of unrefined sugar have increased from 79,354 maunds in 1881-82 to 170,584 maunds in 1891-92 and to 237,034 maunds in 1897-98. The population of the Surma Valley was 2¼ millions in 1881, 2½ millions in 1891, and (estimated) 2¾ millions in 1897-98. Assuming that the standard of comfort is the same as in the Assam Valley, the consumption of unrefined sugar in these three years was 29¼ million pounds, 32½ million pounds and 35¾ million pounds, respectively. The imports in these three years were 6½, 13, and 19¼ million pounds respectively. The produce of the valley was, therefore, 22¾ million pounds in 1881-82, 19½ million pounds in 1891-92, and 16½ million pounds in 1897-98.

At 1,600 lb. per acre the acreage under cane was, therefore, roughly 14,000 in 1881-82, 12,000 in 1891-92, and 10,000 in 1897-98.

This startling decrease in the area under cane is not caused by increased imports of refined sugar, but I am given to understand to the spread of blight in the Bombay variety of cane grown in the Surma Valley. The subject has not hitherto attracted any attention, but I will make it my business to enquire more closely into the subject.

4. On the whole, therefore, it appears that since 1881-82 the use of refined sugar has spread considerably among the better class of natives, and has, therefore, as no refineries exist in Assam, displaced to some extent the use of unrefined sugar and injuriously affected the cane cultivation of the Province. In the Brahmaputra Valley sugar-cane cultivation has remained stationary where a considerable expansion to meet the increased demand might have been expected, while the Surma Valley sugar-cane cultivation is decaying chiefly, I believe, owing to the spread of blight, but, partly, there can be no doubt, to the increased use of refined sugar.

The absence of any information, however, as to the source of the refined sugar consumed in Assam renders any anwer to the specific question raised by the Government of India impossible.

No. 62, dated 28th February, 1899.

From—C. H. A. HILL, Esq., Secretary for Berar to the Resident at Hyderabad,

To—The Secretary to the Government of India, DEPARTMENT OF REVENUE AND AGRICULTURE.

I am directed to refer to your Circular No. 15—48-3, dated the 31st October 1898, regarding the effect of increasing imports of refined sugar on the market for, and the price of, Indian sugars, and in reply to forward a copy of the Director of Land Records' report submitted by the Commissioner with his No. 70 dated the 19th February 1899. The report shows that the cultivation of sugarcane and the production of sugar possess no importance in Berar, and that as regards consumption of refined sugar the bounty-fed article imported from Bombay is rapidly displacing the non-protected refined sugar manufactured in the North-Western Provinces.

No. 38, dated 9th January, 1899.

From—The Director of Land Records and Agriculture, Hyderabad Assigned Districts,

To—The Commissioner, Hyderabad Assigned Districts.

I have the honour to acknowledge the receipt of your endorsement No. 8384 of the 7th December 1898, forwarding a copy of Circular No. 15—48-3, dated 31st October 1898, from the Government of India, Department of Revenue and Agriculture, on the subject of the effect which the increasing imports of refined sugar from Europe and from Mauritius into India, have so far exercised or are tending to exercise, on the market for, and the price of, Indian sugars, and thereby on the profits of sugar-cane cultivation in India.

2. The Government of India desire that inquiry should be made as to the effect of the competition of imported sugars on—

(*a*) the cultivation of sugar-cane,

(*b*) the profits of such cultivation, and

(*c*) the profits of the sugar industry; and further,

(*d*) the possibility of any falling-off in the land or canal revenues in consequence of the abandonment of sugar-cane cultivation.

3. Before dealing with these points in detail it is necessary to examine the statistics of our trade in sugar. Tables A and B attached to this letter show, respectively, the extent of our imports and exports of refined and unrefined sugar, during the last five years. Our chief trade in sugar is with Bombay, the North-West Provinces and Bombay Port; the items for the remainder of the Provinces included in the tables are so small that they may be left out of account. Our refined sugar comes almost entirely from the North-West Provinces and Bombay Port; the average annual import from the former being 20,575 maunds, against 72,416 maunds, from Bombay Port. It is evident that the latter is the imported article, the refined sugar of the North-West Provinces being locally manufactured. As far then as Berar is concerned the competition to supply our wants in refined sugar is between the indigenous article of the North-West Provinces and the imported sugars of Bombay, and the proportion, in which they are consumed in the Province, stands at about 2 of the former to 7 of the latter. The reasons why the imported sugar is more in favour than that of the North-West Provinces are not far to seek; to begin with, the Railway freight from Bombay is much less than that from the North-West Provinces, imposing a severe handicap on the produce of the latter, and also the price of the imported article is much cheaper, being Rs. 9-6 per maund against Rs. 12-8 in the North-West Provinces. Presuming then that the qualities of the two sugars are equal, it is evident that as far as our Province is concerned, the produce of the North-West Provinces cannot hope to compete with imported sugar, and the trade statistics prove this. In 1893-94, the imports of refined sugar from the North-West Provinces were 27,702 maunds; in each subsequent year there has been a steady decline till in 1897-98 the quantity imported amounted to only 11,638 maunds, or considerably less than half the former quantity. A more than corresponding rise is to be observed in the imports of refined sugar from Bombay Port; commencing at 50,158 maunds in 1893-94, the figure has now risen to 127,625 maunds, or more than 2½ times the former import.

4. *To turn to (a) the effect of the competition of imported sugar on the cultivation of sugar-cane in Berar.*—Table C gives the details of the area devoted to the growth of sugar-cane in each district in the Province, and it will at once be observed that the total area of this crop is very insignificant. The average of the last five years amounts to only 3,859 acres out of a total area under cultivation of 6,634,050 acres, or ·06 per cent of the whole. The annual figures certainly show a steady decline in this cultivation, since they have dropped from 5,315 acres in 1893-94 to 3,159 acres in 1897-98, but I do not think that this decline can be attributed to the competition of foreign sugars. We have no sugar refining mills in Berar, and our production finds its way to market either in the forms of canes sold separately or as *gur* or unrefined sugar. That the supply of unrefined sugar is not nearly equal to the

demand is clearly proved from the import figures, which show that we take an annual average amount of 164,208 maunds from Bombay, Bengal, and the North-West Provinces. Any further extension of the area under sugar-cane would result in an increased output of unrefined sugar which would find a ready sale within the Province. The decline of sugar cane cultivation in Berar is, in my opinion, partly attributable to three successive years of short rainfall, and partly to want of capital and enterprise on the part of the cultivators. Sugar-cane is a crop that takes 12 months to mature and requires a plentiful supply of manure and water and an extended period of labour. In Berar it is all grown under wells, and three years of drought have had a marked effect on the water-supply; rather than risk the failure of the sugar-cane crop, the cultivator prefers to put down vegetables, of which he can get two or three crops in the year and can sell readily in the local markets.

5. (*b*) *The effects on the profits of sugar-cane cultivation*.—Since we have no sugar refining industry in Berar, the imported refined sugar does not come into competition with the local production of "goor" or unrefined sugar. I have already shown that our requirements are much in excess of our produce, and that we import unrefined sugar in large amounts. Until the cultivation of sugar-cane in Berar extends sufficiently to satisfy the local demand for unrefined sugar, the question of the competition of refined sugar does not come in. Unrefined sugar can be imported at a price varying from Rs. 5 to Rs. 6 per maund, which is a little more than half the cost of the refined article; until therefore the latter drops to something nearer the price of the former, it is not likely to have any effect on the profits of cultivation of sugar-cane in Berar.

6. (*c*) *The effects on the profits of the sugar industry*.—This is a question with which our Province is not concerned, since refined sugar is not manufactured here. We import the article to a large extent, and of course buyers will go to the cheapest market, and as matters stand at present this is Bombay Port. Until the price of the refined sugar of the North West Provinces falls to a level with that of the foreign article, the import into Berar of bounty-fed sugars will continue to increase.

7. (*d*) *The possibility of any falling-off in the land or canal revenues in consequence of the abandonment of sugar-cane cultivation*.—Were the growth of sugar-cane absolutely abandoned in Berar, it would not in any way affect our land revenue. We have no large water-works and all our sugar-cane is grown under wells and the crop cultivated is not taken into consideration in fixing the assessment of well lands. Our assessments run for 30-year periods and are not liable to fluctuations according to the crops grown; even should dry corps be cultivated and the water of the well remain unused, the garden land assessment must be paid just the same.

8. A few remarks on our exports of sugar seem necessary. Although our production is not nearly equal to the demand, still we export some 4,500 maunds of unrefined sugar annually; and further, although refined sugar is entirely an imported article, yet our annual exports amount to 6,300 maunds. These are some of the vagaries of trade that are inexplicable, as Colonel Mackenzie once put it, Berar seems to act as a bonded warehouse for the Central Provinces with reference to this article! What is still more strange is that the refined sugar, imported from Bombay Port, seems to some extent to be again returned to the Bombay Presidency. To attempt to explain this appears impossible.

AKOLA;
The 9th January 1899.

F. W. FRANCIS,
Director of Land Records and Agriculture.

No. 96, dated 7th March 1899.

Telegram from—The Secretrary to the Government of the Punjab, Revenue Department,
To—The Secretary to the Government of India, DEPARTMENT OF REVENUE AND AGRICULTURE.

Your No. 469 Imported sugar almost entirely superseding Indian refined sugar in towns, consequently great falling-off in imports of refined sugar from North-Western Provinces, previously the chief source of supply. Native sugar refineries are also gradually being closed. In the Punjab cultivation, though not extending, has not fallen off as the demand of the agricultural population which is chiefly for unrefined sugar is still sufficient to maintain prices at a level which renders cultivation profitable.

No. 19, dated 7th March 1899

From—M. W. FENTON, Esq., Revenue and Financial Secretary to the Government of the Punjab,
To—The Secretary to the Government of India, DEPARTMENT OF REVENUE AND AGRICULTURE.

In compliance with the orders contained in your letter No. 15—48-3, dated 31st October 1898, I am directed by the Lieutenant-Governor to submit, for the information of the Government of India, copy of a letter, No. 508, dated 3rd March 1899, and enclosures, from the Director of Land Records and Agriculture reporting the results of his inquiries regarding the effect of the competition of imported sugars on the cultivation of sugar-cane and on the sugar industry in the Punjab.

2. As it is understood that this report is very urgently required by the Government of India, it is now forwarded without any comments. If on examination the Lieutenant-Governor finds it necessary to make any remarks with reference to Captain Dunlop-Smith's conclusions, which on the whole appear to tally with the statistics available, a further communication will be addressed to you.

No. 508, dated 3rd March 1899.

From—CAPTAIN J. R. DUNLOP-SMITH, Director of Land Records and Agriculture, Punjab,
To—The Revenue Secretary to the Government of the Punjab.

In reply to your No. 87,* dated 17th November 1898, forwarding a copy of Government of India Circular No. 15—48-3 directing an inquiry into the sugar question, I have the honour to report as follows.

Preliminary.
*Proceedings, November 1898, Nos. 1 to 3 A.

Consumption of refined and unrefined sugar in the Province.

2. The following table which has been compiled from the Internal Trade Reports prepared in the Financial Commissioner's Office gives the imports and exports in maunds of both refined and unrefined sugar into, and out of, the

Punjab during the last eleven years :

1	2	3	4	5	6	7	8
Year.	Refined Sugar.			Unrefined Sugar.			Total columns 4 and 7.

Difference per cent ...	+106	—43	+107	—11	+126	—53	—8

Except for a check from 1891 to 1893, the imports of refined sugar have steadily increased, and the returns last year were 106 per cent higher than the average of the previous ten years, and nearly four times the total of 1887-88. The exports have always been inconsiderable and require no comment. The imports of unrefined sugar have also declined, but not to anything like the same extent, and the fluctuations from year to year have been considerable. The exports, on the other hand, have risen by as much as 126 per cent. The total of last year is very remarkable. The result is that while the balance of refined sugar available for consumption in the Province has more than doubled, the balance of the unrefined article has been reduced by over one-half. If the two balances are combined, as in column 8 of the above table, it will be seen that the amount of both refined and unrefined sugar left for consumption in the Province in 1897-98 was almost exactly the same as in 1887-88, and was slightly less than the annual average of the previous decade.

Effect of imports of refined sugar.

3. These figures show that the refined sugars have been gradually ousting the unrefined varieties imported from other parts of India, and no doubt the same process has been going on, though in a very small degree, at the cost of the same product manufactured within the limits of the Province. Most of the unrefined sugar is imported from the North-Western Provinces, and especially in late years the falling off has been considerable. The total of last year's imports was only 7 per cent below that of 1887-88 and 3 per cent below the annual average of the previous ten years, but it fell short of the total of 1894-95 by as much as 38 per cent. The Punjab was never famous for the manufacture of the high class country sugar, and depended largely on importations of the Chandausi and Moradabad varieties for the consumption in towns. The country classes, however, have been in the habit of using *gur* only as an article of daily food or coarse sugar locally prepared. Refined sugar has up till now had to contend with the usual opposition of a conservative race to a novelty, and more especially with the prejudices of a people whose very diet is affected by religious and social considerations. Only a few years age no little agitation was aroused by the circulation of a rumour that bone-dust was used in the process of refining. In spite of these difficulties, which are quickly disappearing, refined sugar has forced its way rapidly. Its cheapness combined with its attractive appearance and its palpable superiority as an article of food have popularised it with the less scrupulous, and confectioners soon found out an easy and very profitable way of overcoming the objections of the orthodox by adulterating it with Indian sugars and selling the compound at the old high rates. The opposition to the foreign article is now weak, and I think there is ample evidence to show that it is regularly used at all social and public gatherings, and even in private households in towns. In the city of Lahore, for instance, there are only two confectioners at the present time who use indigenous sugars in the manufacture of sweets, and their wares are almost exclusively reserved for use during fasts and at religious ceremonies. The business done by them, moreover, is very limited. I can recall no other town of any importance with which I am acquainted in the Upper Punjab where there is any confectioner who uses Indian sugar. These changes have seriously affected the trade with the North-Western Provinces, which will as time goes on dwindle to even smaller proportions, but the effect on the Punjab industry has been very slight.

4. Refined sugar has, however, not found its way into the villages to any appreciable extent. There the people are more bound by custom and tradition than the inhabitants of towns, and use *gur* as an article of daily food. *Gur* is sweeter and more adapted to the necessities of the zamindar, and is very much cheaper than refined sugar. Its price varies from Rs. 4 to Rs. 5 per maund, while imported sugar sells at from Rs. 9 to Rs. 10 for the same quantity. Until therefore the Punjab peasant makes a radical change in his simple style of living and so long as the cost of cultivating cane maintains the same proportion to the sale-price of *gur*, there is not much fear of the area under sugar-cane falling off. The following table shows the fluctuations in the acreage under cane and other food stuffs during the last eleven years:

Fluctuations in the area under sugar-cane.

1	2	3	4	5	6
			Area under sugar-cane.		
Year.	Area under food-crops in the kharif.	Area under food-corps in both kharif and rabi.	Actual.	Per cent on Column 2.	Per cent on Column 3.
	Acres.	Acres.	Acres.		
1887-88	8,620,862	20,283,938	366,698	4·2	1·8
1888-89	8,260,158	21,687,751	391,060	4·7	1·8
1889-90	8,861,806	18,711,347	325,562	3·7	1·7
1890-91	8,489,257	20,753,194	323,868	3·8	1·5

1894-95	8,212,971	21,395,293	339,930	4·1	1·6
1895-96	6,942,338	16,443,121	385,508	5·6	2·3
1896-97	6,496,392	15,842,028	398,202	6·1	2·5
Average	8,274,945	20,061,955	353,705	4·2	1·7
1897-98	9,452,948	22,333,684	348,121	3·7	1·6
Difference per cent.	+14·2	+11·3	—1·5	—11·9	—5·9

The fluctuations in the area under sugarcane are clearly due to variations in the character of the seasons, and the above figures by no means show that the cultivations of this staple is declining. The year which gave the largest outturn of cane was 1896-97, when the area under food-crops in the kharif was the lowest, and in 1892-93 the area under kharif food-crops was the highest on record, but the area under cane was the lowest. The percentages in the last two columns show that cane is easily holding its own.

Extension of sugar-cane cultivation.

5. Statement A appended to this letter gives the total area under sugar-cane in each district of the Province since 1884-85, and Statement B gives the details of irrigated and unirrigated areas since 1887-88. It will be seen that there has been a steady extension of cane cultivation on irrigated lands in those districts in which the canals and other sources of artificial irrigation have most largely been developed. Such districts are Jhang and Gujranwala, in which the Chenab Colony is situated, Hissar, Karnal, Umballa, Hoshiarpur, Ludhiana, Ferozepore, Lahore, Gurdaspur, and Sialkot.

Profits of sugar-cane cultivation.

6. As to the profits of cane growing, I have already stated that so long as the cost of cultivation bears very much the same relation as at present to the sale-price of *gur*, these profits will continue to be realised. The cost of preparing the land, of irrigation, weeding and harvesting has increased no doubt in the last twenty years owing to the rise in wages, but not to such an extent as to cripple the production of any particular staple. In the case of sugar-cane, moreover, it has been counterbalanced by the large reduction in the expenses of crushing the juice due to the introduction of the various kinds of iron mills. It would be difficult to draw up a statement for the whole Province showing the exact effect of the rise in wages and the reduction of expenditure in manufacture on the whole cost of the production of *gur*, but it may be assumed that this has not increased in the same proportion as its value in the market has.

Effect of foreign sugar imports on the manufacture of *gur*.

7. The following figures give the prices of *gur* per maund during the last eleven years:

Year.	Price of gur per maund. Rs. a. p.
1887-88	3 13 8
1888-89	3 6 5
1889-90	4 13 9
1890-91	5 6 11
1891-92	4 4 8
1892-93	4 5 1
1893-94	4 3 10
1894-95	4 2 7
1895-96	4 0 4
1896-97	4 2 5
Average	4 4 4
1897-98	4 7 7

The price has thus risen by 16·1 per cent since 1887-88 and is 4·8 per cent above the annual average of the last decade. The prices of 1889-90 and 1890-91 have not been reached since, but the table in paragraph 4 above shows in both of these years the area under cane was much below the average. There is certainly no tendency towards a fall in price, so that it cannot be said either that the profits of cultivation are declining or that refined sugar has yet entered into competition with *gur*.

Reduction in the number of sugar refineries.

8. Sugar-cane is used in the Punjab chiefly for the manufacture of *gur* by the zamindars themselves, but a small proportion is used for the production of coarse country sugar by the class known as *Khandsaris*. The latter either purchase the standing crop or contract with the owner for supply of so much *rab*, which they convert into sugar in their own refineries (Khanchi). These refineries are generally confined to large towns, but are occasionally met with in villages also, and there seems no doubt that they have been affected by the foreign imports. Europe-made sugar sells at from Rs. 9 to Rs. 10 per maund, but the indigenous article sells at from Rs. 9 to Rs. 15. So the latter must give way. It requires, moreover, in the perparation of sweetmeats less than half the labour which has to be spent on country sugar. The refineries in villages are holding their own, but their trade is slipping away from those in the towns. Agents of European firms are being gradually established in the different trading centres of the Province, and their operations are contributing largely to the extinction of country sugar. The following table which has been compiled from information collected during a recent tour through three of the largest cane-producing districts in the province shows the decline in the number of refineries in the last eleven years:

1	2	3	4	5	6	7	8
District.	Town.	Refineries at work in		Increase.	Decreases.	Net decrease.	
		1887-88.	1897-98.			Actual.	Per cent.
Hoshiarpur ...	Tanda	7	3	...	4		
	Urmar	34	19	...	15		
	Garhdiwala	25	15	...	10		
	Hariana	49	31	...	18		
	Mukerian	23	34	11	...		
	TOTAL ...	138	102	11	47	36	26
Jullundur ...	Basti Danishmandan ...	8	10	2	...		
	Basti Darweshan	37	31	...	6		
	Basti Ghuzan	17	8	...	9		
	Jullundur	15	13	...	2		
	TOTAL ...	77	62	2	17	15	19·5
Gurdaspur ...	Kadan	10	7	...	3		
	Srigovindpur	33	21	...	12		
	Harchowal	7	13	6	..		
	TOTAL ...	50	41	6	15	9	18·0
	GRAND TOTAL ...	265	205	19	79	60	22·6

The markets selected were typical, and the above table gives a fairly accurate idea of the rate at which the indigenous industry is shrinking. Out of 12 towns only 3 show an

increase, which has probably been caused by refiners who finding their trade going transferred their shops to more promising localities.

The possibility of future curtailment of sugar-cane cultivation from the assessment point of view.

9. I have gone over the Assessments and Settlement Reports of the Kangra, Gurdaspur, Amritsar, Shahpur, Gujranwala, Lahore, and Sialkot Districts all recently settled and can find no allusion to the possibility of the future curtailment of cane cultivation. And the annual revenue reports received in recent years from other districts such as Hoshiarpur and Jullundur are also silent on this head. Thus neither the Settlement Officers who must have an intimate knowledge of the resources of the tracts the assessments of which they revise, nor the Deputy Commissioners who periodically review the changes in crops and cultivation in their districts, have felt any apprehensions as yet as to future of sugar-cane.

Indirect results of foreign imports.

10. Two indirect results have doubtless been caused by foreign imports. The first is that the comparatively small amount of sugar-cane which was formerly converted into sugar by local refiners and has now been set free has gone to supply the increased demand for *gur* caused by the rise in the agriculturist population. The second result is that the area under sugar-cane has not expanded so largely as it would have done had the indigenous refining industry not contracted. In other words, the foreign imports have prevented to a slight extent the area under cane from increasing so largely as it would presumably have done under the old conditions, but have not had the effect of actually causing that area to shrink. It follows therefore that this new trade in beet sugar has had no effect in the past on the land revenue or canal dues, and there is no probability of its making itself felt in this direction in the immediate future. At the same time I am strongly of opinion that the subject should not be lost sight of, and I would suggest that sugar-cane be added to the list of crops for which forecasts have to be prepared. Such forecasts would of course be submitted only from selected districts.

Final.

11. I have the honour to apologise both for the delay in the reply to the Government of India reference and for the somewhat disjointed manner in which the results of our inquiries have been arranged in this letter. But I purposely postponed taking up the question till I could have an opportunity of visiting the chief cane districts and making local investigations. I concluded these only two days ago at Batala in Gurdaspur, so that the letter has been written under great pressure. The issues raised by this question are very important, and they will not be lost sight of by this Department. The copy of the review of the question of countervailing duties on bounty-fed sugar is returned herewith as desired in your memorandum No. 14-A., dated 3rd February 1899.

CAMP MONTGOMERY;
The 3rd March 1899.

GANGA SAHAI,
Personal Assistant,
for *Director of Land Records and Agriculture, Punjab.*

No. 189—530, dated 11th March 1899.

From—The Chief Commissioner, Ajmere-Merwara,

To—The Secretary to the Government of India, Department of Revenue and Agriculture.

I have the honour to acknowledge the receipt of your Circular letter No. 15—48-3, dated the 31st October 1898, regarding the effect of increasing imports of refined sugar on the market for, and the price of, Indian sugars.

1. From the Commissioner, Ajmere-Merwara, to the Chief Commissioner, Ajmere-Merwara, No. 144, dated 17th February 1899, with enclosures.
2 To the Commissioner, Ajmere-Merwara, rom the First Assistant to the Agent to the Governor General, Rajputana, and Chief Commissioner, Ajmere Merwara, No. 530, dated March 1899.

2. In reply, I have the honour to submit, for the information of the Government of India, a copy of the correspondence noted on the margin, and to add that further information has been called for from the Commissioner, which will be submitted immediately it is received.

No. 144. dated 17th February 1899.

From—The Commissioner, Ajmere-Merwara,

To—The Chief Commissioner, Ajmere-Merwara.

With reference to your office endorsement No. 1372—530, dated the 17th November 1898, forwarding, for enquiry and report, the Government of India Circular No. 15—48-3, dated the 31st October 1898, regarding the effect of increasing imports of refined sugar on the market for, and the price of Indian sugars, I have the honour to forward a copy of letter No. 690, dated the 4th February 1899, from the Assistant Commissioner, Ajmere, with enclosures, and to state that the returns prepared by the Assistant Commissioner of Ajmere prove conclusively that imported sugar is being used to a very much larger extent than formerly and thus either the consumption of both imported and indigenous sugar must have increased very considerably, or else the former is largely replacing the latter in the requirements of the native population of India.

2. The Assistant Commissioner of Merwara has collected no statistics on the subject, but his enquiries tend to show that a religious prejudice exists against sugar of foreign manufacture, the methods employed in which are suspected to be opposed to caste prejudices, but in view of the figures furnished by the Assistant Commissioner of Ajmere, I am unable to think that this prejudice affects the consumption of imported sugar to any material extent.

3. The areas under sugar cultivation in Ajmere-Merwara is very small, but so far no sign of the plant going out of cultivation has been recorded.

No. 690, dated 4th February 1899.

From—The Assistant Commissioner, Ajmere,

To—The Commissioner, Ajmere-Merwara.

I have the honour to acknowledge the receipt of your endorsement No. 5611, dated the 23rd November 1898, regarding the effect of the increasing imports of refined sugar on the market, and the price of Indian sugar in the Ajmere District.

1. Statement showing the imports of foreign sugar into the Ajmere District by rail from the 1st April 1893 to the 31st March 1898.
2. Statement showing the area cultivated and the outturn of sugar-cane in the Ajmere District from 1894-95 to 1898-99.

2. I enclose the statements marginally noted.

3. It is clear from the Traffic Manager's return that the import by rail of foreign, *i.e.*, refined, sugar into the Ajmere District has increased by leaps and bounds since 1894. During the year ending the 31st March 1898, the import was five times what it was in the year ending the 31st March 1894. The increase has not, however, been absolutely steady, as during the year ending the 31st March 1897 the import was good deal less than during the year ending the 31st March 1896. I do not know that it would be possible to obtain a satisfactory explanation for this. But I think it may be taken that the return shows that foreign, that is refined, sugar is steadily displacing Indian-made sugar in the markets of the Ajmere District. The Revenue Extra Assistant Commissioner informs me that foreign, that is, refined, sugar is much more largely used in the bazaars for making sweetmeats than formerly.

4. The large consumption of sweetmeats in India and the vast size of the Indian Continent must make India a most valuable market for sugar, and if the case for the whole of India is the same as the case for the Ajmere District, it behoves the British Government to take steps to stimulate the manufacture of refined sugar in India itself and to secure that the Indian import trade in refined sugar is facilitated far over West India sugar plantations now reported to be in so bad a plight.

5. The cultivation of sugar-cane in the Ajmere District, as shown in the statement attached, is limited to a few villages, and during the past five years it has only averaged

some 400 acres with an outturn of some 4,300 maunds of unrefined sugar. But the area cultivated under sugar-cane during the year 1898-99 was little more than half the area cultivated under sugar-cane in 1894-95. This may be to some extent due to the precarious rainfall of the Ajmere District. But I am inclined to attribute it to the increased import of foreign refined sugar, which the frugal native mind has found to taste sweeter and to go farther than the product of the country.

6. As the area cultivated under sugar-cane is so small and as the revenue demand of the Ajmere District has been fixed at a very low figure, and is a fixed demand (except in the case of some 38 variable villages) for a certain number of years, the decrease in cultivation of sugar-cane can, I consider, have no effect on the payment of Government revenue or on the ability of the cultivators to pay the same.

Statement showing the Area under Sugar-cane Cultivation for the last five years.

G. R. KHANDEKAR,
for *Assistant Commissioner, Ajmere.*

No. 530, dated March, 1899.

From—The First Assistant to the Agent to the Governor General, Rajputana, and Chief Commissioner, Ajmere-Merwara,

To—The Commissioner, Ajmere-Merwara.

In acknowledging the receipt of your letter No. 144, dated the 17th February 1899, I am directed to request that statistics for the past ten years may be furnished in the tabulated form used by the Assistant Commissioner of Ajmere in the statement which forms an enclosure to your letter under reference, showing the are a under sugar-cane cultivation and the import of foreign sugar into both the districts under your charges.

2. The Chief Commissioner would also be glad to be supplied with a table showing for the same period the comparative prices of the different classes of both country and foreign sugar from the coarsest to the finest.

Extract from the Proceedings of the Government of Madras, Revenue Department,—No. 962 Mis., dated 8th March 1899.

Read again—

G. O. No. 681, dated 15th November 1898, communicating to the Board of Revenue, for investigation and report, letter from the Government of India, requesting to be furnished with information as to the effect of the competition of imported sugars on the cultivation of sugar-cane in the Madras Presidency, on the profits of such cultivation and on those of sugar industry, also as to the possibility of any falling off in the land or canal revenues in consequence of the abandonment of sugar-cane cultivation.

Read—

Telegram from the Government of India, revenue and agriculture Department, dated 13th February 1899, enquiring when a reply to its Circular No. 15 (Agriculture), dated 31st October 1898, may be expected, and stating that the information is very urgently required.

Read again—

Reminders to the Board of revenue, No. 21 R, dated 16th February 1899, and No. 26 R, dated 24th February 1899 requesting a very early reply to G. O. No. 681, dated 15th November 1898

Read again—

Official Memorandum, Revenue Department, No. 46, dated 16th February 1899, enquiring whether the Government may expect a communication on the sugar bounties question from the Chamber of Commerce.

Read—

Letter* from the Chamber of Commerce, Madras, dated 17th February 1899, submitting report on the subject of the effect of the competition of bounty-fed sugar imported into India on the local industry.

* Copy attached.

Order thereon by the Government of Madras.

The Board of Revenue is requested to submit, with the least practicable delay, the report called for in G.O. No. 681, dated 15th November 1898.

2. The letter of the Vice-Chairman, Chamber of Commerce, Madras, will meantime be communicated to the Government of India.

No. 962 A.

Copy to the Government of India, Department of Revenue and Agriculture.

Dated 17th February 1899.

From—C. E. P. VANSAGNEW, Esq., Vice-Chairman, Chamber of Commerce, Madras,

To—The Secretary to the Government of Madras, Revenue Department.

With reference to the G.O. No. 681 (Revenue), dated the 15th November 1898, in which the Chamber is asked to supply the Government with information on the subject of the effect of the competition of bounty-fed sugars imported into India on the local industry, I have the honour to inform you that, while the area of cultivation of sugar-cane in this Presidency may not yet have been adversely affected, there can be no doubt that the competition has forced down the prices of refined sugar manufactured in this country to such a point as to seriously endanger the future of the industry.

In support of this opinion, the Chamber would invite attention to the following figures of sale prices for the last six years of sugar locally refined by the firm which is most largely interested in the manufacture of sugar in this Presidency. The prices are gross realised in Calcutta, which is the largest and most representative market in this country, and refer to only two brands, of more or less equal value:

Year.	Highest Price. R. a. p.	Lowest Price. R. a. p.	
1893	10 1 0	9 15 0	per Bengal maund.
1894	9 15 0	9 8 0	" "
1895	9 8 0	8 12 0	" "
1896	8 14 0	8 11 6	" "
1897	8 11 6	8 1 0	" "
1898	8 1 0	7 10 0	" "

In the opinion of the Chamber, the reason for this great falling off in price, notwithstanding a steady improvement in the quality of the article, is undoubtedly the reduction in the price of beet sugar during the above period brought about by the heavy bounties by which that industry is subsidised on a steadily increasing scale. With the falling off in the price of the locally refined article, it would have been impossible to compete with the imported bounty-fed sugar but for the margin which, it is well known, refiners have in past years enjoyed on the price of raw sugars. That margin must now, with the fall in refined sugars, have disappeared, and though it may be that the price of the raw sugars may admit of some reduction, the Chamber doubts it, in view of the high price of poonac manure and the recent spread of disease among canes.

In any case, there is a limit below which raw sugar cannot be profitably produced, while there is no apparent limit to the bounties, which were again increased in Germany only last year. A further fall in the price of the refined article must adversely influence the market for the raw product, and thus react upon cultivation, leading eventually to the curtailment, if not to the complete extinction, of the Indian sugar industry.

The Chamber sees no means of escape from this calamity other than the abolition of the bounties by international agreement, or the imposition in this country of countervailing import duties on bounty-fed sugar.

No. 6.

No. 16, dated 23rd March 1899.

From—His Excellency the Viceroy,

To—The RIGHT HON'BLE LORD GEORGE F. HAMILTON,
HER MAJESTY'S SECRETARY OF STATE FOR INDIA.

In conformity with the provisions of Section XXI of the Indian Councils Act, 1861, I have the honour to forward herewith an authentic copy of the Law noted in the margin, which has been passed by the Council of the Governor General of India for making Laws and Regulations, and to which I have signified my assent.

(Act No. XIV of 1899) to further amend the Indian Tariff Act 1894.

2. In accordance with the instructions contained in Your Lordship's predecessor's despatch No. 61, dated 21st December 1869, a copy of the papers noted in the margin, relating to the Law, accompanies.

Statement of Objects and Reasons, dated

Extracts from Proceedings, dated 10th and 20th March 1899.

(ACT NO. XIV OF 1899.)

[AS PASSED IN COUNCIL.]

A Bill to further amend the Indian Tariff Act, 1894.

WHEREAS it is expedient to further amend the Indian Tariff Act, 1894; It is hereby enacted as follows :— VIII of 1894.

Short title and commencement.

1. (1) This Act may be called the Indian Tariff Amendment Act, 1899; and

(2) It shall come into force at once.

Addition of new section 8-A after section 8, Act VIII, 1894.

2. After section 8 of the Indian Tariff Act, 1894, the following section shall be added, namely :— VIII of 1894.

Additional import duty on bounty-fed articles.

"8-A. (1) Where any country, dependency or colony pays or bestows, directly or indirectly, any bounty or grant upon the exportation therefrom of any article and the article is chargeable with duty under the provisions of this Act, then, upon the importation of any such article into British India, whether the same is imported directly from the country of production or otherwise, and whether it is imported in the same condition as when exported from the country of production or has been changed in condition by manufacture or otherwise, the Governor General in Council may, by notification in the Gazette of India, impose an additional duty equal to the net amount of such bounty or grant, however the same be paid or bestowed.

" (2) The net amount of any such bounty or grant as aforesaid shall be, from time to time, ascertained, determined and declared by the Governor General in Council, and the Governor General in Council may, by notification in the Gazette of India, make rules for the identification of such articles and for the assessment and collection of any additional duty imposed upon the importation thereof under sub-section (1)."

Act not to apply in certain cases.

3. This Act shall not apply to any imported article the bill of lading for which was signed and given before the commencement of this Act.

This Bill was passed at a Meeting of the Council of the Governor General of India for the purpose of making Laws and Regulations on the twentieth day of March, 1899.

(Sd.) CURZON OF KEDLESTON,

President.

I assent to this Bill.

(Sd.) CURZON OF KEDLESTON,

Viceroy and Governor General.

The 20th March 1899.

(An authentic copy.)

(Sd.) H. W. C. CARNDUFF,

Offg. Secy. to the Govt. of India,

Legislative Department.

STATEMENT OF OBJECTS AND REASONS.

DURING the last two years there has been a rapid and large increase in the amount of bounty-fed sugar imported into India, especially from Germany and Austro-Hungary. This appears to be seriously affecting the important sugar industries of India, as it is reported that many refineries have already ceased to work and that others are on the verge of being closed.

2. The present Bill has been prepared with the object of enabling the Government of India to impose countervailing duties on bounty-fed articles at the port of importation and thus to preserve the sugar cultivation and industries of this country.

J. WESTLAND.

The 10th March 1899.

Extracts from the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892 (24 & 25 Vict., Cap. 67, and 55 & 56 Vict., Cap. 14).

The Council met at Government House, Calcutta, on Friday, the 10th March 1899.

* * * * * * * *

INDIAN TARIFF ACT (1894) AMENDMENT BILL.

The Hon'ble SIR JAMES WESTLAND moved for leave to introduce a Bill to further amend the Indian Tariff Act, 1894. He said:—"I see that it is stated in the List of Business that my object is stated in the title of the Bill. With all deference to the Hon'ble Member who has charge of the Legislative Department, I think it would require a large amount of perspicacity for anyone to see my object stated in the title of the Bill. As a matter of fact, I am proposing to open an entirely new chapter in our fiscal history, and which I have already endeavoured to make plain, in language which is not legal and not legislative, but which, I fancy, has been understood, by statements made in the newspapers.

"I propose to ask the leave of the Council to introduce a Bill which will have the effect of conferring upon the Government a power to impose countervailing duties in the case of bounty-fed sugar imported from European countries. I shall not take up the Council's time by explaining the economic effect of bounties and of countervailing duties. I take it for granted that Hon'ble Members know these matters as well as I do myself, and, if I refer to them for a short time, it is only with the object of introducing to the Council the facts with regard to which I shall have to satisfy them in asking leave to introduce this Bill.

"It is well known that the effect of bounties is two-fold. It affects in two entirely opposite directions the interests of the consumer and the producer. So far as regards the consumer, it brings the article of consumption to the market at a cheaper price than would otherwise be available to him. In that respect he receives benefit. But the producer looks at it from a different point of view. It supplants in the market the produce which he would otherwise bring to it by a competitive produce which has attached to it an artificial advantage. England, of course, is, as regards sugar, a nation of consumers. No project for the imposition of countervailing duties has there been made; but India, on the other hand, is, to a very large extent, a nation of producers, and the productive interests of the country in respect of sugar are, as I hope to satisfy the Council, extremely important, and ought to be safeguarded by any measures that we can take. As regards the interests of the producer, I shall quote some official documents which have reference to them, and will show that sugar is a particularly important product in this country. Hon'ble Members will no doubt excuse my beginning my quotations by a reference to an old Financial Statement—that of 1877-78. Sir John Strachey in talking of sugar in that statement says:—

'It is one of the most important agricultural staples of those provinces, and it is important not only to the agriculturists and manufacturers and consumers, but directly to the Government, which looks greatly to sugar cultivation for its irrigation revenue.'

"Then again, when the Chamber of Commerce, Calcutta, made a representation about a year ago on the subject of sugar, they also drew attention to the extreme importance of the productive interests connected therewith. They enclosed a memorandum from the firms interested in the sugar industry in Calcutta, in which it was said:—

'The importance of cane cultivation in the agricultural scheme of almost every Province in India is perhaps hardly appreciated, except by those officials whose duties have brought them into association with the settlement of land-revenue. The remark may be found in many a settlement report that in such tracts the entire rent, and therefore the entire revenue, is paid from the cane-field. "The peasants say," writes the Settlement-officer of Bareilly, "that sugarcane is to other tillage as the elephant to other beasts." In almost every settlement report and district gazetteer of the Punjab, of the North-Western Provinces and of Oudh, the extremely important position held by sugarcane in maintaining agricultural prosperity is prominently noticed, as the extracts quoted below sufficiently indicate;'

and then they proceed to make the extracts justifying the statement. Again, in a report from the Lieutenant-Governor of the North-Western Provinces received the other day, talking of the possibility of the reduction of cultivation of sugar in the North-West, he says:—

'The closing of refineries must lead to a contraction in the acreage under sugar. This reduction might, if the refining industry were destroyed, reach a maximum of 250,000 to 300,000 acres. Such a reduction in the acreage under a valuable and paying crop would cause far-reaching injury to landlords, tenants and the labouring population, and might affect the well-being of the rural classes to an extent that would produce serious discontent in the sugarcane-growing regions. The stability of the Government revenue would be affected, not indeed directly, because the land-revenue assessments are not ordinarily made on the special or crop rents that are in some places paid for land let out for a cane crop, but because the reduction of the profits of a valuable crop would impair the rent-paying capacity of the tenants, and thus cripple the resources of the landlords.'

"Perhaps these extracts will show the importance which is attached from the agricultural and economic point of view to the maintenance of sugar cultivation. With refer-

ence to the interests of the consumer, which I mentioned are entirely in the opposite direction, there is one very considerable discount to be reckoned in India, and that is, that the bounty-fed sugar is a refined sugar, and the sugar which is affected by it in this country is mostly the refined article. The common people of this country, that is, the poorer classes, do not, for the most part, consume refined sugar, although they are taking to it lately in larger quantities. The principal staple, however, of their consumption is unrefined sugar, and, so far as we can trace it at present, although the unrefined sugar has to a certain extent been affected by the large importation, to which I will presently allude, of bounty-fed sugar, still it is mostly in the direction of the cheapening of refined sugar that the effect of this bounty-fed import has been seen. Accordingly, although the consumer has benefited by the cheapness of the bounty-fed importations, yet the consumer who is so benefited is not the poorer classes but the classes who are comparatively well able to bear the burden of the removal of the cause cheapening their sugar. I find that the report made by the West Indian Commission expresses this view even with regard to England. They state :—

'It has, we believe, been argued that the reduction in the price of sugar which has resulted from the bounty system is such a source of gain to the British Empire as a whole that it would not be right for Your Majesty's Government to initiate any measures to bring about the abolition of that system. In that argument we do not concur. * * The benefit which the British Empire as a whole derives from any lowering of the price of sugar due to the operation of the bounty system is too dearly purchased by the injury which that system imposes on a limited class, namely, Your Majesty's West Indian and other subjects dependent on the sugar industry. * * We have, therefore, no hesitation in saying that the abolition of the bounty system is an object at which Your Majesty's Government should aim, if they should see their way to securing that result, and that the accomplishment of such an end is worth some sacrifice provided always that such sacrifice would be really effective and would not involve evils out of all proportion to those which it is desired to remove.'

"Of course we are not, so far as this Legislative Council is concerned, considering the interests of the West Indian subjects of Her Majesty; but the very expressions here used might be adapted to India with a small variation and we might say that the benefit which India as a whole derives from any lowering of the price of sugar due to the operation of the bounty system is too dearly purchased by the injury which that system imposes on one class, namely, the agricultural population which is dependent on the sugar industry of the country.

"I wish to bring the Council the actual facts of importations into this country so as to show to what an extent in recent years the importation of bounty-fed sugar has increased. I have before me the statistics of importation for the last twenty years stated in thousand of hundredweights. The facts are that for the first ten years the importation of sugar was about one million hundredweight; towards the end of that period it had risen to one million and a half hundredweight. By far the largest portion of this, almost the whole of it, was Mauritius sugar. European sugar hardly entered into the figures at all. In none of the first five years was there any European importation at all, and during the last five years there was an importation of 15,000, 10,000 and 11,000 hundredweight in three of the years concerned. After 1890, although the importation from Mauritius continued and rather increased, that is to say, moved up from about one million three hundred thousand to one million six or seven hundred, yet the importation from Austria and Germany vastly and suddenly increased. The year 1890-91 was almost the first year in which German sugar was imported, and in that one year 709,000 hundredweight were imported. The figures then fell off for a short time, but during the last three years, 1896-97-98, the amount which has been imported from Austria and Germany combined has been 874,000 hundredweight; then the year after that more than two million hundredweight, and in the ten months of this year more than a million hundredweight has been received. This is a very large and a very sudden increase, and I will mention the facts to which it is due. In 1897 the Government of the United States passed an Act, upon which the Bill now before the Council is framed, by which they imposed countervailing duties upon sugar. The effect of that Act was to cut out the bounty-fed sugar of Europe from the markets of the United States. The consequence was that bounty-fed sugar was driven to find its market in India, and it found its market very suddenly and very abundantly. Hon'ble Members are no doubt aware that a couple of years ago the attention of Her Majesty's Government was drawn to the critical condition of the sugar industry in the West India Islands. They sent out to inquire into the subject a Commission of which two members were my own distinguished predecessor Sir David Barbour, and the Hon'ble Sir Edwin Collen's distinguished predecessor Sir Henry Norman. They made a report in which they showed that the sugar industry of the West India Islands, upon which the commercial prosperity and even the administrative possibilities of the West Indian Colonies depended, was in an extremely critical state, and they attributed it all to the existence of the bounty system. Thereupon Her Majesty's Government took what they considered the only means of having the bounty system revised, namely, they proposed to call a Conference of the various European Powers in order to consider the whole question of bounties. At that time the Government of Belgium had had its attention drawn to the subject, and they met the invitation to Conference issued by Her Majesty's Government by stating that they had already taken measures to

have a Conference of the Powers. This Conference took place in Brussels in the summer of 1898. It was a Conference which came to no practical conclusion. The proposals regarding the dropping of the bounty system were opposed for various reasons, mainly by France and Russia, but no practical conclusion was come to. The Conference separated on the understanding that the Government of the King of the Belgians would continue by diplomatic action to pursue its object. At the instance of the Calcutta Chamber of Commerce we had taken measures to have India represented by a member at that Conference, and Mr. Ozanne, who was a recently retired Civil Servant of the Presidency of Bombay, was the Indian representative. After the Conference separated we received a letter from the Chamber of Commerce of Madras, and also from the Chamber of Commerce of Upper India, in which they recommended that now, as the proposals of the Brussels Conference proved ineffective, we should at once take measures to impose a countervailing duty. Madras is to some extent an exporting Province, and it grows a fair quantity of sugar; but Cawnpore, the seat of the Chamber of Upper India, is the centre of a most important sugar industry and is much more in touch with the subject and much more closely affected by it than any of the other Chambers. The Chamber of Commerce of Calcutta has also taken up the subject, and I find from their last annual report that they recommend the imposition of countervailing duties as the only alternative in the event of further negotiations regarding the abolition of bounties proving futile, and that a continuance of unrestricted importation will probably result in the closing of the remaining sugar refineries in the district of Jessore, a large number of which have already ceased to work.

"But I am a little in advance of the subject when I refer to the closing of the sugar refineries. I wish to show that it is not merely a matter of theory, but an ascertained fact that the sugar industry of this country has been very adversely affected.

"In India altogether about 3,000,000 acres are under sugarcane cultivation. Of this, 1,300,000 are in the North-Western Provinces and Oudh, 1,000,000 are in Bengal, and the remaining 700,000 are scattered over the other Provinces of India. It is obvious, therefore, that by far the most important Province from the sugar-producing point of view is that of the North-Western Provinces and Oudh. Now, we have obtained very full particulars of the recent condition of the sugar cultivation and of the sugar-refining industry in the North-Western Provinces, and I may at once say that the immediate effect upon cultivation has not been very great. Apparently the production has diminished, taking the whole of India, from about 3,000,000 to about 2,600,000, that is to say, a drop of about 13 per cent.; but there are many reasons why cultivation should not be immediately affected. In the first place, the natives of this country are extremely conservative in their habits and customs. It is very difficult to move them from the existing cultivation, and they will for a long time sustain loss in that cultivation before absolutely giving it up. Moreover, agriculture is largely carried on under advances for delivery of actual produce, and these obligations are obviously obligations which can only be carried out by continuing cultivation, so that the mere depression in the price of sugar does not make itself immediately seen in the reduction of cultivation. It will do so ultimately beyond a doubt. As regards refineries however, we have strong evidence that the importation of bounty-fed sugar is causing very serious disaster. In a letter from His Honour the Lieutenant-Governor of the North-Western Provinces he tells us :—

"There has been a substantial decrease in the acreage under cane in those parts of the Province where the margin of profit on the cultivation is least, this decrease being probably due to the competition of bounty-fed sugar. Further experience is, however, required to arrive at certain conclusions in this respect.

'Foreign sugar does not as yet compete with *gur*, but it is now competing with refined sugar for home consumption, of which article it has seriously reduced the exports. It has also already caused the closure of numerous refineries, while it has seriously endangered the stability of others. The Director gives statistics showing that 120 refineries have stopped working, but his figures on this point are incomplete. He has since informed the Lieutenant-Governor that no less than sixty have been closed in a part of the district of Azamgarh alone, of which no account is taken in his memorandum.

'The price of refined sugar has been reduced about 12 per cent. in five years, and this decline has had a general lowering effect on all sugar prices.'

"He goes on to report also that—

'The information available points to the probability of the further cheapening of the production of bounty-fed sugar in the future, to its importation in increasing quantities, and to the further under-selling of the native refiners.

'It is of much more importance to these Provinces to preserve their sugar industry on the basis of present arrangements than to have a cheap foreign sugar supplied to the consumers of the refined article.

'There is no prospect of native processes being so improved that refineries could hold their own against the foreign competition assisted by bounties.'"

"I may mention that in the description of the condition of things in the North-Western Provinces we are not dependent upon the reports of the North-Western Provinces alone. For example, in reply to our enquiries, which we issued last September, we have a report from the Resident of Hyderabad regarding the sugar consumption in Berar. He says :—

'In 1893-94 the imports of refined sugar from the North-West Provinces were 27,702 maunds; in each subsequent year there has been a steady decline till in 1897-98 the quantity imported amounted to only 11,638 maunds, or considerably less than half the former quantity. A more than corresponding rise is to be observed in the imports of refined sugar from Bombay port; commencing at 50,158 maunds in 1893-94, the figure has now risen to 1,27,625 maunds, or more than 2½ times the former import.'

" So that, whether this sugar which had been imported in Bombay and Berar is bounty-fed or not, it is obvious that the conditions of the trade are at present such that a Province which had formerly a large supply from the North-Western Provinces, has ceased to derive its sugar from there. The same is the case as regards the Punjab. The Government of the Punjab have not as yet sent us their report, but they have sent us in anticipation of the report a telegram which I shall read. They say :—

'Imported sugar almost entirely superseding Indian refined sugar in towns. Consequently great falling off in imports of refined sugar from North-Western Provinces, previously the chief source of supply. Native sugar refineries are also gradually being closed. In the Punjab, cultivation, though not extending, has not fallen off, as the demand of the agricultural population, which is chiefly for unrefined sugar, is still sufficient to maintain prices at a level which renders cultivation profitable.'

" It will be seen, therefore, that the information which we have received as to the condition of the North-Western Provinces in respect of their sugar industry, whether we look at what has been said by the Government of the North-Western Provinces itself, or by the effect as observed from the outside by the Government of the Punjab and the Resident of Hyderabad who represents the Berars, is the same, namely, that the prospects of the industry in the North-Western Provinces are very much like the prospects which have been described by the Commissioners who were sent to investigate the matter in the West India Islands. As regards Calcutta, it may be sufficient for me to refer to the statement of the Chamber of Commerce in their last annual report—a statement which I have already quoted—

'In any case a continuance of the unrestricted importation of bounty-fed sugar would probably result in the closing of the remaining sugar refineries in the district of Jessore, a large number of which had already ceased to work.'

" I have some further information which I might lay before the Council regarding the falling off in the price of sugar which, of course, is the direct effect of the importation of the bounty-fed sugar and through which those deleterious effects I have been describing have been operating. The general falling off in prices during the last three years has been (at Cawnpore) a falling off of about one and a half rupees out of a price of about 11, 12 and 13 rupees per maund— a sufficiently serious falling off to necessitate the closing of the refineries, and, when the refineries are closed, there must, no doubt, follow a falling off in the cultivation. I think therefore the Council may take it as proved that we are in the presence of a real danger to an important industry ; and I trust they are sufficiently convinced that the time has come when, if we are to protect our sugar industry in this country, which is extremely important, it is necessary for us to take measures against bounty-fed importations. Of course we might wait a little longer ; we might wait till our refineries are still further closed, and till the raiyats are so impoverished as to give up the cultivation altogether ; but it is better in these matters, I think, to take, protective measures beforehand, because it is far more easy to revive and encourage an existing industry than to restore one which has been by adverse circumstances extinguished.

" It is hardly necessary for me to touch upon the extent of bounties, or on their effect upon the trade of foreign countries. We are legislating only as regards India. But I would like to point out that the measure we are taking, or which I am asking the Council to take, is not necessarily a measure that condemns the action of foreign countries in putting bounties upon their sugar. We have only regard to our own internal concerns, and it may be perfectly possible for us even to approve the action of foreign Governments in putting a bounty upon their sugar and at the same time to take measures to prevent their having an injurious effect upon our own cultivation. I observe that the argument which the representative of France laid before the Brussels Conference as justifying the granting of sugar bounties in France was this. He said it is all very well for England to denounce sugar bounties. England is the mistress of the seas ; she can look forward with confidence even to a state of isolation arising out of war ; foreign ports will still be open to her and her ports will be open to importation from foreign countries ; but in the case of France it is exactly the opposite. If France is isolated and an enemy of France has command of the seas, then the result might be a very serious national disaster. It is the duty of the Government of France, as a mere question of national preservation, to take care that France shall be independent of foreign countries in the matter of her provisionment. If a certain quantity of sugar is absolutely necessary for the inhabitants of France, then the Government of France must take care that that amount of sugar shall be forthcoming within an area that is under her own command, and, if the cultivation under normal circumstances is not sufficient to produce it, it is legitimate for the Government, by the operation of bounties, to give sufficient encouragement to the internal cultivation of sugar. It is therefore a matter of internal administration. What I point out with regard to this is that we may quite agree with them. We are not bound in any way to denounce the system of bounties as a matter of internal administration of any foreign country. We only wish to protect our own industry, and we claim the same right to preserve our industry in this country as foreign nations no doubt claim to preserve and encourage the sugar industry and sugar cultivation in their own territories."

The motion was put and agreed to.

The Hon'ble SIR JAMES WESTLAND introduced the Bill.

The Hon'ble SIR JAMES WESTLAND moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* and in the local official Gazettes in English. He said:—"The Bill, I may state, is in form a sufficiently simple one. It is copied in its wording from the Bill which is actually operative in the United States of

America We take power to impose, in addition to the ordinary tariff which is levied under the Tariff Act, a further duty equal to the amount of bounty which is granted by any foreign nation The wording of the Act is in short the same as the wording of section 5 of the United States Act of the 24th July 1897. In the United States they have a slightly different form of legislation from ours; that is to say the Act itself imposes the duty, but lays down directions that the Executive shall prescribe rules for its assessment and regulations for the carrying out of the purposes of the Act. In this case we have slightly modified the procedure, and we give the Government power to impose the necessary duties as well as to lay down these rules and regulations. I hope that the Act will be considered sufficiently simple to pass without being referred to a Select Committee, and it is the intention of the Government to pass it if possible without its being examined by a Select Committee during the currency of the present session."

The Hon'ble MR ALLAN ARTHUR said:—"I should like to say that I support this Bill As the Hon'ble Sir James Westland has said, the Bengal Chamber of Commerce urged that legislation in this direction might be undertaken It might be urged that if foreign Governments are generous enough to give us sugar under cost-price, it would be rather foolish of us not to take the sugar on those low terms and grow something else on our sugar land. I think, as the Hon'ble Sir James Westland has pointed out, the interests of the producer in India are greater than the interests of the consumer, and as the unrestricted importation of beet sugar is likely to kill the sugar industry in India altogether, I think that legislation will be of great benefit to a great many people in India. With reference to the Hon'ble Sir James Westland's remarks with regard to the passing of the Bill this session I should like to call his attention to one point, namely, that in putting the Bill into operation there may be cases of great individual hardship. I understood him to say that the probability was that the duty which would be imposed would be equivalent to the bounty that the foreign Governments give. I think it is highly improbable that the price of sugar will rise in India to the extent of the duty that will be imposed. I may say that there has been a very large quantity of beet sugar sold 'to arrive,' as it is called in Calcutta, that is, shipment for months ahead, and if the price of sugar does not rise to the same extent as the amount of the duty, then I think the buyers of that sugar will probably be very heavy losers by this legislation, unless provision is made to avoid this; and I hope the Hon'ble Sir James Westland, in making arrangements to bring the Bill into operation, will consult the mercantile community in the matter."

The Hon'ble SIR JAMES WESTLAND said:—"The Hon'ble Mr. Arthur was good enough to mention this matter to me before the commencement of the proceedings in Council. There is a provision in the Tariff Act as it stands which alters the terms of contracts in which the conditions as regards the payment of customs duty have been altered by new legislation I do not know if that would go far enough in giving relief in the cases to which the Hon'ble Mr. Arthur refers; but in legislation like that which I have just been announcing it is always difficult to enter into the matters of detail to which the Hon'ble Mr Arthur has referred before taking up the general question, because it is necessary to keep our intentions secret pending preliminary consideration, and it is impossible therefore to consult people in regard to details However, I hope to be able to settle this matter in consultation with the Hon'ble Mr. Arthur, and possibly in consultation with the sugar merchants who represent the industry in Calcutta."

The Hon'ble Rai Bahadur P. Ananda Charlu said:—"I very gladly welcome this Bill. I consider it to mark a very important epoch by way of a departure in the fiscal legislation of this country The reasons for my considering so I shall reserve for a future occasion as the Hon'ble Financial Member has stated that very probably this measure will be brought up for discussion and determination during this session. I will at present only make this observation that even from the point of view of the consumer it is quite easy to show that this measure will be a welcome one."

The motion was put and agreed to.

Extract from the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892 (24 and 25 Vict., Cap. 67, and 55 and 56 Vict., Cap. 14).

The Council met at Government House, Calcutta, on Friday, the 20th March 1899.

* * * * * * * * *

INDIAN TARIFF ACT (1894) AMENDMENT BILL.

The Hon'ble Sir James Westland moved that the Bill to further amend the Indian Tariff Act, 1894, be taken into consideration. He said:—

"When I moved on last Council day for leave to introduce this Bill, I was careful to explain it solely with reference to Indian conditions There is one part of the subject to which I did not then refer, but to which I shall now take the opportunity of referring. His

Excellency the Viceroy has received a memorial from the sugar-planters of Mauritius. These sugar-planters are very naturally dismayed at the prospect of their being reduced by the operation of the bounties given in the countries of Europe to the conditions in which the sugar-industry is in the West India Islands. It is with reference to that, that they make an appeal to the Viceroy to have legislation passed in this country of the character, which is now before the Council. I think that the days are passed when, under the pretence of absolutely free trade, no consideration was given to any circumstances arising outside the country concerned. We now do admit a certain obligation to other countries, and especially to those with whom we are knit by the Imperial tie. We are especially interested in the sugar-cultivation of the Mauritius, by reason of the fact that that sugar cultivation is carried on very largely by labour imported from India. The greater part, I believe, of the inhabitants of the Mauritius are Indians, and as such are entitled to some measure of protection from this Council. The petition of the sugar-planters and merchants commences as follows :—

'The cultivation of sugar-cane and the manufacture and sale of cane sugar are practically the sole industries of the inhabitants of Mauritius, and their welfare and even their livelihood depend upon the remunerative sale of the sugar produced.

'The sugar industry, directly, or indirectly gives employment and the means of subsistence to a population of about 380,000, of whom more than 260,000 are Indian immigrants or immediate descendants of natives of India.

'These Indian immigrants have come to Mauritius with the sanction and under the control and protection of the Imperial and the Indian Governments secured by laws suggested, approved or imposed by both Governments, and therefore the Imperial and Indian Governments are jointly responsible with the Government of Mauritius for the welfare and means of subsistence of themselves and their descendants.'

"That perhaps carries things too far. However, as I pointed out, the sugar cultivation in Mauritius is one which gives employment to a very large Indian population, and if our legislation, based as it is on interests which are purely Indian, and refer to this country alone, also helps to preserve the means of subsistence to such a large number of Indian immigrants, I think I may bring it before the Council as one additional reason in support of the Bill which was introduced last Council day. I am glad to think from the public notices which I have seen of the legislation now before the Council, I am not called upon to defend it. It has been generally approved of, and, I think my proper course is to wait in case objections are made to it before I say anything further in its defence."

The Hon'ble Mr. Mehta said :—"I confess I should have preferred that this Bill had been allowed to run the usual course which Bills in this Council run. I should have preferred it the Bill had been referred to a Select Committee. I say this for two reasons. In the first place, it seems to me that the matter is not quite so simple as my Hon'ble friend Sir James Westland said in introducing the Bill. He has placed certain materials before the Council, but it seems to me, that a certain amount of further investigation and verification is absolutely essential before the conclusions drawn by him can be accepted. It is true that a certain number of sugar-refineries in the country have been stopped, but I am not quite sure that the facts placed, before us necessarily point to the importation of bounty-fed sugar as the sole or main cause of that result It seems to me, that further enquiry and investigation and verification of some of those figures and statistics should be really made, before we commit ourselves to the legislation which is sought for The second reason I have is, that the matter is not so urgent as not to allow time for the appointment of a Select Committee. I quite admit, as the Hon'ble Sir James Westland has pointed out, that we must not wait until the sugar-industy in this country is destroyed, but I do not think he has made out a case for such urgency, as to justify the course he has adopted in not referring the matter for consideration to a Select Committee For these reasons, it seems to me that it would have been more desirable if the Bill had been referred to a Select Committee.

The Hon'ble Mr. Gangadhar Rao Madhav Chitnavis said :—" My Lord, I wish only to make one remark, and that is to express my cordial concurrence in the proposal which has been submitted to the Government by the Hon'ble the Finance Member. The existing state of things with regard to the sugar-industry of India is such, that it is impossible to tolerate it any longer. The bounty-fed beet-sugar has nearly driven away cane sugar from our markets, and one by one the raiyats are giving up cane-cultivation. And once a raiyat has given up cane-cultivation, he has practically done with it for ever For it should be borne in mind that the raiyat plants canes and preserves their cuttings immersed in water for the next year's cultivation. A raiyat who has failed to preserve these cuttings, has either to purchase them—if at all procurable—at an enormous cost or to give up cane-cultivation altogether. Thus, should the existing state of things be allowed to continue, a time might come when the cultivation of cane will disappear altogether from this country.

"In the same manner the date-sugar having been driven away from the market by the bounty-fed beet, it is said that the raiyats in Bengal have ceased to grow date-trees. And, that being the case, it is apprehended that the manufacture of sugar from date-Juice might disappear from Bengal in the course of a few years.

"When the indigenous manufacture of date and cane sugar has been thus destroyed in India, the European Governments will, of course, discontinue the bounty which they now give to the beet-sugar. What is more, the European manufacturers themselves will then be in a position to sell their inferior sugar at their own price. When things have been brought to this pass, it is likely that the Indians will make an effort to revive the cultivation of date and cane. But the European Governments referred to above, might then resume the practice of giving bounty to the best-sugar and thus once again destroy the sugar-industry of India. It will thus be seen, that the only way of saving this purely agricultural country from a serious disaster, is to levy a countervailing duty on all bounty-fed sugar.

"Of course it would be absurd to expect unanimity of opinion on such a measure as the Sugar Bill. There are people, well-meaning people too, who, I know, view it with alarm as being repugnant to the principles of free trade. But free trade can never prevent us from initiating legitimate measures of self-defence. In my humble judgment it is the first duty of the Government of India to consider the interests of the people of India; and it is from that point of view that I look at this question; and, looking at it from that point of view, I can have do doubt that the course which the Government of India have determined to take is a just and right one, for the initiation of which the people will feel most grateful to Your Lordship."

The Hon'ble Rai Bahadur P. Ananda Charlu said:—"At the first blush, it may look as though we are flying in the face of free trade principles. But, in reality, we are doing nothing of the kind. If our action were abnormal, it is only directed against steps which are themselves abnormal and which, while inflicting deeper and deeper injury on us, seem to admit of no other cure, in order to safeguard what are of vital interest to us. But, in truth, are we embarking on anything abnormal? In my humble judgment, we do no such thing.

"If the sugar, whose importation is proposed to be subjected to countervailing duties, were the outcome of natural resources and of normal conditions, it may perhaps be arguable whether, on commercial grounds, an exception could be taken to it on the ground of irreparable loss to us. It may be equally arguable whether, on commercial grounds, it is expedient to stem, by artificial means, a torrent which—as unerringly as does water—must find its proper level sooner or later. But the sugar in question is unnaturally produced. It is made capable of being sold as cheap as it is now, only by reason of bounty which bolsters it up—be that bounty in the shape of a prior advance by the States to stimulate manufacture or be it in the shape of remission or refund of taxation after the commodity has been produced, in order to quicken its circulation in the Indian and other unprotected markets, for the up-keep or welfare of which the bounty-giving Governments make no sacrifice or have no concern. Noting the tendency it has created to alarmingly diminish the cane-cultivation in extensive tracts, solely and wholly devoted to it in this country, and the dreaded certainty of danger that our sugar manufactories will have soon to shut shop and pass out of their present prosperous existence, the day is not distant when locally-made sugar is sure to be a thing of the past or be relegated to the limbo of our other and numerous extinct industries. When that bitter cup is full to the brim, the imported sugar will increase by leaps and bounds, rule our markets absolutely without a rival, and its owners may dictate their own terms or drive the hardest bargains. Let us suppose—and the supposition is by no means unnatural—that the bounties which now prop up the manufacture in the foreign countries are withdrawn—be it from caprice or because no longer necessary or because wiser counsels prevail. The result will be, that a well-established and thriving industry would have been, in the meantime, brought (at best) to the brink of ruin. The capital and labour, which are now working with excellent results, would be diverted from the production of commodities of extensive local consumption and sent adrift in problematic search of tentative re-investments in a spirit of timid experiment or hazardous enterprise, so foreign to the genius, nature and habits of the people of this country. It is easy to realise what will be the fate of even the present consumer when reduced to a condition of sole or virtual dependence on the tender mercies of that foreign producer. Viewed in this light alone, the present Bill is fraught with good to the consumer as well as the producer in this country. This is not all. I think, that, unless, indeed, we rigidly define the term the 'consumer' as an intensely and sordidly selfish being the word has a wider significance in this country where spontaneous charity is enjoined on every individual as inviolable and meritorious religious duty towards the poor and helpless within the fold, common to them and him. If, then, the consumer should regard himself, not merely as living for himself and his immediate kith and kin, but as one acting for and acted upon by the common good of his community, as distinguished from other communities, he could not help taking a far more comprehensive view of his position. He would then conceive his well-being as part and parcel of the well-being of the rest of his community and welcome some amount of hardship and sarcrifice on his part without murmur. If, again, the present consumers are of the well-to-do classes as asserted, our position is all the more strong; for we must bear in mind that they must then realise a near and repeatedly-recurring future when they must come in for their share of contribution, either in the shape of additional taxes or of large charities, in case the hosts of cane-growers and sugar-makers of the day are thrown out of employ or

reduced to a state of starvation—as is but too likely in this land of periodic famines—and are thereby cast on their hands or on the State, which is the same thing. Having regard to their inherited nature or to this eventuality, which—be it repeated—is by no means improbable, the effect of this Bill, even if it should cause a rise in the price of sugar they use, would be to lay men of comparative competence under a species of indirect taxation for the benefit of their poor brethren, which they will not and ought not to grudge. These are among my reasons for advocating this measure with perfect loyalty to free trade doctrines.

"There is another ground—not an altogether inapt ground—in favour of this Bill. It is this, namely, that it is calculated to dispel the notion—more or less widespread and more or less groundless—that free trade has ruined the indigenous industries—a notion which cannot but lend an undesirable colour to the opinion entertained about the effects of the British rule. I regard it, therefore, not only as inaugurating an era in the fiscal legislation of the country and as being welcome on that account and on its own merits but also as dispelling the above erroneous notion. There is no doubt, that with the advent of British sovereignty, the reign of free trade has synchronised in this country; and, with that reign, a taste has set in for British articles of clothing which began to flow in unchecked. But the truth ought not be disguised that such is, after all, the fault of the altered tastes rather than of free trade. Certain new ideas of the decencies and comforts of life, which have followed in the wake of the civilization of the West, have weaned not a few from their old and traditional ways; but free trade, as such, has had nothing to do with that result. Exigencies that have arisen in consequence may have, as I think they did, intensified the result, but it is difficult to see how that result could be helped or could be said to have been originated by it. For every one man or woman who fell in with and adopted the Western fashions, there are tens, if not hundreds, who have adhered to their old ways, in a perceptible degree. It is therefore illogical to say that because a large number of the well-to-do and the seekers of the fashion of the day have utilised the Western articles, the articles themselves or the natural facilities for their influx should be denounced or proscribed. Giving free trade the fullest swing, it seems to me that the local industries might well have thriven if the tastes of the people had, in the bulk, remained unvaried and unvariable. Take, for instance, the almost entire masses of the Hindu ladies. They have been untouched by the fashions of their Western sisters, and the species of manufacture which supplied their clothing have, I believe, continued to hold the ground. As surely would the manufacture of male clothing have continued its hold, if men too could be brought to display or develop a like tenacity to old habits. While for these reasons I regard the prevailing outcry against free trade as unreasonable, while I recognise in the Bill before us a departure which marks a desirable epoch in our fiscal legislation, and which will prove a powerful solvent of doubts entertained about the operation of free trade doctrines, I cannot but share the feeling nor get rid of the impression that, just as the threatened ruin of the cane-growers and sugar makers has laudably moved our Government towards this measure of preventive legislation, the urgent need exists to inaugurate measures, on similar lines, to meet the case of the millions of skilled workmen whose ruin is almost accomplished and whose instructed and inherited aptitude for delicate workmanship, menaced with extinction at every famine that comes round, presents a no less anxious and grave problem of the day.

"Claims of international commerce may be said to be in the way. I am not unaware of the motives, results, and advantages laid to its credit. I nevertheless venture to think that it suffices to say just at present that the subject has not yet ceased to be controversial and that, so far as this dependency of the British Sovereign is concerned, those motives, results, and advantages are either too remote or too problematic to be efficacious. In the meantime let me allow that the claims of international commerce are indeed great. But the claims of a nation's prosperity and its freedom from utter impoverishment are even greater. The question may well be asked, whether the sustenance and prosperity of millions of lives, which run imminent risk of being either altogether lost or sensibly enfeebled are not to be a primary object of every Government—a consideration paramount above commerce, international amity, and all else. One may well entertain the grave doubt whether there is not, to the problem to be grappled with, a *political* as well as a *commercial* and an economical side, whether the European and the American Governments, which are not wanting in intelligence and which have persisted in non-free-trade principles in dealing with other States, side by side with a full recognition of free-trade principles within their own territorial jurisdictions, do not after all, act in tacit acknowledgment of some such distinction; and whether sufficiently long periods of such persistence have not elapsed to refute by practical concrete results the abstract theory that the policy is bound to prove suicidal.

"But these latter remarks are superfluous to set on its legs the Bill before us—a Bill which has indisputable merits of its own. The sole aim with which I have thrown out those observations is to hint at what seems to me a possible solution of a kindred problem of no less gravity; and I have done so, in the hope that what is but an academical debate to-day in relation to the Bill now on the anvil, will, before long, pass within the domain of practical politics; and that this Bill will prove but the harbinger of other measures to come, though they must needs be experimental, fragmentary, and cautious at the outset."

The Hon'ble SIR JAMES WESTLAND said :—"In the remarks of the Hon'ble Mr. Mehta I think he has failed to observe the distinction between the functions of this Council and the functions of a Select Committee. The question whether this Bill is in principle required or not and whether we ought to provide for the protection of the sugar industry against existing adverse influences is, it seems to me, a question which the Council must decide for itself, and not a question which it should refer to a Select Committee. The business of a Select Committee rather comes in after the principle has been laid down and after the general tendency of the proposed legislation has been accepted, to see whether the proposed Bill is correct in point of form, or whether it cannot be altered and improved in respect of the subsidiary arrangements connected with it. The reason why no proposal has been made to refer this Bill to a Select Committee is that if the principle is adopted there is really very little work for the Select Committee to do. The Bill, as I said last Council day, has been framed on the basis and upon the wording of an Act which is actually operative for purposes to which we desire to apply this Bill. It has been carefully framed upon the experience of another legislature, and I think we may take it for granted that a further consideration of it by a Select Committee would not have altered it in point of form, or suggested any improvements in a matter so simple as that of giving powers to Government to impose duties of a certain class. Then, as regards the statement of the Hon'ble Mr. Mehta that he did not consider that the Bill was of a sufficiently urgent character to be brought up to be passed at this Council, I think I may reasonably refer him to the two speeches which have been delivered, one by the Hon'ble Mr. Chitnavis, himself an agriculturist and in close touch with all agricultural questions, and the other by the Hon'ble Mr. Charlu, who is a keen observer and reporter on all matters relating to social economy in India. I think the statements of those two gentlemen will have convinced the Council that after all there was some reason for regarding this measure as an urgent one and seeking to pass it before the session comes to an end. Nor do I think that it is altogether reasonable to refer to a Select Committee the question of whether the statistics which have been laid before the Council are correct. I have not stated these matters of my own knowledge. What I stated to the Council was taken from the official reports of the high officers who were instructed to enquire into the subject, which reports have been based upon very careful enquiries. These papers I quoted pretty fully last Council day, and I can only say that if any Hon'ble Member had desire to verify them still further, the fuller reports and details could easily have been placed at his disposal. I trust, therefore, that the Council will feel that the measure which is before them has been amply justified and will, on the motion which I shall presently make, be pleased to pass it into an Act."

The motion was put and agreed to.

The Hon'ble SIR JAMES WESTLAND moved that to the Bill the following clause be added, namely :

"3. This Act shall not apply to any imported article the bill of lading for which was signed and given before the commencement of this Act."

Act not to apply in certain cases.

He said :—"I am afraid that the Hon'ble Mr. Mehta may now pounce upon me and say that my moving this amendment is evidence that the matter ought to have been laid before a Select Committee ; but this really is no new matter. It is not brought before the Council for the first time. The Hon'ble Mr. Allan Arthur mentioned it at the last meeting, and I gave an undertaking that I should consider the subject with Mr. Allan Arthur and with his constituents, and be able to lay it before the Council for consideration when the Bill came up to be passed. In an ordinary measure for changing the duties imposed by the Tariff the law prescribes that the contracts which have been made before the change have to be modified with reference to that change. The principle upon which that provision in the law is based is that under ordinary circumstances the change of a tariff duty results in the change of the price of the article concerned more or less exactly by the amount of the duty imposed or taken off. If this were merely a revenue measure, if it were a measure merely for altering the rate of duty which is demanded at the ports upon sugar, I would be strongly averse to making any alteration in the existing provision of the law relating to current contracts for purchase or sale of articles to be imported. I take it for granted that people who make contracts of the kind know what the law is relating to them and relating to the operation upon them of any subsequent alteration of duty. But the present masure is not one that has simply for its object the alteration of a duty. It is one that will have some effect upon the sugar trade as a whole. No doubt the price will enhance. It has been enhanced, I believe, by a certain amount, but the price will not be enhanced by the same amount by which we alter the duties. The consequence is that where we now throw upon the forward seller of sugar the obligation to pay the customs duty at the port, he may indeed pass it on to his purchaser, but at the same time this purchaser will not be enabled by a corresponding rise of price to recover it from his purchaser. Well, the form which the provision should take with respect to these contracts for future delivery has been very carefully considered by me in consultation with those most competent advisers,—the Committee of the Chamber of Commerce,—and the form in which the clause is proposed is a form which seems to them the best for the

saving of existing contracts, namely, that sugar which has been put on board a steamer at a foreign port before the date of the commencement of this Act, that is to say, before to-day, shall not be affected by the imposition of these new duties. This will postpone for a short time the operation of the Act so far as concerns the protection of the sugar-industry, but it will relieve merchants from a good deal of uncertainty regarding their transactions and from what may be a good deal of unfairness in the operation of the law. Another form which was proposed was simply to exempt from the operation of the Act all sugar which was the subject of a contract made before the Act was introduced. It seemed to me there were strong objections to giving legislation that form, because it is a section of which the operation would not in regular course come to a close by any fixed time. We might have sugar imported a year hence, or two years hence, or even ten years hence, upon the basis of a contract already made. We cannot postpone the operation of the Act for such an indefinite time, or give to future importations, which, as I say, might extend over years, an advantage over other importations going on at the same time; whereas if the Council accepts the provision for security of current contracts, which I have laid before them, the result will be that after a very short time—I suppose a month at the outside—the whole of this temporary exemption will have ceased and all sugar imported into the country will be under the operation of the Act"

The Hon'ble MR ALLAN ARTHUR said :—"I think the amendment proposed by the Hon'ble Sir James Westland fairly meets the difficulties which I pointed out at the last meeting of the Council might arise in bringing this Bill into operation. I agree with the Hon'ble Member in regard to what he said as to the difficulty of exempting all contracts that were made before the passing of the Act from the operation of the Act, and I further think it would give the holders of such contracts a greater advantage than they can reasonably claim.

"The holders of contracts for sugar now at sea, *i.e.*, for which bills of lading are signed, will no doubt make a profit on their contracts. Beet-sugar has already risen 12 annas per maund, but as the dealers who hold such contracts probably also hold contracts for sugar which will be shipped after the passing of the Act, they will probably make a loss on these latter contracts, as it is improbable that the price of beet-sugar will advance to the full extent of the duty imposed. There will be a set-off, however, in the profit on the former contracts against the probable loss on the latter contracts, and, on the whole, I think the amendment meets the difficulties as well as they can be met."

The motion was put and agreed to.

The Hon'ble SIR JAMES WESTLAND moved that the Bill, as amended, be passed.

His Excellency THE PRESIDENT SAID :—"Before I put the question that this Bill be passed into law I should like to make a few observations with regard to it. I have been glad to notice the complete unanimity that has prevailed with regard to the Bill in this Council—representative as it is of so many diverse and important interests. The Hon'ble Mr Mehta indeed would have preferred that this Bill should have been referred to a Select Committee—a contention to which I think that an adequate reply was given by the Hon'ble Sir James Westland. I also understood him to urge that it might have been desirable that further enquiry should have taken place with respect to the subject matter of this legislation. Well, I have always heard it made a reproach against the Indian Government that it is perpetually conducting enquiries, and very seldom acting upon them; and that reproach I, at any rate, during my time of administration here, desire to escape.

"The answer to my Hon'ble friend Mr. Mehta is that we have been conducting enquiries for a whole year past. We have received representations from every leading Chamber of Commerce in the country, and from most, if not all, the important firms connected with this industry. We have addressed observations to, and received replies from, the Governments of all the provinces and districts of India concerned. We should have had if my Hon'ble colleague's advice had been followed, to wait for the best part of another year before we introduced this legislation We regarded the case as urgent, and we were not prepared to accept such a delay. At the same time I am glad to notice that the Hon'ble Mr Mehta, although he delivered this criticism on a point of detail, did not withhold his assent, which I am certain that he is prepared to give, to the general principle of the measure. Then we have had on a previous occasion and again to-day a statement approving the Bill from the Hon'ble Mr. Allan Arthur, the distinguished representative of European mercantile interests in this capital, and finally we have had two speeches from the Hon'ble Mr. Chitnavis and the Hon'ble Mr. Ananda Charlu, which I take it we are entitled to regard as typical of the opinions that are held by those important sections of the native community which they represent at this table I am therefore, I think, justified in saying that at any rate within these walls complete unanimity has prevailed with regard to the principle of the Bill.

"This complete unanimity here reflects an almost equally complete unanimity outside. There are, it is true, certain interests and certain Chambers of Commerce—Bombay and Karachi I may name—in which those interests are strongly represented, which have not entirely concurred in the necessity for countervailing duties at this stage. Those representations are entitled to due consideration, but it is to be noted that they do not

come from the areas where the sugar-cane is grown, where the refineries exist, or where the real effect of the bounty system is felt. They represent in the main the interests neither of the producers nor of the consumers, but of the importing merchants. On the other hand, if I regard either the representations to which I have already referred, and which have been received by us from the Local Governments, or the reception which our proposals have met with alike in the English and the Native Press of India, I do not hesitate to say that few measures have ever passed through this Council with a greater weight of qualified and homogeneous opinion behind them.

"Now the first point that I desire to emphasise is this—that it is in the interests of India, and of India alone, that this legislation has been proposed by us, and that I have authorised the introduction of this Bill. It may be that our Bill may ultimately affect the action of other countries. It may more immediately touch the interests of certain of our own colonies as well. The Hon'ble Sir James Westland in his speech to-day has alluded to the representations that we have received from the colony of Mauritius, a colony in which, in view of the enormous Indian population that is there engaged in labour, we here are bound to take a close interest, and whose welfare we should be glad, I am certain, consistently with our own, to subserve. It may be that this Bill will set an example of far-reaching significance. By some it may even be regarded as a factor in the Imperial problem. It is from such points of view that we may expect the measure to be examined, and perhaps criticised, in the British Parliament in London. I do not deprecate such examination, or such criticism, conscious that it will not weaken, but will rather strengthen, our case. All I have to say here is that our conduct has not been determined by those considerations. We are exercising our own legislative competence, of our own initiative, though with the sanction and concurrence of the Secretary of State, to relieve India from an external competition, fortified by an arbitrary advantage, which can be shown to have already produced serious consequences upon our agriculture and manufactures, and which, if unarrested, is likely to produce a continuous and a dangerous decline.

"There is another point upon which I must, in passing, say a word. I have been glad to notice that no one in this Council has ventured upon the argument that we are guilty of an economic heresy in our proposal to meet bounties by a countervailing duty. Bounties are in themselves an arbitrary, and in my opinion a vicious, economic expedient designed in exclusively selfish interests. They are inconsistent with free trade, because they extinguish freedom, and they reverse the natural currents of trade. To meet them by a countervailing duty is to redress the balance and to restore the conditions under which trade resumes its freedom I do not think that we need pay much attention, therefore, to the mutterings of the high priests at free trade shrines. Their oracles do not stand precisely at their original premium This is not a question of economic orthodoxy or heterodoxy ; it is a question of re-establishing a fiscal balance which has been deflected for their own advantage and to our injury by certain of our foreign competitors.

"Moreover, if the utilitarian basis upon which the doctrines of free trade are supposed in the last instance to rest, *viz.*, that they regard the interests of the greater number, be examined, out of their own mouths would the prophets of those doctrines, in India at any rate, be condemned. For here we are dealing in the case of the sugar industry with a population the vast majority of which are not consumers of a cheap imported article but are themselves producers of the raw material, and in their capacity as consumers, consume for the most part the article which they have themselves produced and worked up. In other words, the conditions that prevail in England are completely reversed. The majority in England consists of poor consumers to whom it is indispensable that the price of sugar should be low. The minority consists of capitalist producers On the other hand, the majority in India consists of poor producers whose industry is at stake ; the minority consists of well-to-do consumers of refined sugar who are not likely in my judgment, to be affected seriously, if indeed they are at all affected, by enhanced prices resulting from our legislation, but who, if they were, could not claim that their interests should override those of the overwhelming majority of the population.

"Now I shall not recapitulate the figures which have been laid before you with so much ability and clearness by the Hon'ble Sir James Westland when he introduced the Bill at our last meeting ; but let me remind you of the facts which have been established in this discussion They are these :—firstly, that there has in the last few years been an enormous increase in the importation of beet-sugar into India from Germany and Austria—a fact which is unquestionably due to the loss by the American market of those countries in consequence of the imposition of countervailing duties by the Government of the United States in 1897 ; secondly, that in the same period the rupee price of sugar in this country has seriously fallen ; thirdly, that there has been a contraction in nearly every part of India in the area under sugar cultivation, the total reduction being estimated at as much as 13 per cent ; fourthly, that there has been a widespread and a still unarrested closing of native refineries, a phenomenon which is capable of one explanation, and one alone ; for while it may be argued that the decline in the total area under cultivation may be partially due to other causes such as famine and the low prices resulting from famine, that this is not the case in respect of the factories which have been closed is demonstrated by the fact that in districts where cultivation has increased,

or remained stationary—in other words in districts which have remained unaffected by famine—the refineries nevertheless have been, and still are being, shut.

"From these facts it appears to me to be impossible to draw any other conclusion than that this decline in an Indian industry—in which I have seen it stated that two millions of people are employed and in which the value of the annual crop has been estimated at nearly twenty millions sterling—is due to the importation of beet-sugar at a price below the natural cost of production *plus* the cost of transport, in other words, to the unrestricted competition of a bounty-fed article.

"Now this is a state of affairs which neither the Government of India nor I, as the head of that Government, from whatever point of view we may regard it, can contentedly accept. If we look at it from the point of view of the agriculturist, we cannot sit still and look on while he is impoverished by the economic exigencies of Continental nations. If we regard it from the point of view of native manufactures, what would be the meaning and value of the speeches which I have made since I came to India about the encouragement of native enterprise, if I were to acquiesce in the tacit suppression of this promising branch of indigenous industry? We ought, on the contrary, I think, to stimulate and to encourage its development by every means in our power. Finally, if I approach the question from the point of view of the Government, while we should be strangely constituted if we could contemplate with equanimity the preventible growth of an agrarian and industrial grievance, which must sharply react upon the general prosperity of the people, we should also be poor stewards of our own estate if we were to acquiesce in a condition of affairs that must detrimentally affect both the land assesments and the canal returns, and in this way jeopardise the ultimate revenues of the State.

"These are the grounds—which I have endeavoured to state in their wider rather than in their narrower aspect—that have induced the Government of India to introduce this Bill, and that enable me confidently to recommend it to the acceptance of this Council and of the public."

The motion was put and agreed to.

MILITARY DEPARTMENT.

Simla, the 12th May, 1899.

APPOINTMENTS.

ADJUTANT-GENERAL'S DEPARTMENT.

No. 499.—Brevet-Lieutenant-Colonel A. R. Martin, Indian Staff Corps, officiating Deputy Adjutant-General in India, to be Deputy Adjutant-General in India, *vice* Colonel E. A Money, C.B., resigned. Dated 6th May 1899.

ARMY STAFF.

No. 500.—Captain I. Kirkpatrick, 2nd Battalion, South Staffordshire Regiment, to be a Station Staff officer, 1st class, in the Madras Command, *vice* Major W. F. Coleman, appointed a Deputy Assistant Adjutant-General. Dated 13th February 1899.

No. 501.—Captain R. M. Betham, 8th Regiment of Bombay Infantry, to be District Recruiting officer, Poona, *vice* Captain G. W. C. Knatchbull, vacated. Dated 23rd March 1899.

No. 502.—Captain F. St. D. Skinner, 2nd Battalion, Royal Sussex Regiment, to be a Deputy Assistant Adjutant-General for Musketry on the establishment, *vice* Captain E. H. F. Finch, appointed to the Head-Quarters of the Punjab Command. Dated 24th April 1899.

No. 503.—Colonel F. H. Whitley, 2nd Battalion, Durham Light Infantry, to be an Assistant Adjutant-General on the establishment, *vice* Major E. R. C. Graham, who has vacated. Dated 26th April 1899.

ORDNANCE DEPARTMENT.

No. 504.—Lieutenant H. E. Garstin, Royal Artillery, to officiate as an Ordnance Officer, 4th class, to fill an existing vacancy, with effect from the 28th April 1899.

No 505.—In G. G. O. No. 3, dated 6th January 18 9, *for* "Lieutenant G. G. K. Duff, Royal Artillery," *read* "Lieutenant H. W. Bowen, Royal Artillery."

No. 506.—In G. G. O. No. 25, dated 13th January 1899, *for* "Captain E. L Tomkins, Royal Artillery," *read* "Lieutenant G. G. K. Duff, Royal Artillery."

PERSONAL STAFF.

No. 507.—The Viceroy and Governor-General has been pleased to make the following appointment on His Excellency's personal staff.

To be extra Aide de-Camp.

Lieutenant H. N. Holden, 5th Regiment of Bengal Cavalry. Dated 1st May 1899.

STAFF CORPS.

No. 508.—With reference to paragraph 6 of the regulations published with clause 92, India Army Circulars, 1891, the undermentioned officers of the Unattached List are admitted to the Indian Staff Corps, with effect from the dates specified, subject to confirmation by the Secretary of State for India:

Second-Lieutenants—

Vere Arthur Coaker. Dated 30th March 1899.

Grenville Pulteney Gurdon. Dated 3rd April 1899.

Hugh Lennox Dyce. Dated 4th April 1899.
Henry Clifford Kay. Dated 9th April 1899.

NATIVE ARMY.

No. 509.—*10th Regiment of Bengal (Duke of Connaught's Own) Lancers*—

Jemadar Mian Khushal Chand, appointed on probation in G. G. O. No. 474 of 1897, is confirmed in that rank, with effect from the 11th April 1897.

No. 510.—The following direct appointments are made:

16th (The Lucknow) Rajput Regiment of Bengal Infantry.

Ram Singh to be Jemadar, on probation, to fill an existing vacancy. Dated 2nd November 1898.

33rd (Punjabi Muhammadan) Regiment of Bengal Infantry.

Sultan Fateh Ali Khan to be Jemadar, on probation, to fill an existing vacancy, with effect from date of joining.

COMMANDS.

DISTRICT.

No. 511.—Colonel N. R. Stewart, Indian Staff Corps, Colonel on the Staff, Ferozepore, to officiate in Command of the Hyderabad Contingent, with the temporary rank of Brigadier-General, *vice* Major-General Sir M. G. Gerard, K.C.S.I., C.B., appointed to officiate in Command of a 1st class district. Dated 27th April 1899.

No. 512.—Colonel G. H. More-Molyneux, Indian Staff Corps, Colonel on the Staff, Cawnpore, to officiate in Command of a second-class district in the Bengal Command, with the temporary rank of Brigadier-General, while so employed, *vice* Brigadier-General Sir A. Gaselee, K.C.B., officiating as Quartermaster-General in India, and in relief of Brigadier-General E. A. Money, C.B. Dated 4th May 1899.

LONDON GAZETTE.

No. 513.—The following extract is published for general information:

MEDICAL DEPARTMENT.

SUBORDINATE.

No. 514.—With the approval of the Right Hon'ble the Secretary of State for India, the Government of India sanction the following changes in the conditions of service of the warrant officers of the Indian Subordinate Medical Department, with effect from the 1st of April 1899:

1. The existing grade of 3rd class assistant surgeon is abolished and the service will be divided into four classes as shown below:

Old designations. (Grades.)		New designations. (Classes.)	Corresponding Rank.	Pay. Rs.
1st class	Above 5 years' service	1st class	Conductor	200
	Under 5 " "	2nd class		150
2nd class	Above 5 " "	3rd class	Sub-Conductor	110
	Under 5 " "	4th class		85
3rd class				

Note.—Compensation for quarters, furlough pay, half-pay, pensions, etc., of the new classes will be according to the allowances at present authorised for the corresponding former grades.

2. Subject to good-conduct and efficiency and in the case of 3rd class assistant surgeon the passing of an examination also, as detailed in paragraph 3, a service of five years in the 4th class and of seven in the 3rd and 2nd class, respectively, shall entitle as assistant surgeon to promotion to the next higher class.

3. Third class assistant surgeons will, before being eligible for promotion, be required to pass an examination in surgery, practice of medicine, materia medica, hygiene, midwifery and acquaintance with the regulations which govern military hospitals, at any time before the end of the twelfth year of service. No allowance on any account, including that of field service, will be made for failure to pass this examination which will be held annually under the orders of the Director-General, Indian Medical Service, who may, on the advice of the examiners, remand a candidate to his studies for any period not exceeding two years.

4. (*a*) The assistant surgeons in the service on the 1st April 1899 (excluding those who have been specially promoted, degraded or passed over for promotion during their service) will be classified from 1st April 1899, according to their length of service as follows:

Those under five years' service will be graded in the 4th class;

Those of 5 and under 12 years' service will be graded in the 3rd class;

Those of 12 and under 19 years' service will be graded in the 2nd class;

Those of 19 years' service and over will be graded in the 1st class; and their rank in their new class will in like manner be fixed according to the date of their warrant rank. Thus an assistant surgeon who entered the service on the 1st August 1886, will be placed in the 2nd class and will rank from the 1st August 1898.

(*b*) An assistant surgeon, who has been specially promoted, degraded, or passed over for promotion during his service will be placed in the same class as, and immediately below, the assistant surgeon next above him in his present grade whose promotion has been normal and the date of his rank in his new class shall be the

same as that of a normal assistant surgeon and in his subsequent promotion he shall (unless again specially promoted, degraded or passed over for promotion) be treated according to paragraphs 2 and 3 above as if his entry into the class occurred on such date.

(c) All promotions made under paragraph 4 (a) into the first and second classes shall be subject to the condition that the assistant surgeons so promoted shall, if not already qualified, qualify within two years in accordance with paragraph 3 above.

PROMOTIONS.

INDIAN STAFF CORPS.

No. 515.—Subject to Her Majesty's approval, the undermentioned officer is granted the temporary rank of Lieutenant-Colonel, whilst serving as regimental commandant, Indian Army:

Major Lewis Montgomery Murray Hall,—2nd April 1899.

No. 516.—The following promotions are made, subject to Her Majesty's approval:

To be Lieutenant-Colonel.

8th May 1899.

Major Edward Henry Hopton Montresor.

Lieutenants to be Captains.

9th May 1899.

Horace Walter Cobham.
Bernard Scott.
Julian Stuart Dallas.
Richard George Bagley.
Thomas Edwin Scott, D S O.
Arthur Hay.
Henry Alan Vallings.
Charles Roderick Maclagan Hutchinson.
Ernest Douglas Money.
Leslie Hawthorne Marriott.

Second-Lieutenants to be Lieutenants,

20th April 1899.

James William Sherrard
Edward Leyborne Popham.
Ronald Stuart Gordon.
Hedley Morton Battye.
Francis Stewart James Murray.
George Hutchison.
Hugh Ernest Rudkin.
Andrew Galbraith Cowan.
George Wright Stratford Sherlock.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 6th, 1899.

During the week under review there have been heavy rains and strong winds and gales in Burma, due to the advance northward of the depression which was developing over the Andaman Sea at the close of last week, but over India the weather has been quiet and generally fine. Pressure has been high and above the normal average over Bombay and low and below the normal over Northern and North-Eastern India. As a result, dry westerly and north-westerly winds have prevailed over the greater part of India, and the only rainfall which has been received over India has been light or moderate showers occurring during dust and thunder storms. Very hot weather prevailed during the week over Northern India where the wind was westerly, but over the central parts of India and over the greater part of the Peninsula where the wind was north-westerly or even northerly the mean temperature was steadily lower than usual. In Burma the heat was largely controlled by the rainfall, accompanying the storm mentioned above, and was very largely below the normal on the 4th and 5th May when the rainfall was very heavy.

Daily Summary.—*Sunday, April 30th*—Pressure was changing very slightly, and the only important feature in the weather was the storm which was developing over the Andaman Sea and which was drawing the wind into north in Lower Burma and occasioning rain over Lower Burma and Tenasserim. Over India the weather was very quiet, pressure generally higher than usual and the wind between north-west and west except in the Bay area where the directions were southerly. Dust and thunder storms had occasioned showers of rain over parts of Bengal, of the southern half of the Peninsula and of Rajputana,

but the rainfall amounts were small. The heat had been greater than usual over Northern India, the greater part of Burma and the Madras coast districts, but had been below the normal elsewhere. The largest opposite variations from the normal were —7·0° at Chanda and + 8·5° at Mandalay.

Monday, May 1st.—The barometer had fallen almost everywhere. The change had been very rapid at Diamond Island, and the storm which had been developing over the Andaman Sea had approached that station where pressure was over 0·25 inch below the normal. The winds were cyclonic around the Andaman Sea and were blowing a gale at Diamond Island. Rain had fallen over Tenasserim and Deltaic Burma, the heaviest amount being 5·67 inches at Diamond Island. Over India the pressure and wind conditions were unchanged, and the only rainfall was some light showers accompanying dust and thunder storms. The heat remained excessive over the greater part of Northern India and of Burma and the Madras coast districts, while over Lower Burma, the Peninsula and the central parts of India the weather was cooler than usual.

Tuesday, May 2nd.—Pressure had risen briskly over Tenasserim and fallen over Lower Burma. The storm had continued to move northward and lay close to Bassein, in which neighbourhood the barometer was between 0·30 inch and 0·36 inch below the normal. Cyclonic gales prevailed over Lower Burma where heavy rain had fallen. Over India there was still no important change to record. Pressure was higher than usual generally, but much more so over the Western desert than over Eastern and North-Eastern India. Westerly to north-westerly winds prevailed throughout, and the only rainfall was a few light local thundershowers The heat over Northern India was increasing, and the mean temperature was slightly to very largely excessive in Northern India and in the Madras coast districts. It still remained low over Lower Burma and the greater part of the Peninsula and of North Bombay.

Wednesday, May 3rd.—The barometer had risen with great rapidity over Lower Burma, and the cyclonic storm had filled up. Elsewhere there had been no important change. Pressure was high along the west coast and low over West Bengal and the West Punjab. The wind was still strong in parts of Burma, but the gales had subsided. The direction of the wind was more northerly than usual over the Peninsula. Rain continued to fall over Burma, but over India the weather was fine with a few local thundershowers. The distribution of temperature relatively to the normal was little changed, and the principal variations from the average were +9·2° at Rawalpindi, +8·4° at Silchar, —7·6° at Bassein and —5·6° at Belgaum.

Thursday, May 4th.—The barometric changes had been generally unimportant and irregular. Southerly winds were blowing over the Bay area and into Bengal and easterly winds along the foot of the Eastern Himalayas, but elsewhere the directions were between west and north-west with more northing than is usually the case. Dull, rainy weather prevailed over Burma, but the rainfall amounts were not heavy except at Minbu where 7·90 inches had been received. Over India the weather remained generally fine, but the local thundershowers were somewhat more widespread and somewhat heavier. The weather was cooler than usual over Burma (Minbu —12·7°), the west of the Peninsula (Belgaum —5·9°) and North Bombay and Rajputana (Hyderabad —5·1°), but elsewhere the heat was excessive, the principal variations from the normal having been +10° at Rawalpindi and +9·7° at Mymensingh.

Friday, May 5th.—The barometer had fallen over North Bengal and risen elsewhere. Pressure was considerably above the normal over North-Western and Western India and considerably below in Bengal. Westerly winds prevailed down the Gangetic Plain, southerly winds over the Bay area and north-westerly winds elsewhere. Showers of rain had been received over Burma, Assam and Sikkim, while dust and thunder storms, in some cases accompanied with rain, had been experienced in different parts of North-Western and Central India and the Peninsula. The heat was greater than usual over Northern India—more particularly in Bengal—and less than usual elsewhere. Some of the more important variations from the normal were + 8·1° at Rawalpindi, + 11·2° at Patna, —10·6° at Yamethin, — 5·2° at Belgaum and —6·4° at Bickaneer and Hyderabad (Sind).

Saturday, May 6th.—Pressure had increased, but generally by small amounts, and the general conditions of pressure were unchanged. Hot westerly

winds prevailed down the Gangetic Plain into West Bengal, while southerly winds prevailed over the Bay area and north-westerly or variable winds elsewhere. The weather remained showery in Assam, but the rain had ceased in Burma. Local dust and thunder storms continued to give rain to parts of Central India, the Central Provinces, and Southern India. Very hot weather continued to prevail over the Punjab, the North Gangetic Plain, Bengal and Upper Burma, the principal variations having been +5·2° at Rawalpindi, +12·1° at Bogra and + 5·2° at Bhamo. Elsewhere the heat was generally less than usual.

Temperature.—The weather during the week under review has been generally excessively hot over the Punjab, the Gangetic Plain and Bengal where during the greater part of the week there have been hot westerly winds, but over the Peninsula, North Bombay and the neighbouring regions where the wind has been north-westerly the heat has been slightly to considerably less than usual, while in Burma, as the heavy rain extended, the mean temperature fell to much below the normal.

The following table gives the mean temperature variation data for the week :

Province.	April 1899.	May 1899.						Mean variation of week.
	30th	1st	2nd	3rd	4th	5th	6th	
	°	°	°	°	°	°	°	°
Burma	+2·1	—0·5	—1·9	—3·3	—5·1	—4·0	0	—1·8
Assam	+3·9	+4·7	+3·2	+5·3	+6·9	+6·5	+2·5	+4·7
Bengal	+3·7	+3·8	+4·7	+5·2	+7·4	+8·2	+7·9	+5·8
Orissa	+0·6	—2·3	+1·1	+1·4	+4·0	+4·9	+5·4	+2·2
Bihar	+2·2	+2·8	+3·8	+4·2	+5·4	+8·4	+8·4	+5·0
Chota Nagpur	+1·9	+0·1	+2·3	+1·9	+4·1	+5·8	+5·2	+3·0
N.-W. P. and Oudh	+0·1	+0·5	+4·0	+3·5	+4·0	+3·1	+2·5	+2·5
Punjab	+3·6	+5·7	+6·9	+6·0	+6·2	+2·4	+1·2	+4·6
Sind	—1·1	+0·6	—0·5	—1·1	—2·0	—3·7	—4·9	—1·8
Rajputana	—1·8	+0·7	+1·6	+1·5	—0·8	—3·5	—1·4	—0·5
Gujarat	—4·1	—1·0	—2·5	—2·1	—0·6	—3·3	—3·9	—2·5
Central India	—3·9	—1·6	+1·3	+1·4	—1·1	—3·0	—2·2	—1·3
Central Provinces	—2·6	—1·3	+0·5	+1·9	+0·9	—1·5	—0·2	—0·3
Berar	—2·3	—3·6	—1·0	+1·0	—0·1	—3·2	—0·5	—1·4
West Coast	—0·9	—0·8	—1·1	—1·7	—2·2	—1·7	—1·1	—1·4
Bombay Deccan	—3·3	—2·6	—5·3	—3·5	—2·5	—3·2	—2·0	—3·2
Mysore	—2·0	—5·4	—5·0	—4·0	—4·0	—2·1	—1·9	—3·5
Madras Coast	+1·4	+2·2	+4·2	+2·6	+2·9	+1·4	+1·2	+2·3
Madras Deccan	—3·2	—2·3	—3·3	—1·4	—1·7	—1·9	—0·5	—2·0
South India	—1·4	—1·8	—1·8	—1·5	—1·9	—2·3	—2·3	—1·9
Mean for whole of India	—0·4	—0·1	+0·6	+0·9	+1·0	+0·4	+0·7	+0·4

The mean temperature of the whole of India for each day of the week and for the whole week was about normal, but on turning to the provincial variations considerable differences are exhibited. Thus Assam, Bengal, Orissa, Bihar, Chota Nagpur, the North-West Provinces, the Punjab and the Madras Coast, all exhibited a moderate to large excess, while all the remaining provinces showed a deficiency. The greatest excess was in Bengal, the greatest deficiency in Mysore.

The following were the highest maxima reported on each day:

April	30th	108·5°	at	Cuttack.
May	1st	111·3°	„	Jacobabad.
„	2nd	110·8°	„	Do.
„	3rd	109·3°	„	Lucknow.
„	4th	108·4°	„	Gaya and Khushab.
„	5th	109·5°	„	Gaya.
„	6th	108·5°	„	Cuttack.

Rain.—As was the case last week and as is usual at this time of year, nearly all the rain which has fallen over the Indian area has accompanied dust and thunder storms, and has consequently been scattered, local and generally light. The only exception has been the rainfall in Lower Burma which accompanied the deepish depression which crossed the South-West Burma coast from the Andaman Sea in the early days of the week. This depression occasioned heavy rain in the Rangoon, Bassein and Maubin districts on the 1st and 2nd of May and in the Minbu district on the 3rd of May. In all other places the rainfall, as mentioned above, was connected with dust and thunder storms. These storms occurred principally on the 5th and 6th May in Assam, on the 30th April and the 1st and 2nd May in Bengal, on the 1st and 2nd May over the Peninsula and on the 5th and 6th May over the central districts. In the remaining parts of India where rain fell the fall was scattered throughout the week.

The rainfall table at the close of the summary shows that rain in appreciable amount, *i.e.*, the average actual rainfall of the division, 0·10 inch or more in amount, fell in twenty-eight of the rainfall divisions. These twenty-eight divisions included, all the Burma divisions, the Surma and Brahmaputra divisions of Assam, the deltaic, north and hill divisions of Bengal, Orissa, the hill division of the North-West Provinces, the South Punjab, Malabar, Mysore, the Bombay Deccan, Khandesh, Berar, Kathiawar, Sind, Baluchistan, Rajputana (East) and Central India (West), the north and south divisions of the East Coast, the South-Central, Central and South divisions of Madras and Hyderabad (South). In all the remaining divisions there has been either no rain whatever or the actual average rainfall has been less than 0·10 inch, and hence practically *nil*. Where rain was received the amount ranged from 4·63 inches in Deltaic Burma, 4·01 inches in the Bengal Hills and 3·57 inches in Tenasserim, to 0·10 inch in North Bengal and Central Madras and 0·11 inch in Orissa, Malabar and Gujarat. The third column of the table shows that the average actual rainfall of the week was greater than the normal average rainfall, in Tenasserim, Deltaic, Central and Upper Burma, the Bengal Hills, the South Punjab, Khandesh, Berar, the west of the Central Provinces, Gujarat, Kathiawar, Sind, Baluchistan, Central India, Rajputana, the East Coast (North) and Hyderabad (South). This excess was as much as 4·15 inches in Deltaic Burma, 2·25 inches in the Bengal Hills, 2·01 inches in Upper Burma, 1·78 inches in Tenasserim and 1·62 inches in Baluchistan, but elsewhere the excess was small and unimportant. On the other hand, in all the rainfall divisions not mentioned above, the week's rainfall was less than usual, the deficiency amounting to over 3 inches in the Surma and hill divisions of Assam and over 1 inch in the Assam Valley, Deltaic Bengal, North Bengal and Coorg.

The following were the principal large totals recorded at individual stations during the week:

Burma	Bilin, Thatôn	6·43 inches.
	Bassein	6·05 "
	Maubin	7·29 "
	Minbu	8·87 "
	Magwe	7·02 "
Assam	North Lakhimpur	4·63 "
Bengal	Darjeeling	4·01 "
	Satkhira (Khulna)	1·18 "
Punjab	Hansi	0·71 "
Mysore	Chennagiri (Shimoga)	2·80 "
Central Provinces	Melghat (Ellichpur)	2·20 "
Madras	Kelapalur (Trichinopoly)	2·33 "

The three concluding columns of the rainfall table show that the rainfall for the period February 26th to May 6th has been short of the normal in Arakan, Central Bengal, a large part of the Gangetic Plain and of the Punjab and in some central districts, but that in all other parts of the country the total fall has been normal or in excess of the normal, the excess in some parts of the Peninsula having been particularly large.

PROVINCE.	DIVISION.	Rainfall data for week ending May 6th, 1899. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from February 26th to May 6th, 1899. Average actual rainfall of season to date.	Average normal rainfall, February 26th to May 6th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
for *Meteorological Reporter to the Government of India.*

SIMLA, *11th May, 1899.*

M. FINUCANE,
Offg. Secretary to the Government of India.

B

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 30TH APRIL 1898, AND FROM 1ST JANUARY TO 29TH APRIL 1899.

N.B.—As regards the figures in column *Total earnings from 1st January 1899*, audited figures have been used, as far as possible.

Railway.	Average earnings per mile per week during the 1st half of 1898.	Week ending 30th April 1898.			Week ending 29th April 1899.			Earnings from 1st January to 30th April 1898.	Earnings from 1st January to 29th April 1899.	Increase.	Decrease.
		Mean mileage worked.	Earnings. Total.	Earnings. Per mile open.	Mean mileage worked.	Earnings. Total.	Earnings. Per mile open.

INVENTIONS and DESIGNS.

Calcutta, the 11th May 1899.

NOTIFICATIONS.

No. 1487 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 6th May 1899:—

No. 155 of 1899.—Max Gehre, engineer, of Rath near Düsseldorf in Germany. *An improved device of producing electric current at sea by the action of the waves.*

No. 156 of 1899.—Archibald Anderson Dickson, manufacturer, of Spadina road, in the city of Toronto, in the county of York, and province of Ontario, in the dominion of Canada. *An improved process and apparatus for forming cold peat into blocks for fuel.*

No. 157 of 1899.—Oscar Patric Ostergren, mechanical engineer, of 605 Halsey street, Brooklyn, and Moriz Burger, mechanical engineer, of 431 West 154th street, both of New York, U. S. A. *Improvements in apparatus for the liquefaction of aeriform fluids.*

No. 158 of 1899.—Bomanjee Sorabjee Engineer, merchant, residing at Pachora, Khandeish. *Improvements in cotton gins.*

No. 159 of 1899.—Birney Clark Batcheller, mechanical engineer, of 1518 North 15th street, Philadelphia, Pennsylvania, U. S. A. *An improvement in pneumatic transmission systems.*

No. 160 of 1899.—Birney Clark Batcheller, mechanical engineer, of 1518 North 15th street, Philadelphia, Pennsylvania, U. S. A. *An improved pneumatic transmission system.*

No. 161 of 1899.—Birney Clark Batcheller, mechanical engineer, of 1518 North 15th street, Philadelphia, Pennsylvania, U. S. A. *An improvement in pneumatic despatch apparatus.*

No. 162 of 1899.—Birney Clark Batcheller, mechanical engineer, of 1518 North 15th street, Philadelphia, Pennsylvania, U. S. A. *Improvements in carriers for pneumatic despatch tubes.*

No. 163 of 1899.—Birney Clark Batcheller, mechanical engineer, of 1518 North 15th street, Philadelphia, Pennsylvania, U. S. A. *An improvement in carrier-receiving mechanism for pneumatic transit tubes.*

No. 164 of 1899.—Birney Clark Batcheller, mechanical engineer, of 1518 North 15th street, Philadelphia, Pennsylvania, U. S. A. *An improvement in carriers for pneumatic tubes.*

No. 165 of 1899.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, North Britain. *Improvements in apparatus for sifting, sorting and classifying tea or other products or materials.*

No. 166 of 1899.—Samuel Beran, manufacturer, of Obrowitz, Brunn, Moravia, Austria. *Improvements in carding engines.*

No. 167 of 1899.—John Barker Norton and Harry Barker Norton, sanitary engineers, of 1 Old Court Corner, Calcutta. *An improved combined watercloset and urinal basin principally intended for native use.*

No. 168 of 1899.—Paluru Sankaranarayana, M.A., tutor to the Rajah of Pithapuram, of Pithapuram, Godavari district, Madras Presidency. *An improvement in spring candle stands.*

No. 169 of 1899.—Max Gehre, engineer, of Rath near Düsseldorf, in the German Empire. *Improvements in wave motors.*

No. 170 of 1899.—Dr. Carl Auer von Welsbach, of IV Schelifmuhlgasse 4, Vienna, Austria. *Improvements in illuminating conductors for incandescent electric lamps.*

No. 171 of 1899.—Duke William Bullard, engineer, of 2 Colonial Avenue, Minories, in the city of London. *Improvements in cigar making machines.*

No. 172 of 1899.—Electric Resistance and Heating company, limited, manufacturers, of 130 Dashwood House, New Broad street, in the city of London. *Improvements in the manufacture of electrical resistances.*

No. 173 of 1899.—Ludwig Weber, manager of Mercantile Mission Branch of Mangalore, South Canara. *Improvements in roofing tiles.*

No. 174 of 1899.—Max Jasper, trading as Chemische Fabrik Max von Jasper of Jaspersweg 1—10 Bernau, near Berlin, in the Empire of Germany. *An improved manufacture of incandescence bodies for illuminating purposes.*

No. 175 of 1899.—Akshoy Kumar Chatterji, medical practitioner and late health officer, Baraset, at present residing at Baidyapur, Burdwan district. *Dal flours.*

No. 176 of 1899.—John Miller, senior, and John Miller, junior, dyers and finishers, of 10 Cunliffe villas, Manningham, Bradford, in the county of York, England. *Improvements in the method of and apparatus for rendering textile fabrics waterproof by one treatment or process.*

No. 177 of 1899.—The Neild "Sleeve" Electric Joint Syndicate, limited, manufacturers, of Bloomfield House, London Wall, in the city of London. *An improved joint for telegraph and other wires conveying electricity.*

No. 1488 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 347 of 1898.—The Petolite Fuel Syndicate, limited, of 57 Moorgate street, in the city of London. *Improvements in the manufacture of briquettes or blocks of fuel from waste products or otherwise, enriched by petroleum compounds.* (Specification filed 3 May 1899.)

No. 348 of 1898.—The Petolite Fuel Syndicate, limited, of 57 Moorgate street in the city of London. *An improved mode of admixing and preparing petroleum and other matter in compound form, with a view to its final use as a combustible.* (Specification filed 3 May 1899.)

No. 431 of 1898.—Heinrich Hampel, manager, of the Paper Mill, Klein, Neusiedl near Vienna, and Victor Zampis, gentleman, of VI Dürergasse 13, Vienna. *An improved method of the preparation of a rosin-soap for paper-sizing, containing an admissible quantity of free rosin.* (Specification filed 2 May 1899.)

No. 473 of 1898.—Allibhoy Vallijee & Sons, tin despatch box manufacturers, Mooltan cantonment. *An improved tin ice box.* (Specification filed 14th April 1899.)

No. 7 of 1899.—Charles Josiah Ross, outfitter, trading as J. and G. Ross, of 227 High street, Exeter, in the city and county of Exeter. *Improvements in hats, helmets and the like head coverings.* (Specification filed 2 May 1899.)

No. 1489 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 267 of 1890.—Charles Arthur Turton. *Improvements in the methods, machinery and appliances used for withering or desiccating tea leaf.* (From 12 May 1899 to 12 May 1900.)

No. 81 of 1895.—Samuel Cleland Davidson. *Improvements in steam engines and in means for driving high speed shafts therefrom.* (From 17 May 1899 to 17 May 1900.)

No. 82 of 1895.—Samuel Cleland Davidson. *Improvements in apparatus for withering tea leaf, or exposing chemicals or other material to hot or cold air, or a mixture of air and vapour or gases; also for drying yarns, cloths and other substances.* (From 17 May 1899 to 17 May 1900.)

No. 1490 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorising others so to do, has ceased:—

No. 139 of 1894.—George Denis Blake. *Improvements in the drying of indigo, and an apparatus for the purpose.* (Specification filed 2 February 1895.)

No. 238 of 1894.—Reginald Henry Pierce. *Improvements in fishplates and their fastenings for joining rails.* (Specification filed 30 January 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 38 of 1893.—Edward Lennon Cantwell. *Improvements in portable sugarcane crushing mills.* (Specification filed 3 February 1894.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,
Offg. Secy. under the Inventions and Designs Act, 1888.

CALCUTTA POST OFFICE NOTICE.

The 13th May, 1899.

Mails for	Date of closing at the General Post Office, Calcutta.	Route by which despatched.
	1899	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Madagascar, Réunion, etc., Natal, and Cape Colony, and in general all countries served through the United Kingdom.	18th May	Per P. & O. Str. from Bombay.
Parcels, Insured letters and Money Orders for the United Kingdom and other Foreign places.	17th „	Ditto.
*Australasian Colonies . .	13th „	*Viâ* Tuticorin and Colombo.*
Colombo	14th „	Per P. and O. Str. *Malta.*
Straits Settlements, China and Japan.	16th „	Per Steamer *Lightning.*
Rangoon and Moulmein . .	18th „	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, Mergui, Penang and Singapore.	15th „	Ditto.
Rangoon and Moulmein . .	13th „	Ditto.
Akyab, Kyaukpyu and Sandoway.	13th „	Ditto.
Ditto ditto . .	15th „	Per land route *viâ* Chittagong.
Ditto ditto A.M. At 5-30	16th „	Ditto.
Port Blair	15th „	*Viâ* Rangoon.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles will be cleared for the forenoon Mails at the following hours:—

For Goalundo and Chittagong Express train at 5-30 A.M.
For Eastern districts as far as Dacca at 6-30 A.M.
For Bombay Mail *viâ* Nagpur at 7-30 A.M. and with a late fee of ½ anna up to 8 A.M.
For Midnapore and Orissa at 8 A.M.

The letter-box will be cleared for the evening Mails without late fee at the following hours, *viz.*:—

For E. I. Railway Loop Mail at 2-30 P.M. and up to 2-55 P.M. with a late fee of ½ anna.

For the Bombay Mail *viâ* Jubbulpore carrying also Mails for Ceylon at 6 P.M.

For Darjeeling and Assam at 3-25 P.M. without late fee, and 3-50 P.M. with late fee of ½ anna.

For the Punjab at 7-30 P.M.

Late letters bearing a fee of ½ anna will be received for the Bombay Mail *viâ* Jubbulpore up to 6-30 P.M. and for other Mails from 7-30 to 8 P.M., and from 8-0 to 8-45 P.M. with a late fee of 1 anna for the Punjab Mails only.

Late registered articles will be received between the following hours:—

For Offices served by the Bombay Mail *viâ* Allahabad and Jubbulpore from 5 P.M. to 6-15 P.M.
For Offices served by the Punjab Mail from 6 P.M. to 7 P.M.
For Offices served by the Goalundo Mail from 6 P.M. to 7 P.M.
For Offices served by the Khulna Mail from 6 P.M. to 7 P.M.

The late fee on each registered letter will be two annas, which must be prepaid in stamps on the letter.

Articles for Burma and for Port Blair by Sea are received without late fee up to 7-30 P.M., after which hour they are received fully prepaid and bearing an extra stamp of ½ anna up to 8 P.M.

On the latest safe day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6 P.M., and late letters and papers fully prepaid will be received up to 6-30 P.M.

On the day of despatch of the Mail for Europe (Thursday), the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6-30 P.M., and late letters and papers fully prepaid will be received up to 6-45 P.M. Late registered articles will be received from 5 to 6 P.M. On other days the letter-box for Foreign articles will be cleared for the last time without the late fee at 6 P.M., and late letters and papers will be received up to 6-30 P.M. for despatch by any Foreign Mails *viâ* Tuticorin, Madras, or Bombay the same night and up to 6-30 P.M., late letters and papers up to 9 P.M., for any Foreign Mails despatched by Sea. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

P. J. GORMAN,
Offg. Presidency Postmaster, Calcutta.

GEOLOGICAL SURVEY OF INDIA.

FOR SALE.

1. Records of the Geological Survey of India, Vols. I to XXX. Price R2 per volume or R1 per part.

2. Memoirs of the Geological Survey of India, Vols. I to XXVII. Price per Volume R5.

3. Palæontologia Indica, Series I to XVI. The price of these publications is 4*a*. per single plate.

4. A Manual of the Geology of India, 2nd Edition. By R. D. Oldham, A.R.S.M., F.G.S. Price R8.

5. A Manual of the Geology of India, Economic Geology, 2nd Edition, part 1, corundum. By T. H. Holland, A.R.C.S., F.G.S. Price per copy R1.

6. An Introduction to the Chemical and Physical Study of Indian Minerals. By T. H. Holland, A.R.C.S., F.G.S. Price 8*a*.

7. Report on the Geological Structure and Stability of the Hill Slopes around Naini Tal. By T. H. Holland, A.R.C.S., F.G.S. Price R3.

8. Bibliography of Indian Geology. By R. D. Oldham, A.R.S.M., F.G.S. Price R1-8.

9. Map of the Geology of India, scale 1"=96 miles. R1 per copy.

10. Map of the Geology of India, in 6 sheets, scale 1"=32 miles. R12 per copy.

11. Reports on the Inspection of Mines in India, by James Grundy :—

Report for the year ending 30th June, 1894. Price R1.
Do. do. 30th June, 1895. Price R2.
Do. do. 30th June, 1896. Price R1.
Do. do. 31st Dec., 1896. Price R1.

Apply to the Registrar, Geological Survey of India, Calcutta.

CIVIL ENGINEERING COLLEGE, SIBPUR.

SESSION 1899-1900.

Candidates for admission to the Engineer Department should apply to the Principal before the 15th May, 1899. Each application must be accompanied by a Registration fee of R1. The session begins on Monday, the 5th June, 1899.

Candidates must furnish proof that they have passed one of the following tests :—

(1) The F. A. Examination of the Calcutta University, or a similar standard of any Indian University recognised by the Calcutta University. The candidate's age must be under 21 years.

(2) The B.A. Examination in the B. Course in Physics and Chemistry. The candidate's age must be under 23 years. (These students are admitted direct into the second year class.)

The maximum number to be admitted each year is limited to 40. The position in the University Examinations and the age of the candidates will be taken into consideration when selection is made, and such selection will be made by the Principal.

The tuition fee for students of the Engineer class is R10 a month for each month of the year, vacation included.

Ten scholarships will be awarded to students entering the Engineer Department not being already holders of junior or senior scholarships. Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Further particulars will be supplied on application to the Principal.

A. MACDONELL,
Offg. Principal, Civil Engineering College.

SIBPUR,
The 4th April, 1899.

THE YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 3rd and 4th July, 1899, at 10-30 A.M. :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity).	100	50
Dictation (spelling, punctuation, etc).	100	50
Arithmetic (the whole) . .	240	160
Mensuration (*a*) the whole . .	60	30
Book-keeping (*b*) mercantile .	100	50
TOTAL .	600	400

Minimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping," by Ball and Hamilton.
"Book-keeping" by double and single entry by W. Inglis (Chambers' Educational Course).

The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in July. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed; but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

*This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 10 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

NOTE.—A candidate already in Government service should, in like manner, submit his application through his immediate official superior to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts to whom the candidate submits his application to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the college or at the

office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

A. MACDONELL,

Offg. Principal, Civil Engineering College.

SIBPUR,
The 1st May, 1899.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8;* per eight-ounce tin, *R5;* per pound tin, *R10*. PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1898, the price of this Quinine will be as follows:—

1-pound tin,	R17,	or, post-free,	R17-12.
½	„	R8-8,	„	R9-0.
¼	„	R4-4,	„	R4-12.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৮ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন		১৭,	বা ডাকমাশুল বিনা	১৭৸০
৷ আধ „	„	৮৷০	„	৯,
৷ শিকি „	„	৪৷০	„	৪৸০

পরিক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনাডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required :—

VOLUME I.*

Section	I.	Building Materials,	R2-6.
"	II.	Masonry,	R1-4.
"	III.	Carpentry (1889),	R1-4.
"	IV.	Earthwork (1892),	R1-4.
"	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings. (In the Press.)	
"	VII.	Bridges,	R4-4.
"	VIII.	Roads,	R1-8.
"	IX.	Railways (1891),	R1-4.
"	X.	Irrigation Works. (Under revision.)	

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7.

" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition, with Curve Table). R3.

XIII. **Drawing** (by Lieut. R. Pulford, R.E.). † R8.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.

XIV. **Simple Applied Mechanics,** Parts I and II in one (in the Press).

Simple Applied Mechanics, Part II (1st edition). 8*a*.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.

XVI. **Earthwork Estimating,** with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. Say R1.

XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 6*a*.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X. is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Shelly's Workshop appliances. R1-8.

Curve Tables, complete, for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Notes on Chemistry of Building Materials. R2-0.

Tate's Mechanism. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunnya Lal. R2-8.

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 12*a*.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12*a*.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. (In the Press.)

Wooden Bridges and Designs. By Rai Kunhya Lal. (In the Press.)

Blasting under Water (2nd edition). 10*a*.

Waugh's Instructions for Topographical Surveying. R1.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6*a*.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-8.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R2-0.

Banerman's Descriptive Mineralogy. R3.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time). 4*a*.

Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.

Cape's Geometry. R1-4.

Cape's Mechanics. 8*a*.

Todhunter's Plane Trigonometry. R2-12.

Todhunter's Differential Calculus. R2-8.

Military Topography. 8*a*.

HINDUSTANI.

Elements of Hindustani Grammar. 8*a*

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II. Each Part 3*a*.

Short Account of Ganges Canal (English and Urdu), 4*a*.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large. R1-4.

Surveying Field-Books (ruled). 14*a*.

Levelling Field-Books (English Pattern). R1-4.

" " (Canal "). R1-4.

" " (College "). R2-0.

P. W. D. Note-Book. R1-4.

" **Measurement Book.** R1-4

Circular Card-board Protractors, 12 inches. R2.

J. CLIBBORN, *Lieut.-Col., I. S. C.,*
Principal, Thomason Civil Engineering College, Roorkee

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage. R	a.	p.	With postage. R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
" each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. R	a.	p.	For mofussil. R	a.	p.
For the Calcutta Series; per copy	0	8	9	0	10	0
" each of the Madras, Bombay, and Allahabad Series; per copy	0	5	3	0	5	9
" the Calcutta Series. For the year	7	2	6	8	6	3
" each of the Madras, Bombay, and Allahabad Series. For the year	4	4	6	4	11	0

Persons desiring to subscribe for, or purchase, the Report, should apply to—
Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper, of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 20	R 14	R 9
" three issues	" 55	" 36	" 24
" six "	" 100	" 68	" 45
" nine "	" 145	" 96	" 54
" twelve "	" 180	" 120	" 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. R	a.	p.	With postage. R	a.	p.
Bengal Law Reports, for one year	20	0	0	22	8	0
Single copies, R2 per copy.						
Full Bench Rulings, Parts I and II	20	0	0	22	8	3

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Government of India Notifications, Appointments, Promotions, &c.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Simla, the 20th May, 1899.

No. 561-*M*.—His Excellency the Viceroy and Governor General, accompanied by His Honour the Lieutenant-Governor of the Punjab, His Excellency the Commander-in-Chief and the Members of the Governor General's Council, will attend the Divine Service at Christ Church, Simla, at 11 o'clock on Wednesday, the 24th May 1899, which will be held in commemoration of the 80th Birthday of Her Majesty the Queen-Empress.

Officers of Her Majesty's services, Civil and Military, are invited to attend.

Full dress will be worn by all officers entitled to wear uniform: morning dress by gentlemen not entitled to wear uniform.

The Chaplain of Simla will arrange for seats being reserved for those who have no sittings at Christ Church, if application is made to him in writing.

By Command,

ARTHUR SANDBACH, *Lieut.-Col.,*

Military Secretary to the Viceroy.

HOME DEPARTMENT.

Patterson, Indian Staff Corps, 5th Bengal Cavalry, is appointed to officiate as Assistant Inspecting Officer, Rajputana and North-Western Provinces Imperial Service Cavalry and Transport, *vice* Captain F. H. B. Commeline, with effect from the 12th March, 1899, and until further orders.

The 19th May, 1899.

No. 1315-*I.-B.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to make the following rules to regulate the admission to practice and the practice of Legal Practitioners in the Court of the Judicial Commissioner of the Hyderabad Assigned Districts, and in Courts subordinate to that Court in the Hyderabad Assigned Districts, the

Hyderabad Residency Bazars, the Cantonment of Secunderabad, the Hyderabad Contingent Stations of Aurangabad, Bolarum, Hingoli, Jalna, Mominabad and Raichur, and the railway lands in the territories of His Highness the Nizam of Hyderabad (other than the railway lands referred to in the Notifications of the Government of India in the Foreign Department, No. 4564-I., dated the 18th November, 1891, and No. 3244-I.-B., dated the 26th August, 1897):

CHAPTER I.

PRELIMINARY.

Short title, commencement and extent.

1. (1) These rules may be called the Hyderabad Assigned Districts Legal Practitioners Rules, 1899; and

(2) They shall come into force at once.

(3) They extend to the Hyderabad Assigned Districts, the Hyderabad Residency Bazars, the Cantonment of Secunderabad, the Hyderabad Contingent Stations of Aurangabad, Bolarum, Hingoli, Jalna, Mominabad and Raichur, and the railway lands in the territories of His Highness the Nizam of Hyderabad (other than the railway lands referred to in the Notifications of the Government of India in the Foreign Department, No. 4564-I., dated the 18th November, 1891, and No. 3244-I.-B., dated the 26th August, 1897).

Definitions.

2. In these rules, unless there is anything repugnant in the subject or context,—

(a) "advocate" means any person admitted as an advocate under Chapter III:

(b) "Judicial Commissioner" means the Judicial Commissioner of the Hyderabad Assigned Districts:

(c) "pleader" means any person holding a certificate as a pleader granted under Chapter IV:

(d) "Resident" means the Resident at Hyderabad:

(e) "subordinate Court" means any Court, other than a Revenue Court, subordinate, or hereafter declared by the Governor General in Council to be, for the purposes of these rules, subordinate, to the Judicial Commissioner: and

(f) "tout" means any person who procures the employment in any legal business of any legal practitioner in consideration of any remuneration moving from such practitioner, or proposes to any legal practitioner to procure his employment in any legal business in consideration of such remuneration.

CHAPTER II.

GENERAL PROVISIONS.

Authority to practise.

XIV of 1882. V of 1898.

3. Except as provided in the Code of Civil Procedure or the Code of Criminal Procedure, 1898, or in any other law for the time being in force, no person shall appear, plead or act for any other person in the Court of the Judicial Commissioner or in any subordinate Court, unless he is an advocate or pleader authorized so to do under these rules:

24 & 25 Vict. c. 104.

Provided that any person who is entered as an advocate, vakil or attorney on the roll of any High Court established under the Indian High Courts Act, 1861, or as an advocate on the roll of the Chief Court of the Punjab or of the Court of the Judicial Commissioner of the Central Provinces, and who ordinarily practises in such Court or in some Court subordinate thereto, shall be entitled to appear, plead and act in the Court of the Judicial Commissioner or in any subordinate Court without being admitted as an advocate or granted a certificate as a pleader under these rules.

CHAPTER III.

ADVOCATES.

Persons eligible for admission as advocates.

4. Any person who has been admitted as a barrister in England or Ireland, or as a member of the Faculty of Advocates in Scotland, may, in the discretion of the Judicial Commissioner, be admitted as an advocate of the Court of the Judicial Commissioner.

Certificates required.

5. Every person desirous of being admitted as an advocate under this Chapter shall, before being so admitted, submit an application, as hereinafter provided, and produce therewith a certificate showing that he has been admitted as a barrister in England or Ireland, or as a member of the Faculty of Advocates in Scotland, together with satisfactory certificates of good moral character and ability.

Form of application.

6. Every application for admission as an advocate under this Chapter shall be in the form of a letter, addressed to the Judicial Commissioner, stating the date on which, and, if the applicant is a barrister, the Inn by which, the applicant was called to the Bar, and that it is his intention to practise within the jurisdiction of the Court of the Judicial Commissioner.

Admission discretionary.

7. (1) The Judicial Commissioner may, in his discretion, grant or refuse an application submitted under this Chapter, and his order thereon shall be final.

(2) If the application is refused, the Judicial Commissioner shall not be bound to specify his reasons for such refusal.

(3) If the application is granted, the Judicial Commissioner will give the applicant, on his supplying a stamp of the value of three hundred rupees, a certificate of admission under his signature and the seal of his Court, and enrol his name in his Court's Register of Advocates.

Practice.

8. Every person admitted as an advocate under this Chapter shall be entitled to practise in any subordinate Court as well as in the Court of the Judicial Commissioner.

CHAPTER IV.

EXAMINATION AND CERTIFICATES OF PLEADERS.

Examination required.

9. Except as otherwise provided in rule 25, any person desirous of obtaining a certificate as a pleader under these rules shall, before being granted such a certificate, pass the examination prescribed thereby.

Standards of examination, etc.

10. (1) There shall be one examination annually held in the month of September or at such other time, and at such place, as the Resident shall notify at least four months beforehand in the Hyderabad Residency Orders.

(2) There shall be two standards of examination, the higher and the lower, as provided by rule 14. Candidates desirous of practising as pleaders in the Court of the Judicial Commissioner and in all subordinate Courts shall be required to pass by the higher standard. Candidates desirous of so practising only in subordinate Courts shall be required to pass by the lower standard.

(3) The examination will be conducted by a Committee, of which the Civil and Sessions Judge of the Hyderabad Assigned Districts, or such other officer as the Resident may nominate in this behalf, shall be President, and the other members shall be appointed by the President.

(4) The duty of preparing the examination papers will be entrusted to the President, subject to the approval of the Judicial Commissioner.

(5) The remuneration to be paid to a non-official member appointed under sub-section (3) shall be fixed by the Judicial Commissioner, and shall be paid from the fees levied under rule 11.

Application for examination.

11. (1) Any person desirous of being examined shall, before being admitted to the examination, submit an application in writing to the Judicial Commissioner within two calendar months from the date of the notification prescribed by rule 10, sub-section (1), together with—

(a) a certificate showing the place of his birth and his exact age, which at the date of the examination shall be over twenty-two, and. unless the Judicial Commissioner by general order otherwise directs, under thirty-five, years;

(b) a certificate that he has passed the Entrance Examination of the Calcutta, Bombay, Madras, Allahabad or Punjab University, or any other examination which the Resident may declare to be equivalent thereto;

(c) a certificate that he can speak, read and write the Marathi language fairly and has a good colloquial knowledge of the Urdu language, if he intends to practise in the Hyderabad Assigned Districts, or a certificate that he can speak, read and write the Urdu language fairly, if he intends to practise in any area other than the Hyderabad Assigned Districts within the jurisdiction of the Court of the Judicial Commissioner;

(d) a satisfactory certificate that he is of good moral character, dated not earlier than six calendar months immediately preceding the time fixed for the examination; and

(e) a fee of ten rupees (British Indian currency), for which a receipt shall be furnished by the Judicial Commissioner.

(2) No certificate submitted under this rule shall be accepted unless it is signed by an officer not lower in rank than a District Judge, Collector, Political Agent or Registrar of a High Court, Chief Court or Court of a Judicial Commissioner.

Admission to examination.

12. (1) After perusal of the certificates required by rule 11, any after such inquiry (if any) as he may think fit to make, the Judicial Commissioner may, in his discretion, grant or refuse the application, and his order thereon shall be final.

(2) If the application is refused, the Judicial Commissioner shall not be bound to specify any reason for such refusal, but shall return to the applicant the fee paid by him under rule 11, clause (e).

(3) If the application is granted, the name of the applicant shall be included in a list of the candidates admitted to the examination, which shall be published in the Hyderabad Residency Orders at a reasonable time before the time fixed for the examination.

(4) The fee of a candidate, who has been admitted under sub-section (3), may not be reserved for any subsequent examination, nor shall it under any circumstances be refunded.

Subjects of examination.

13. (1) The examination shall be conducted in writing in the English language, and want of proficiency in that language shall of itself be held to disqualify a candidate.

(2) One paper shall be set in each of the subjects hereinafter set forth, and the maximum number of marks obtainable for each shall be as follows:

(a) Hindu and Muhammadan Law and the Law relating to Succession, Probate and Administration	100
(b) the Law relating to Civil Procedure and Limitation and the Hyderabad Assigned Districts Small Cause Courts Law, 1889 .	100
(c) the Law relating to Contracts, Torts, Specific Relief, Transfer of Real Property, Mortgages and Trusts	200
(d) the Law relating to Evidence, Registration and Stamps	100
(e) Criminal and Police Law	100

(3) In addition to the Acts, Regulations and Law Reports bearing on the above subjects, the examination may extend to the following text-books, namely:

(a) Mayne's *Hindu Law and Usage;*

(b) Macnaghten's *Principles and Precedents of Muhammadan Law;*

(c) Field's *Law of Evidence;*

(d) Leake's *Law of Contracts;*

(e) Cunningham's *Commentaries on the Indian Contract Act;*

(f) Addison's *Law of Torts;*

(g) Collett's *Law of Torts;*

(h) Smith's *Equity Jurisprudence*, or Snell's *Principles of Equity;*

(i) Broom's *Legal Maxims;* and

(j) Macpherson's *Law of Mortgages.*

14. (1) In order to pass the examination by the higher standard, a candidate shall be required to obtain at least thirty per cent. of the maximum number of marks obtainable for each paper and seventy per cent. of the aggregate number of marks obtainable for all the papers.

Pass marks for each standard.

(2) In order to pass the examination by the lower standard, a candidate shall be required to obtain at least thirty per cent. of the maximum number of marks obtainable for each paper and fifty per cent. of the aggregate number of marks obtainable for all the papers.

15. A list of the candidates who have, in the opinion of the Committee appointed under rule 10, passed by the higher and lower standards, respectively, shall be submitted by the Committee for the orders of the Judicial Commissioner.

Report to Judicial Commissioner.

16. If, in the opinion of the Committee, any candidate has presented himself for examination without due preparation, the Committee may prohibit his appearance at the next examination.

Power of Committee to postpone re-examination.

17. Any candidate who may have been declared by the Committee to have passed, may nevertheless be refused a certificate by the Judicial Commissioner, whose order in the matter shall be final.

Orders of Judicial Commissioner.

18. The candidates who have been declared by the Committee to have passed the examination and have not been refused by the Judicial Commissioner, will receive from the Judicial Commissioner certificates (hereinafter called "original certificates") in Form I or in Form II, as the case may be, set forth in the first schedule. Certificates in Form I shall be granted to candidates who have passed by the higher standard, and certificates in Form II to those who have passed by the lower standard.

Certificates.

19. Any candidate who is declared by the Committee to have failed to pass the examination may, subject to the limitation of age prescribed by rule 11 and to the provisions of rule 16, appear at a subsequent examination on production only of the certificates of age and good moral character required by rule 11, clauses (a) and (d).

Re-examination.

20. Original certificates shall be valid till the thirty-first day of December following the date of their issue, but the holders shall, on application and delivery of their original certificates to the Judicial Commissioner for cancellation, receive renewed certificates.

Expiry and renewal.

21. Renewed certificates shall be valid till the thirty-first day of December following the date of their issue, but the holders shall, on application and delivery of their expired certificates to the Judicial Commissioner for cancellation, receive from year to year renewed certificates.

Renewed certificates.

22. The Judicial Commissioner shall cause to be published every year in the Hyderabad Residency Orders a list of persons whose certificates are valid for the current year.

List to be published.

23. Every certificate in Form I set forth in the first schedule, whether original or renewed, shall be written upon stamped paper of the value of fifty-rupees, to be provided by the applicant, and every certificate in Form II, whether original or renewed, shall be written upon stamped paper of the value of twenty-five rupees, to be provided by the applicant:

Stamp-paper.

Provided that in the case of original certificates or certificates renewed under rule 20, which are issued for a portion only of the year, the fees shall be proportionately reduced, but that no reduction shall be made for a fraction of a quarter.

24. Holders of certificates in Form I set forth in the first schedule shall be entitled to practise in the Court of the Judicial Commissioner and in all subordinate Courts; and holders of certificates in Form II shall be entitled to practise only in any subordinate Court:

Practice.

Provided that any person who obtained, previous to the year 1889, a certificate in Form B granted under the rules published in Resident's Book Circular No. XV of 1885 and holds a certificate under these rules in Form II set forth in the first schedule, may, notwithstanding anything contained in such latter certificate, practise in the Court of the Judicial Commissioner in all cases, except the following:

(a) applications for permission to appeal to Her Majesty in Council, under Chapter XLV of the Code of Civil Procedure; XIV

(b) cases in which the High Court may exercise powers under Chapter XLVI of the Code of Civil Procedure, except in regard to applications to review decrees or orders passed by Courts of Small Causes;

(c) applications not hereinbefore specified made to the High Court under any of the other provisions of the Code of Civil Procedure;

(d) appeals to the High Court under section 589, proviso (b), of the Code of Civil Procedure; and

(e) criminal cases or proceedings.

25. (1) The Judicial Commissioner may, in his discretion, exempt any advocate, vakil or attorney on the roll of any High Court established under the Indian High Courts Act, 1861, from passing the examination prescribed by these rules, and may permit him to practise permanently in his Court and in all or any of the subordinate Courts, on such advocate, vakil, attorney or other person submitting an application, together with satisfactory certificates— 24 & 25 c. 104

Power to exempt from examination in certain cases.

(a) that he is of good moral character;

(b) that he can speak, read and write the Marathi language fairly and has a good colloquial knowledge of the Urdu language, if he intends to practise in the Hyderabad Assigned Districts, or that he can speak, read and write the Urdu language fairly, if he intends to practise in

any area other than the Hyderabad Assigned Districts within the jurisdiction of the Court of the Judicial Commissioner ; and

(c) that he has practised for the space of at least three years in such High Court or in some Court subordinate thereto.

(2) The Judicial Commissioner may likewise exempt any person who has taken the degree of Bachelor of Laws at the Calcutta, Bombay, Madras, Allahabad or Punjab University from passing the examination prescribed by these rules, and may permit him to practise permanently in his Court and in all or any of the Courts subordinate to his Court on the submission by such person of an application, together with—

(a) a satisfactory certificate that he is of good moral character ; and

(b) a certificate of linguistic proficiency as required by sub-section (1) in the case of advocates, vakils and attorneys :

Provided that such exemption shall be granted only to persons who are permanent residents of the area to which these rules extend.

(3) Persons admitted under this rule shall be liable to the higher fee prescribed by rule 23.

CHAPTER V.

SUSPENSION FROM PRACTICE AND CANCELLATION OF CERTIFICATES.

Suspension from practice or cancellation of certificates by Judicial Commissioner.

26. The Judicial Commissioner may suspend from practice, or cancel the certificate of, any advocate or pleader who is convicted of any offence implying a defect of character unfitting him to be an advocate or pleader ; and may likewise suspend from practice, or cancel the certificate of, any advocate or pleader—

(a) who takes instructions in any case, except from the party on whose behalf he is retained, or some person who is the recognized agent of such party within the meaning of the Code of Civil Procedure, or some servant, relative or friend authorized by the party to give such instructions ; or

XIV of 1882.

(b) who is guilty of fraudulent or grossly improper conduct in the discharge of his professional duty ; or

(c) who tenders, gives, or consents to the retention, out of any fee paid or payable to him for his services, of any gratification for procuring, or having procured, the employment in any legal business of himself or any other advocate or pleader ; or

(d) who directly or indirectly procures, or attempts to procure, the employment of himself as such advocate or pleader through or by the intervention of any person to whom any remuneration for obtaining such employment has been given by him, or agreed or promised to be so given ; or

(e) who accepts any employment in any legal business through the intervention of a person who has been proclaimed as a tout under rule 40 ; or

(f) for any other reasonable cause.

Confirmation of Resident.

27. The suspension from practice, or the cancellation of the certificate, of any advocate or pleader under rule 26 shall not take effect unless the order of the Judicial Commissioner in this respect has been confirmed by the Resident.

Suspension from practice or cancellation of certificates at instance of subordinate Courts.

28. (1) If the presiding officer of any subordinate Court has reason to believe that any advocate or pleader practising before him has been guilty of fraudulent or unprofessional conduct, he shall reduce to writing in a concise form the grounds for his belief and forward a copy of the same to the advocate or pleader, together with a notice that on a day therein appointed, not being less than twenty days from the date of despatch of the said copy, the matter will be taken into consideration.

(2) On such day, or on any subsequent day to which the inquiry may be adjourned, the presiding officer shall receive and record all evidence properly produced in support of, and opposition to, the charge, and shall record his finding in the case.

Report by subordinate Court to Judicial Commissioner.

29. (1) If the presiding officer finds the charge established and considers that the advocate or pleader should be suspended in consequence, or that his certificate should be cancelled, he shall forward the proceedings in the case and his finding for the orders of the Judicial Commissioner.

(2) Every report made under sub-section (1)—

(a) by any Civil Judge, other than the Civil and Sessions Judge or any District Magistrate in the Hyderabad Assigned Districts, shall be made through the Civil and Sessions Judge, Hyderabad Assigned Districts ;

(b) by any District Magistrate in the Hyderabad Residency Bazars, the Cantonment of Secunderabad, or the said railway lands to which these rules extend, shall be made through the First Assistant Resident ;

(c) by any subordinate Magistrate in the Hyderabad Assigned Districts or any of the Hyderabad Contingent Stations of Aurangabad, Jalna, Mominabad and Hingoli, shall be made through the District Magistrate and the Civil and Sessions Judge, Hyderabad Assigned Districts ;

(d) by any Magistrate in the Hyderabad Residency Bazars, the Cantonment of Secunderabad, any of the Hyderabad Contingent Stations of Bolaram and Raichur, or the railway lands to which these rules extend, shall be made through the District Magistrate and the First Assistant Resident.

(3) Each officer, through whom such report as aforesaid is forwarded, shall record his opinion on the case for the information of the Judicial Commissioner.

Order by Judicial Commissioner.

30. The Judicial Commissioner may call for the record of any proceedings taken under rule 28 and pass such orders thereon as he may think fit.

Surrender of certificate.

31. Any advocate or pleader who has been suspended from practice or whose certificate has been cancelled under this Chapter, shall forthwith deliver up his certificate to such Court as the Judicial Commissioner may direct.

CHAPTER VI.

REMUNERATION OF ADVOCATES AND PLEADERS.

Limitation of fees.

32. (1) In the taxation of costs as between party and party in any suit or proceeding in the Court of the Judicial Commissioner or in any subordinate Court, the sums allowed against the unsuccessful party in respect of the fees of his adversary's advocate or pleader shall not exceed the following:

(a) in all regular suits and appeals in which the pecuniary value of the relief claimed has been or can be exactly defined, three per cent. on the value of the relief claimed;

(b) in all other regular suits and appeals, three per cent. on the amount of the largest money claim which would be covered by the court-fee affixed to the plaint:

Provided that in no case shall a higher fee than one thousand rupees be allowed without the sanction of the Judicial Commissioner.

(2) Fractions of rupees shall be omitted in the calculation of the amount of the fees allowable under this rule.

(3) The fees of one advocate or pleader only shall be allowed as costs in a suit.

(4) The fees fixed as aforesaid shall include fees for conducting proceedings for the execution of a decree where the advocate or pleader employed for this purpose was engaged in the original prosecution of the suit.

(5) In proceedings for the execution of a decree where a new advocate or pleader is engaged, and in miscellaneous proceedings, the fees allowable shall be one-fourth of the fees fixed as aforesaid.

Suits to enforce agreements with client.

33. Where a suit is brought to enforce an agreement between an advocate or pleader and his client with regard to the amount or manner of payment for the whole or any part of any services rendered, charges incurred, or disbursements made, in connection with legal business transacted by such advocate or pleader, the Court may, if it is of opinion that the agreement is not fair and reasonable, reduce the amount payable under it, or order the agreement to be cancelled and the costs, charges and disbursements aforesaid to be ascertained in the same manner as if no such agreement had been made.

Agreements to bar further claims.

34. An agreement between an advocate or pleader and his client shall bar any further claim on the part of the advocate or pleader beyond the terms of the agreement with respect to any services, fees, charges or disbursements in connection with the conduct and completion of the legal business in respect of which the agreement has been made, except such services, fees, charges or disbursements (if any) as have been expressly excepted by the agreement.

Saving.

35. Any provision in an agreement between an advocate or pleader and his client to the effect that the advocate or pleader shall not be liable for negligence, or that he shall be relieved from any responsibility to which he would otherwise be subject as such advocate or pleader, shall be void.

CHAPTER VII.

PENALTIES.

Unauthorized practice.

36. If any person attempts to practise in the Court of the Judicial Commissioner or in any subordinate Court in contravention of these rules, the Court shall refuse to hear him, and he shall be incapable of maintaining any suit for, or enforcing any lien with respect to, any fee or reward for, or with respect to, anything done or any disbursement made by him as an advocate or pleader while contravening these rules.

Failure to surrender certificate.

37. Whoever, being an advocate or pleader, fails to deliver up his certificate as required by rule 31 shall be liable by order of the Court, to which the delivery should have been made, to a fine not exceeding two hundred rupees and, in default of payment, to simple imprisonment for a term not exceeding three months.

Practice after suspension, etc.

38. Every advocate or pleader who has been suspended from practice or whose certificate has been cancelled under these rules, and who practises during such suspension or after such cancellation, shall be deemed to have committed an offence under section 228 of the Indian Penal Code. XLV of 1860.

Revision.

39. Every order made under rule 36, 37 or 38 shall be subject to revision by the Judicial Commissioner.

Power to frame and publish list of touts

40. (1) The Judicial Commissioner, a Sessions Judge, and any District Magistrate (each as regards his own Court and the Courts subordinate thereto) may frame and publish lists of persons proved to his satisfaction, by evidence of general repute or otherwise, habitually to act as touts, and may from time to time alter or amend such lists.

(2) No person's name shall be included in any such list until he has had an opportunity of showing cause against such inclusion.

(3) A copy of every such list shall be kept hung up in every Court to which the same relates.

(4) The Court or Judge may, by general or special order, exclude from the precincts of the Court any person whose name is included in any such list.

(5) Every person, whose name is included in any such list, shall be deemed to be proclaimed as a tout within the meaning of rule 26, clause (e).

Rescission of notifications and savings.

41. The notifications of the Government of India in the Foreign Department specified in the second schedule are hereby rescinded:

Provided that—

(a) every advocate admitted under the rules contained in the notifications so rescinded and borne on the roll of the Court of the Resident or Judicial Commissioner at the commencement of these rules shall be deemed to have been admitted under these rules; and

(b) every pleader's certificate granted under the said rules and in force at the commencement of these rules shall be deemed to have been granted under these rules in Form I or Form II, as the case may be, set forth in the first schedule.

Mr. Gurbaksh Singh.

Mr. Abhaya Charan Banerjee.

T. HIGHAM,

Joint Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 13th, 1899.

A very marked change of weather has occurred over India during the week under review. During the first three days of the week strongly marked hot weather conditions prevailed over Northern India with dry westerly winds, a high temperature and no rain beyond one or two local thundershowers. On Wednesday, 10th May, the weather changed. Pressure became lowest in the north-west, and a tongue of relatively low pressure extended south-eastward down the Gangetic Plain. At the same time pressure rose steadily over North-East India and Burma. Hence during the remainder of the week the general conditions were such as ordinarily prevail in June instead of in May; south-easterly and easterly winds were blowing across Bengal and up the North Gangetic Plain, while westerly winds prevailed over Central and Southern India. The easterly wind occasioned a certain amount of rainfall over Burma, Bengal and the North-West Himalayas, while the westerly wind was dry. With the occurrence of rain the temperature fell, and the heat at the close of the week was much less than usual over Bengal and slightly less than usual in Burma.

Daily Summary.—*Sunday, May 7th.*—The barometer was falling everywhere—most in the north. Pressure was lowest in North Bihar, and moderate gradients prevailed over Northern India, while over the Peninsula pressure was high and uniform. The wind was northerly on the west and southerly on the east coast of the Peninsula and generally westerly elsewhere. The weather was slightly cloudy in places, and dust and thunder storms had occasioned some local rainfall. At Sibsagar over 3 inches had been received, but in general the amounts were moderate or small. The weather was slightly cooler than usual over Sind, Rajputana, part of the Central Provinces and the east of the Peninsula, but was hotter than usual elsewhere, the excess being very large in Bengal.

Monday, May 8th.—Pressure had increased over Burma and North-East India and decreased elsewhere. The general conditions of pressure were the same as on the preceding day, but the differences were smaller. The winds were practically unchanged. Sibsagar again reported a moderate shower of rain, but the few local falls which were received in other parts of the country were quite unimportant. The temperature conditions were the same as on the 7th. The heat was very excessive in Bengal.

Tuesday, May 9th.—The barometer had fallen a little at some north-western stations, but had risen elsewhere, the change having been brisk to large in places. The area of lowest pressure was reported from North-West India, and an arm or trough of relatively low pressure was developing over the Gangetic Plain. Variable winds and calms were reported from North-West India and the Gangetic Plain and south-easterly to easterly winds in Burma and East Bengal, but elsewhere there had been but little change. There was more cloud than of late, and showers, generally, however, of small amount were reported from parts of North-Western, North-Eastern and Central India. The mean temperature had risen over North-West India, and practically the only place

where the heat was less than usual was the east of the Peninsula. In the extreme north-west and extreme north-east of India the excess was large to very large.

Wednesday, May 10th.—Pressure had been steady or had risen slightly over Burma, North-East India and the west and centre of the Peninsula, but elsewhere it had fallen—more especially at the foot of the North-West Himalayas. Pressure was lowest near Sialkot, and the south-easterly and easterly winds noticed in Bengal on the 9th had suddenly extended north-westward along the line of the hills as far as the East Punjab. Elsewhere the wind changes were unimportant. The weather was cloudy to overcast over Burma, North-East India and the west of the Peninsula, and fairly general rain had been received over Burma, Assam and Bengal and scattered showers over the Kashmir Himalayas and parts of the west and centre of the Peninsula and of the Central Provinces. The weather relatively to the normal was cool in parts of Burma, Madras, the Central Provinces and Gujarat, but was more or less hotter than usual elsewhere. The excess was large to very large over the Punjab and the North Gangetic Plain.

Thursday, May 11th.—The barometer had fallen. There had been no important change in the general conditions of pressure. Readings were lowest over the Punjab whence an arm of low pressure passed south-eastward down the Gangetic Plain as far as Allahabad and Sutna. To the north and east of this arm the wind was south-easterly and easterly, and elsewhere blew from between south-west and north-west. The sky had become more cloudy over Northern India, and rain had been received over Burma, East and West Bengal, Orissa, the North-West Himalayas and parts of the Peninsula. Temperature was lower than usual over Burma, Deltaic and South-West Bengal and the Bombay Deccan, but was more or less excessive elsewhere. In the Punjab the excess was very large.

Friday, May 12th.—The barometric changes had been slight. Pressure was lowest over the West Punjab, with the usual arm of low pressure over the Gangetic Plain and was highest in Burma. The winds were practically unaltered and were strongly easterly over Northern India. There was a good deal of cloud. There had been fairly general rain over Burma and light scattered rain over Sikhim, Bihar, the North-West Himalayas, the west and the south of the Peninsula and one or two central districts.

Saturday, May 13th.—Pressure had risen almost everywhere. The change had been brisk to rapid in the north, so that the arm of low pressure had been transferred southward, but in other respects there had not been much change. South-easterly to easterly winds continued over the greater part of Northern India and northerly through westerly to southerly winds over the Peninsula, but in parts of Deltaic Bengal and of Orissa there were, owing to a small depression at the head of the Bay, some northerly winds. There was a good deal of cloud over Burma, North-East India and the North-West Himalayas, where also rain had been fairly general and moderately heavy in places. Temperature had decreased except over some central and southern districts. The heat was much more than usual over parts of North-Western and Central India and much less than usual over parts of Bengal and of Burma.

Temperature.—The past week has been one of large changes of temperature and of large variations from the normal conditions. At the commencement of the week, when hot, dry, westerly winds were blowing down the Gangetic Plain, the heat was excessive over Bihar and Bengal, while in parts of North-West India the weather was cooler than usual. Later in the week, when rain was falling over North-East India, the mean temperature fell to largely below the average over parts of Bengal, while, on the contrary, over North-West India the heat was very excessive.

The following table gives the mean temperature variation data for the week :

PROVINCE.	MAY 1899.							Mean variation of week.
	7th	8th	9th	10th	11th	12th	13th

Mean for whole of India .	+1·7	+2·2	+3·0	+2·8	+2·7	+2·8	+0·7	+2·3

The mean temperature of the whole country for each day of the week and for the whole week exceeded the normal. The excess was least (only 0·7°) on the 13th and was greatest (as much as 3°) on the 9th. The provincial variations show that in the case of Burma, Gujarat, Mysore, the Madras Coast and South India the heat for the week was about normal, but that in the case of all the remaining provinces the heat was excessive—more particularly so in the Punjab.

The following were the highest maxima reported on each day:

May 7th	. . . .	110·5°	at	Burdwan.
„ 8th	. . . .	112·0°	„	Do.
„ 9th	. . . .	113·2°	„	Jacobabad.
„ 10th	. . . .	117·1°	„	Do.
„ 11th	. . . .	119·5°	„	Do.
„ 12th	. . . .	119·5°	„	Do.
„ 13th	. . . .	120·0°	„	Do.

Rain.—As mentioned above, ordinary hot weather conditions prevailed over the greater part of India during the early part of the week under review, and during the continuance of those conditions the only rainfall received was that which fell during the few scattered dust and thunder storms which were experienced in different parts of the country. Subsequently the weather changed. Pressure became low in North-West India and within a band which stretched east-south-east and west-north-west across Northern India. To the northward and eastward of this band south-easterly and easterly winds set in, and the weather became much damper and more rainy, while to the southward where westerly winds still held the thundershowers became more frequent and heavier. The rainfall returns show that the greater part of the rain fell on the following dates: in Burma between the 11th and 13th; in Assam between the 7th and

10th; in Bengal on the 10th and 11th and again on the 13th; on the North-West Himalayas between the 11th and 13th; in the west of the Peninsula between the 10th and 13th; in the central districts of India between the 7th and 10th; and in North Madras on the 13th.

The rainfall table at the close of the summary shows that, with the exception of twenty-four divisions, *viz.*, North and South Oudh, the east, central, west and west submontane divisions of the North-West Provinces; the south-east, south, submontane, north and west divisions of the Punjab; the three divisions of the Central Provinces; Gujarat; Kathiawar; Sind; the divisions of Central India and of Rajputana; the central and south divisions of Madras and the central and south divisions of the east coast, in all of which the week's rainfall has been actually or practically *nil*, good rain has fallen throughout the country. The average actual falls range from 2·96 inches in Arakan, 2·61 inches in the Bengal Hills, 2·32 inches in the Surma division of Assam, 2·22 inches in Orissa and 2·04 inches in the Brahmaputra division of Assam, to 0·16 inch in the Konkan, 0·18 inch in the south division of Hyderabad and to 0·19 inch in Berar. The third column of the table shows that in the majority of the divisions the week's rainfall has been lighter than usual, but in the Burma divisions, the Bengal Hills, the south-west and west divisions of Bengal, the east submontane division of the North-West Provinces, the central division of the Punjab, Mysore, the Konkan, the Bombay Deccan, Khandesh, Berar, Baluchistan and the north divisions of the east coast the fall has been heavier than usual, the principal cases of excess being about 1 inch in Central Burma, Arakan and Orissa and about ¾ inch in Bihar, Bengal Hills, the Bombay Deccan and Baluchistan. In all the remaining parts of India the rainfall has been short of the normal, the principal cases of deficiency being 3·40 inches in the Assam Hills, 2·01 inches in the Surma division of Assam and 1·23 inch in East Bengal. With a few exceptions, there was no very heavy rainfall during the week in any part of the country.

The following were the principal large totals recorded at individual stations during the week:

Burma . . .	Zalun, Henzada	6·10 inches.
	Magôk	3·96 "
	Kyaukpyu	6·34 "
Assam . . .	Sunamgunj, Sylhet	8·12 "
Bengal . . .	Bhola, Bakergunj	3·86 "
	Alipurduar, Jalpaiguri . . .	4·44 "
Bihar . . .	Muzaffarpur	8·08 "
Mysore . . .	Kolar	2·48 "
Deccan . . .	Khanapur, Belgaum . . .	11·93 "

The three concluding columns of the table show that the total rainfall for the period February 26th to May 13th has been short of the normal over the greater part of Upper India as well as over some central districts, but has been heavier than usual elsewhere—more particularly so over parts of the Peninsula.

PROVINCE.	DIVISION.	Rainfall data for week ending May 13th, 1899. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from February 26th to May 13th, 1899. Average actual rainfall of season to date.	Average normal rainfall, February 26th to May 13th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 13th May.*—Little or no rain fell during the week, except in the northern part of the Circars. There were some showers on the West Coast and in parts of the Central districts. The water-supply is normal. Ploughing is in progress in many places and some small sowings are being made. The standing crops generally are in good condition. Pasture is insufficient in many places, but fodder is available. Cattle are in normal condition. Prices are rather higher in the Circars and in parts of the Deccan and on the West Coast, but elsewhere the decline continues.

Bombay.—*For week ending 17th May.*—Slight rain fell in parts of ten districts during the week. Reaping of late crops continues in Khandesh and Thar and Parkar. Preparations for next season are progressing generally and sowing in Kanara and Karachi. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in six and fallen in four districts; elsewhere they are stationary.

Bengal.—*For week ending 15th May.*—There was rain in all parts of the Province during the week and agricultural prospects have generally improved. Ploughing and early sowings are proceeding rapidly and the autumn rice and jute already sown in several parts are doing well. The state of sugarcane and other young crops in the ground is good. The harvesting of spring rice is still going on. There has been no important change in the price of common rice since last week. Cattle are generally in good condition. The fodder-supply is reported to be everywhere sufficient, except in parts of Manbhum.

North-Western Provinces and Oudh.—*For week ending 17th May.*—The weather was generally unsettled during the week with slight showers in parts of the Provinces. Spring harvest operations are practically over. Extra crops and sugarcane are thriving. Irrigation of the standing crops is being resorted to where necessary. Preparations for the autumn crop sowing have begun in parts. Prospects are favourable. Markets are well-stocked. Fodder is abundant. Prices have a rising tendency in some districts, but are otherwise fairly stationary.

Punjab.—*For week ending 17th May.*—Rain has fallen in all districts, except Jullundur, Mooltan, Ferozepore, Lahore, and Dera Ismail Khan. Reaping and threshing of spring crops are still going on and sowing of autumn crops continues in Mooltan, Lahore, Amritsar, and Peshawar. The ground is being prepared for sowing in Umballa. Sugarcane and tobacco are being weeded in parts of Sialkot. The crop outturn is reported average in Jullundur and Dera Ismail Khan. The condition of extra spring crops is good in Hissar, Umballa, and parts of Peshawar; and fair in Jullundur, Ferozepore, Lahore, and Dera Ismail Khan. Food-stocks are sufficient in Ferozepore, Amritsar, and Peshawar. Hailstorms did some damage to crops in parts of Shahpur. The condition of cattle is poor in Hissar and Delhi; fair in Dera Ismail Khan; and good elsewhere. Fodder is scarce in Hissar, Delhi, Shahpur, and Dera Ismail Khan, and sufficient elsewhere. Prices, especially of wheat, have fallen in Delhi, Umballa, Jullundur, Mooltan, Lahore, and Amritsar, but remained almost unchanged elsewhere. Wheat is selling from $16\frac{14}{16}$ to 22, gram $19\frac{1}{2}$ to $23\frac{1}{4}$, maize 30 to 35, barley 30 to 32, bulrush-millet 18 to 27, great millet 24, and rice $13\frac{1}{2}$ to $14\frac{1}{2}$ seers per rupee.

Central Provinces.—*For week ending 16th May.*—The weather has been generally cloudy and hot. Slight showers of rain fell in thirteen districts during the week. The threshing of spring crops has been completed in all districts, except Balaghat. In Saugor the labouring classes complain of want of work and the forest concessions have proved invaluable in this district, owing to a bumper mahua (*Bassia latifolia*) harvest. About 1,272 persons are in receipt of relief in the Damoh district. Water is scarce in parts of Mandla, Chhindwara, Chanda, and Bhandara. Fodder is scarce in parts of six districts and grain-stocks are insufficient in the Hinganghat tahsil of Wardha. The price of wheat, gram, rice, and *juar* has risen in some districts and has fallen in others. The cheapest prices are—wheat 20, gram 34, rice 23, and *juar* 19 seers per rupee; the dearest prices are—wheat $12\frac{1}{2}$, gram 18, rice 10, and *juar* 22 seers per rupee.

Burma.—*For week ending 13th May.*—In Lower Burma ploughing for wet weather paddy has commenced in parts of the Amherst district. In Upper Burma harvesting of island crops is completed and reaping of dry weather paddy is still in progress in most districts. Preliminary operations for the early wet weather crops have been extended to six other districts in addition to those last reported. The condition of the standing crops continues unchanged. Price of paddy has risen slightly in Rangoon, Prome, Thongwa, and Pakôkku and considerably in Bassein and Amherst, and there is a slight fall in Akyab; elsewhere the price is as before.

Assam.—*For week ending 10th May.*—Rain fell in most districts during the week. More rain is wanted in Cachar and in parts of Kamrup. Sowing of early rice, planting of sugarcane, and plucking and manufacture of tea are in progress. Prospects of tea are generally good, but red spider is prevalent in Cachar, Nowgong, and in parts of Darrang. Land is being prepared for late rice. Reaping of low land transplanted rice is nearly finished in Sylhet where the outturn is good. Sowing of jute is finished in Sylhet, but still continues in Goalpara. Prices—common rice—Silchar and Dhubri 16, Gauhati 14½, Tezpur and Sibsagar 12, Nowgong 14, Sylhet 21, and Dibrugarh 14 seers per rupee.

Mysore and Coorg.—*For week ending 17th May.*—MYSORE: Rainfall—70 cents in the Civil and Military station. Rain general and good in parts of Hassan. The standing crops are in good condition. Prices have fallen slightly in Kolar and Bangalore. *Ragi (Eleusine coracana)* has been sown in Kadur and Hassan.

COORG: Rainfall—53 cents. Ploughing for rice continues. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 17th May.*—BERAR: The weather is warm with occasional clouds. Preparation of land for the monsoon crops continues. Scarcity of fodder and water prevails in parts of the Province. Prices are fluctuating.

HYDERABAD: Rainfall—6 cents. Harvesting of the winter rice crop continues in parts, and fields are being prepared for monsoon sowings. A scarcity of water is felt in certain taluks. Prices of grain show a tendency to fall. Prices—wheat 10, coarse rice 10½, and *juar* 25 seers per current sicca rupee.

Central India.—*For week ending 17th May.*—Slight rain with hail fell in Jhabua and light showers in Bhopal and Indore during the week. Agricultural operations are in progress in Malwa and Bhopawar and have been completed elsewhere. Agricultural stock and pasturage are in good condition. Prices are normal throughout Central India. The condition of opium is fair in Malwa.

Rajputana.—*For week ending 17th May.*—Rainfall ranging from over half inch to 18 cents fell at Kerowlee, Bhurtpore, the Deva pargana of Jeysulmere, Ulwar, Haraoti, Bikanir, and few cents at Jeypore and Kishengarh. Harvesting and threshing continue. Land is being prepared in Ajmere and elsewhere for the autumn crops. Agricultural stock is in fair to good condition, but poor in Meywar and Haraoti. Fodder scarcity prevails except in three States. Prices are rising in Bhurtpore and Ulwar; falling in Jhallawar; and are steady elsewhere. Two persons emigrated from Merwara during the week. The total emigration from Merwara up to date numbers 4,416. The numbers employed on relief works were—Ajmere 591, Merwara 4,458, and Marwar 940. The number on gratuitous relief in Ajmere-Merwara was 160. Prices—Ajmere 19⅓, Beawar 22, and Marwar 15 seers per rupee.

Kashmir.—*For week ending 16th May.*—The weather is fine. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

JAMMU PROVINCE.—*For week ending 17th May.*—There was slight rain during the week. Prices are generally stationary. Prices—wheat from 18 to 25 and maize 29 to 34 seers per rupee. The condition of the standing crops is generally fair, but they are suffering in the Jasrota district for want of rain. Reaping and threshing of spring crops are in progress. Fodder is sufficient.

Nepal.—*For week ending 13th May.*—Rainfall—0·71 inch. The weather has been very warm. The wheat crop is doing well. Indian-corn and up-land rice are still being sown. Rice—9½ seers per rupee.

M. FINUCANE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 18th May 1899.

NOTIFICATIONS.

No. 1550 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 13th May 1899:—

No. 178 of 1899.—The International Typal Telegraph company, a corporation organized and existing under the laws of the state of Michigan, Detroit, state of Michigan, U. S. A. *Improvements in printing telegraphs.*

No. 179 of 1899.—W. A. Stuart-William, civil engineer, Nahan, Sirmoor state, Punjab. *A water-lift styled the "Jat" for irrigation purposes.*

No. 180 of 1899.—Fraser and Chalmers, limited, engineers and manufacturers, of 43 Threadneedle street, London. *Improved means for raising water from mine shafts or other places.*

No. 181 of 1899.—Reginald Belfield, electrician, of 32 Victoria street, in the city of Westminster, England. *Improvements relating to collectors and conductors for electric railways on the overhead system.*

No. 182 of 1899.—Louis Bell, electrical engineer, of 54 Glenwood Avenue, Newton Centre, county of Middlesex, state of Massachusetts, U. S. A. *Improvements in cooling apparatus.*

No. 1551 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection from 11 A. M. to 4 P. M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 478 of 1898.—Walter Ernest Hutchinson, mariner, of 55 Poets road, Canonbury, and Arthur Edward Newton, mariner, of 16 Linthorpe road, Stamford hill, both in the county of Middlesex, England. *Improvements in derricks.* (Specification filed 10 May 1899.)

No. 8 of 1899.—Oliver Hazard Perry Cornell, manufacturer, of 44 Broadway, in the city of New York, state of New York, U. S. A. *Improvements in and connected with barrels.* (Specification filed 8 May 1899.)

No. 18 of 1899.—Gustav Graf von Geldern-Egmond, Imperial and Royal Field Marshal Lieutenant, and President of the Imperial and Royal Technical Military Commission in Vienna. *Improvements in the manufacture of explosives.* (Specification filed 10 May 1899.)

No. 40 of 1899.—Walter Mardon Ducat, colonel, late Royal Engineers, of 13 Devonshire terrace, Hyde park, London, W. *An improvement in the method of, and apparatus for, purifying water, sewage and other foul liquids.* (Specification filed 10 May 1899.)

No. 70 of 1899.—Emil Carl Boeckh, brush manufacturer, residing at 11 Prince Arthur avenue, in the city of Toronto, in the county of York and province of Ontario, U. S. A. *Improvements in combined display-table and case.* (Specification filed 10 May 1899.)

No. 80 of 1899.—John King, mechanical engineer, Charles Downes, boiler maker, and Mihangel Ap Iwan, doctor of medicine, all of Buenos Aires, Argentine Republic. *An improved apparatus for heating feed water, promoting water circulation, and generating steam in locomotive and other steam boilers.* (Specification filed 10 May 1899)

No. 1552 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 83 of 1889.—George Bakewell Dewhurst. *Improvements in apparatus for marking folded piece-goods with trade marks and other marks and devices, and for printing and colouring such marks and devices at a single operation.* (From 21 May 1899 to 21 May 1900.)

No. 121 of 1889.—La Société des Générateurs á Vaporisation Instantanée (Sytème Serpollet). *Improvements in apparatus for generating steam.* (From 6 June 1899 to 6 June 1900.)

No. 103 of 1890.—Arthur Marie Francois Laurent-Cely and Illius Augustus Timmis. *Improvements in and relating to, and in the manufacture of, electric secondary cells.* (From 27 May 1899 to 27 May 1900.)

No. 314 of 1890.—Alexander Stanley Elmore. *Improvements in the process and apparatus for manufacturing copper tubes, sheets, strips and wires by electrolysis.* (From 20 May 1899 to 20 May 1900.)

No. 47 of 1891.—Ludwig Epstein. *Improvements in the formation of electrodes for use in primary and secondary electric batteries.* (From 12 May 1899 to 12 May 1900.)

No. 179 of 1892.—The Vacuum Brake company, limited. *Improved means applicable for use in railway trains fitted with pneumatic brakes for enabling passengers to signal the drivers and guards.* (From 26 October 1899 to 26 October 1900.)

No. 303 of 1892.—Charles James Fauvel.—*An improved furnace and method for the treatment of refractory ores.* (From 12 July 1899 to 12 July 1900.)

No. 109 of 1893.—Charles Hodgson. *An improvement in point locks for railways.* (From 14 June 1899 to 14 June 1900.)

No. 1553 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorising others so to do, has ceased:—

No. 155 of 1894.—B. L. Ghose. *A smoke purifier.* (Specification filed 13 February 1895.)

No. 173 of 1894.—Alexander St. George Ashe. *A camp bed and kit boxes combined* (Specification filed 9 February 1895.)

No. 191 of 1894.—Arthur William Macleod. *An electrical punkah-pulling machine.* (Specification filed 8 February 1895.)

No. 281 of 1894.—Francis Gascoigne Lynde. *A new and imp[illegible] d of raising and lowering lamps on signal posts.* (S[illegible] ruary 1895.)

No. 13 of 1895.—Stephen Augustus Ralli, Alexander Anthony Vlasto, Ambrose Pandia Ralli and Theodore Anthony Vlasto. *An automatic double acting continuous grain weighing machine for wheat, seeds and grain of every description into bags or bulk.* (Specification filed 13 February 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,

Offg. Secy. under the Inventions and Designs Act, 1888.

ORDERS BY THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

The undermentioned candidates have passed the Entrance Examination, 1899 :—

FIRST DIVISION.

Rangoon, Moulmein, Tavoy, Mergui, Penang and Singapore.	22nd ,,	Ditto.
Rangoon and Moulmein . .	20th ,,	Ditto.
Akyab, Kyaukpyu and Sandoway.	20th ,,	Ditto.
Ditto ditto . .	22nd ,,	Per land route *viâ* Chittagong.
Ditto ditto A.M. At 5-30	23rd ,,	Ditto.
Port Blair	25th ,,	*Viâ* Madras.
Ditto Parcels . . .	24th ,,	Ditto.
South African Ports . . .	22nd ,,	Per Steamer *Congella.*
Ditto ditto	27th ,,	Per Steamer *Crescent.*
Mauritius, Réunion, Mayotte, Nossi Be, Delagoa Bay, Natal and Cape Colony.	25th ,,	*Viâ* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles will be cleared for the forenoon Mails at the following hours:—

For Goalundo and Chittagong Express train at 5-30 A.M.
For Eastern districts as far as Dacca at 6-30 A.M.
For Bombay Mail *vid* Nagpur at 7-30 A.M. and with a late fee of ½ anna up to 8 A.M.
For Midnapore and Orissa at 8 A.M.

The letter-box will be cleared for the evening Mails without late fee at the following hours, *viz.*:—

For E. I. Railway Loop Mail at 2-30 P.M. and up to 2-55 P.M. with a late fee of ½ anna.

For the Bombay Mail *viâ* Jubbulpore carrying also Mails for Ceylon at 6 P.M.

For Darjeeling and Assam at 3-25 P.M. without late fee, and 3-50 P.M. with late fee of ½ anna.

For the Punjab at 7-30 P.M.

Late letters bearing a fee of ½ anna will be received for the Bombay Mail *viâ* Jubbulpore up to 6-30 P.M. and for other Mails from 7-30 to 8 P.M., and from 8-0 to 8-45 P.M. with a late fee of 1 anna for the Punjab Mails only.

Late registered articles will be received between the following hours:—

For Offices served by the Bombay Mail *viâ* Allahabad and Jubbulpore from 5 P.M. to 6-15 P.M.
For Offices served by the Punjab Mail from 6 P.M. to 7 P.M.
For Offices served by the Goalundo Mail from 6 P.M. to 7 P.M.
For Offices served by the Khulna Mail from 6 P.M. to 7 P.M.

The late fee on each registered letter will be two annas, which must be prepaid in stamps on the letter.

Articles for Burma and for Port Blair by Sea are received without late fee up to 7-30 P.M., after which hour they are received fully prepaid and bearing an extra stamp of ½ anna up to 8 P.M.

On the latest safe day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6 P.M., and late letters and papers fully prepaid will be received up to 6-30 P.M.

On the day of despatch of the Mail for Europe (Thursday), the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6-30 P.M., and late letters and papers fully prepaid will be received up to 6-45 P.M. Late registered articles will be received from 5 to 6 P.M. On other days the letter-box for Foreign articles will be cleared for the last time without the late fee at 6 P.M., and late letters and papers will be received up to 6-30 P.M. for despatch by any Foreign Mails *viâ* Tuticorin, Madras, or Bombay the same night and up to 8-30 P.M., late letters and papers up to 9 P.M., for any Foreign Mails despatched by Sea. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

P. J. GORMAN,

Offg. Presidency Postmaster, Calcutta.

NOTICE.

There is a vacancy in the post of Bengali Pundit to the Board of Examiners' Office. The salary attaching to the post is R40 per mensem. Candidates must possess a knowledge of English, Sanskrit and Bengali. Applications addressed to the Secretary, Board of Examiners, 17, Elysium Row, will be received up to 30th May and must be accompanied by copies of Testimonials.

NOTICE.

It is notified, for information of Military and Civil officers, that services of Shams-ul-Ulama, Shaikh Mahmud Gilani, Persian Instructor, and Mr. R. F. Azoo, Arabic Instructor, have been specially retained by Government for giving instruction to candidates intending to present themselves for examinations in Arabic and Persian before the Board of Examiners. Gentlemen requiring their tuition should communicate with them at the office of the Board of Examiners.

THE YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 3rd and 4th July, 1899, at 10-30 A.M. :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity).	100	50
Dictation (spelling, punctuation, etc).	100	50
Arithmetic (the whole)	240	160
Mensuration (*a*) the whole	60	30
Book-keeping (*b*) mercantile	100	50
TOTAL	600	400

Minimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping," by Ball and Hamilton.
"Book-keeping" by double and single entry by W. Inglis (Chambers' Educational Course).

The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in July. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed; but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

NOTE.—A candidate already in Government service should, in like manner, submit his application through his immediate official superior to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts to whom the candidate submits his application to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the college or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

A. MACDONELL,
Offg. Principal, Civil Engineering College.

SIBPUR,
The 1st May, 1899.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1898, the price of this Quinine will be as follows:—

1-pound tin,	R17,	or,	post-free,	R17-12.
½ „	R8-8,		„	R9-0.
¼ „	R4-4,		„	R4-12.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৮ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	১৭৲ বা ডাকমাশুল বিনা	১৭৸৹
½ আধ „ „	৮৷৹	„	৯৲
¼ সিকি „ „	৪৷৹	„	৪৸৹

পরিক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনাডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পুর্ব্বক মিশান হয় নাই তাহার গারান্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

II I 2

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required :—

VOLUME I.*

Section I. Building Materials, R2-6.
" II. Masonry, R1-4.
" III. Carpentry (1889), R1-4.
" IV. Earthwork (1892), R1-4.
" V. Tools and Plant (never published).

VOLUME II.*

Section VI. Buildings. (In the Press.)
" VII. Bridges, R4-4.
" VIII. Roads, R1-8.
" IX. Railways (1891), R1-4.
" X. Irrigation Works. (Under revision.)

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7.
" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition, with Curve Table). R3.
XIII. Drawing (by Lieut. R. Pulford, R.E.). † R8.
XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.
XIV. Simple Applied Mechanics, Parts I and II in one (in the Press)
Simple Applied Mechanics, Part II (1st edition). 8a.
XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.
XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. Say R1.
XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Shelly's Workshop appliances. R1-8.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Notes on Chemistry of Building Materials. R2-0.

Tate's Mechanism. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunnya Lal. R2-8.

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 12a.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12a.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. (In the Press.)

Wooden Bridges and Designs. By Rai Kunhya Lal. (In the Press.)

Blasting under Water (2nd edition). 10a.

Waugh's Instructions for Topographical Surveying. R1.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-8.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R2-0.

Banerman's Descriptive Mineralogy. R3.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time). 4a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.

Cape's Geometry. R1-4.

Cape's Mechanics. 8a.

Todhunter's Plane Trigonometry. R2-12.

Todhunter's Differential Calculus. R2-8.

Military Topography. 8a.

HINDUSTANI.

Elements of Hindustani Grammar. 8a.

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II. Each Part 3a.

Short Account of Ganges Canal (English and Urdu). 4a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large. R1-4.

Surveying Field-Books (ruled). 14a.

Levelling Field-Books (English Pattern). R1-4.
" " (Canal "). R1-4.
" " (College "). R2-0.

P. W. D. Note-Book. R1-4.
" Measurement Book. R1-4

Circular Card-board Protractors, 12 inches. R2.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly, Nos. 1 to 5), bound R2.
Quarterly, Nos. 1, 2, 3, 4, and 5, } 8a. each,
Vol. II, Quarterly, Nos. 6 and 7, } exclusive
" VI, " Nos. 24 and 25, } of pack-
" VII, " Nos. 26, 27, 28, and 29, } ing and
Extra No., April 1870. } postage.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI 8a. each, exclusive of packing and postage.

Quarterly Number 41A of Vol. X. 8a. each, exclusive of packing and postage.

Cloth covers for Volumes of 1st and 2nd Series, at 4a. **each.**

(THIRD SERIES.)

Quarterly Nos. 13 and 15, at 8a. **each, exclusive** of packing and postage.

Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2a. **each,** and loose papers, 3rd Series, 3a. each, exclusive of packing and postage.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of admission to the different classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I. S. C.,*
Principal, Thomason Civil
Engineering College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
" each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	a.	p.	R	a.	p.
For the Calcutta Series; per copy . . .	0	8	9	0	10	0
" each of the Madras, Bombay, and Allahabad Series; per copy	0	5	3	0	5	9
" the Calcutta Series. For the year . .	7	2	6	8	6	3
" each of the Madras, Bombay, and Allahabad Series. For the year . . .	4	4	6	4	11	0

Persons desiring to subscribe for, or purchase, the Report, should apply to—
Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*

PROMISSORY NOTES.

Lost.

The not transferable Treasury Note, No. 017225, of the 3½ per cent. loan of 1854-55, for R900 (nine hundred only), originally standing in the name of Krishna Bai, Manager for the Temple of Sree Dattatraya at Chanda, the proprietor, by whom it was never endorsed to any other person. Payment of the above Note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest and for the issue of duplicate in favour of the proprietor after two years from the date of last advertisement.

KRISHNA BAI,
Widow of Sambshio,
Pujarin of the Temple of Dattatraya,
Chanda.

Lost.

The Government Promissory Note No. 014173 of the 3 per cent. loan, 1896-97, for R500 (five hundred) originally standing in the name of Chartered Bank of India, Australia and China (original No. 011226) and last endorsed to Prasanna Kumar Mitra, the proprietor by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of a duplicate in favour of the proprietor. The public are cautioned against purchasing or otherwise dealing with the above mentioned security.

BHOLA NATH GHOSE, *Shed Foreman,*
Chitpur, E. B. S. Railway.

SUPPLEMENT TO

The Gazette of India.

No. 20.] CALCUTTA, SATURDAY, MAY 20, 1899.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

Matter intended for publication in the Supplement should reach the Press not later than Thursday.

CHAS. SANDERSON,

Offg. Publisher, Gazette of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 26th May 1899.

NOTIFICATIONS.

No. 1622 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 20th May 1899:—

No. 183 of 1899.—Charles James Jennings, Major General, on the retired list of the Madras army, St. Anns, Ootacamund. *An improved form of puttee.*

No. 184 of 1899.—Samuel Thomas Gresham, engineer, of 6 Waterloo street, Calcutta. *An automatic safety catch for railway and other vehicle doors.*

No. 185 of 1899.—William Edward Sharps and Reuben Hilton Chase, gentlemen, both of Philadelphia, in the county of Philadelphia and state of Pennsylvania, U. S. A. *An improved process of producing a substitute for rubber.*

No. 186 of 1899.—The Automatic Telephone company, limited, of 13 and 14 Abchurch lane, in the city of London. *An improved system of automatic telephone exchange.*

No. 187 of 1899.—John Edward Tenison Woods, civil engineer and chemist, of 38 Chantry road, Stockwell, in the county of London, and William Ascroft Byrom, gentleman, of 32 Great St. Helens in the city of London. *Improvements in and connected with the manufacture of calcium carbide and such like compounds, the reduction of metallic oxides and the melting and refining of steel and other metals.*

No. 188 of 1899.—Emile Bede, engineer, of 10 Square Guttenberg, Brussels, in the kingdom of Belgium. *Improvements connected with electric traction.*

No. 189 of 1899.—Gustav Leske, manufacturer, of 70 Blumenstrasse, Berlin. *Improvements in machinery for corrugating paper.*

No. 190 of 1899.—Reginald Belfield, electrician, of 32 Victoria street, in the city of Westminster, England. *Improvements in switches for electric circuits.*

No. 191 of 1899.—Alexander Muirhead, telegraph engineer, of the town of Shortlands, in the county of Kent, England. *Improvements in telegraphic transmitting, receiving and translating arrangements.*

No. 1623 P.—A SPECIFICATION of the undermentioned invention has been filed under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. This and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a

fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 380 of 1898.—N. Futehally and company, merchants, of Bank street, Fort, Bombay. *Cleaning and dressing aloe-fibre plant leaves.* (Specification filed 13 May 1899.)

No. 1624 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 143 of 1889.—John French Golding. *Improvements in machines for the manufacture of metal lattice-work or trellis-work.* (From 22 August 1899 to 22 August 1900.)

No. 165 of 1891.—Alfred William MacIlwaine. *Improved means for cleaning or removing extraneous matter from rape and other seeds.* (From 5 October 1899 to 5 October 1900.)

No. 28 of 1893.—Samuel Cleland Davidson. *Improvements in apparatus for drying tea or other vegetable substances or other material.* (From 7 June 1899 to 7 June 1900.)

No. 200 of 1893.—Theodore Guilleaume. *Improvements in electric cables.* (From 5 September 1899 to 5 September 1900.)

No. 270 of 1894.—Thomas Henry Lee Bake and Henry Alfred Leverett. *Improvements in tanning skins and hides.* (From 22 March 1899 to 22 March 1900.)

No. 282 of 1894.—Robert Thornton Moore. *Hanging, counterbalancing and actuating punkahs.* (From 6 May 1899 to 6 May 1900.)

No. 105 of 1895.—Samuel Cleland Davidson. *Improvements in apparatus for withering or limping tea leaf in the course of its manufacture into black tea.* (From 19 June 1899 to 19 June 1900.)

No. 1625 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorising others so to do, has ceased:—

No. 123 of 1894.—John James Davidge Cleminson. *Improvements in railway and tramway locomotives and other vehicles.* (Specification filed 14 February 1895.)

No. 143 of 1894.—Abraham Wilhelm Schwarz. *A process for rock blasting by means of chloride of nitrogen.* (Specification filed 14 February 1895.)

No. 147 of 1894.—James Buchanan Brand and Clauder Lorraine Franklyn. *Improvements in underground conduits for electric railways.* (Specification filed 18 February 1895.)

No. 210 of 1894.—Thomas Robert Raney Ashton and Edward John Keily. *Improvements in magazine fire-arms.* (Specification filed 18 February 1895.)

No. 211 of 1894.—Thomas Robert Raney Ashton and Edward John Kelly. *Improvements in magazines for fire-arms.* (Specification filed 18 February 1895.)

No. 263 of 1894.—The Pneumatic Patents company, limited. *Improvements in type-writing machines.* (Specification filed 14 February 1895.)

No. 304 of 1894.—Robert Annesley. *A moveable urinal.* (Specification filed 15 February 1895.)

No. 337 of 1894.—Arthur John Lucy. *A hydraulic apparatus for working punkahs.* (Specification filed 15 February 1895.)

No. 360 of 1894.—Archibald Symington. *Improvements in windows of road, railway, tram and other carriages.* (Specification filed 20 February 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,

Offg. Secy. under the Inventions and Designs Act, 1888.

MILITARY WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 12th May, 1899.

No. 9-*A*.—The following promotion is made in the Engineer Establishment of the Military Works Department with effect from the date specified :—

NAMES.	From	To	Nature of promotion.	With effect from
Lieutenant E. N. Stockley, R.E.	Assistant Engineer, I grade.	Executive Engineer, IV grade.	Temporary	3rd April, 1899.
Lieutenant F. P. Rundle, R.E.	Assistant Engineer, I grade.	Executive Engineer, IV grade.	Temporary	7th April, 1899.
Captain E. L. Dunsterville, R.E.	Attached	Executive Engineer, IV grade.	Temporary	24th April, 1899.
Lieutenant J. L. Meyer, R.E.	Assistant Engineer, I grade.	Executive Engineer, IV grade.	Temporary	24th April, 1899.

S. C. TURNER, *Major-General,*

Director General of Military Works in India.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

I.—The undermentioned candidates have passed the F.E. Examination, 1899:—

FIRST DIVISION.

(In order of merit.)

1.	Tafazzul Ahmad	Civil Engineering College, Sibpur.
2.	Nandi, Kalicharan	Ditto ditto.

SECOND DIVISION.

(In order of merit.)

1.	Sen, Jogeschandra	Civil Engineering College, Sibpur.
2.	Bandyopadhyay, Chintaharan ...	Ditto ditto.
3.	Chattopadhyay, Sureschandra ...	Ditto ditto.
4.	Mitra, Charuchandra	Ditto ditto.
5.	Chattopadhyay, Asitachandra ...	Ditto ditto.
6.	Bhattacharyya, Jnaneschandra ...	Ditto ditto.
7.	Sengupta, Jaminikanta	Ditto ditto.
8.	Mitra, Anukulchandra	Ditto ditto.
9.	Ghosh, Krishnachandra	Ditto ditto.
10.	Bhattacharyya, Harinath	Ditto ditto.
11.	Basu, Atulkrishna	Ditto ditto.
12.	Chakrabarti, Manmathanath ...	Ditto ditto.
13.	Das, Bhubanmohan	Ditto ditto.
14.	Ray, Panchugopal	Ditto ditto.
15.	Sarma, Rohindranath	Ditto ditto.
16.	Datta, Adharlal	Ditto ditto.
17.	Chandra, Rajendranath	Ditto ditto.
18.	Bhattacharyya, Srischandra ...	Ditto ditto.
19.	Chattopadhyay, Madhusudan ...	Ditto ditto.
20.	Ghosh, Nandalal	Ditto ditto.
21.	" Sripati	Ditto ditto.
22.	Dasgupta, Jatindrakumar ...	Ditto ditto.
23.	Gupta, Prankumar	Ditto ditto.
24.	Ghosh, Upendranath	Ditto ditto.
25.	Das, Surendranath	Ditto ditto.
26.	{ Ray, Nagendranath	Ditto ditto.
	{ Nandi, Jogeschandra	Ditto ditto.
28.	Mukhopadhyay, Manmathanath ...	Ditto ditto.

II.—The undermentioned candidates have passed the L.M S. Examinations, 1899:—

PRELIMINARY SCIENTIFIC L.M.S. EXAMINATION.

A. F. COX,
Head Commissioner of Paper Currency

CIVIL AND MILITARY STATION, BANGALORE.

MUNICIPAL OFFICE.

NOTIFICATION.

Dated the 2nd May, 1899.

No. 670.—In exercise of the powers conferred under sections 102 (*a*) (*b*) (*d*) (*e*) (*f*) (*g*) (*h*), 137 (1) (*e*), (*v*) and 137 (1) (*k*) of the Bangalore Municipal Law, 1897, the Municipal Commission for the Civil and Military Station of Bangalore have made the following Bye-laws, and the same having been confirmed by the Resident in Mysore as required by section 139, they are hereby notified for public information under section 180 (3) of the said Law :—

Chapter III—*continued.*

SANITATION AND OTHER PURPOSES.

BYE-LAW No.. MANUFACTURE AND PREPARATION OF ARTICLES OF FOOD AND DRINK.

BANGALORE MUNICIPAL LAW, SECTION 102 (*a*), (*b*), (*d*) AND (*e*).

No. 3443, dated 17th August 1898.

1. No place shall be used for the manufacture or preparation for sale of Ice, Ærated waters, Flour, Bread, Sweetmeates, Hoppers, Sugar or Jaggery unless licensed for the purpose.

Provided that no license will be necessary for the manufacture and preparation of any of the above-mentioned articles for private consumption only, and not for sale.

2. Any person wishing to use any place for any of the said purposes shall apply to the President for a license. The President may at his discretion grant or refuse such license provided that every order refusing such license shall be in writing, and shall state the ground on which it proceeds. Provided also that * * * before granting any such license the President shall refer the application to the Health Committee for report as to the suitability of the premises for the purpose proposed, that if the Health Committee report that the premises are unsuitable the license shall be refused, and that if the Health Committee at any time consider, for reasons to be recorded by them, that any place so licensed has become unsuitable for the purpose for which it is licensed, the President shall cancel the license, or suspend it until the place has been made suitable for the said purpose.

3. Application must be made to the President before the end of the first month of each official year for the renewal of all licenses granted under this Bye-Law.

4. The following fees shall be charged for licenses granted under this Bye-Law :—

Nature of trade.	Fee per annum. R	a.	p.
1. Ice Manufactory	50	0	0
2. Aerated Water Manufactory	100	0	0
3. Flour Mill (Machine)	50	0	0
Flour Mill (Hand)	5	0	0
4. Bakery	5	0	0
5. Sweetmeat Bazaar	5	0	0
6. Hopper Bazaar	1	0	0
7. Sugar or Jaggery Manufactory, 1st class	10	0	0
" " " 2nd class, for manufacture of SugarCandy only	2	0	0

5. The following conditions shall be attached to all licenses granted under this Bye-Law for any of the following purpose :—

(1) *Manufacture of Ice.*

(*a*) Water to be converted into ice shall be drawn only from such sources as are approved of by the Health Committee.

(*b*) Such water shall not be carried in massacks or in any other vessels not approved of by the Health Committee.

(*c*) Carts employed for the carriage of such water shall be kept on the premises and shall have the designation of the factory painted on the barrel, and shall at all times be kept in a state of scrupulous cleanliness.

(2) *Manufacture of Ærated Waters.*

(*a*) All water to be manufactured into ærated water shall be boiled before use, and be kept while cooling in a suitable covered vessel.

(*b*) If the water be filtered after boiling, the filtering vessels and materials shall be sterilized at such times, and in such manner, as the Health Committee may direct.

(*c*) All water to be used for washing bottles shall be stored in closed iron vessels, and be treated before use with permanganate of potassium in such manner as the Health Committee may direct.

(*d*) The room in which ærated waters are manufactured shall be properly roofed, and kept clean and in good repair; the walls shall be plastered with mortar and shall be lime-washed at least once in three months; the floor shall be flagged, tiled or cemented so as to be impervious to water, and shall be properly drained.

(*e*) All water to be manufactured into ærated waters or to be used for washing bottles shall be drawn only from sources approved by the Health Committee.

(*f*) Such water shall not be carried in massacks or in any other vessels not approved of by the Health Committee.

(*g*) Carts employed for the carriage of such water shall be kept on the premises, shall have the designation of the factory painted on the barrel, and shall at all times be kept in a state of scrupulous cleanliness.

(*h*) The premises and all appliances used in the manufacture shall be opened to inspection at all reasonable times by the President, the Medical Officer, or any officer authorized by them.

(*i*) No ærated waters of any kind shall be issued from the manufactory without having a proper label on each bottle, giving full name and address of manufacturer.

(3) *Manufacture of Bread or Sweetmeats.*

(*a*) No place for the manufacture of bread or sweetmeats shall be roofed with leaves, thatch or such like inflammable materials, nor shall any screens or sunshades made of tatty, matting or gunny be allowed.

(*b*) The boards, platforms, or vessels used for the kneading of dough, or mixing of materials, shall be thoroughly cleansed daily. In the preparation of any such article no portion of the materials used shall be allowed to come into contact with the bodies of persons in any way which may be objected to by the Health Committee and which is not necessary for the purpose of manufacture.

(*c*) Every room used for the manufacture of any of the said articles shall be kept in a proper state of cleanliness and lime washed at least once in every three months.

6. Whoever without obtaining a license as required by this Bye-Law uses any place for any of the purposes mentioned in clause I shall be liable on conviction to a fine not exceeding R50, and to a further fine which may extend to R5 for every day after such conviction during which he continues to use such place for such purpose.

7. If the holder of any license under this Bye-Law employs any person to be in charge of the place for which such license is granted, such person shall be equally liable with the licensee for the observance of all conditions attached to such license.

8. A breach of any condition of any license granted under this Bye-Law shall render the holder of the license and the person in charge of the place licensed, liable on conviction to a fine not exceeding R20 and to a further fine which may extend to R5 for every day after such conviction during which the breach continues.

SANITATION AND OTHER PURPOSES.

BYE-LAW No. PLACES FOR SALE OF ARTICLES OF FOOD AND DRINK.

BANGALORE MUNICIPAL LAW, SECTION 102, (*d*) AND (*e*).

A. General.

1. No place shall be used as a market for the sale of meat, fish or vegetables intended for human food except those mentioned in the list given below; provided that the President shall have power to license as retail shops for any of the above articles, such other places as the Health Committee may think fit for the purpose, and to withdraw such licenses.

2. The following places may be used as markets under the above clause:—

(*a*) *Public Markets.*

General Market—New Market Road;
Beef and Poultry Markets—Broadway Road;
Fish Market—Broadway Road;
Fish Market—New Market Road.
Shulay General Market—Shulay;
Alsur General Market—Alsur;
Pork Market—Timmiah Road;
Vegetable Market—New Market Road;
Beef and Mutton Stalls—Knoxpett:

and such other places as may from time to time be set apart by the Commission for use as public markets.

(b) Private Markets.

Such places as may from time to time be approved by the Commission for use as Private markets.

B. Public Markets.

3 Public markets shall not be open for use by the public, before 6 A.M., or after 8 P.M.

4. Every shop-keeper, stall-holder, or sitter therein shall remove his goods and close his shop daily at or before the time of closing so as to allow of the markets being thoroughly cleansed for the next day.

5. No goods shall be brought into the markets except such as are intended for sale; and such goods shall be kept only in the shops, stalls, sittings, or godowns.

6. Any person selling or exposing for sale in any market, any meat, fish, or vegetable matter which is decomposed or unfit for consumption or any meat that by blowing or other artificial means is made to appear to be in a condition differing from what it really is, shall be liable on conviction to a penalty not exceeding R50.

7. No projections of any kind from shops, stalls, or sittings shall be allowed. Every article forming such projections will be removed by the Market Sergeant, and will be liable to be confiscated by the President, and to be sold by public auction. The proceeds of goods so confiscated and sold shall be credited to Municipal Funds.

8. All shop-keepers, stall-holders, and sitters in the public markets shall be decently and properly dressed.

9. All scales, weights, and measures shall be kept clean and in proper order. Standard weights and measures will be kept in charge of the Market Sergeant.

10. Every shop-keeper stall-holder or permanent sitter, who may employ another person to act in his stead, shall declare the fact to the Market Sergeant, who shall enter the name of the said substitute on the back of the rent receipt.

11. No shop, stall, or sitting shall be sub-let without the sanction of the President.

12. Stalls, shops or permanent sittings shall not be let for less than one month at a time, unless by special order of the President, and all rents therefor shall be paid on or before the 10th of each month to the Market Sergeant, or other person, or persons, authorized by the President in writing to collect such rents.

13. Lost articles, found by any person within the limits of the Municipal markets, shall be handed over by the finder to the Market Sergeant, who shall hand them over to the Police to be disposed of as unclaimed property.

14. No one shall create a disturbance in the market by singing, or beating of tom-toms, or by other musical instruments, or by quarrelling, or by using abusive language.

15. No coolies shall be allowed into the markets unless in the service of stall-holders, or brought in by intending purchasers, nor shall any vagrants or beggars be allowed.

16. No person shall bring a dog into the market.

17. No vendor in the market shall smoke in his stall, and no vendor or other person shall cook in the market without special permission, or spit the juice of "Pan Supari" or throw fruit peel or pieces of vegetables about, or sleep on the stalls or anywhere within the limits of the markets.

18. No person shall satisfy a call of nature or commit any other nuisance within the limits of a market, except in a urinal or latrine provided for that purpose. Any breach of this rule shall render the offender liable on conviction to a penalty not exceeding R10.

19. No person suffering from leprosy or other loathsome or contagious disease shall be allowed to keep a stall in any market, or be employed in any way in the preparation or sale of food in such market, and any such person coming within the market may be expelled by the Market Sergeant or his Assistant.

20. No person resorting to any market, or being in charge of any vehicle, waggon, cart, truck or any horse or other beast of burden, shall cause or allow such vehicle or beast to stand within the precincts of the market for any longer time than shall be reasonably necessary for getting in or out of such vehicle, or loading such waggon, cart or truck.

21. The Market Sergeant and his subordinates may expel from the market premises any person who is found drunk or begging, or loitering, or who misconducts himself or infringes any of the above rules or is a lunatic; and if such person is a tenant or his servant, may (subject to the approval of the President) prevent him from further carrying on any trade or business in the market or occupying any shop or stall therein. A vendor guilty of assault may be expelled from the market and prevented from further carrying on any trade or business or occupying any shop or stall in the market.

22. All vendors or their servants or agents shall obey all reasonable orders of the Market Sergeants, but shall have the right of appealing against such orders to the President.

C. Private Markets.

23. Whoever without the sanction of the Commission uses any place as a Private market shall be liable on conviction to a fine not exceeding R50, and to a further fine which may extend to R5 for every day after such conviction during which he continues so to use it.

24. Whoever having reason to believe that the use of such place as a market has not been sanctioned by the Commission, sells or exposes for sale in such market any meat, fish or vegetables shall be liable on conviction to a fine not exceeding R10, and to a further fine which may extend to R1 for every day after such conviction during which he sells or exposes for sale any such article.

25. When the use of any place as a private market has been sanctioned by the Commission, the President shall issue a license to the owner thereof. The owner shall keep such license affixed in a conspicuous place at or near the entrance of such market. The owner of every such market shall apply to the President in the first month of each official year for the renewal of his license.

26. If at any time the President or the Health Committee consider that such place has become unsuitable for the purpose of a market or likely to be a nuisance to the neighbourhood, the President shall require the owner to carry such works out as may be necessary to make the place suitable or to abate the nuisance, and shall suspend or withhold the license until such works have been carried out. Provided that no such market shall be permanently suppressed without the sanction of the Commission.

27. When any such license is suspended or withheld by the President under the above section, notice of such suspension or withholding shall be affixed in English and two vernacular languages in some conspicuous place at or near the entrance to such market.

28. Any person who during the suspension or withholding of the license of a private market as provided in Section 26 above keeps open such market, shall be liable on conviction to a fine not exceeding R50, and to a further fine which may extend to R5 for every day after such conviction during which he keeps open such market.

29. Any person who having knowledge of such withholding or suspension sells or exposes for sale in any such market any meat, fish or vegetables shall be liable on conviction to a fine not exceeding R10 and to a further fine which may extend to R1 for every day after such conviction during which he sells or exposes for sale any such article.

30. Every private market shall be under the control of the Commission, and the President or Medical Officer or any other officer authorized by them may, either with or without the assistance of the police, enter every such market at all reasonable hours and inspect the same, and seize all articles of food or drink exposed for sale or stored therein which may appear to be unfit for food or drink.

31. The owner, occupier, or farmer of every such market shall have a pipe, of not less than one inch in diameter, laid on from the nearest water main. and shall cause such market to be thoroughly washed and cleansed once in every twenty-four hours, and shall be responsible for the proper condition of such market.

32. Every market shall be kept thoroughly clean and ventilated, and shall be paved and provided with proper drains for the conveyance of waste water to the nearest public drain or sewer; and such markets, drains, and ventilators shall be constructed in all respects to the satisfaction of the President and the Health Committee.

33. No owner, occupier, farmer of, or vendor in, any market or stall shall sell, or expose or permit to be exposed for sale, or admit into, or permit to remain in, any such market or stall, any meat, or fish, or vegetable matter which is decomposed or unfit for consumption, or any meat that by blowing or other artificial means is made to appear to be in a condition differing from what it realy is.

34. The owner, occupier or farmer of any market shall not permit any person suffering from leprosy or other loathsome or contagious disease to keep a stall in such market, or to be employed in any way in the preparation or sale of food in such market.

35. No person shall satisfy a call of nature or commit any other nuisance within the limits of a market, except in a urinal or latrine provided for that purpose.

36. The owner, occupier, or farmer of any market shall not permit any dogs to enter such market. Any dogs found in any such market may be destroyed by any Municipal Officer or servant

37. Breach of any of these rules for the control of private markets when not otherwise provided for shall render the offender liable on conviction to a fine not exceeding R20 and to a further fine which may extend to R2 for every day after such conviction during which the breach continues.

D.—Retail shops outside markets.

38. Whoever without obtaining a license from the President under section 1 of this Bye-law uses any place not being within a public or licensed market for the sale of any meat, fish or vegetables shall be liable on conviction to a fine not exceeding R20 and to a further fine which may extend to R2 for every day after such conviction during which he continues so to use it.

Fees.

39 For every license granted by the President under section 1 of this Bye-law for the

use of any place as a retail shop for the sale of meat, fish or vegetables, the following fees shall be charged :—

For the sale of meat	R 5	per annum.
Do. fresh fish	„ 5	do.
Do. salt fish	„ 1	do.
Do. vegetables	„ 1	do.

all such licenses shall expire on the 31st March in each year, and application for their renewal must be made to the President before the end of the first month of the official year.

40. Every such license granted for the sale of meat shall be in the following form :—

——— is hereby licensed to keep a butcher's shop at No. ——in——street for the retail sale of animal flesh intended for human food subject to the following conditions :—

(1) That the President, Medical Officer, or other officer authorized by them shall at all times have free access to the shop for municipal purposes, and that he shall produce this license to any such officer demanding it.

(2) That he shall not sell, or offer for sale, the flesh of any animal that has not been examined and passed by the Veterinary Inspector and slaughtered in a public slaughter-house.

(3) That he shall not sell or offer for sale any meat that is decomposed or unfit for consumption, or that by blowing or other artificial means is made to appear to be in a condition differing from what it really is.

(4) That he shall keep for use in the shop proper scales and correct stamped weights.

(5) That a breach of any of the above conditions by himself or by his servants, shall render him liable on conviction to a fine not exceeding R20.

SANITATION AND OTHER PURPOSES.

BYE-LAW No. SALE OF MILK AND BUTTER.

B. M. L. SECTION 102 (*f*) (*g*) AND (*h*).

1. No person shall carry on trade as Dairyman unless licensed by the Commission.
The term "Dairyman" for the purpose of this Bye-law includes every person who carries on trade in milk or butter or who keeps milch cattle for the purpose of selling milk.

2. Any person wishing to carry on trade as a Dairyman shall apply to the President for a license stating the nature of the business to be carried on and the place in which it is to be carried on. The President may at his discretion grant or refuse such license provided that every order refusing such license shall be in writing, and shall state the ground on which it proceeds. Provided also that * * * before granting any such license the President shall refer the application to the Health Committee for report as to the suitability of the premises for the purpose proposed, that if the Health Committee report that the premises are unsuitable, the license shall be refused, and that if the Health Committee at any time consider, for reasons to be recorded by them, that the premises used for the said trade have become unsuitable for the purpose, the President shall cancel the license or suspend it until the premises have been made suitable for the said purpose.

3. Application must be made to the President before the end of the first month of each official year for the renewal of all licenses granted under this Bye-law.

4. A fee of R2 per annum shall be charged for each license under this Bye-law.

5. No licensed Dairyman shall sell or keep milk in any dwelling-house or room or place used for sleeping or cooking.

6. Every licensed Dairyman shall cause every part of the internal surface of the walls, roof and flooring of every room or place in which milk or butter is kept or sold by him, and all shelves or benches on which milk vessels are kept, to be kept constantly clean, and all vessels used for the purpose of his trade to be washed and thoroughly cleaned before and after use.

7. No licensed Dairyman shall permit any person suffering from any loathsome, contagious or infectious disease to be employed in any way in the preparation, storage or distribution of milk or butter, or the tending of milch cattle or to enter any place used for such purposes, and no person so employed shall knowingly come into contact or communication with any person suffering from any such disease.

8. No licensed Dairyman shall use or permit to be used for the washing or cleaning of milk vessels, or for any other purpose by which it may be brought into contact with milk or butter, any water other than that drawn from a public main or from a well previously approved in writing by the Health Committee.

9. Every licensed Dairyman who keeps milch cattle shall, in case of any outbreak of sickness amongst such cattle, give immediate notice thereof to the Health Officer or Sanitary Inspector, and shall also at once remove any sick animal from contact with other animals which are not sick, and keep it apart in such place as may be approved by such officer pending the orders of the President, or, in case there should be no suitable place on the premises where sick animals can be conveniently segregated, he shall, pending such orders as aforesaid, remove any such sick animal to some other place approved of by such officer. He shall immediately, on receipt of the President's orders in regard to the segregation or disposal of such animal, comply with and carry out such orders.

10. No licensed Dairyman owning any milch cattle suffering from any form of disease shall permit the milk of such animal to be sold or used for domestic purposes until he shall have received the consent in writing of the Health Officer.

11. Breach of any of these rules shall render the offender liable on conviction to a fine not exceeding R50, and to a further fine which may extend to R5 for every day after such conviction during which the breach continues.

SANITATION AND OTHER PURPOSES.

BYE-LAW No. CONTROL OF BURIAL AND BURNING-GROUNDS.

B. M. L. SECTION 137 (1) (e) (v).

1. Every owner or person having control of any place used as a burial or burning-ground shall cause the same to be registered in a register, which shall be kept in the Municipal Office for that purpose, together with the names of the owner and the persons having control thereof, and shall deposit in the Municipal Office at the time of registration a plan of the said place showing the extent and boundaries thereof.

A fee of R10 shall be paid for every such registration.

2. If it appears to the President that there is no owner or person having the control of any such place, the President shall assume control thereof, and direct it to be registered, or may cause it to be closed.

3. Notice of the registration shall be affixed in English and in two vernacular languages, in some conspicuous place at or near the entrance to such places.

4. Whoever after the registration of any such place acquires by inheritance, transfer, or any other means the ownership or control thereof shall, within one month of such acquisition, give information thereof in writing to the President.

5. The owner or the person having control of any such place shall, when so required by the President, give all information that may be required regarding the attendants employed, or the system of management followed therein, or any other matter connected with the control thereof.

6. The owner or any person having control of any such place shall cause the same to be kept at all times in a cleanly state, and free from noxious vegetation to the satisfaction of the President, and shall, if so required by the President by notice in writing, cause the same to be enclosed by a sufficient wall or fence.

7. The person having control of every such place shall give information within twenty-four hours to such person as may be appointed by the President in that behalf, and in such form as may be prescribed by the President, of all burials and burnings which take place therein.

8. No person shall bury, or cause to be buried any corpse or part of a corpse in a grave, whether dug or constructed of masonry or otherwise, in such manner that the surface of the coffin, or the surface of the body where no coffin is used, is at a less depth than five feet from the surface of the ground,......and no grave shall be used for the burying of more than one corpse, except in the case of two or more members of one family being buried at the same time or in the case of sanction being obtained under para. 10 to re-open an old grave or family vault.

9. No person shall build or dig, or cause to be built or dug any grave in any burial ground, at a less distance than two feet from the margin of any other existing grave.

10. No person shall without the sanction in writing of the President, or an order in writing of a Magistrate, re-open a grave already occupied.

11. Whoever brings or conveys or causes to be brought, or conveyed, a corpse, or part thereof, to any burial or burning-ground, shall cause the same to be buried, or burnt, within six hours after its arrival at such ground.

12. No person when burning or causing to be burnt a corpse, or part of a corpse, in any burning-ground, shall permit the same or any part thereof to remain without being completely reduced to ashes.

13. No person shall permit clothes, or any other articles, connected with the burning of any corpse, to remain at or near a burning-ground without being completely reduced to ashes.

14. No person shall act as Vettiyan, grave-digger or other attendant in a Municipal burial or burning-ground, without being licensed for that purpose by the President. Licenses granted for such purposes shall be in the form appended, and may be withdrawn or cancelled at the President's discretion.

Bangalore Civil and Military Station Municipality.

HEALTH DEPARTMENT.

Under the provisions of the Bye-law for the control of burial and burning-grounds ......

....

is hereby licensed to act as..
at the..burial and burning-ground
on ....road in the..................................Municipal circle under the conditions named on the reverse hereof.

President.

CONDITIONS REFERRED TO.

This license may be withdrawn or cancelled on proof of the licensee—

(*a*) not being available, without reasonable excuse, at the said burial or burning-ground at any time or times at which his services as
may be required by any member or members of the community usually resorting to it,

(*b*) or neglecting to do the duty usually required of him there, as such, on occasions of burial and burning,

(*c*) or causing or permitting or being a party to any infringement of the rules laid down in the Bye-laws for the control of burial and burning-grounds, as far as they affect him, and his duties as such,

(*d*) or demanding, or attempting to extort, any higher fee than at the rates following, *viz.*:—

For burial of a corpse of or under 12 years of age	Annas	8
Ditto do. above that age	,,	10
For cremation of a corpse of or under 12 years of age, including the milk ceremony, if any.	,,	3
Ditto do. above that age, including as above	,,	6
For supplying tools for the purpose of digging grave, etc., to those not otherwise requiring his services	,,	1½

(*e*) or being guilty of any misconduct which in the opinion of the President requires the withdrawal of the license.

15. No person shall erect or build, or cause to be erected or built, any monument, tombstone, shrine, temple, building or enclosure, in any Municipal burial or burning-ground without the sanction in writing of the President. A fee of 8 annas per square foot or part of a square foot shall be paid by the applicant before such sanction is granted by the President. The President may cause anything so erected or built without his sanction to be demolished.

16. Breach of any of these rules shall render the offender liable on conviction to fine not exceeding R50.

SANITATION AND OTHER PURPOSES.

BY-LAW No. FOR REGULATING THE DESTRUCTION OR SEGREGATION OF STRAY DOGS AND OF HORSES AND CATTLE SUFFERING FROM ANTHRAX, GLANDERS, RINDERPEST OR ANY OTHER SUCH DISEASE.

BANGALORE MUNICIPAL LAW, SECTION 137 (1) (*k*).

1. Notice of the occurrence of any case of anthrax, glanders, rinderpest or any other such disease, affecting horses or cattle, as required by section 123 of the law, shall be given to the Health Officer or the Sanitary Inspector of the Division.

2. The Health Officer on receiving information of the existence of any such disease shall make such enquiry as may be necessary, and if he is satisfied that the removal or segregation of any such animal or animals is necessary, the owner shall keep such animal or animals apart in, or removed them to, such place as may be approved by the Health Officer.

3. On report from the Health Officer that the destruction of any animal is necessary by reason of its suffering from such disease, the President may, by order in writing, require such animal to be immediately destroyed, and no damages shall be payable in respect of any animal destroyed under such order. When any animal has died from or been destroyed on account of any such disease, the carcase shall be removed as soon as possible to the nearest cinerator, and there cremated. The cost of such removal and cremation shall be paid by the owner or person in charge of the animal.

4. Every place which has been occupied by any animal suffering from such disease, and teverything which may have come into contact with such animal whilst so suffering, shall be immediately cleansed and disinfected in such manner as may be required by the Health Officer, and if any such thing is in the opinion of the Health Officer not susceptible of efficient disinfection, he shall require it to be destroyed, provided that for all article so destroyed such compensation shall be paid as the President, after necessary enquiry, may consider reasonable.

5. Every stall or building which has been occupied by any animal suffering from such disease shall, within 24 hours after it has been disinfected as provided in section 4 above, be thoroughly lime-washed, and no such stall or building shall be re-occupied until at least seven days after it has been so disinfected and lime-washed.

6. Breach of any of these rules shall render the offender liable on conviction to a fine not exceeding R50, and to a further fine which may extend to R5 for every day after such conviction during which the breach continues.

7. Any dog found straying in any public street or place without a collar, and apparently ownerless, may be destroyed by any person authorized by the President in that behalf.

L. T. HARRIS, *President,*
Municipal Commission,
Civil and Military Station, Bangalore.

CALCUTTA UNIVERSITY.

REVISED NOTICE.

SREEGOPAL BASU MALLIK FELLOWSHIP.

An election for the above Fellowship, founded for the encouragement and promotion of Sanskrit learning and Vedantic studies, will be held on or about the 26th July, 1899.

The remuneration is R400 per mensem for a period of two years. The Fellow shall not embark in, or continue in, any other occupation or profession during the term of this Fellowship.

Hindu graduates of the Calcutta University or any other Hindus, without distinction of caste, who may have made the Vedanta their especial study, are eligible as candidates.

Each candidate is to send in to the Registrar, before the 30th June, certificates of his qualifications and 15 copies of a synopsis, printed in either Bengali or English, of at least 12 lectures to be delivered by him during his tenure of office in the subjects which will be found in the Regulations.

The attention of intending candidates is particularly directed to Rule 13:—

> "Under no circumstances will any candidate, or any one on his behalf, be allowed to canvass directly or indirectly for his appointment, or in any way to communicate with regard thereto with any member of the Syndicate or with Babu Sreegopal Basu Mallik, or with any one acting on his behalf"

Disqualification is the penalty attached to disregard of this rule.

Copies of the Rules and Regulations can be had on application to—

A. C. EDWARDS,
Registrar.

SENATE HOUSE;

CALCUTTA POST OFFICE NOTICE.

The 27th May, 1899.

Mails for	Date of closing at the General Post Office, Calcutta.	Route by which despatched.
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Madagascar, Réunion, etc., Natal, and Cape Colony, and in general all countries served through the United Kingdom.	1899 1st June	Per P & O. Str from Bombay.
Parcels, Insured letters and Money Orders for the United Kingdom and other Foreign places.	31st May	Ditto.
*Australasian Colonies . .	27th „	*Vià* Tuticorin and Colombo *
Colombo	29th „	Per P. and O. Str. *Sunda.*
Rangoon and Moulmein . .	1st June	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, Mergui, Penang and Singapore.	29th May	Ditto.
Rangoon and Moulmein . .	27th „	Ditto.
Akyab, Kyaukpyu and Sandoway.	27th „	Ditto.
Ditto ditto . .	29th „	Per land route *vià* Chittagong.
Ditto ditto At 5-30 A.M.	30th „	Ditto.
Port Blair	29th „	*Vià* Rangoon.
Mauritius, Réunion, Mayotte, Nossi Be, Delagoa Bay, Natal and Cape Colony.	29th „	*Vià* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles will be cleared for the forenoon Mails at the following hours:—

For Goalundo and Chittagong Express train at 5-30 A.M.
For Eastern districts as far as Dacca at 6-30 A.M.
For Bombay Mail *vià* Nagpur at 7-30 A.M. and with a late fee of ½ anna up to 8 A.M.
For Midnapore and Orissa at 8 A.M.

The letter-box will be cleared for the evening Mails without late fee at the following hours, *viz.*:—

For E. I. Railway Loop Mail at 2-30 P.M. and up to 2-55 P.M with a late fee of ½ anna.

For the Bombay Mail *vià* Jubbulpore carrying also Mails for Ceylon at 6 P.M.

For Darjeeling and Assam at 3-25 P.M. without late fee, and 3-50 P.M. with late fee of ½ anna.

For the Punjab at 7-30 P.M.

Late letters bearing a fee of ½ anna will be received for the Bombay Mail *vià* Jubbulpore up to 6-30 P.M. and for other Mails from 7-30 to 8 P.M., and from 8-0 to 8-45 P.M. with a late fee of 1 anna for the Punjab Mails only.

Late registered articles will be received between the following hours:—

For Offices served by the Bombay Mail *vià* Allahabad and Jubbulpore from 5 P.M. to 6-15 P.M.
For Offices served by the Punjab Mail from 6 P.M. to 7 P.M.
For Offices served by the Goalundo Mail from 6 P.M. to 7 P.M.
For Offices served by the Khulna Mail from 6 P.M. to 7 P.M.

The late fee on each registered letter will be two annas, which must be prepaid in stamps on the letter.

Articles for Burma and for Port Blair by Sea are received without late fee up to 7-30 P.M., after which hour they are received fully prepaid and bearing an extra stamp of ½ anna up to 8 P.M.

On the latest safe day of despatch of the Mail for the Australasian Colonies *vià* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6 P.M., and late letters and papers fully prepaid will be received up to 6-30 P.M.

On the day of despatch of the Mail for Europe (Thursday), the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6-30 P.M., and late letters and papers fully prepaid will be received up to 6-45 P.M. Late registered articles will be received from 5 to 6 P.M. On other days the letter-box for Foreign articles will be cleared for the last time without the late fee at 6 P.M., and late letters and papers will be received up to 6-30 P.M. for despatch by any Foreign Mails *vià* Tuticorin, Madras, or Bombay the same night and up to 8-30 P.M., late letters and papers up to 9 P.M., for any Foreign Mails despatched by Sea. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

P. J. GORMAN,

Offg. Presidency Postmaster, Calcutta.

GEOLOGICAL SURVEY OF INDIA.

FOR SALE.

1. Records of the Geological Survey of India, Vols. I to XXX. Price R2 per volume or R1 per part.

2. Memoirs of the Geological Survey of India, Vols. I to XXVII. Price per Volume R5.

3. Palæontologia Indica, Series I to XVI. The price of these publications is 4*a.* per single plate.

4. A Manual of the Geology of India, 2nd Edition. By R. D. Oldham, A.R.S.M., F.G.S. Price R8.

5. A Manual of the Geology of India, Economic Geology, 2nd Edition, part 1, corundum. By T. H. Holland, A.R.C.S., F.G.S. Price per copy R1.

6. An Introduction to the Chemical and Physical Study of Indian Minerals. By T. H. Holland, A.R.C.S., F.G.S. Price 8*a.*

7. Report on the Geological Structure and Stability of the Hill Slopes around Naini Tal. By T. H. Holland, A.R.C.S., F.G.S. Price R3.

8. Bibliography of Indian Geology. By R. D. Oldham, A.R.S.M., F.G.S. Price R1-8.

9. Map of the Geology of India, scale 1"=96 miles. R1 per copy.

10. Map of the Geology of India, in 6 sheets, scale 1"=32 miles. R12 per copy.

11. Reports on the Inspection of Mines in India, by James Grundy :—

Report for the year ending 30th June, 1894. Price R1.
Do. do. 30th June, 1895. Price R2.
Do. do. 30th June, 1896. Price R1.
Do. do. 31st Dec., 1896. Price R1.

Apply to the Registrar, Geological Survey of India, Calcutta.

NOTICE.

There is a vacancy in the post of Bengali Pundit to the Board of Examiners' Office. The salary attaching to the post is R40 per mensem. Candidates must possess a knowledge of English, Sanskrit and Bengali. Applications addressed to the Secretary, Board of Examiners, 17, Elysium Row, will be received up to 30th May and must be accompanied by copies of Testimonials.

NOTICE.

It is notified, for information of Military and Civil officers, that services of Shams-ul-Ulama, Shaikh Mahmud Gilani, Persian Instructor, and Mr. R. F. Azoo, Arabic Instructor, have been specially retained by Government for giving instruction to candidates intending to present themselves for examinations in Arabic and Persian before the Board of Examiners Gentlemen requiring their tuition should communicate with them at the office of the Board of Examiners.

THE YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 3rd and 4th July, 1899, at 10-30 A.M. :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity).	100	50
Dictation (spelling, punctuation, etc).	100	50
Arithmetic (the whole)	240	160
Mensuration (a) the whole	60	30
Book-keeping (b) mercantile	100	50
TOTAL	600	400

Minimum required in all papers collectively.

(a) Todhunter's Mensuration for Beginners.
(b) "Book-keeping," by Ball and Hamilton.
"Book-keeping" by double and single entry by W. Inglis (Chambers' Educational Course).

The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in July. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burma only The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed ; but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it ; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

NOTE.—A candidate already in Government service should, in like manner, submit his application through his immediate official superior to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts to whom the candidate submits his application to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the college or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but

direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

A. MACDONELL,

Offg. Principal, Civil Engineering College.

SIBPUR,

The 1st May, 1899.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1898, the price of this Quinine will be as follows:—

1-pound tin,	R17,	or, post-free,	R17-12.
½ „	R8-8,	„	R9-0.
¼ „	R4-4,	„	R4-12.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৮ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য লইবে, যথা—

১ এক পোণ্ড টিন	১৭, বা ডাকমাশুল বিনা	১৭৸০	
। আধ „ „	৮৷০	„	৯,
। শিকি „ „	৪।০	„	৪৸০

পরিক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনাডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials,	R2-6.
„	II.	Masonry,	R1-4.
„	III.	Carpentry (1889),	R1-4.
„	IV.	Earthwork (1892),	R1-4.
„	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings. (In the Press.)	
„	VII.	Bridges,	R4-4.
„	VIII.	Roads,	R1-8.
„	IX.	Railways (1891),	R1-4.
„	X.	Irrigation Works. (Under revision.)	

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7.

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

* Date of Edition on sale.

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition, with Curve Table). R3.
XIII. **Drawing** (by Lieut. R. Pulford, R.E.). † R8.
XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.
XIV. **Simple Applied Mechanics**, Parts I and II in one (in the Press)
Simple Applied Mechanics, Part II (1st edition). 8a.
XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.
VI. **Earthwork Estimating**, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. Say R1.
XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly, Nos. 1 to 5), bound R2.

Quarterly, Nos. 1, 2, 3, 4, and 5,	8a. each, exclusive of packing and postage.
Vol. II, Quarterly, Nos. 6 and 7,	
„ VI, „ Nos. 24 and 25,	
„ VII, „ Nos. 26, 27, 28, and 29,	
Extra No., April 1870.	

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI 8a. each, exclusive of packing and postage.

Quarterly Number 41 A of Vol. X. 8a. each, exclusive of packing and postage.

Cloth covers for Volumes of 1st and 2nd Series, at 4a. each.

(THIRD SERIES.)

Quarterly Nos. 13 and 15, at 8a. each, exclusive of packing and postage.

Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2a. each, and loose papers, 3rd Series, 3a. each, exclusive of packing and postage.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of admission to the different classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I. S. C.,*
Principal, Thomason Civil Engineering College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage. R a. p.	With postage. R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. R a. p.	For mofussil. R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 0
„ each of the Madras, Bombay, and Allahabad Series; per copy	0 5 3	0 5 9
„ the Calcutta Series. For the year . .	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . . .	4 4 6	4 11 0

Persons desiring to subscribe for, or purchase, the Report, should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*

The 26th May, 1899.

No. 756-*E.-A.*—Whereas the Governor General in Council has power and jurisdiction within the tract noted in the margin:

The tract bounded on the north by the country of the Mianis; on the west by the country of the Bargha Shirannis; on the south by the country of the Zmarrais and Ustranas; and on the east by the Dera Ismail Khan District.

In exercise of such power and jurisdiction, and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to make the following orders:

PART I.

1. (*1*) The provisions, so far as they can be made applicable in the circumstances for the time being, and as amended for the time being by subsequent enactments, of the enactments specified in the First Schedule to this Part, are hereby applied to the aforesaid tract, subject, in the case of the Code of Criminal Procedure and the Punjab Frontier Crimes Regulation, to the modifications specified in the Second Schedule to this Part.

(*2*) For the purpose of facilitating the application of the said enactments to the said tract, any Magistrate or Court for that tract may construe any provision in any such enactment with such alterations, not affecting the substance, as may be necessary or proper to adapt it to the matter before the Magistrate or Court.

THE FIRST SCHEDULE.

Enactments applied.

Number and year.	Subject.
Act XLV of 1860	Indian Penal Code.
Act XXIII of 1867	Punjab Murderous Outrages.
Act IX of 1877	Reviving and Amending Act XXIII of 1867.
Act V of 1898	Criminal Procedure.
Regulation IV of 1887	Punjab Frontier Crimes.

THE SECOND SCHEDULE.

Modifications in the Code of Criminal Procedure and the Punjab Frontier Crimes Regulation.

(1) *In the Code of Criminal Procedure—*

(a) The Court of Session may take cognizance of any offence, as a Court of Original Jurisdiction, without the accused person being committed to it by a Magistrate, and shall, when so taking cognizance of any offence, follow the procedure prescribed by the Code of Criminal Procedure for the trial of warrant cases by Magistrates;

(b) No appeal shall lie from any order of the Sessions Judge;

(c) Trials before the Court of Sessions may, in the discretion of the Sessions Judge, be without jury or the aid of assessors.

(2) *In the Punjab Frontier Crimes Regulation, 1887—*

(a) For section 1, sub-sections (2), (3), (4), (5) and (6), the following shall be substituted, namely:

"(2) This Regulation shall not be enforced against (1) European British subjects, or (2) persons of any such class as the Local Government may, by notification in the local official Gazette, declare to be exempt therefrom, or (3) any person in the civil or military service of the Government, unless such person is accused of having committed an offence conjointly with a person to whom this Regulation applies."

"(3) The word 'class' as used in sub-section (2), includes any persons who may be collectively described in a notification under this section as persons exempt from the provisions of this Regulation."

(b) Section 2 and section 7, sub-section (2), shall be omitted.

(c) For clause (2) of section 3, the following shall be substituted, namely:

'(2) "Commissioner" means the Commissioner of the Derajat Division, and

'(3) "Deputy Commissioner" means Deputy Commissioner of the Dera Ismail Khan District.'

(d) For sub-section (1) of section 10, the following shall be substituted, namely:

"When the Deputy Commissioner thinks it expedient that any dispute should be settled in the manner provided by this section, he may make an order in writing, stating the grounds of his opinion and referring the dispute to a Council of Elders."

PART II.

For the purposes of the exercise of criminal jurisdiction as regards the aforesaid tract,—

(1) (a) The Deputy Commissioner for the time being of the Dera Ismail Khan District, as regards the said tract, shall exercise the powers of a District Magistrate, as described in the Code of Criminal Procedure, and may try any offence or pass any sentence which a District Magistrate specially empowered under section 30 of that Code may try or pass; and

(b) Every Magistrate having for the time being any jurisdiction within the Dera Ismail Khan District shall exercise the like jurisdiction, as regards the said tract.

(2) The Commissioner for the time being of the Derajat Division shall be the Sessions Judge, and his Court the Court of Sessions as regards the said tract.

(3) The functions of the High Court as a Court of Reference and Revision shall be discharged by the Lieutenant-Governor of the Punjab and its Dependencies.

(4) All other functions of the High Court shall be discharged by the Court of Session.

(5) This part of this notification applies to all proceedings, except proceedings against European British subjects or persons jointly charged with European British subjects.

No. 1370-*I.-A.*—In exercise of the powers conferred by section 13 of the Births, Deaths and Marriages Registration Act, 1886 (VI of 1886), and in supersession of the notification of the Government of India in the Foreign Department, No. 346-I., dated the 25th January, 1889, the Governor General in Council is pleased to appoint the persons for the time being holding the offices designated in the first column of the schedule hereto annexed to be Registrars of Births and Deaths in respect of the classes of persons indicated in section 11, sub-section *1*, clause (*b*), of the said Act for the local areas respectively mentioned opposite their designations in the second column of the schedule.

2. For the purposes of section 24, sub-section (2), and section 32 of the said Act, the Governor General in Council is further pleased to appoint the Registrar General of Births, Deaths and Marriages for Ajmere-Merwara, for the time being, to be the Registrar General for the local areas mentioned in the schedule.

Officers.	Local areas.
The Resident, Jaipur	The States of Jaipur and Kishengarh, excepting the lands herein declared to constitute separate local areas.
The Railway Medical Officer at Bandikui	Bandikui Railway station and the adjoining Railway lands.

POST OFFICE.

The 26th May, 1899.

No. 2326-*S.R.*—In exercise of the power conferred by section 10 (*i*), of the Indian Post Office Act (VI of 1898), the Governor General in Council is pleased to declare that Malta, Jamaica, Mauritius, North Borneo, and Labuan should be added to the list of British Possessions mentioned in Part I, rule 3 of the Notification in this Department, No. 1429-C.S.R., dated the 30th March 1899, published in the *Gazette of India* of the same date.

STATISTICS AND COMMERCE.

Customs.

The 22nd May, 1899.

No. 2351-*S.R.*—In exercise of the powers conferred by sections 22 and 23 of the Sea Customs Act, 1878 (VIII of 1878) the Governor General in Council is pleased to declare that fittings of steel (such as bends, boots, elbows, tees, sockets, flanges, and the like), for steel pipes and tubes shall be assessed to duty on importation at the rate at which steel pipes and tubes are assessed, namely, one per cent. *ad valorem.*

The 23rd May, 1899.

No. 2372-*S.R.*—In exercise of the power conferred by section 23 of the Sea Customs Act, 1878 (VIII of 1878), the Governor General in Council is pleased to exempt from the import duty leviable thereon under No. 14 of Schedule IV of the Indian Tariff Act, 1894 VIII of 1891), as amended by Acts XVI of 1894 and III of 1896, machinery (and component parts thereof) for the casting of type.

LEAVE AND LEAVE ALLOWANCES.

No. 2255-*P.*

The 17th May, 1899.

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read—

Resolution by the Government of India in the Finance and Commerce Department, No 546, dated 31st January 1883, prohibiting heads of offices from employing officers belonging to other establishments without the previous consent of the officers on whose establishments they are borne.

RESOLUTION.—In paragraph 1 of the foregoing Resolution it is stated that "officers employed under Government sometimes obtain leave of absence, with the intention of taking up other employment under Government or otherwise, or accept such employment while on leave." The use of the words "or otherwise," in the passage above quoted, has had the effect of rendering the orders in the Resolution applicable to the cases of officers who take service under private employers while on leave. These cases are, however, dealt with under separate orders* and the Resolution of 31st January 1888 should be held to apply only to the case of an officer taking employment on one Government establishment before he has resigned his appointment on another. The Governor General in Council is accordingly pleased to direct that the words "or otherwise," referred to above, be cancelled.

* No. 3738, dated 10th July 1888.
No. 2256-P., dated 17th May 1899.

Ordered that this Resolution be communicated to all Local Governments and Administrations, to the several Departments of the Government of India (except the Public Works Department) to the Heads of Departments subordinate to this Department, and to all Accountants General and Comptrollers for information.

Ordered, also, that a copy of this Resolution be forwarded to the Public Works Department, with reference to the communication from that Department, No. 127-G., dated 4th February 1899.

Ordered also that this Resolution be published in the *Gazette of India.*

No. 2256-P.

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read—

Resolution by the Government of India in the Finance and Commerce Department, No. 3738, dated 10th July 1888, prohibiting officers in receipt of furlough or leave allowances from taking service under any other employer in India; and, in the case of officers lent to any other employer, from taking leave or obtaining leave allowances unless they actually quit their employment for the period of such leave.

RESOLUTION.—In supersession of the Resolution read in the preamble, the Governor General in Council is pleased to issue the following orders relating to the conditions of acceptance of private employment during leave.

No gazetted officer of Government, who is in receipt of furlough or leave allowance, may, without the special orders of the Government of India, take service under any other employer in India, and no such officer, whose services have been lent to any other employer in India, can take leave or obtain leave allowances from the Government of India, unless he actually quits his employment for the period of such leave. In the case of a non-gazetted officer the previous consent of his departmental superior is sufficient authority for the taking of leave with the object of obtaining such employment and for the acceptance of such employment during leave.

ORDER.—Ordered that this Resolution be communicated to all Local Governments and Administrations, to the several Departments of the Government of India (except the Public Works Department), to Heads of Departments subordinate to this Department, and to all Accountants General and Comptrollers for information.

Ordered also that a copy of this Resolution be forwarded to the Public Works Department, with reference to the communication from that Department, No. 127-G., dated 4th February 1899.

Ordered also that this Resolution be published in the *Gazette of India.*

SALARIES, ESTABLISHMENTS, ETC.

COMPENSATION.

No. 2418-*Ex.*

The 26th May, 1899.

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read—

Resolution by the Government of India, Finance and Commerce Department, No. 2422-Ex., dated the 31st May 1897.

Resolution by the Government of India, Finance and Commerce Department, No. 4847-Ex., dated the 5th November 1898.

Resolution by the Government of India, Finance and Commerce Department, No. 5040-Ex., dated the 17th November 1898.

RESOLUTION.—The claim of an officer appointed in India to receive exchange compensation allowance under the rules at present in force depends on two factors, which may be described as *personal* and *official* eligibility.

Personal eligibility is obtained only by being outside "the class to which an important privilege as to appointment in India is secured by the Statute 33

Vict., Cap. 3" (paragraph 4 of Resolution in this Department, No. 2422-Ex., dated 31st May 1897).

Official eligibility depends on the tenure of an appointment, or the membership of a service or Department, which has been declared by the Government of India to render its holder or member entitled to exchange compensation allowance if personally eligible.

2. The Resolution in this Department, dated 5th November 1898, No. 4847-Ex., has given detailed instructions in regard to official eligibility, and the Government of India now consider it desirable, in order to reduce the references which have hitherto been made to them on the subject, to lay down more specific instructions than have yet been promulgated in regard to the determination of personal eligibility.

3. It will be recollected that in the Circular letter of the Government of India in the Home Department, dated 18th April 1879, No. 21—746-53, it was ruled that no person other than a native of India as defined in section 6 of 33 Vict.,* Cap. 3, should, save in certain excepted Departments, be thereafter appointed to an office carrying a salary of R200 a month or upwards without the special sanction of the Governor General in Council. Persons who belong to the class (Natives of India) who are thus protected as against outside competitors are not eligible for exchange compensation allowance. In the case therefore of a claimant for exchange compensation allowance who has been born in India and whose father was at that time in the country, the first thing to be considered is not the appointment or Department which he at present holds or belongs to, but whether, if he had at the time he first entered Government service been an applicant for a post to which the restrictive orders of 1879 apply (a Deputy Collectorship, for example), he could have been appointed thereto without the special sanction of the Government of India. An Indian-born applicant for such a post would not, whatever his race, be regarded as falling under the restrictive orders of 1879 if he had been wholly or mainly brought up in this country. It follows, therefore, that a man of this description should be held *primâ facie* ineligible on personal grounds for exchange compensation allowance, whatever his actual appointment may be, and if he demurs to this presumption, it will fall upon him to show fully and clearly—

*That is, "a person born and domiciled within the dominions of Her Majesty in India of parents habitually resident in India and not established there for temporary purposes only."

(*a*) That he was not domiciled in India at the time of his first appointment to Government service; or

(*b*) That his parents were only temporary residents in this country.

If he cannot do this, his claim fails.

4. The disposal of "personal eligibility" claims to exchange compensation allowance should further be subject to the following principles:

(1) In all cases in which the question whether or not the officer concerned is a 'Statutory native' has already been raised in connection with some claim of his to the privileges of a Statutory native, the decision then arrived at must be regarded as final;

(2) All persons who have, subsequent to the promulgation of the orders of the 18th April 1879, above referred to, been admitted to Government service without the special sanction of the Government of India under circumstances which would have necessitated such sanction had they not been regarded as Statutory natives, must be deemed personally ineligible for exchange compensation allowance.

5. The case of men entering the Government service subsequent to the issue of the exchange compensation allowance rules promulgated with this Department's Resolution of 31st May 1897, No. 2422-Ex., is governed by No. IV of those rules, which requires, as a condition of eligibility for exchange compensation allowance, the grant of a certificate which must be withheld from any one who is qualified for appointment under 33 Vict., Cap. 3, section 6. In determining whether a certificate should be withheld on this ground, Local Governments will bear in mind the principles enunciated in paragraphs 3 and 4 of the present Resolution.

6. Cases already referred to the Government of India and now pending will be disposed of by them; but all other cases should be dealt with by Local Governments under the above instructions. In any case coming before it, which the Local Government considers doubtful either in regard to the personal or the official eligibility of the claimant, reference will be made direct to the Government of India in the Finance and Commerce Department. It is hoped, however, that the present instructions will greatly diminish the number of such references.

7. Where a Local Government has decided that an officer is not a statutory native for the purposes of the new exchange compensation allowance rules and does not consider a reference to the Government of India to be required, audit officers will accept the decision as final.

8. Departments of the Government of India other than the Financial Department will exercise the powers of Local Governments under the Resolution in the case of officers serving directly under them.

ORDER.—Ordered, that the foregoing Resolution be published in the *Gazette of India*, and that it be circulated to all Local Governments and Administrations; to Departments of the Government of India; to the Private Secretary to His Excellency the Viceroy; to Heads of Departments subordinate to the Financial Department; to the Comptroller and Auditor General; and to all Accountants General and Comptrollers.

J. F FINLAY,

Secretary to the Government of India.

MILITARY DEPARTMENT.

Simla, the 25th May, 1899.

No. 222.—Mr. H. H. Gahan, Superintending Engineer, 3rd Class, temporary rank, State Railways, and Officiating Junior Consulting Engineer to the Government of India for Railways, Nagpur, is permitted to retire from the service of Government, with effect from the forenoon of the 20th May 1899, under Article 712 (*c*) of the Civil Service Regulations.

The 23rd May, 1899.

No. 224.—The Hon'ble E. H. S. Napier, Executive Engineer, 2nd Grade, State Railways, is, on return from privilege leave, appointed Deputy Consulting Engineer for Railways, Bombay, until further orders.

The 25th May, 1899.

No. 225.—Mr. G. W. V. deRhe Philipe, Examiner of Accounts, attached to the Office of the Examiner of Accounts, Oudh and Rohilkhand Railway, is appointed to officiate as Examiner of Accounts, Oudh and Rohilkhand Railway, during the absence of Mr. W. Ogden, on privilege leave.

The 26th May, 1899.

No. 227.—The following is published for general information:

No. 967 R. E., dated Simla, the 23rd May, 1899.

RESOLUTION—By the Government of India, Public Works Department.

Application to Railways worked by Companies of the scheme for improving the Provident Funds, approved for State Railways.

Read again—

Resolution No. 09 R. E., dated 24th January 1899.

Despatch from Secretary of State, No. 58 Railway, dated 14th July 1898, paragraphs 2—4.

Read—

Despatch from the Secretary of State, No. 68 Railway, dated 11th August 1898.

RESOLUTION.—The Government of India are pleased to permit the rules for State Railway Provident Funds, as contained in the Resolution quoted in the preamble, to be applied, so far as they are applicable, to the railways worked by Companies quoted in the margin, whose Boards have expressed their willingness to accept the rules on behalf of their employés.

Madras.
South Indian.
Bengal-Nagpur.
Indian Midland.
Southern Mahratta.
Bengal and North-Western.
Rohilkhand and Kumaun.
Burma.

Pending a further reference to the Government of Bombay in regard to a fundamental question affecting the application of the new rules to existing subscribers, the two railways noted in the margin, whose Boards have also expressed their willingness to adopt the new rules, have been excluded, for the present, from the scope of the Resolution.

Great Indian Peninsula Railway.
Bombay, Baroda and Central India Railway.

2. The rules published under Public Works Department Resolution No. 09 R. E., dated 24th January 1899, may be, so far as they are applicable, embodied in the existing rules of the several railways enumerated. The present subscribers will then exercise the option of electing between the old and new rules, and the European and Eurasian subscribers of 20 years' service and upwards who elect for the old rules will, on retirement to Europe, America, or the Colonies, also obtain the advantage of payment of their compulsory deposits, with bonus at the rate of 1*s.* 6*d.*

3. The condition of having their existing and future deposits recast and kept on a sterling basis does not apply to subscribers to the funds covered by this Resolution, as the assets are invested in certain classes of securities prescribed by rule, and cannot, like the assets of the State Railway funds, be held at interest by Government.

4. Rule IV of those published under Public Works Department Resolution No. 09 R. E. of 1899 is not a fundamental rule, and there is no objection to the existing rule applicable to each railway concerned being retained.

5. Some objections have been raised to rule III in the form in which it was originally circulated to the Boards of the several Companies. In its form as published it is believed that it is sufficiently elastic to meet these objections; but the Government of India are prepared to consider proposals for modifying it so far as railways worked by Companies are concerned.

6. Pensioned officers of Government serving a Company on a railway which adopts these rules, although they will be permitted to elect for the new rules, cannot have their deposits paid at the rate of 1*s.* 6*d.* unless they have more than 20 years' service during which they were earning no pension. Officers who are earning a pension while serving a Company cannot, under existing orders, subscribe to the Provident Fund.

7. In the case of railways worked by Companies to which the new rules may be eventually extended, it will be a condition of their adoption, that all railway servants, on transfer from a State railway to any line worked by a Company, or *vice versâ*, shall have their Provident Fund accounts transferred also, provided that the transfer is made with the consent of the Manager or Agent, and without break of service.

8. Agents of the several railways concerned should report in due course whether the orders are accepted by the whole body of subscribers, subject to the above general conditions.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Governments of Madras, Bombay and Burma, Public Works Department, Railway Branch, the Chief Commissioner of Assam, the Resident at Hyderabad, and the Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam, for information and guidance.

Ordered also that a copy be forwarded to the Accountant General, Public Works Department, for information, and that it be published in the *Gazette of India.*

F. R. UPCOTT,

Secretary to the Government of India.

TELEGRAPHS.

The 23rd May, 1899.

No. 223.—The following officiating and temporary promotions are made in the Superior Establishment of the Indian Telegraph Department, with effect from the dates specified :

Name.	From	To	Date.
Mr. W. P. Henderson .	Assistant Superintendent, Class VI, 1st Grade.	Superintendent, Class V, 2nd Grade, officiating.	12th March 1899.
Mr. W. P. Henderson .	Superintendent, Class V, 2nd Grade, officiating.	Superintendent, Class V, 2nd Grade, temporary rank.	13th April 1899.
Mr. N. U. K. Leslie .	Assistant Superintendent, Class VI, 2nd Grade.	Superintendent, Class V, 2nd Grade, officiating.	13th April 1899, and until further orders.

The 25th May, 1899.

No. 226.—The following is published for general information:

No. 441 C. W. I., dated Simla, the 18th May, 1899.

RESOLUTION—By the Government of India, Public Works Department.

Review of the Revenue Report of Irrigation Works in Baluchistan for 1897-98.

Read—

Revenue Report of Irrigation Works in Baluchistan for the year 1897-98, forwarded with letter No. 1046, dated the 2nd March 1899, from the Secretary to the Agent to the Governor General, Baluchistan, Public Works Department.

OBSERVATIONS.—There are two Minor Irrigation Works in Baluchistan, of which Capital and Revenue Accounts are kept, *viz.*, the Shebo Canal and the Khushdil Khan Reservoir.

2. There has been no expenditure chargeable to Capital Account since 1894-95, up to the end of which year the outlay on these works amounted to Rs. 16,12,782, including indirect charges.

3. The results obtained on these works in 1897-98, compared with those of the five previous years, are shown in the following statement :

Year.	Area irrigated.	Gross revenue collected.	Rate per acre irrigated.	Working expenses, Direct and Indirect.	Net revenue.	Return on capital outlay.
	Acres.	Rs.	Rs.	Rs.	Rs.	Per cent.
1892-93	10,484	39,528	3·77	17,361	22,167	1·43
1893-94	7,983	48,910	6·12	22,316	26,594	1·70
1894-95	6,461	21,176	3·27	13,395	7,781	0·48
1895-96	7,070	33,272	4·71	12,971	20,301	1·26
1896-97	3,355	29,137	8·70	15,394	13,743	0·85
Average of five years ending 1896-97.	7,071	34,405	4·86	16,287	18,118	1·14
1897 98	6,090	55,871	9·17	27,794	28,077	1·74

It will be seen from these figures that the area of irrigation was rather below the normal, though the gross revenue exceeded that of 1896-97 by 91·7 per cent. and the average of the past five years by 62 per cent., while the rate per acre irrigated has been considerably in excess of any previously recorded. The large increase in the working expenses was due partly to heavy repairs to the Khushdil Khan Reservoir and partly to an abnormal increase in the establishment charges caused by the retention of an Engineer to report on these Irrigation Works. It is not stated whether the increase in the gross receipts was due in any degree to the employment of this officer. The net revenue was Rs. 28,077 compared with Rs. 13,743 in 1896-97 and Rs. 18,118, the average of the past five years.

4. The revenue is still collected in kind, *viz.*, one-third of the total produce. On the Shebo Canal, the average yield per acre was—wheat 5·50 maunds and barley 10·42 maunds against the previous year's yield of 6·40 and 10·31 maunds, respectively, and the average revenue realized from the irrigation of these crops was Rs. 8·06 per acre as compared with Rs. 5·19 in 1896-97. The average yield per acre during the year is said to have been very low as compared with the experiments made of the crops, but no details of the experiments have been given.

On the Khushdil Khan Reservoir, the yield per acre was 9·60 maunds of wheat and 11·90 maunds of barley against the preceding year's yield of 10·28 and 12·70 maunds respectively. The average revenue realized was Rs. 10·35 per acre against Rs. 11 in 1896-97.

ORDER.—Ordered, that a copy of this Review be forwarded to the Agent to the Governor General and Chief Commissioner, British Baluchistan, Public Works Department, for information.

Also, that a copy of the Review and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab in the Public Works Department, for information.

Also, that a copy of the Review and of the Report be forwarded to the Revenue and Agricultural Department for information.

Also, that the Review be published in the *Gazette of India.*

Ordered, further, that a copy of this Review and of the Report be forwarded to Her Majesty's Secretary of State for India for information.

T. HIGHAM,

Joint Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 20th, 1899.

Throughout the whole of the present week the pressure conditions over India have been abnormal. Pressure has been lowest over the Western desert, and from North-West India a trough or tongue of relatively low pressure has extended east-south-eastward and south-eastward across Northern India to the Orissa or Madras Coast. As a consequence of this distribution, there has been a flow of air up the Bay, while over Bengal and the Gangetic Plain the wind has been south-easterly and easterly. Hence the air has been unusually damp, and an exceptional amount of rain has fallen over Burma, Bengal and parts of Northern India, and the mean temperature over these regions has been much below the normal average. Over the central parts of India the winds have been light and variable, while over the Peninsula the direction has been westerly and north-westerly. In these two regions the weather has been less disturbed than within the region of easterly winds, but still dust and thunder storms, accompanied with rain, have been fairly frequent. Quite at the close of the week a small storm, the third recorded this season, developed at the head of the Bay and gave disturbed weather and very heavy rain over Deltaic Bengal. The weather at this time was generally cooler than usual except in parts of North-West India and of the west of the Peninsula.

Daily Summary.—*Sunday, May 14th.*—The barometer read lowest over the Western desert, relatively low within a tongue which extended from Rajputana south-eastward to Ganjam and high over the west of the Peninsula, Burma and along the foot of the Himalayas. The winds were westerly and north-westerly over the Peninsula and south-easterly to easterly over Burma and Northern India. The sky was cloudy in places, and rain had been received over parts of Burma, Bengal, Assam, the North-West Himalayas, the Peninsula and some central districts. The amounts were heavyish in parts of Madras and of Deltaic Bengal. The heat was less than usual over a large part of Burma, Bengal, the east of the North-West and Central Provinces and the east of the Peninsula and above the average elsewhere.

Monday, May 15th.—The barometer had fallen, but there had not been much change in the conditions of pressure except that gradients had increased over the Bay. The winds were also practically unchanged except that the force was lower. There was a good deal of cloud, and rain had fallen fairly generally over Burma, Assam and Lower Bengal and as scattered showers over the North-West Himalayas, the submontane districts of North-West India and some central and southern districts. The largest amounts (between 1½ inches and 2½ inches) were reported from Burma and Bengal. The mean temperature had fallen to below the normal along the foot of the North-West Himalayas and remained low over part of Burma, Bengal and the east of the Peninsula.

Tuesday, May 16th.—Pressure had continued to decrease in most places, but there was still no change in the general distribution of pressure. The winds remained westerly and north-westerly over the Peninsula, southerly and south-easterly in Burma and south-easterly to easterly in Bengal and Northern India. The sky was more or less cloudy except over Central and North-West India. Rain had again fallen fairly generally over Burma, Assam, Bengal, the Kashmir Himalayas and the south-west of the Peninsula, while a few local showers had been received in other parts of the country. The rainfall amounts were unusually large over Lower Bengal.

Wednesday, May 17th.—The barometer had risen over Burma, North-East India, the Gangetic Plain, the Central Provinces and North Madras and had fallen or been steady elsewhere. As a result, the tongue of relatively low pressure had been moved southward and ran south-south-eastward from North-West India to the Coromandel Coast. Otherwise there had been no important change. The winds were lighter and somewhat more irregular, but remained on the whole westerly and north-westerly over Central and Southern India and south-easterly to easterly in Burma and Northern India. There was a good deal of cloud except in parts of North-West India. Rain had again fallen fairly generally over Burma, Assam and Bengal, while scattered showers had occurred in other parts of the country. The largest amounts continued to be reported from East Bengal. The weather was cool all over North-East India.

Thursday, May 18th.—Pressure had increased almost everywhere—briskly to rapidly in the north and slightly in the south. Pressure was lowest in the north-west, and the tongue of relatively low pressure continued to run south-eastward and south-south-eastward to the Madras Coast. The winds were practically unchanged. Rain continued general and moderately heavy over Burma and East Bengal, and a few scattered showers had fallen in other parts of the country. The mean temperature was low except in the Punjab, Rajputana, Sind, Bombay and the south of the Peninsula. The excess was large in the Punjab and the deficiency large in the North-West Provinces, the Central Provinces and West Bengal.

Friday, May 19th.—Pressure had changed very little, and the pressure conditions were practically unaltered, but the barometric differences over the Bay were much greater than usual. There had been again no important change in the winds. Rain had been general over Ceylon, the south of the Peninsula, Burma and East Bengal, and scattered falls were reported from other parts of the country. The rainfall had been much heavier than usual and at Colombo had been particularly heavy (5·55 inches). The heat had been greater than usual over the Bombay Presidency, Rajputana, Sind, the west of the Punjab, Assam and Tenasserim and had been below the normal elsewhere.

Saturday, May 20th.—There had been practically no change in the barometer or the general conditions of pressure except at the head of the Bay where pressure had given way rapidly and a small storm had developed. The winds were cyclonic and fresh to strong in force in Deltaic Bengal, but were unchanged in other places. There was again a good deal of cloud except in North-West India, and general rain was still reported from Burma, Assam, Bengal (Proper) and the south of the Peninsula, while scattered showers had fallen in other parts of the country. Saugor Island had received 6·86 inches of

rain and other places in North-East India had received considerable to large amounts. The mean temperature was in moderate excess in the Punjab and Rajputana and in slight excess in parts of the west of the Peninsula, Assam and Tenasserim.

Temperature.—The rainfall around the Bay area (but particularly in the north) has kept temperature low in this locality, while the south-east winds, which have blown from Bengal into Upper India, have carried these low temperatures north-westward up the Gangetic Plain as far as the east of the Punjab. These winds did not extend beyond the East Punjab, and the West Punjab, Rajputana and Sind have been steadily under the influence of excessive temperatures.

The following table gives the mean temperature variation data for the week:

PROVINCE.	MAY 1899.							Mean variation of week.
	14th	15th	16th	17th	18th	19th	20th	
	°	°	°	°	°	°	°	°
Burma	—1·0	—0·6	—1·8	—1·3	—2·6	—1·0	—1·3	—1·4
Assam	+4·8	+2·9	—0·5	—4·1	—1·8	+2·0	0	+0·5
Bengal	—0·9	—2·4	—3·9	—2·8	—1·8	—0·9	—1·9	—2·1
Orissa	—5·3	—5·6	—3·2	—3·5	—1·0	—1·2	—5·5	—3·6
Bihar	—2·5	—1·6	—3·4	—2·1	—4·6	—2·4	—1·5	—2·6
Chota Nagpur	—9·8	—7·4	—6·3	—3·8	—4·2	—5·8	—6·6	—6·3
N.-W. P. and Oudh	+0·6	—0·6	—1·1	—2·9	—4·0	—3·7	—4·2	—2·3
Punjab	+5·6	+0·3	+3·5	+3·0	+1·7	+2·0	+4·2	+2·9
Sind	+4·1	+5·7	+4·3	+6·9	+5·2	+3·9	+3·2	+4·8
Rajputana	+6·4	+6·8	+6·5	+6·7	+3·4	+1·7	+2·0	+4·8
Gujarat	+1·8	+3·0	+2·4	+1·5	+1·3	—0·3	—0·5	+1·3
Central India	+2·8	+2·4	+3·5	+0·7	—1·5	—2·8	—3·0	+0·3
Central Provinces	+1·2	+0·5	+1·8	—0·3	—2·3	—3·6	—2·6	—0·8
Berar	+4·2	+1·0	+0·3	+1·6	+2·7	+0·3	—1·2	+1·3
West Coast	+1·1	+0·9	+0·3	—0·9	+1·3	+1·2	+0·8	+0·7
Bombay Deccan	+3·7	+2·1	+1·0	—0·8	+0·4	+0·6	—0·5	+0·9
Mysore	—1·3	+0·1	—2·3	—4·4	—1·7	—3·8	—3·1	—2·4
Madras Coast	—2·5	—0·6	—2·6	+0·2	+0·4	—3·3	—4·3	—1·9
Madras Deccan	—0·7	—0·9	—2·4	—1·6	+0·3	—0·8	—0·1	—0·9
South India	—0·3	+0·1	+1·5	—0·5	+1·5	+0·4	—2·2	+0·1
Mean for whole of India	+0·6	+0·3	—0·1	—0·4	—0·4	—0·9	—1·4	—0·3

Except on the 20th, when it was in some defect, the mean temperature of the whole country was very nearly normal on each day of the week. The provincial variations exhibited, however, large departures from the normal, thus in Rajputana and Sind the excess averaged as much as 4·8°, while in Chota Nagpur the deficiency averaged as much as 6·3°. In the Punjab, Sind and Rajputana the heat was more or less excessive and in Burma, Bengal, Orissa, Bihar and Chota Nagpur more or less deficient on each day of the week, but in most provinces the variations were irregular and varied from day to day.

The following were the highest maxima reported on each day:

May 14th	114·7°	at	Jacobabad.
„ 15th	118·5°	„	Do.
„ 16th	115·2°	„	Hyderabad (S.).
„ 17th	120·0°	„	Jacobabad.
„ 18th	115·7°	„	Hyderabad (S.).
„ 19th	117·1°	„	Jacobabad.
„ 20th	117·1°	„	Do.

The hottest area was thus Sind throughout the week.

Rain.—As mentioned above, unusual conditions of pressure and unusual winds have prevailed over India during the week under review. Large pressure differences have existed over the Bay, and a fresh southerly wind has blown from the Bay into Burma and Bengal, and backing to south-east and east has passed on up the Gangetic Plain as far as the south-east of the Punjab and the Kumaun Himalayas. Over the whole of the area, influenced by these winds, the rainfall of the week has been generally heavier than usual, while over parts of Burma and of Bengal the rainfall was unusually constant for the time of year. In the central parts of the country and over the Peninsula the winds were generally north-westerly and westerly during the week, while the rainfall was generally light and scattered, falling ordinarily during the occurrence of dust and thunder storms. The rainfall returns show that in Burma rain fell almost daily during the week; in Assam also the rainfall was almost daily; in Bengal the fall was scattered throughout the week except in Orissa where rain occurred on the 15th, 16th and 20th, and in Bihar when it occurred on the 16th, 17th and 18th; over the Gangetic Plain rain occurred on different days throughout the week, while in the Punjab there were a few scattered showers mainly on the 14th, 15th and 16th. In the west of the Peninsula the rainfall mainly occurred on the 14th and 16th and in the east on the 14th, 15th and 16th and again on the 19th, while over the central districts of India the fall was mainly on the 14th and 15th.

The rainfall table at the close of the summary shows, that during the week under review, rain fell in all the rainfall divisions of India except Gujrat, Kathiawar, Sind, Baluchistan, Western Rajputana and the Jaipur division of the East Coast (North), but in the case of South Bihar, the South Punjab, the West Punjab, the Konkan and Khandesh the average actual rainfall of the week was less than one-tenth of an inch, so that the rainfall was either actually or practically *nil* in all the above eleven divisions. In all the other divisions effective rain was received, the amounts varying from 7·34 inches in East Bengal, 3·94 inches in the Surma division of Assam and 3·89 inches in Deltaic Bengal, to 0·14 inch in the North Punjab, 0·19 inch in the Bombay Deccan, 0·10 inch in Berar, 0·13 inch in the central division of the Central Provinces, 0·12 inch in the east of Central India and 0·11 inch in the south division of Hyderabad. The third column of the table shows that the week's rainfall exceeded the average normal rainfall in Central and Upper Burma and Arakan, the Assam Valley, all the Bengal divisions, except Chota Nagpur and South Bihar, all the North-West Provinces divisions, the Punjab Hills, Mysore, Berar, all the Central Provinces divisions, the north and south divisions of the East Coast and the central and south-central divisions of Madras. In all the remaining divisions the week's rainfall was less than usual. The excess was greatest in the north-east and amounted to 5·69 inches in East Bengal, 2·87 inches in Deltaic Bengal and over 1 inch in Upper Burma, Arakan, North Bengal, the Bengal Hills and North Oudh. The principal cases of deficiency were 3·54 inches in Tenasserim and 2·14 inches in the Assam Hills.

The following were the principal large totals recorded at individual stations during the week:

Burma	Kindah	9·17 inches.
	Magôk	6·50 "
Assam	Suranganj (Sylhet)	9·48 "
Bengal	Patnakhali (Barisal)	12·23 "
	Diamond Harbour	9·51 "
	Jalpaiguri	7·77 "
N.-W. P.	Lakhimpur	3·56 "
Punjab	Hoshiarpur	1·90 "
West Peninsula	Kasargod (Mangalore)	6·40 "
East Peninsula	Salur (Vizagapatam)	4·35 "
	Turaiyur (Trichinopoly)	4·30 "

The three concluding columns of the table show that the rainfall for the period February 26th to May 20th has been less than the normal (by 20 per cent. or more) in Tenasserim, the west submontane and hill districts of the North-West Provinces, all the Punjab divisions, the central division of the Central Provinces, Kathiawar, the east of Central India and Western Rajputana. In all the other places the total rainfall has been normal or in excess of the normal.

PROVINCE.	DIVISION.	Rainfall data for week ending May 20th, 1899. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from February 26th to May 20th, 1899. Average actual rainfall of season to date.	Average normal rainfall, February 26th to May 20th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 20th May.*—Rain fell almost throughout the Presidency during the week; the fall was considerable for the season in parts of the Circars and in the Central districts, but very light in the extreme South. The water-supply is generally sufficient for the season. Cultivation is proceeding, such crops as are standing being generally in good condition. Pasture is scanty, but fodder is sufficient and the condition of cattle is generally good. Prices are almost stationary.

Bombay.—*For week ending 24th May.*—There was moderate or light rain in parts of seven districts during the week. Preparations for monsoon cultivation are progressing generally; and sowing is going on in Karachi, Shikarpur, and Kanara. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in four and fallen in three districts; elsewhere they are stationary.

Bengal.—*For week ending 22nd May.*—The weather throughout the week was unsettled and rain varying in amount fell all over the Province. In some parts of Bengal Proper the rain was in excess of present agricultural requirements. Ploughing and early sowings are going on and sugarcane and other crops in the ground are doing well. The harvesting of spring rice is proceeding. The price of common rice shows a slight rise in some districts, but is on the whole stationary. The fodder-supply is generally reported to be sufficient.

North-Western Provinces and Oudh.—*For week ending 24th May.*—Rain has been general during the week, the falls being heaviest in the sub-montane and eastern districts. The standing crops are doing well and are being irrigated where necessary. The extra crops are being harvested in parts. Weeding of sugarcane has begun. Preparation of fields for the autumn crops and sowings continue. Prospects are favourable and supplies and fodder are sufficient. Prices have risen in a few districts, but are otherwise stationary to falling.

Punjab.—*For week ending 24th May.*—Slight rain is reported from Hissar, Umballa, Delhi, Ferozepore, Sialkot, Shahpur, and Rawalpindi. Spring crops are being threshed and housed. Sowings of autumn crops continue in Mooltan and Peshawar. Cotton and sugarcane are being weeded in Sialkot and ground for autumn sowings is being prepared in Umballa. The outturn is reported average in Hissar, Jullundur, Lahore, and Dera Ismail Khan. The condition of the extra spring crops is good in Umballa, Sialkot, and Peshawar; fair or average in Delhi, Jullundur, Ferozepore, Lahore, and Dera Ismail Khan; and very fair in Hissar. Some damage has been done to crops by strong winds in Lahore. The condition of cattle is poor in Hissar, Delhi, and parts of Dera Ismail Khan; fair in Sialkot; and good elsewhere. Fodder is scarce in Hissar, Delhi, Shahpur, and parts of Dera Ismail Khan; and is sufficient elsewhere. Prices, especially

of wheat, have risen in Sialkot and Dera Ismail Khan; fallen in Umballa, Jullundur, Rawalpindi, and Peshawar; and remained unchanged elsewhere. Wheat is selling from $17\frac{1}{16}$ to 23, barley 32, gram $19\frac{1}{2}$ to $22\frac{1}{2}$, maize 28 to 35, great millet 24, bulrush-millet 18 to 27, and rice $13\frac{1}{2}$ to $14\frac{1}{2}$ seers per rupee.

Central Provinces.—*For week ending 23rd May.*—The weather has been generally cloudy and hot with high winds. Rain has fallen in all districts, except Jubbulpore and Chanda. Raipur received nearly 2 inches and Bilaspur over an inch. The threshing of the spring crops has been completed in all the districts. Preparation of land for autumn crops is in progress. In Saugor the labouring classes complain of want of work. About 2,208 persons are in receipt of relief in the Damoh district. Water is scarce in parts of Mandla, Chhindwara, Chanda, and Bhandara. Fodder is insufficient in parts of six districts. The price of wheat, rice, and *juar* has fallen in some districts and has risen in others. The cheapest prices are—wheat 20, gram 35, rice 23, and *juar* 26 seers per rupee; the dearest prices are—wheat 14, gram 18, rice 10, and *juar* 22 seers per rupee.

Burma.—*For week ending 20th May.*—In Lower Burma ploughing has commenced in parts of Thongwa and Amherst. In Upper Burma reaping of dry weather paddy continues in Thayetmyo, Bhamo, Katha, Shwebo, the Lower and Upper Chindwin and is completed in Pakôkku and in parts of Mandalay. Ploughing for early wet weather crops is going on in most districts. Sowing of early paddy on hill sides in Bhamo, Myitkyina, and the Ruby Mines district and in the Shan States; transplanting in Kyaukse; sowing of cotton in Sagaing; and of upland crops in parts of Meiktila and Yamethin have commenced. The standing crops are doubtful in Katha; fair in the Ruby Mines district; poor in parts of Mandalay; and good elsewhere. The price of paddy has fallen in Amherst, Bassein, Prome, and Myingyan and has risen in the Upper Chindwin and in Thongwa; elsewhere it is stationary.

Assam.—*For week ending 19th May.*—The weather is seasonable. Sowing of early rice, planting of sugarcane, and plucking and manufacture of tea are in progress. Prospects of tea are generally good, but red spider is prevalent in parts of Darrang. Land is being prepared for late rice; reaping of low land transplanted rice is nearly finished in Sylhet and the outturn is good. Sowing of jute is finished in Goalpara. Prices—common rice—Sylhet 21, Dhubri 16, Gauhati 15, Tezpur and Sibsagar 12, and Nowgong and Dibrugarh 14 seers per rupee.

Mysore and Coorg.—*For week ending 24th May.*—MYSORE: Rainfall—2 inches 23 cents in the Civil and Military station and rain general and good in parts of the Province. Prospects are favourable. Prices have slightly fallen in Kolar and Kadur; and risen in Tumkur and Hassan. *Ragi (Eleusine coracana)* has been sown in parts of Mysore, Kadur, and Hassan.

COORG: Rainfall—18 cents. Ploughing for rice continues. Coffee-berries are forming. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 24th May.*—BERAR: The weather is hot and cloudy. Breaking up of land for the ensuing monsoon crop continues. Fodder is insufficient in parts of the Wun district. The water-supply is inadequate in parts of the Province. Prices are almost steady.

HYDERABAD: Rainfall during the week 10 cents. The winter rice crop has suffered from unseasonable rain in two districts, but in other parts harvesting continues. Preparation in fields for the monsoon sowings is in progress. Water scarcity continues to be felt. Prices of grain are stationary. Prices—wheat 10, coarse rice 10½, and *jowari* 25 seers per current sicca rupee.

Central India.—*For week ending 24th May.*—Slight rain fell during the week in all Agencies, except Bundelkhand. Agricultural operations have been completed. Agricultural stock and pasturage are in good condition. Prices are above normal in Bundelkhand and normal elsewhere.

Rajputana.—*For week ending 24th May.*—Rain ranging from about 1½ inches to 11 cents fell at Pertabgarh, Meywar, Kotah, Haraoti, Ajmere, Kerowlee, Dholepore, and Bhurtpore. Agricultural operations are proceeding satisfactorily. Land is being prepared in all parts for the autumn crops. Agricultural stock is in fair to good condition. Fodder scarcity prevails in the States mentioned last week. Prices are rising in Jhallawar and Bhurtpore; and are steady elsewhere. The numbers employed on relief works were—Ajmere 413, Merwara 4,644, and Marwar 935. There are 238 persons on ordinary works and 191 on gratuitous relief in Ajmere-Merwara. Prices—Ajmere 20, Beawar 22, and Marwar 15 seers per rupee. Arrangements are being made to supplement the water-supply in Kherwara, where wells are failing.

Kashmir.—*For week ending 23rd May.*—The weather is fine. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

JAMMU PROVINCE.—Report not received.

Nepal.—*For week ending 20th May.*—Rainfall—1·16 inches. The weather is seasonable. Sowing of indian-corn and upland rice is still in progress. Wheat prospects are good. Rice—9½ seers per rupee.

M. FINUCANE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

No. 18—17-2.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture (Geology and Minerals),—dated Simla, the 20th May, 1899.

Read the undermentioned papers—

Department of Revenue and Agriculture Resolution No. 15—27-4, dated the 12th December 1894.

Department of Revenue and Agriculture Circular to Local Governments and Administrations, No. 16—27-5, dated the 13th December 1894.

Department of Revenue and Agriculture Circular to Local Governments and Administrations, No. 17—27-6, dated the 13th December 1894.

Despatch to Her Majesty's Secretary of State for India, No. 74, dated the 21st October 1897.

Despatch from Her Majesty's Secretary of State for India, No. 16 (Revenue), dated the 19th January 1899.

RESOLUTION.

The Governor General in Council is pleased to prescribe the following revised rules for regulating the grant by Local Governments of licenses to explore and prospect for minerals and the grant of mining leases in British India:

Rules for the grant of licenses by Local Governments to explore and prospect for Minerals, and of Mining Leases in British India.

The following rules regulating the grant by Local Governments of licenses to explore and prospect for minerals and thh grant of leases of mines and minerals have been made by the Governor General in Council, and sanctioned by the Secretary of State for India in Council.

No such license or lease can be granted by any Local Government otherwise than in accordance with these rules, except with the previous sanction of the Secretary of State for India in Council, or with that of the Governor General in Council under any general or special authority which he may have received in this behalf from the said Secretary of State in Council.

In these rules—

Collector means the Revenue Officer in charge of the district;

Local Government includes a Chief Commissioner; and

Person includes any persons, syndicate, partnership, or Company.

A license or lease under these rules may be granted to any person; in case of the death of the person or any of the persons to whom it is granted it shall inure for the benefit of his legal representatives.

Exploring Licenses.

1. A license to explore land for minerals or mineral oil, called hereinafter an exploring license, will authorise the licensee to search the surface of the land specified in the lecense for minerals of every description and for mineral oil, and, subject to such restrictions as the Local Government may from time to time impose, to remove any specimens or samples found by the licensee in or upon such land.*

2. Such license shall only be granted with respect to land in which the mines, minerals, or mineral oils are the property of the Government, and (subject to the provisions of any law, or rule having the force of law, for the time being in force with reference to such land) shall not authorise the licensee to enter upon any land in the occupation of any person without the consent of the occupier.

* *Note.*—The surface of unoccupied and unreserved land which is the property of Government may be freely searched without a license, but the Government does not object to granting a license to explore when one is applied for.

3. Such license cannot be assigned, nor can any right or interest thereunder be transferred without the assent of the Local Government.

4. Such license shall not authorise the licensee to mine or quarry, but he may turn up to such depth as the Collector may sanction, and, subject to such conditions as he may impose, the surface of unoccupied land, or, with the consent of the occupier, that of land which the Government has granted for agricultural purposes, reserving only the right to minerals.

5. Such license may be granted by such person and under such rules as the Local Government may prescribe.

6. Every such license shall run for one year, but may be renewed for a further similar term by the same authority, and there shall be paid for each license or renewal such fee, not exceeding Rs. 10, as the Local Government may prescribe.

7. A royalty shall be payable to Government on the value of all precious stones found and removed by an explorer, whether he has taken out a license or not. In the case of licenses such royalty shall be at such rate, not exceeding 15 per cent., as shall be fixed by the license, and in the case of an unlicensed explorer, shall be 15 per cent. on the value of the stones removed. Neglect to report the discovery of any such stone within a reasonable time shall involve the forfeiture of the license and of all claim to have an application for a mining or prospecting lease favourably considered.

8. Such license shall give no exclusive or preferential rights, but in considering rival claims for a prospecting license or mining lease, due regard will be had to operations conducted under cover of an exploring license.

Prospecting Licenses.

9. (1) A license to prospect for minerals or mineral oil, called hereinafter a prospecting license, shall confer on the licensee the sole right, subject to the conditions contained in the license, to mine, quarry, bore, dig and search for, win, work, and carry away any mineral or mineral oil specified in the license, and lying or being within, under, or throughout the land specified in the license.

(2) A prospecting license shall only be granted with respect to land in which the mines, minerals, or mineral oils are the property of the Government, and shall apply only to the area described in the license.

10. No prospecting license shall be granted except to a person approved by the Local Government, and such person shall, before the license is granted, deposit as security in respect of each license such sum, not being less than Rs. 100, as the Collector may determine, or give security to the like amount to the satisfaction of the Collector. Subject to such deduction on account of compensation for surface damage or otherwise as the Collector may order, the amount of any deposit made under this rule, should the depositor afterwards become the lessee of any mining lease, will be carried to his credit as part of the rents and royalties payable under his lease, and should he decline or fail to obtain any such lease as aforesaid, will be returned to him.

11. (1) Every application for a prospecting license shall, unless the Local Government shall in any case otherwise direct, be made to the Collector of the district, in which the land or some part of the land with respect to which the license is required is situate.

(2) Every such application shall contain the following particulars, namely:

(a) the name, residence, and profession of the applicant;

(b) a description, as accurate as possible, and illustrated by a rough sketch, of the situation, boundaries, and area of the land with respect to which the license is required; and

(c) a specification of the mineral or minerals for which the applicant desires to prospect.

(3) Every application shall be accompanied by a certificate that the applicant has been approved by the Local Government, under the signature of one of its secretaries.

12. On receipt of any such application the Collector shall, as soon as practicable, inquire whether the grant of the license applied for is inexpedient either on the ground that the land described in the application is required for a public purpose, or otherwise.

13. (1) Should the Collector be of opinion that it is not expedient to grant the license, or should he find that the licensee has not been approved by the Local Government, he shall refuse to grant the license, and shall forthwith report the matter through the proper channel to the Local Government, which may pass such orders as it may think fit.

(2) Subject to the control of the Local Government, the Collector, if he finds that there is no objection to the grant of the license applied for, and if the applicant has been

approved by the Local Government, may grant to the applicant a license in such form as may be prescribed, and shall report the matter to the Local Government or such other authority as the Local Government may direct.

14. A register of applications for prospecting licenses shall be kept in English in the Collector's office, specifying—

(1) Name of applicant.

(2) Date.

(3) Residence of applicant.

(4) Situation of the land.

(5) Boundaries.

(6) Estimated area.

(7) Date of certificate of approval of applicant by the Local Government.

(8) Date of license.

(9) Rent and royalty payable.

(10) Period for which granted.

15. Every prospecting license shall contain such conditions as may in any particular case seem necessary, and shall in all cases contain the following conditions:

(i) The term for which the license shall be granted shall be one year or such shorter term as the applicant may desire. The license may be renewed by the Collector for a further term not exceeding two years, whenever he is satisfied that the licensee has been prevented from completing his search of the land by any cause other than his own default.

(ii) A moderate rent not exceeding one rupee per acre shall be paid for the land covered by the license.

(iii) The licensee shall pay a royalty at a rate not exceeding 15 per cent. of the value on all precious stones won and carried away, and a royalty at the rates specified in Schedule C on all other minerals won and carried away over and above such quantity as the Collector, subject to the orders of the Local Government, may allow to be taken free for purposes of experiment.

(iv) No land in the occupation of any person shall be entered upon without the consent of the occupier, and no trees, standing crops, or other private property shall be cut or in any way injured without the consent of the owner thereof.

(v) The licensee shall make and pay reasonable satisfaction and compensation for all injury which may be done by him in exercise of the powers granted by the license, and shall indemnify the Government against all claims which may be made by third parties in respect of any such damage or injury.

(vi) The licensee shall not cut or injure any tree on unoccupied and unreserved land without the permission of the Collector in writing.

(vii) Such license cannot be assigned nor can any right or interest thereunder be transferred without the consent of the Local Government.

(viii) In case of any breach on the part of the licensee of any of the five last preceding clauses, the Collector may summarily revoke the license, and thereupon all rights conferred thereby or enjoyed thereunder shall cease.

(ix) The licensee shall, within six months next after the determination of the license or the date of the abandonment of the undertaking, whichever shall first occur, securely plug any bores and fill up or fence any holes or excavations that he may have made in the land to such extent as the Collector may require, and shall to the like extent restore the surface of the land and all buildings thereon which he may have damaged in the course of prospecting: Provided that this clause shall not apply to any land held under a mining lease.

(x) Should any question of dispute arise regarding the license, or any matter or thing connected therewith, or the powers of the licensee thereunder or the amount or payment of the rent or royalty made payable thereby, the matter in difference shall be decided by the Local Government, whose decision shall be final.

16. On or before the determination of his license the licensee shall have a right, subject to the rules hereinafter contained—

(a) in the case of mineral oil or minerals other than precious stones, to a mining lease in accordance with the terms contained in rules for mining leases;

(*b*) in the case of precious stones, to the first offer of such mining lease as the Governor General in Council may think fit to grant.

Such lease may include so much land, whether comprising the whole or a part only of the area for which the prospecting license was granted, as shall not exceed the area specified with respect to mining leases in Schedule A annexed to these rules.

Mining Leases.

17. (1) Every application for the grant of a mining lease, not being a lease of a mine of precious stones, shall be presented to the Collector in whose district the land or some part of the land with respect to which the lease is applied for is situate. The Collector shall forward the application through the proper channel to the Local Government. The Local Government may by general or special order require a deposit of money not exceeding Rs. 500 to be made by the applicant in any case or class of cases before the application is taken into consideration.

(2) No mining lease shall be granted otherwise than with respect to land in which the mines, minerals, or mineral oils are the property of Government.

18. Every application for a mining lease shall contain—

(*a*) the name, residence, and profession of the applicant;

(*b*) the name of the mineral for which the applicant intends to mine;

(*c*) a map of the area over which the proposed lease is to extend.

19. On receipt of any such application the Local Government may, if the applicant is entitled to a lease under Rule 16, or if it considers that the applicant should be granted a mining lease, grant the same in accordance with these rules over such one or more blocks, each not exceeding in extent the area specified in Schedule A annexed to these rules, as the Local Government may think fit:

Provided that no mining lease shall be granted by a Local Government under these rules so as to cause the total area held under mining leases by the lessee, or by those joint in interest with him, to exceed ten square miles.

No such lease shall be executed until it has been approved by the Advocate General or other legal adviser, if any, appointed for the Province.

20. Without the previous sanction of the Governor General in Council, the length of a block shall not be allowed to exceed four times its breadth.

21. The term for which a mining lease may be granted shall not exceed thirty years, and no covenant for renewal may be inserted in the lease without the sanction of the Governor General in Council.

22. Every such lease shall contain such conditions and stipulations as the Local Government may in each case consider necessary; but shall in every case contain the following conditions, namely:

(i) the lessee shall pay a royalty at the rate specified in the lease, which rate shall be that fixed for the particular mineral in Schedule C; and if any other mineral shall be discovered by him, then the royalty shall be paid therefor at such rate, not being less than 20 per cent. of the value thereof, as the Local Government may determine, until a mining lease has been obtained in respect of such mineral; but the lessee shall be entitled to require and obtain such lease for the term then unexpired of his original lease upon the terms hereinbefore mentioned in Rule 16;

(ii) the lessee shall also pay for every year after the first year a fixed yearly dead rent at a rate not less than that laid down in Schedule B: provided that no lessee shall pay both royalty and dead rent in respect of the same lease, but only such one of them as may be of the greater amount;

(iii) the lessee shall also pay for all land which he may take up, use, or occupy for the purpose of the mine a surface rent at the rate specified in Schedule B;

(iv) the lessee shall at his own expense erect and at all times maintain and keep in repair boundary marks and pillars according to the demarcation to be shown in a plan annexed to his lease;

(v) the lessee shall make and pay reasonable satisfaction and compensation for all injury which may be done by him in exercise of the powers granted by the lease, and shall indemnify the Government against all claims which may be made by third parties in respect of any such injury;

(vi) the lessee shall not cut or injure any tree reserved in the lease;

(vii) neither the lessee nor any person claiming through or under him shall assign the lease, or transfer any right or interest thereunder, or underlet the whole or any portion of the premises comprised in such lease, without the assent of the Local Government first had and obtained ;

(viii) the lessee shall commence operations within two years from the date of the execution of the lease, and shall thereafter carry them on effectually in a proper, skilful, and mininglike manner unless prevented by unavoidable cause ;

(ix) the lessee shall keep correct accounts showing the quantity and particulars of all minerals obtained from the mine and the number of persons employed therein, and also complete plans of the mine, and shall allow any officer authorised by the Local Government in that behalf at any time to examine such accounts and plans, and shall furnish the Local Government with such information and returns in respect of the aforesaid matter as it may prescribe ;*

(x) the lessee shall allow any officer authorised by the Local Government in that behalf to enter upon the premises comprised in the lease for the purpose of inspecting the same ;

(xi) the lessee shall without delay send to the Collector a report of any accident which may occur at or in the said premises, and also the finding therein of any mineral not specified in the lease ;

(xii) should the royalty or rent reserved or made payable by the lease be not paid within two months next after the date fixed in the lease for the payment of the same, the Local Government may enter upon the said premises and destrain all or any of the minerals or moveable property therein, and may carry away or detain them until the rent or royalty due and all costs and expenses occasioned by the non-payment thereof shall be fully paid ; and, if any royalty or rent remain at any time unpaid for six calendar months after the date on which it is due, the Local Government may determine the lease and take possession of the premises comprised therein ;

(xiii) in case of any breach on the part of the lessee of any covenant or condition contained in the lease, the Local Government may determine the lease and take possession of the said premises ;

(xiv) at the end or sooner determination of the lease, the lessee shall deliver up the said premises and all mines (if any) dug therein in a proper and workmanlike state, save in respect of any working as to which the Local Government may have sanctioned abandonment ;

(xv) should any question or dispute arise regarding the lease or any matter or thing connected with the mines and minerals leased, or the working or non-working thereof, or the amount or payment of the royalty or rent reserved or made payable by the lease, the matter in difference shall be decided by the Local Government, whose decision thereon shall be final.

23. No lease of a mine of precious stones shall be granted except by the Governor General in Council. The procedure for obtaining and the conditions of such lease shall be those prescribed by Rules 17 to 22, read as if the Governor General in Council were substituted for the Local Government.

General Provisions as to Licenses and Leases.

24. (1) All operations conducted under the authority of these rules within a reserved forest shall be subject to such conditions as the Local Government may by general or special order from time to time prescribe.

(2) It shall be a condition of every license granted under these rules that, before the commencement of exploration or prospecting (as the case may be) within a reserved forest, notice shall be given to the District Forest Officer of the intention to commence operations, and that the operation shall be conducted subject to any conditions regarding the use of fire that he may prescribe.

(3) Every mining lease which includes any portion of a reserved forest shall, if it authorises the lessee to fell timber for mining purposes, specify the area within which, or the quantity up to which, and the terms and conditions upon which, he may exercise that authority.

25. Should the applicant for a prospecting license or mining lease desire the Collector to prepare for him the sketch required by Rule 11 (2) (*b*) or the map required by Rule 18 (*c*), or should the sketch or map presented by the applicant be insufficient, the Collector may prepare the sketch or map required, and may, if he so order, recover the cost from the applicant at a rate not exceeding 4 annas per acre. If the Local Government has prepared a map of a tract of country specially for the convenience of intending applicants for licenses

* *Note.*—All information and returns obtained or furnished under this clause shall be treated as strictly confidential.

and leases under these rules, and if any applicant makes use of such map for the sketch or map aforesaid, it will be open to the Local Government to recover as above such share of the cost of preparing the map as it may consider to be equitably due from such applicant.

26. If a license or lease is not executed within six months after leave has been granted for it, the right of the applicant to such license or lease shall be held to have lapsed, unless the Local Gevernment for special reasons consents to grant the same notwithstanding the delay.

SCHEDULE A.

(*Vide* No. 19 of Rules.)

Maximum area in square miles for Mining-lease—

Coal	2
Oil	1
Gold or silver	¼
Metals	½
Precious stones	*

SCHEDULE B.

(*Vide* Nos. 15 (ii), 22 (ii), and 22 (iii) of Rules.)

—	Prospecting.	Mining.	
		Surface Rent per Acre.	Dead Rent per Acre (minimum).
Rent charged for—			
Coal	A moderate rent not exceeding one rupee per acre.	The rent rate assessable under the Revenue or Rent law of the Province; or, if no such rent is so assessable, the rate which may be fixed by agreement, subject to a maximum of one rupee.	4 annas.
Oil			1 rupee.
Gold or silver			1 rupee.
Iron			1 anna.
Other metals			1 rupee.

SCHEDULE C.

(*Vide* Nos. 15 (iii) and 22 (i) of Rules.)

	Prospecting and Mining.
Royalty—	
Coal, exclusive of dust and coal used on the works.	1 anna per ton.
Oil	8 annas per 40 gallons or 5 per cent. *ad-valorem* on gross value.
Gold or silver	7½ per cent. on the net profits of each year taken separately.
Iron	¼ anna per ton of ironstone.
Copper, tin, lead, or other metals	2½ per cent. on the sale value at the pit's mouth or on the surface, of the dressed ore or metal, convertible at the option of the lessee to an equivalent charge per ton to be fixed annually or for a term.
Precious stones	30 per cent. on the net profits of each year taken separately.

* Will be decided by the Government of India in each case on its merits.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations for information and guidance, and that a copy be forwarded to all Departments of the Government of India, to the Director, Geological Survey of India, and to the Inspector General of Forests, for information.

Ordered, also, that the Resolution be published in the Supplement to the *Gazette of India* for general information.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.
RAILWAY.

EAST INDIAN RAILWAY.

Synopsis of the financial transactions for, and to end of, the year 1898.

No. 114-A.R., dated Simla, the 18th May, 1899.

RESOLUTION—By the Government of India, Public Works Department.

Read the following:

Note by A. R. BECHER, Esq., Accountant General, Public Works Department, on the synopsis of the financial transactions of the East Indian Railway for the year 1898.

In continuation of my note No. 267 R. of 17th May 1898, I beg to submit, for the information of the Government of India, a synopsis of the financial transactions of the East Indian Railway from the date of its purchase by the State (1st January 1880) to the close of the year 1898.

2. The Capital Expenditure of the East Indian Railway may be thus stated.

Under the Purchase Act, 42 and 43 Vict., Cap. CCVI, the Capital Stock of the Company was taken over by Government at a commuted value of £125 for every £100 of Capital Stock:

	£
The share capital of the Company, amounting to £26,200,000, was accordingly stated at	32,750,000
Under the same Act the debentures and debenture stock were taken over by Government, and amounted to	4,450,000
TOTAL ...	37,200,000

	Rs.
The Company had at 31st December 1879 overdrawn from Government on Capital Account ...	26,45,269
The cost of the land taken up for the Railway and paid for by Government had been	59,26,183

and the further outlay to close of the year 1898 from grants by Government from borrowed moneys, and from debentures raised by the Company has been :

	Rs.	Rs.
On Construction Account	6,92,16,697	
„ Stores Suspense Account ...	1,10,38,070	
„ Capital Advance Account ...	*—8,11,685*	
		7,94,43,082
		8,80,14,534

Deduct—Assets on the 31st December 1879, received by Government on purchase of the line and made over to the Company—

	Rs.	Rs.
Stores in stock	76,65,340	
Balance of cash and other Suspense accounts ...	8,22,167	
	84,87,507	
Realization by the sale of surplus and obsolete stores originally valued at Rs. 16,06,079 not taken over by the undertaking, and other miscellaneous receipts	6,30,652	
		91,18,159

making the Capital outlay at close of 1898 ... Rs. 7,88,96,375+£37,200,000

		Rs.
3. During the year 1898 the gross traffic earnings were	...	5,97,96,060
the working expenses	...	1,85,76,596
and the net earnings	...	4,12,19,464

4. These results of working the East Indian Railway affected the finances of the Government of India in the manner and to the extent exhibited in the following paragraphs.

5. The liabilities incurred by the Government of India in connection with the purchase of the East Indian Railway are as follows:

	Capital.	Interest.	
Sterling liabilities—	£	£	
(a) Debenture stock	1,500,000	67,500	(inclusive of payment for redemption of Capital).
(b) Annuities, terminable in 1953 ...	26,200,000	1,179,000	
(c) Deferred annuities ...	6,550,000	262,000	
		1,508,500	
Less—Annual payment for redemption of Capital ...		65,500	
Net sterling annual liability ...		1,443,000 which	

at 15·8943 per rupee = Rs. 2,17,88,943.

6. The liabilities incurred by Government since the purchase of the line have been—

		Rs.
Debentures of old Company discharged ...		3,54,66,835
Debentures raised by new Company (£1,550,000)		2,68,80,832
	Rs.	
Construction Account	6,92,16,697	
Stores Suspense Account	1,10,38,070	
Capital Advance Account	*—8,11,685*	
	7,94,43,082	
Less—Outlay met from debentures raised by the Company	2,68,80,832	5,25,62,250
Land charges by the State		59,26,183
Capital overdrawn at time of purchase ...		26,45,269
		12,34,81,369
Less—Credits to Government for value of stores, etc., made over to the Company		91,18,159
TOTAL	...	11,43,63,210

The debentures raised by the Company form a sterling liability of £1,550,000 bearing interest at 2½ per cent. per annum, and the difference between the above total and the rupee equivalent of the debentures (11,43,63,210 — 2,68,80,832), *viz.*, Rs. 8,74,82,378 represents the rupee liabilities incurred by Government.

7. The following, therefore, seems to be a fair account of the transactions of the railway, as they affect Government, for 1898 :

		Rs.	Rs.
Traffic earnings		5,97,96,060	
Less—Working expenses		1,85,76,596	
Net earnings			4,12,19,464
Sterling liabilities in connection with the purchase, £1,443,000 at 15·8943*d.* per rupee...		2,17,88,943	
Interest on debentures, £37,003		5,58,683	
Interest on rupee liabilities—			
Interest on outlay to 30th June 1895, including land charges, Rs. 8,13,35,890 at 4 per cent.		32,53,436	
Interest on subsequent outlay, *viz.*—	Rs.		
From 1st July 1895 to 31st December 1897	27,50,170		
Half outlay during 1898 $\left(\frac{33,96,318}{2}\right)$	16,98,159		
	44,48,329		
at 3½ per cent.		1,55,692	
Payment of surplus profits to the Company ...		24,99,244	
Payment to the Company's Provident Fund ...		4,12,195	
Total payments			2,86,68,193
Net profit to Government			1,25,51,271

The corresponding net profit was—

	Rs.
in 1897	1,24,81,903
„ 1896	77,89,472
„ 1895	70,76,494
„ 1894	56,27,445
„ 1893	85,22,279
„ 1892	73,98,751

8. The Capital outlay on the undertaking may be taken as under—

		£
Sterling (*vide* paragraph 2)		37,200,000
		Rs.
Converted into Indian currency at the average rate of 19·961*d.* per rupee at time of purchase		44,72,72,180
Rupee debt ... ... Rs.	11,43,63,210	
Less—Rupee value of debentures discharged (*vide* paragraph 6, *ante*)	3,54,66,835	
		7,88,96,375
TOTAL ...		52,61,68,555
The interest at 1 per cent. on this Capital would be ...		52,61,686

It follows from this that—

(i) the net earnings of the railway are $\frac{41219}{5262}$, or 7·83 per cent. on the Capital invested by the Government in it;

(ii) the burden which Government bears in respect of it is $\frac{28668}{5262}$, or 5·45 per cent.;

(iii) the clear profit to Government is 2·38 per cent.

ORDER.—Ordered that a copy of the note and accompaniment now read, be forwarded to the Consulting Engineer to the Government of India for Railways, Calcutta, and to the Department of Finance and Commerce, for information.

F. R. UPCOTT,

Secretary to the Government of India.

JUDICIAL.

The 2nd June, 1899.

No. 804.—Mr. J. T. Woodroffe, Barrister-at-Law, is appointed to officiate as Advocate General for Bengal, during the absence on leave of the Honourable Sir G. C. Paul, K C.I.E., or until further orders.

No. 809.—The following draft of a Notification, which it is proposed to issue in exercise of the powers conferred by sections 22 and 8 of the Petroleum Act, 1899 (VIII of 1899), is published for the information of all persons likely to be affected thereby, and notice is hereby given that the said draft will be taken into consideration by the Governor General in Council on or after the 1st July 1899.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date aforesaid will be considered by the Governor General in Council:

Draft notification.

In exercise of the powers conferred by section 22 of the Indian Petroleum Act, 1899 (VIII of 1899), the Governor General in Council is pleased to apply to carbide of calcium the provisions of sections 5, 6, 8 to 10, 12 to 18, 23 and 24 of the said Act and to fix 5 lbs as the limit of the quantity of carbide of calcium which, under section 5 of the said Act, as applied by this Notification, may not be imported, transported, or kept without a license, and to fix 5 lbs. as the limit of the quantity of carbide of calcium which, under section 6 of the said Act, may be transported, or kept by any one person, or on the same premises, without a license.

In exercise of the powers conferred by section 8 of the said Act the Governor General in Council is further pleased to make the following rules:

1. Carbide of calcium kept or transported without a license, under section 6 of the said Act, as applied by this Notification, shall be kept in separate substantial hermetically closed metal vessels containing not more than 1 lb. each.

2. Carbide of calcium (*a*) which is imported or is kept at any place after seven days from the date of its importation, or (*b*) which is transported, or (*c*) which is sold or exposed for sale, shall be contained in hermetically closed metal vessels, having attached thereto labels in conspicuous characters stating the description of the carbide of calcium with the addition of the words "Dangerous if not kept dry and liable, if brought into contact with moisture, to give off a highly inflammable gas" and with the addition, (*d*) in the case of a vessel kept, of the name and address of the consignee or owner; (*e*) in the case of a vessel transported, of the name and address of the sender; and (*f*) in the case of a vessel sold or exposed for sale, of the name and address of the vendor.

No. 902-*G*—Lieutenant-Colonel D Robertson, C.S.I., Indian Staff Corps, a Resident of the 1st class and Resident in Mysore and Chief Commissioner of Coorg, is granted special leave for four months, on urgent private affairs, under Article 348 of the Civil Service Regulations, with effect from the date on which he may avail himself of the leave.

No. 1447-*I.-A.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to apply the provisions of the Prisons Act 1894 (IX of 1894), to the Civil Station of Rajkot so far as they may be suitable:

Provided that, for the purpose of facilitating the application of the said provisions as so applied, any Court having jurisdiction in the said Civil Station may construe them with such alterations, not affecting the substance, as may

be necessary or proper to adapt them to the matter before the Court :

Provided, also, that references to the Local Government shall be read as referring to the Government of Bombay and references to British India or the territories subject to a Local Government as referring to the said Civil Station.

2. The following Notification of the Political Agent in Kathiawar is hereby cancelled to the extent indicated :

Notification.	Extent repealed.
No. 2, dated the 27th January, 1879.	So much as purports to apply Bombay Act II of 1874 to the Civil Station of Rajkot.

No. 1448-*I.-A.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to apply the provisions of the Prisons Act, 1894 (IX of 1894), to the Civil Station of Wadhwan so far they may be suitable :

Provided that, for the purpose of facilitating the application of the said provisions as so applied, any Court having jurisdiction in the said Civil Station may construe them with such alterations, not affecting substance, as may be necessary or proper to adapt them to the matter before the Court :

Provided, also, that references to the Local Government shall be read as referring to the Government of Bombay and references to British India or the territories subject to a Local Government as referring to the said Civil Station.

No. 1449-*I.-A.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to apply the provisions of the Prisons Act, 1894 (IX of 1894), to the Cantonment of Deesa so far as they may be suitable :

Provided that, for the purpose of facilitating the application of the said provisions as so applied, any Court having jurisdiction in the said cantonment may construe them with such alterations, not affecting the substance, as may be necessary or proper to adapt them to the matter before the Court :

Provided, also, that references to the Local Government shall be read as referring to the Government of Bombay and references to British India or the territories subject to a Local Government as referring to the said cantonment.

2. The following Notifications of the Government of India in the Foreign Department are hereby cancelled to the extent indicated :

Notification.	Extent repealed.
No. 403-I., dated the 4th February, 1885.	So much as purports to apply Bombay Acts II of 1874, II of 1882 and IV of 1883 to the Cantonment of Deesa.
No. 4329-I., dated the 30th September, 1887.	The whole.

No. 788-*E.-B.*—Whereas by a Treaty ratified at Peking on the fifth day of June, 1897, it has been agreed between the respective Governments of Great Britain and China that, within the tract of country to the south of the Namwan River, near Namkhai, which may hereafter be designated "the Namwan Assigned Tract" and is enclosed to the west by a branch of the Nammak River and the Mawsi range of hills up to the Loichaw Peak, and thence by the range running in a north-easterly direction to the Shweli River, the administration and control shall be entirely conducted by the British Government:

And whereas the portion of the said Tract which is bounded by the Namkham stream on the north, the Sinmakha stream on the west, the Loichaw Ridge on the south and the Shweli River on the east, has hitherto been administered by the British Government as part of the Shan State of Möngmit, and the portion comprising the villages of Mansawn, Kunkyeng and Kawngnawng, together with the lands appertaining thereto, as part of the Shan State of North Hsenwi :

And whereas it is desirable that so much of the said Tract as has hitherto been administered as aforesaid should continue to be so administered, and that the rest of the said Tract, which has hitherto been administered by the Chinese Government, should henceforth be administered as part of the district of Bhamo in Upper Burma :

Now, in pursuance of the said Treaty and in exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to make the following orders for the administration of the said Tract, namely :

1. (*1*) All laws for the time being in force in the Shan State of Möngmit shall be deemed to apply to the portion of the said Tract which is bounded by the Namkham stream on the north, the Sinmakha stream on the west, the Loichaw Ridge on the south and the Shweli River on the east ;

(*2*) All laws for the time being in force in the Northern Shan States shall be deemed to apply to the villages of Mansawn, Kunkyeng and Kawngnawng, together with the lands appertaining thereto ; and

(*3*) All laws for the time being in force in the district of Bhamo shall be deemed to apply to the rest of the said Tract :

Provided that, for the purposes of the application of the Kachin Hill-tribes Regulation, 1895 (I of 1895),—

(*a*) all laws for the time being applicable, under the said Regulation, to any hill-tribe in the Shan State of Möngmit shall apply to all hill-tribes in the portion of the said Tract which is bounded by the Namkham stream on the north, the Sinmakha stream on the west, the Loichaw Ridge on the south and the Shweli River on the east ;

(*b*) all laws for the time being so applicable to any hill-tribe in the Shan State of North Hsenwi shall apply to all hill-tribes in the villages and lands specified as aforesaid ; and

(*c*) all laws for the time being so applicable to any hill-tribe in the district of Bhamo shall apply to all hill-tribes in the rest of the said Tract.

2. (*1*) The Lieutenant-Governor of Burma and all officers subordinate to the Government of Burma for the time being exercising authority in the Shan State of Möngmit shall have the like authority in the portion of the said Tract which is bounded by the Namkham stream on the north, the Sinmakha stream on the west, the Loichaw Ridge on the south and the Shweli River on the east;

(*2*) The said Lieutenant-Governor and officers for the time being exercising authority in the Shan State of North Hsenwi shall have the like authority in the villages and lands specified as aforesaid ; and

(*3*) The said Lieutenant-Governor and officers for the time being exercising authority in the district of Bhamo shall have the like authority in the rest of the said Tract.

3. (*1*) All Courts having jurisdiction for the time being in the Shan State of Möngmit shall have the like jurisdiction in the portion of the said Tract which is bounded by the Namkham stream on the north, the Sinmakha stream on the west, the Loichaw Ridge on the south and the Shweli River on the east;

(*2*) All Courts having jurisdiction for the time being in the Shan State of North Hsenwi shall have the like jurisdiction in the villages and lands specified as aforesaid ; and

(*3*) All Courts having for the time being jurisdiction in the district of Bhamo shall have the like jurisdiction in the rest of the said Tract.

The 30th May, 1899.

No. 233.—*Corrigendum.—For* "1899" *in Notification No. 215, dated 16th May 1899, substitute* "1898."

T. HIGHAM,

Joint Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

ADDITIONS TO THE RULES FOR THE REGULATION OF APPOINTMENTS IN THE SECRETARIAT CLERICAL SERVICE OF THE GOVERNMENT OF INDIA AND ATTACHED OFFICES.

NOS. 329—40.

Extract from the Proceedings of the Government of India, in the Home Department (Examinations), under date Simla, the 2nd June, 1899.

Read again—

Home Department Resolution No. $\frac{\text{2-Examinations}}{\text{188--189}}$, dated the 5th June 1894.

Read also—

Home Department Resolution Nos. 186—187, dated the 30th April 1897.

RESOLUTION.

The Governor General in Council is pleased to direct that the following additions be made to the rules for the regulation of appointments in the Secretariat Clerical Service of the Government of India and attached offices:

After Rule 9 (2) add:

(3) "If the candidate is employed under Government, a certificate by the Head of the Office or Department to the effect that, in his opinion, there is no objection to the candidate appearing at the ensuing Clerkship Examination.

(4) "A statement whether the candidate has appeared at any previous Clerkship Examination, and if so, in what year."

ORDER.—Ordered, that a copy of the above Resolution be forwarded for information to the Departments of the Government of India (except the Foreign Department) and to the Heads of Offices under the Home Department marginally noted; that a copy be forwarded to the Governments of Bengal, the North-Western Provinces and Oudh and the Punjab for information; that a copy be also forwarded to the Secretary to the Board of Examiners, and that the Resolution be published in the *Gazette of India* for general information.

The Director-General, Indian Medical Service.
The Sanitary Commissioner with the Government of India.

[True Extract.]

A. H. L. FRASER,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 27th, 1899.

Weather conditions have been somewhat unsettled over Northern India during the week under review. The small storm, which developed at the head of the Bay at the close of the previous week, passed into Central Bengal and disappeared during the first two days of the present week. It was succeeded by another but very slight storm over South-West Bengal on the 23rd, which in its turn disappeared on the 24th or 25th. Up to this date the general conditions of the weather were similar to those which had prevailed during the previous week. Pressure was low over the Punjab, relatively low within a trough running from North-West India to the head of the Bay and highest in Ceylon and the south of the Bay. Accompanying this distribution of pressure were westerly and north-westerly winds over the Peninsula, southerly winds in Burma and at the head of the Bay and easterly winds in North Bengal and the North Gangetic Plain. On the 26th these conditions changed somewhat, a rapid barometric fall occurring in Northern India by which the trough of low pressure was transferred northward to the foot of the hills. At the same time the easterly winds ceased in Northern India and the westerly winds from the Peninsula and the Central Provinces extended northward into the Gangetic Plain. The most marked features of the weather during the past week have been the general heavy rain which has been brought up to Burma by the southerly winds and the very high temperatures which have prevailed throughout the week over North-Western India.

Daily Summary.—*Sunday, May 21st.*—The barometer had fallen briskly to rapidly over parts of Bengal, and the small storm which was shown near Saugor Island on the 20th was shown near Bogra and Mymensingh. Rain had been heavy and general over East and Lower Bengal. Elsewhere conditions were fairly normal, though pressure differences were somewhat greater than usual. The southerly wind over Burma was giving moderate general rain over that province, while a few light to moderate scattered showers had been received over Upper India, the central districts and the Peninsula. Large contrasts of temperature were shown, for, while the mean temperature was as much as 9·7° higher than usual at Mooltan, it was 10° lower at Burdwan, Gorakhpur and Chaibassa. Over the Peninsula the temperature variations were much smaller, but the weather was on the whole cooler than usual.

Monday, May 22nd.—Pressure had decreased briskly over North-Western and part of Northern India and over Burma, while it had increased slightly over the Peninsula and slightly to briskly over East Bengal. The small storm over East Bengal had filled up, and the pressure differences over India generally had increased, but otherwise there had not been much change. The winds were generally westerly and north-westerly over the Peninsula and the central parts of India, southerly (south-west—south-east) over Burma and Deltaic Bengal and easterly close to the foot of the hills in Northern India. The heavy rain in Bengal had ceased, but showers were reported from parts of Burma, Assam and the west of the Peninsula. The mean temperature had risen fast over Bengal, but the weather remained generally cooler than usual except in the north-west where the heat was excessive.

Tuesday, May 23rd.—Pressure had decreased almost everywhere. Barometric readings were lowest in the Punjab, relatively low over the Gangetic Plain and highest in Malabar and Ceylon. Pressure differences were abnormally large.

The winds were practically unchanged, the westerly winds in the west and centre were very strong. General rain continued over Burma, Assam and East Bengal, the amounts at some stations being considerable to large. Elsewhere the weather was fine with a few scattered showers. The mean temperature remained excessive over North-West India and generally slightly to moderately below the normal elsewhere.

Wednesday, May 24th.—Pressure had increased over the Punjab, the North-West Provinces and West Bengal and decreased elsewhere. Barometric readings were lowest over the Punjab, whence a trough of relatively low pressure ran south-eastward to Orissa. The pressure differences were nearly as large as on the preceding days. The winds were little altered, and the westerly winds were strong to a gale in different parts of the country. Burma had again received general rain, while scattered showers had been received over Bengal, Assam, the North-West Provinces, the North-West Himalayas and the west of the Peninsula. The mean temperature was high over North-West India as well as over the east and south of the Peninsula, but was generally lower than usual elsewhere.

Thursday, May 25th.—The barometer had risen briskly over the west of the North-West Provinces and the east of the Punjab and had fallen briskly over West Bengal, but elsewhere the changes were small. The pressure distribution was hence practically unaltered, and the winds were generally the same as on the preceding days. Rain had fallen generally over Burma, Assam, East Bengal and the south-west of the Peninsula, and a few light scattered showers were reported from other parts of the country, but in general the weather was fine. The heat was greater than usual over North-Western and less than usual over North-Eastern India, while over the Peninsula it was nearly normal.

Friday, May 26th.—The barometer had fallen briskly to rapidly along the foot of the hills, and the trough of low pressure had been transferred northward to the Himalayan region. This was the only important change, but under its influence the easterly current of air in the north had contracted and almost disappeared. Elsewhere the pressure conditions and the winds were little changed. Rain had continued to fall generally over Burma and Malabar, but elsewhere the weather was fine or nearly so. The mean temperature was low over Burma, the west of the Central Provinces and North Bombay, but was generally excessive elsewhere.

Saturday, May 27th.—Pressure had decreased over Northern India and increased over the Peninsula. Pressure was lowest and much below the normal over the west of the Punjab, while it was relatively low over the North Gangetic Plain and highest in the extreme south of India. Pressure gradients were very steep for the time of year. The winds were variable over the Punjab and along the west coast, easterly close to the foot of the hills in Northern India and about normal elsewhere. The force was fresh to strong over a large part of the country. The rainfall had been heavy and general in Burma, and showers had been received over parts of Assam, Bengal and the west of the Peninsula. The mean temperature was low over Burma and parts of Bombay and the Central Provinces, but elsewhere the heat was excessive.

Temperature.—There were very large and marked contrasts of temperature over Northern India during the week. This was specially noticeable on the 21st, 25th and 27th.

The following were the largest opposite variations on each day:

Sunday	May	21st	Multan	+ 9·7°	Gorakhpur	—10·7°
Monday	"	22nd	Multan	+ 9·0°	Thayetmyo	— 6·2°
Tuesday	"	23rd	Rawalpindi	+ 12·0°	Sholapur	— 6·2°
Wednesday	"	24th	Multan	+ 9·8°	Gorakhpur	— 5·5°
Thursday	"	25th	Jhansi	+ 7·4°	Gaya	— 9·8°
Friday	"	26th	Multan	+ 7·8°	Thayetmyo	— 3·3°
Saturday	"	27th	Sirsa	+ 10·7°	Bassein	— 5·8°

The following table gives the mean temperature variation data for the week:

Province.	May 1899.							Mean variation of week.
	21st	22nd	23rd	24th	25th	26th	27th	
	°	°	°	°	°	°	°	°
Burma	−0·3	−1·5	−0·5	−0·4	−1·2	−1·0	−2·5	−1·1
Assam	−3·1	−4·0	−1·3	+0·5	+0·9	+1·3	+0·4	−0·8
Bengal	−5·1	−2·3	−0·7	−1·4	−0·6	+0·6	+0·8	−1·2
Orissa	−5·8	−2·9	−1·4	−4·5	−2·3	−0·2	+2·9	−2·0
Bihar	−4·4	−2·1	+1·5	−2·0	−4·0	+1·1	+3·0	−1·0
Chota Nagpur	−7·2	−3·1	−0·1	+0·7	−3·4	+2·1	+5·6	−0·8
N.-W. P. and Oudh	−6·2	−2·4	+2·8	+1·0	−0·8	+1·1	+5·7	+0·2
Punjab	+3·5	+5·0	+8·5	+5·3	+3·8	+4·6	+9·1	+5·7
Sind	+1·8	+1·8	+2·6	+1·7	+1·4	+1·2	+1·4	+1·7
Rajputana	+4·5	+4·2	+3·6	+3·6	+4·1	+4·2	+1·4	+3·7
Gujarat	−1·2	−0·7	−2·0	−1·3	−1·5	−1·5	−1·4	−1·4
Central India	−4·0	−0·7	+0·8	+1·1	+1·2	+1·1	+2·4	+0·3
Central Provinces	−1·5	+0·8	0	+0·1	+0·1	+1·3	+1·6	+0·3
Berar	+0·5	+1·3	−0·7	−1·1	−1·6	−1·3	−1·0	−0·4
West Coast	+0·2	+0·3	−0·5	+0·4	+0·3	0	+0·2	+0·2
Bombay Deccan	−1·5	−1·3	−3·6	−2·1	−1·8	−0·4	−1·1	−1·7
Mysore	−2·7	−2·8	−3·7	−1·9	−0·3	+0·2	+0·7	−1·5
Madras Coast	−2·3	+0·9	+1·4	+2·6	+2·5	+3·5	+2·9	+1·6
Madras Deccan	−3·3	−1·5	−1·8	−2·9	−1·4	+0·5	+1·4	−1·3
South India	−1·9	+0·4	+0·3	+1·7	+2·6	+1·1	+0·8	+0·7
Mean for whole of India	−2·0	−0·5	+0·3	+0·1	−0·1	+1·0	+1·7	+0·1

The mean temperature of the whole country for the whole week was very nearly normal, and on most days of the week this was likewise the case; but on the 21st there was some deficiency and on the 27th some excess. The provincial variations show that the mean temperature was excessive throughout the week in North-West India and during most of the week in the Madras coast and South India districts, but that in the remaining provinces the heat was generally less than usual.

The following were the highest maxima reported on each day:

May	21st	115·1°	at	Jacobabad.
"	22nd	113·2°	"	Do.
"	23rd	120·0°	"	Do.
"	24th	116·1°	"	Do.
"	25th	120·0°	"	Do.
"	26th	121·0°	"	Do.
"	27th	122·0°	"	Do.

Rain.—The rainfall conditions of the present week are generally similar to those reported last week. The rainfall area has been very extensive, nearly all parts of the country having received some rain during the week; but, except in Burma and North-East India, the fall has been light, scattered and local, occurring usually during dust and thunder storms. As was the case last week, there has been a strong steady flow of air from the Bay into Burma and Bengal, and this moist current has shifted round into south-east and east over Bengal, and with this direction has travelled across West Bengal up the Gangetic Plain. Over the area influenced by this current the week's rainfall has been more or less heavy, but in most other places it has been lighter than ordinary. At the commencement of the week the heaviest rainfall was reported from Lower Bengal where a small cyclonic storm was disturbing the weather; but, after the beginning of the week, the region of heaviest rainfall was transferred to Burma and

Tenasserim, and this continued until the end of the week. The rainfall returns show that in Burma rain fell daily throughout the week; in Assam similar conditions prevailed; in East and Deltaic Bengal also daily rainfall was reported, but in Central, North and West Bengal the rain, though scattered throughout the week, was less frequent than in the two other divisions; over the Gangetic Plain the rain occurred generally on the 21st and 24th and in the Punjab on the 21st; on the Malabar Coast rain occurred daily, while in other parts of the Peninsula the showers were scattered throughout the week; in the Central Provinces also the showers occurred irregularly during the week.

The rainfall table at the close of the summary shows that no rain whatever fell during the week in the West Punjab, Berar, Gujarat, Kathiawar, Sind, Baluchistan, West Rajputana and the Jaipur division of the east coast, and an unimportant quantity in the central division of the North-West Provinces, the South-East, South and North Punjab, the west of the Central Provinces, Central India and the east of Rajputana. With the exception of these fifteen divisions, effective rain was received throughout the whole country, the average actual rainfall ranging from 8·65 inches in Tenasserim, 8·20 inches in Arakan, 7·86 inches in Deltaic Burma, 7·30 inches in the Surma division of Assam and 5·26 inches in the hill division of Assam, to 0·11 inch in the Central Punjab, 0·13 inch in the submontane division of the Punjab, 0·16 inch in Coorg, 0·12 inch in the central division of the Central Provinces and 0·13 inch in South Madras.

The third column of the table shows that the week's rainfall has been heavier than usual in 23 of the rainfall divisions, *viz.*, Tenasserim, Deltaic and Upper Burma, all the Assam divisions, all the Bengal divisions (except North Bengal and South Bihar), all the North-West Provinces divisions (except the central), the Bombay Deccan, the east of the North-West Provinces and the central divisions of Madras. The greatest excess was in the deltaic division of Burma and the Surma division of Assam where it exceeded 3 inches. In all the divisions, except the 23 quoted above, the rainfall has been short of the normal, but except in parts of the south-west of the Peninsula the deficiency has been small.

The following were the principal large totals recorded at individual stations during the week:

Burma	Bassein	16·36 inches.
	Sandoway	18·30 „
Assam	Sylhet	13·04 „
Bengal	Durgapur (Mymensingh)	10·80 „
	Kuriaram (Rungpur)	11·37 „
Bihar	Araria (Purnea)	6·50 „
Malabar	Quilon	11·66 „
	Malwan (Ratnagiri)	6·43 „
Madras	Nundyal (Kurnool)	4·28 „

The three concluding columns show that the rainfall for the whole period from February 26th to date has been short of the normal over the hill division of the North-West Provinces, all the Punjab divisions, the central division of the Central Provinces, Gujarat, Kathiawar, Central India, Western Rajputana and the south division of Hyderabad. In all the remaining divisions the total seasonal rainfall has equalled or exceeded the normal.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING MAY 27TH, 1899.			RAINFALL DATA FROM FEBRUARY 26TH TO MAY 27TH, 1899.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, February 26th to May 27th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
for *Meteorological Reporter to the Government of India.*

SIMLA, *1st June, 1899.*

M. FINUCANE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 27th May.*—There was seasonable rainfall on the West Coast and showers almost throughout the remainder of the Presidency during the week. The water-supply is normal. Ploughing in many parts and sowings on the West Coast have begun. The standing crops are in good condition. Pasture is scanty, but fodder is sufficient. Cattle are in normal condition. Prices are steady or slightly easier.

Bombay.—*For week ending 31st May.*—There was rain in twelve districts during the week, but the fall was generally light. Preparations for monsoon cultivation are progressing generally, and sowing in Kanara, Karachi, and Shikarpur. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in eight and fallen in four districts; elsewhere they are stationary.

Bengal.—*For week ending 29th May.*—There was general rain during the week; the fall in some parts of Bengal Proper being heavy. Ploughing and early sowings are in active progress. Jute and autumn rice are already sown in many parts and are coming up well. Reports of sugarcane, indigo, and other crops in the ground are good. The price of common rice was practically stationary, the variations reported being slight and confined to a few districts only. The supply of fodder and water for cattle is everywhere sufficient, except in one thana in Manbhum. There was a tornado at Purnea on the 28th May which uprooted many trees and damaged a few public buildings and several private houses.

North-Western Provinces and Oudh.—*For week ending 31st May.*—The weather was generally showery during the week. The standing crops are thriving Irrigation of extra crops, indigo, and sugarcane and the preparation of fields for the autumn sowings continue. Weeding of sugarcane and the harvesting of extra crops in parts are still in progress. Prospects are favourable; markets are well-stocked; fodder is sufficient. There are slight fluctuations in prices in a few districts, otherwise they are practically stationary.

Punjab.—*For week ending 31st May.*—Rain ranging from $\frac{1}{10}$ of an inch to $1\frac{3}{8}$ inches has fallen in Hissar, Umballa, Ferozepore, Sialkot, Rawalpindi, and Dera Ismail Khan. The spring crops are still being threshed and housed. The autumn crops are being sown in Mooltan, Umballa, and Peshawar and weeded and watered in Sialkot and Amritsar. Land is being prepared for sowings in Lahore and in parts of Umballa. Extra spring crops have been reaped in Hissar. The condition of extra spring crops is good in Umballa, Peshawar, and Sialkot; and fair in Delhi, Jullundur, Ferozepore, Lahore, and Dera Ismail Khan. The outturn is reported average in Hissar, Jullundur, Lahore, and Dera Ismail Khan. The condition of cattle is good in Umballa, Jullundur, Ferozepore, Amritsar, and Peshawar; fair in Sialkot; and poor in Hissar and in parts of Dera Ismail Khan. Fodder is scarce in Hissar, Delhi, Shahpur, and Dera Ismail Khan; and sufficient elsewhere. Prices—especially of wheat—have risen in Umballa, Amritsar, Rawalpindi, and Dera Ismail Khan; fallen in Jullundur, Lahore, and Sialkot; and remained unchanged elsewhere. Wheat is selling from $17\frac{1}{16}$ to $22\frac{1}{2}$, gram $19\frac{1}{4}$ to $22\frac{1}{2}$, maize 28 to 33, barley 32, bulrush-millet 18 to 27, great millet 24, and rice $13\frac{1}{4}$ to $14\frac{1}{2}$ seers per rupee.

Central Provinces.—*For week ending 30th May.*—The weather has been generally clouded and hot with strong winds. Slight showers of rain fell in eleven districts. In Saugor the labouring classes complain of want of work. 1,297 and 2,208 persons are in receipt of relief in the Saugor and Damoh districts, respectively Insects are doing damage to sugarcane in the Multai tahsil of Betul. Preparation of land for the autumn sowings is in progress. Sowing has commenced in parts of Raipur and Sambalpur. Water is scarce in parts of Mandla, Chhindwara, Chanda Bhandara, and Nagpur. Fodder is scarce in parts of six districts and grain stocks are insufficient in the Hinganghat tahsil of Wardha. The price of wheat, gram, rice, and *juar* has fallen in some districts and has risen in others.

Burma.—*For week ending 27th May.*—In Lower Burma ploughing continues in Thongwa and Amherst and has commenced in Kyaukpyu, Pegu, Henzada, Myaungmya, and Tavoy. In Upper Burma reaping of dry weather

paddy has been completed in Thayetmyo and continues in Pakôkku, Bhamo, Katha, and the Upper Chindwin, and also in parts of Mandalay and Lower Chindwin; while sowing is finished in Minbu. Ploughing and sowing for wet weather paddy and miscellaneous crops are fairly general. Transplanting of early paddy progresses in Kyaukse, and the crop is being reaped in portions of Shwebo. Sowing of hill-side paddy continues for districts last reported. Ploughing for cotton, sessamum, and pulses continues in the Lower Chindwin and Meiktila. The condition of the standing crops is generally good in parts of Mandalay, Bhamo, Myitkyina, and Katha. Dry weather paddy has been considerably damaged by floods. The price of paddy has risen slightly in Rangoon, Amherst, Minbu, and Shwebo; and fallen a little in Prome, Thongwa, Myaungmya, and Thayetmyo; and largely in Thaton; elsewhere it is as before.

Assam.—*For week ending 30th May.*—The weather is seasonable. Sowing of early rice, planting of sugarcane, and plucking and manufacture of tea are in progress. Prospects of tea are generally good, but more sunshine is wanted in Sylhet. Land is being prepared for late rice. Reaping of low land transplanted rice is finished in Sylhet and the outturn is good. Prices—common rice—Silchar and Dhubri 16, Sylhet 21, Gauhati 17, Tezpur and Sibsagar 12, and Nowgong and Dibrugarh 14 seers per rupee.

Mysore and Coorg.—*For week ending 31st May.*—MYSORE: Rainfall—16 cents in the Civil and Military station and rain general and good in parts of the Kolar district. Prices have slightly risen in Kolar, Hassan, Chitaldrug, and Kadur and fallen in Tumkur. *Ragi (Eleusine coracana)* has been sown in Mysore, Hassan, and Kadur

COORG: Rainfall—88 cents. Ploughing for rice and *ragi* (*Eleusine coracana*) continues Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 31st May.*—BERAR: The weather is hot and cloudy. Ploughing of fields is in progress. Fodder is insufficient in all districts, except Wun. Scarcity of water prevails in parts of the Province. Prices are stationary.

HYDERABAD: Rainfall during the week 11 cents. The autumn sowings have commenced in certain talukas of the Lingsagar and Nalgundah districts. In other parts the ground is being made ready for sowings. The winter rice harvest continues in parts. Water scarcity continues in some talukas. Prices of grain are stationary. Prices—wheat 10, coarse rice 10½, and *jowari* 25¼ seers per current sicca rupee.

Central India.—*For week ending 31st May.*—Rain fell in parts of the Bhopal Agency during the week. Agricultural operations have been completed in Gwalior and Bundelkhand and are in progress elsewhere. Agricultural stock and pasturage are in good condition. Prices are above normal in Bundelkhand and normal elsewhere.

Rajputana.—*For week ending 31st May.*—Rainfall ranging from about half an inch to 6 cents fell at Bikanir, Bhurtpore, Kotah, Pertabgarh, and Haraoti. Agricultural operations are proceeding satisfactorily. Agricultural stock is in fair to good condition. Fodder scarcity prevails in the States reported last week. Prices are rising in two States; slightly rising in Ajmere and Ulwar; falling in Jeysulmere; and are steady elsewhere. Thity-five persons emigrated from Ajmere and 15 from Merwara during the week. The total emigration from Merwara to date numbers—4,431. The numbers employed on relief works were—Ajmere 448, Merwara 5,081, and Marwar 950. There are also 311 persons on ordinary works and 208 on gratuitous relief in Ajmere-Merwara. Prices—Ajmere 19, Beawar 19, and Marwar 15 seers per rupee.

Kashmir.—*For week ending 30th May.*—The weather is cloudy. Rain fell once during the week. Prospects of the spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

JAMMU PROVINCE.—*For week ending 31st May.*—No rain during the week. Prices are generally stationary. Wheat is selling from 16 to 19 and maize 25 to 29 seers per rupee. The spring crops are being threshed and housed. The condition of the standing crops is fair. Sowings for the autumn crops are still going on. Fodder is sufficient.

Nepal.—*For week ending 27th May.*—Rainfall—1·09 inch. The weather is showery. The sowing of upland rice and indian-corn has been completed. The wheat crop is doing well. Rice—9½ seers per rupee.

M. FINUCANE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

No. 21.

Extract from the Proceedings of the Government of India, Department of Revenue and Agriculture (Inventions and Designs),—dated Simla, the 30th May, 1899.

Read—

The appended Report by the Secretary under the Inventions and Designs Act V of 1888 on the working of his office during the calendar year 1898.

RESOLUTION.

Ordered that the report be published for general information in the supplement to the *Gazette of India,* and forwarded to the Legislative Department, and to all Local Governments and Administrations.

[True Extract.]

M. FINUCANE,

Offg. Secretary to the Government of India.

C

No. 1557 P.

FROM

S. C. HILL, ESQ.,

Offg. Secretary under the Inventions and Designs Act,

TO

THE SECRETARY TO THE GOVERNMENT OF INDIA,

DEPARTMENT OF REVENUE AND AGRICULTURE.

Dept. of Rev. & Agri.
Inventions & Designs.

Calcutta, the 18th May, 1899.

SIR,

I have the honour to submit, for the information of the Government of India, the following summary of proceedings in 1898 under the Inventions and Designs Act of 1888.

2. During the year under report Mr. A. T. Pringle continued to officiate in the office of Secretary under the Act until the 21st October 1898 when Mr. G. W. Forrest, the permanent incumbent, returned from furlough and resumed charge of his duties.

3. It is satisfactory to note that the applications for exclusive privileges showed a marked increase having numbered four hundred and eighty-one as against four hundred and fifty-one in the previous year and four hundred and sixty in 1896. Of these one hundred and seventy-one related to inventions by persons resident in British India (forty-five being inventions by natives of the country). There was an increase of two in the class last named and a fair increase also in the number of applications received from Europe, Australia and America—three hundred and ten as against two hundred and ninety-four in the previous year. Thirty-one related to bicycles and similar vehicles, twenty-eight to railways, nineteen to linotype machinery, sixteen to the treatment of fibres, as many to lamps and burners, eleven to punkahs, and ten to the tea-trade.

4. Eighty-three applications of 1897 were pending on the first day of the year. Of these five were abandoned, as many rejected, and leave to file specifications was accorded in the case of the remainder.

With regard to the applications of the year under report, leave was granted in three hundred and seventy-four instances, thirteen applications were rejected, twelve were treated as abandoned, and eighty-two—of which twenty-five were in the hands of experts—were pending on the 31st December 1898.

5. The references to paid and departmental experts fell from ninety-four in 1897 to sixty-six in the year under report. Fees were required in ten cases.

6. Four hundred and nine specifications, or seventeen more than in the previous year, were filed.

7. Three hundred and eight exclusive privileges were kept alive by payment of the prescribed fees as against two hundred and fifty-one in 1897, and two hundred and thirty-six in 1896.

8. Two hundred and fifty-eight privileges ceased during the year.

9. The applications for registering copyright in designs declined from nineteen to sixteen. Of these eight were rejected, one was abandoned and one was pending at the end of the year.

10. The gross revenue rose from R31,032 to R36,303. This sum was principally derived from fees paid for the continuance of privileges and for filing specifications.

11. During the year under report, eleven models were deposited in the Museum.

12. The usual statistics are appended.

I have the honour to be,

SIR,

Your most obedient Servant,

S. C. HILL,

Offg. Secretary under the Inventions and Designs Act.

Statement showing the proceedings under the Inventions and Designs Act of 1888 during the year 1898 as compared with the years 1897 and 1896.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 1st June 1899.

NOTIFICATIONS.

No. 1690 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 27th May 1899:—

No. 192 of 1899.—Guglielmo Marconi and the Wireless Telegraph and Signal company, limited, electricians, both of 28 Mark lane, in the city of London. *Improvements in apparatus employed in wireless telegraphy.*

No. 193 of 1899.—John James Haslam, builder, of Avondale near the city of Auckland, in the provincial district of Auckland, colony of New Zealand. *Improvements in dumping punts or vessels.*

No. 194 of 1899.—Ludwig Weber, manager of Mercantile Mission branch of Mangalore, South Canara. *Improvements in weather-proof tiles.*

No. 195 of 1899.—Dadabhoy Pestonji Mistry, merchant and commission agent, Etawah, N.-W. P. *An improved feeding device for cotton gins.*

No. 196 of 1899.—Weygang's Oil Products company, limited, manufacturers, of 5 St. Peter's Alley, Cornhill, in the city of London. *The manufacture of siccative oil mostly from petroleum.*

No. 197 of 1899.—Carl Jost, engineer, and Alfred Pell, chemist, both of Bombay. *Purifying liquids principally for filtering water.*

No. 198 of 1899.—Charles William Curtis, explosive manufacturer, of 74 Lombard street, in the city of London, and Leyshon Davies, joint manager of Kames Gunpowder mills, Kyles, of Bute, Argyllshire, Scotland. *An improved explosive.*

No. 199 of 1899.—Edward Wythe Smith, electrical engineer, of 66 College street, Chelsea, London *Improvements in electric telegraphs.*

No. 200 of 1899.—Emily Florence Lambert, spinster, of 2 Government Place, Calcutta. *A wind motor, to be called " E. P. Lambert's horizontal wind motor."*

No. 201 of 1899.—Richard Joseph Ives, civil and mechanical engineer, residing at Temperance Hall, Colaba, in the city of Bombay. *A sun-shade and rain-protector for bicycles or any other kind of machine of this class.*

No. 1691 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection from 11 A. M. to 4 P. M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 175 of 1898.—James Shearer, works manager, of Kinnoul cottage, Maryfield, Dundee. *A method of improving the colour of raw jute fibre.* (Specification filed 22 May 1899.)

No. 178 of 1898.—Charles O'Brien, bleacher, of 22 Erskine street, and James Shearer, works manager, of Kinnoul cottage, Maryfield, both of Dundee. *A process for improving the colour of jute fibre.* (Specification filed 22 May 1899.)

No. 290 of 1898.—Isidore Lambert, landlord, of 14 Rue des Pyramides, Paris. *Improvements in sticks for sealing wax and the like.* (Specification filed 4 March 1899.)

No. 350 of 1898.—Maurice Mary Joseph Owen O'Conor, captain in the Third Connaught Rangers, of Inisfale island, Drumshambo, in the county of Leitrim, Ireland. *Improvements in means for finding and raising sunken ships or other objects.* (Specification filed 10 March 1899.)

No. 397 of 1898.—Edward Candish Millard, tea taster, of 27 Martin's lane, Cannon street, London. *Improvements in tea kettles and the like.* (Specification filed 22 May 1899.)

No. 453 of 1898.—William Robert Browne, mechanical engineer, gun carriage factory, Colaba, Bombay. *Improvements in oil vaporisers for oil engines and other purposes.* (Specification filed 22 May 1899.)

No. 4 of 1899.—Jehangir F. Seervai, licentiate of mechanical engineering, of Sleater road, Bombay. *An improved self-closing non-percussion water tap.* (Specification filed 2 May 1899.)

No. 52 of 1899.—Henry Cruse, engineer, of 64 Barton Arcade, Manchester, England. *Improvements in the method of, and apparatus for, generating steam.* (Specification filed 10 May 1899.)

No. 89 of 1899.—Joseph Morewood Dowsett, surveyor, of Warple road, Wimbledon, in the county of Surrey, England. *Improvements in the fastenings of fish-plates of railways and tramways.* (Specification filed 23 May 1899.)

No. 1692 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 59 of 1888.—The Cassel Gold Extracting company, limited. *Improvements in extracting gold and silver from ores or other compounds.* (From 12 July 1899 to 12 July 1900.)

No. 34 of 1889.—George Ashworth and Elijah Ashworth. *Improvements in the method of, and in means for, attaching the clothing to carding engine flats.* (From 27 June 1899 to 27 June 1900.)

No. 175 of 1889.—Samuel Telford Dutton. *Improvements in locking and unlocking points and signals, and detecting the position and movement of points on railways, which improvements are also applicable to the locking and unlocking of turntables, gates and other structures and things appertaining to railways.* (From 27 January 1899 to 27 January 1901.)

No. 190 of 1894.—Samuel Telford Dutton. *Improvements in interlocking pull-over levers on railways.* (From 29 May 1899 to 29 May 1900.)

No. 259 of 1894.—Ernest Harry Archer. *Improvements in collapsible or other metal boxes, cases or chests for containing tea or the like.* (From 20 June 1899 to 20 June 1900.)

No. 12 of 1895.—Jean Reuse. *Improvements in machines for the manufacture of cigars.* (From 26 June 1899 to 26 June 1900.)

No. 107 of 1895.—Alfred Hitchon. *Improvements in and relating to ring spinning machines.* (From 11 June 1899 to 11 June 1900.)

No. 1693 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorising others so to do, has ceased:—

No. 187 of 1894.—Beaumont Dixie Crampton Wood. *A portable hand shearing machine.* (Specification filed 25 February 1895.)

No. 224 of 1894.—James Walker. *Improvements in steam boilers and boiler furnaces.* (Specification filed 23 February 1895.)

No. 261 of 1894.—Edward A. Cardinal and James Love. *An improved cultivator.* (Specification filed 27 February 1895.)

No. 302 of 1894.—Alfred Horatio Bell Sharpe. *Improvements in machinery or apparatus for drying leaves of the tea plant, the same being applicable for drying other analogous substances.* (Specification filed 23 February 1895.)

No. 312 of 1894.—Rowland Matthews. *Improvements in the manufacture of white lead.* (Specification filed 23 February 1895.)

No. 321 of 1894.—Robert Bell. *Improvements in couplings for railway and other vehicles.* (Specification filed 26 February 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 138 of 1893.—George Bell MacIntosh. *Improvements in the feed apparatus and adaptation of crushing machines for salt, coal or other substances capable of being reduced to a powdery state.* (Specification filed 24 February 1894.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,

Offg. Secy. under the Inventions and Designs Act, 1888.

GEORGE WATT,
Reporter on Economic Products to the Government of India.

CALCUTTA,
The 6th September, 1897.

* The other Fasciculi of these works are out of stock, and complete copies cannot be supplied.

NOTICE.

It is notified, for information of Military and Civil officers, that services of Shams-ul-Ulama, Shaikh Mahmud Gilani, Persian Instructor, and Mr. R. F. Azoo, Arabic Instructor, have been specially retained by Government for giving instruction to candidates intending to present themselves for examinations in Arabic and Persian before the Board of Examiners. Gentlemen requiring their tuition should communicate with them at the office of the Board of Examiners.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8*; per eight-ounce tin, *R5*; per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the undernoted rates: per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنكونا فبري فيوج يعني تپ بهگانے والي سنكونا *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1898, the price of this Quinine will be as follows:—

1-pound tin,	R17,	or, post-free,	R17-12.
½ „	R8-8,	„	R9-0.
¼ „	R4-4,	„	R4-12.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৮ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য লইবে, যথা—

১ এক পোণ্ড টিন	১৭,	বা ডাকমাশুল বিনা	১৭৸০
॥ আধ „ „	৮॥০	„	৯,
। শিকি „ „	৪।০	„	৪৸০

পরিক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনাডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials,	R2-6.
„	II.	Masonry,	R1-4.
„	III.	Carpentry (1889),	R1-4.
„	IV.	Earthwork (1892),	R1-4.
„	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings. (In the Press.)	
„	VII.	Bridges,	R4-4.
„	VIII.	Roads,	R1-8.
„	IX.	Railways (1891),	R1-4.
„	X.	Irrigation Works.	(Under revision.)

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7.

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

* Date of Edition on sale.

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition, with Curve Table). R3.
XIII. **Drawing** (by Lieut. R. Pulford, R.E.). † R8.
XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.
XIV. **Simple Applied Mechanics, Parts I and II in one** (in the Press)
Simple Applied Mechanics, Part II (1st edition). 8a.
XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.
VI. **Earthwork Estimating,** with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. Say R1.
XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat

MISCELLANEOUS.

ENGINEERING WORKS.

Shelly's Workshop appliances. R1-8.
Curve Tables, complete, for laying any curve 4a.
Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.
Notes on Chemistry of Building Materials. R2-0.
Tate's Mechanism. R1.
Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunnya Lal. R2-8.
O'Callaghan's Earthwork Tables for India, in one large sheet, 12a.; mounted on cloth and bound. R1-12.
Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12a.
Tyndall's Hand-Book of Specifications. R5.
The Indian Engineer's Pocket Book. (In the Press.)
Wooden Bridges and Designs. By Rai Kunnya Lal. (In the Press.)
Blasting under Water (2nd edition). 10a.
Waugh's Instructions for Topographical Surveying R1.
Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.
Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-8.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R2-0.
Banerman's Descriptive Mineralogy. R3.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.
Boileau's Tables of Log sin² ½ P (for computing time). 4a.
Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.
Cape's Geometry. R1-4.
Cape's Mechanics 8a.
Todhunter's Plane Trigonometry. R2-12.
Todhunter's Differential Calculus. R2-8.
Military Topography. 8a.

† Originally published at R15, reduced to R8.

* Calendar for 1892 includes question papers for entrance to Engineer and Upper Subordinate Classes only.
† These include question papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly, Nos. 1 to 5), bound R2.

Quarterly, Nos. 1, 2, 3, 4, and 5,	8a. each, exclusive of packing and postage
Vol. II, Quarterly, Nos. 6 and 7,	
,, VI, ,, Nos. 24 and 25,	
,, VII, ,, Nos. 26, 27, 28, and 29,	
Extra No., April 1870.	

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI 8a. each, exclusive of packing and postage.

Quarterly Number 41A of Vol. X. 8a. each, exclusive of packing and postage.

Cloth covers for Volumes of 1st and 2nd Series, at 4a each.

(THIRD SERIES).

Quarterly Nos. 13 and 15, at 8a. each, exclusive of packing and postage.

Index to Professional Papers and loose Papers. 1st and 2nd Series, at 2a. each, and loose papers, 3rd Series, 3a. each, exclusive of packing and postage.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depot. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of admission to the different classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I. S. C.,*
Principal, Thomason Civil Engineering College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete series *including postage*. R33

	Without postage. R a. p.	With postage. R a. p.
For the Calcutta Series . . .	10 0 0	12 [illegible]
,, each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 [illegible]
,, a part of the Calcutta Series purchased separately, *inclusive of postage in India*	..	2 0 [illegible]
,, a part of each of the Madras Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	..	1 [illegible]

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. R a. p.	For mofussil R a. p
For the Calcutta Series; per copy . . .	0 8 9	0 10 [illegible]
,, each of the Madras, Bombay, and Allahabad Series; per copy	0 5 3	0 5 [illegible]
,, the Calcutta Series. For the year . .	7 2 0	[illegible]
,, each of the Madras, Bombay, and Allahabad Series. For the year . . .	4 4 0	4 11

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay

The Curator of Government Books, North-Western Provinces and Oudh.

The Officer in charge, Bengal Secretariat Book Depot.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
,, three issues . . .	,, 55	,, 36	,, 24
,, six ,, . . .	,, 100	,, 68	,, 45
,, nine ,, . . .	,, 145	,, 96	,, 64
,, twelve ,, . . .	,, 180	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. R a. p.	With postage. R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 3

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer. Bengal Secretariat, Writers Buildings. Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available

---

METEOROLOGICAL PUBLICATIONS FOR SALE.

At the Meteorological Office, No. 5, Russell Street, Calcutta, at the prices specified below:—

Rainfall Map of India in two sheets, scale 64 miles to one inch, showing the annual distribution of rainfall in India (in colours). R3.

Ditto. Urdu version. Royal 8vo., stiff boards. 6a.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III, & IV of the Dictionary are ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo pages. Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L; and Volume V contains the latter half of L to end of O; Vol. VI (which consists of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume has been issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index is practically a glossary of the vernacular and European names of the plants, animals, and minerals of India, and, as such, is a work of reference, which, it is hoped, will prove of considerable value.

Index to Do. do. 8vo. R2 (4a.)

The above is out of stock.

Technical Art Series published up to 1896, together with their explanatory Text—

- 1886-87, 6 Plates with Text. R1-8 a set (4a.)

The 8th June, 1899.

No. 1526-*I.A.*—The services of Mr. P. R. Cadell, of the Indian Civil Service, Bombay Presidency, are replaced at the disposal of the Home Department, with effect from the date on which he relinquished charge of his plague duties in the Civil and Military Station of Bangalore.

No. 1530-*I.A.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to apply the provisions of the Indian Post Office Act, 1898 (VI of 1898), to the Civil and Military Station of Bangalore so far as they may be suitable :

Provided that references to "British India," "the Local Government" and "a Secretary to the Local Government" shall be construed as referring to the said Civil and Military Station, the Resident in Mysore and the First Assistant to the Resident in Mysore, respectively :

Provided, further, that for the purpose of facilitating the application of the provisions of the enactment hereby applied, any Court in the said Civil and Military Station may construe them with such alterations, not affecting the substance, as may be necessary or proper to adapt them to the matter before the Court.

The Notification by the Government of India in the Foreign Department, No. 2976-I., dated the 9th September, 1895, is hereby cancelled.

The 9th June, 1899.

No. 931-*G.*—It is hereby notified, for general information, that the Netherlands Consulate at

Calcutta has been raised by the Government of the Netherlands to the rank of a Consulate General, and that, with the sanction of Her Majesty's Government, the Governor General in Council is pleased to recognize the provisional appointment of Mr. G. D. Advocaat as Consul General.

No. 1542-*I B.*—In exercise of the power conferred by section 17, sub-section (*1*), clause (*b*), of the Cantonments Act, 1889 (XIII of 1889), as applied to the Cantonment of Mhow by the Notification of the Government of India in the Foreign Department, No. 1375-I., dated the 25th April, 1890, and of all other powers enabling him in this behalf, the Governor General in Council is pleased to direct that the payment of the octroi duties leviable in the said cantonment may be commuted in accordance with the following rule, namely:

Any Military or Civil Officer of Government or of the Railway residing in the Cantonment of Mhow whose pay is not less than Rs. 200 a month, may commute the octroi duties payable on parcels, brought by post or railway, which are intended only for his *bonâ fide* personal use or for that of his family residing with him, for an annual payment on the following scale:

	Rs.
General Officers and Civil Officers whose pay exceeds Rs. 1,500 a month	15 a year.
Colonels and Lieutenant-Colonels and Civil Officers whose pay exceeds Rs. 900 and does not exceed Rs. 1,500 a month	12 ,,
Majors and Civil Officers whose pay exceeds Rs. 500 and does not exceed Rs. 900 a month	10 ,,
Captains and Civil Officers whose pay exceeds Rs. 300 and does not exceed Rs. 500 a month	8 ,,
Lieutenants and 2nd-Lieutenants and Civil Officers whose pay exceeds Rs. 200 but does not exceed Rs. 300 a month	6 ,,

No. 934-*G.*—The following substantive promotions and appointments are made in and to the graded list of the Political Department:

Captain A. McConaghey, Indian Staff Corps, a Political Assistant of the 3rd class, to be a Political Assistant of the 2nd class, with effect from the 26th March, 1899.

[The appointment of Mr. R. B. Hughes, of the Indian Civil Service, to be a Political Assistant of the 2nd class, in Notification No. 495-G., dated the 31st March, 1899, is hereby cancelled.]

Consequent on the appointment of Mr. J. A. Crawford, of the Indian Civil Service, a Resident of the 2nd class and Revenue and Judicial Commissioner in Baluchistan, to be Commissioner of the Hyderabad Assigned Districts, with effect from the 4th April, 1899—

Colonel H. A. Vincent, Indian Staff Corps, a temporary Resident of the 2nd class and Resident in Bikaner, to be a Resident of the 2nd class.

Mr. A. F. deLaessöe, C.M.G., C.I.E., a Political Agent of the 3rd class, to be a Political Agent of the 2nd class.

Captain J. Ramsay, C.I.E., Indian Staff Corps, a Political Agent of the 4th class, to be a Political Agent of the 3rd class.

Captain M. A. Tighe, Indian Staff Corps, a Political Assistant of the 1st class, to be a Political Agent of the 4th class.

Captain P. T. A. Spence, Indian Staff Corps, a Political Assistant of the 2nd class, to be a Political Assistant of the 1st class.

Captain H. T. Pritchard, Indian Staff Corps, a Political Assistant of the 3rd class, to be a Political Assistant of the 2nd class.

Consequent on the death of Lieutenant-Colonel A. M. Muir, Indian Staff Corps, a Political Agent of the 2nd class, and with effect from the 16th May, 1899—

Major P. J. Melvill, Indian Staff Corps, a Political Agent of the 3rd class, to be a Political Agent of the 2nd class.

Major R. H. Jennings, Royal Engineers, a Political Agent of the 4th class, to be a Political Agent of the 3rd class.

Mr. W. E. Jardine, of the Indian Civil Service, a Political Assistant of the 1st class, to be a Political Agent of the 4th class.

Captain B. E. M. Gurdon, D.S.O., Indian Staff Corps, a Political Assistant of the 2nd class, to be a Political Assistant of the 1st class.

Captain A. D'A. G. Bannerman, Indian Staff Corps, a Political Assistant of the 3rd class (on furlough), to be a Political Assistant of the 2nd class.

These arrangements are made without prejudice to superior acting appointments held by any of the above-mentioned officers on the dates specified.

No. 935-*G.*—The following changes are made in the graded list of the Political Department:

Consequent on the reversion of Major P. J. Melvill, Indian Staff Corps, from officiating Resident of the 2nd class, and his appointment (hereby ordered) to officiate as a Political Agent of the 2nd class, and with effect from the 1st April, 1899—

Captain A. F. Pinhey, Indian Staff Corps, an officiating Political Agent of the 2nd class, reverts to his substantive grade of Political Agent of the 3rd class.

Mr. W. E. Jardine, of the Indian Civil Service, an officiating Political Agent of the 3rd class, reverts to officiating Political Agent of the 4th class.

Mr. R. B. Hughes, of the Indian Civil Service, an officiating Political Agent of the 4th class, reverts to officiating Political Assistant of the 1st class.

COMPENSATION.

Simla, the 5th June, 1899.

No. 2556-*Ex.*

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read—

Resolution by the Government of India, Finance and Commerce Department, No. 4847-Ex, dated the 5th November 1898, promulgating orders as to what are the appointments by virtue of holding which an officer, *appointed in India*, not being a statutory native, becomes entitled to Exchange Compensation Allowance.

Despatch to Her Majesty's Secretary of State for India, No. 8, dated the 5th January 1899.

Despatch from Her Majesty's Secretary of State for India, No. 79 (Financial), dated the 27th April 1899.

RESOLUTION.—Orders were reserved in the Resolution of 5th November 1898 in regard to the eligibility for Exchange Compensation Allowance of the following officers and appointments recruited in India:

(1) European and Eurasian Engineers appointed from the Indian Colleges before recruitment from those Colleges was limited to statutory natives.

(2) European and Eurasian Engineers appointed direct before recruitment was limited to officers sent out from England and officers appointed from the Indian Colleges.

This category includes a few officers appointed after passing the direct examination of the Thomason College.

(3) Non-military Upper Subordinate Establishment of Sub-Engineers, Supervisors and Overseers employed in the Public Works Department and in the Military Works Department.

NOTE.—This category includes pensionable subordinates of the same class in the Railway Branch, not belonging to any of the classes of Railway *employés* referred to in paragraph 4 of the Resolution of 5th November 1898.

(4) Subordinate Account establishments of the Public Works and Military Departments and officers promoted therefrom to the superior branch of the same establishments.

(5) Examinership of Marine Accounts.

(6) Civilian overseers at the Remount Depôts.

(7) Clerical and ministerial appointments in Government offices other than those which are admitted in paragraphs 36, 37 and 38 of the Resolution of 5th November 1898.

2. Under instructions from the Secretary of State, His Excellency the Governor General in Council is now pleased to pass the following orders in regard to each of the classes of officers and appointments above specified:

(*a*) Engineer officers of the classes specified are eligible and may be admitted to Exchange Compensation Allowance if not personally debarred as statutory natives of India.

(*b*) It is the declared policy of the Government that the non-military Upper Subordinate establishments referred to in clause (3) of paragraph 1 should be filled with persons born and brought up in India. Exchange Compensation Allowance will not, therefore, be issued to persons appointed to that establishment after 31st March 1897. The allowance may, however, be granted, as a special concession, to those who were members of it on that date, and are personally qualified.

(*c*) The Subordinate Account establishments of the Public Works and Military Departments are not establishments in which a proportion of Europeans is indispensable and members of these establishments are therefore not eligible for Exchange Compensation Allowance.

The Superior Branches of these establishments are officered by systems intended to secure a considerable European element, and those who have not been admitted through such channels cannot be held to have been appointed as Europeans. Officers promoted from the subordinate grades are therefore not eligible. As a special concession however the few officers in the Public Works Accounts Department who were promoted to the Superior Establishment before 1st January 1893 may be treated as eligible if personally qualified.

(*d*) The Examinership of Marine Accounts cannot be classed as an appointment which should in itself carry Exchange Compensation Allowance. But an officer selected for the appointment from the Royal Navy or Royal Indian Marine or from the eligible grades ot any of the Accounts Departments will be eligible if otherwise qualified.

(*e*) The duties of civilian overseers at the Remount Depôts are not of such a character as to require such European qualifications as cannot be found among statutory natives of India. They cannot, therefore, be regarded as eligible for Exchange Compensation Allowance.

(*f*) The duties of clerical and ministerial appointments generally are such as can be discharged by native agency, pure and statutory, and no claim can be recognised on behalf of the few Europeans, not being statutory natives, in clerical and ministerial employ who are not eligible under paragraphs 36, 37 and 38 of the Resolution of 5th November 1898.

3. It should be clearly understood that these orders merely supplement those contained in the Resolution of 5th November 1898 and are subject to the condition laid down in the latter part of paragraph 1 thereof that they do not render a person appointed in India eligible for the allowance, if he is a *native of India* within the definition of that term in Statute 33 Vict., cap. 3, section 6.

ORDER.—Ordered that the foregoing Resolution be published in the *Gazette of India*, and that it be circulated to all Local Governments and Administrations; to Departments of the Government of India; to the Private Secretary to His Excellency the Viceroy; to Heads of Departments subordinate to the Financial Department; to the Comptroller and Auditor General; and to all Accountant Generals and the Comptrollers.

STATISTICS AND COMMERCE.

CUSTOMS.

The 9th June, 1899.

No. 2635-*S.R.*—In exercise of the power conferred by sub-section (2), of section 8-A of the Indian Tariff Act, 1894 (VIII of 1894 as amended by Acts III of 1896 and XIV of 1899), and in supersession of the rates of additional duty on sugar mentioned against Belgium in the notification in the Finance and Commerce Department, No. 1327-S.R., dated the 20th March 1899, the Governor General in Council is pleased to declare that the rates shall be reduced as follows, with effect from the 1st of June 1899:

No. 629.—Senior Assistant Surgeon and Honorary Lieutenant James Kelly to be Senior Assistant Surgeon with the honorary rank of Captain, subject to Her Majesty's approval;

Supernumerary Senior Assistant Surgeon and Honorary Lieutenant Timothy Baptist is absorbed in his rank;

Second-class Assistant Surgeon Charles Nathaniel Gregg to be first-class Assistant Surgeon;

Third-class Assistant Surgeon Thomas Henderson Brooks to be second-class Assistant Surgeon,—

with effect from the 12th March 1899, consequent on the retirement of Senior Assistant Surgeon and Honorary Major R. Johnson.

Madras.

No. 630.—The undermentioned military pupils having passed their final examination are admitted into the service as third-class Military Assistant Surgeons, with effect from the 31st March 1899:

William Hope Meneaud.

Cecil Beaumont Green.

Herbert Charles Jackson.

Archibald Albert Freud-Hart.

Percival Thomas Duckworth.

George Edwin Duckworth.

George Maurice Callaghan.

Christian Frederick Theodore Cartner.

John Francis deRozario.

Anthony Walter Gernon.

James Alfred Lemerle.

NATIVE ARMY.

No. 631.—*10th (Jat) Regiment of Bengal Infantry*—

Subadar Buta Singh to be Subadar-Major and Jemadar Mangal to be Subadar, *vice* Nauratan Singh, *Sardar Bahadur*, transferred to the pension establishment, with effect from the 14th April 1899.

No. 632.—*24th (Punjab) Regiment of Bengal Infantry*—

Jemadar Dewa Singh (I) to be Subadar and Drill-Havildar Diwan Singh to be Jemadar, *vice* Mula Singh, transferred to the pension establishment, with effect from the 9th April 1899.

Pay-Havildar Ganesha Singh to be Jemadar, *vice* Uttam Singh, transferred to the pension establishment, with effect from the 9th April 1899.

No. 633.—*34th (Punjab) Regiment of Bengal Infantry (Pioneers)*—

Color-Havildar Buta Singh to be Jemadar, *vice* Badan Singh, transferred to the pension establishment, with effect from the 16th May 1899.

No. 634.—*16th Regiment of Madras Infantry*—

Havildar-Major Shaikh Salar to be Jemadar, *vice* Zynulabdin, deceased, with effect from the 4th May 1899.

No. 635.—*1st Regiment of Bombay Infantry (Grenadiers)*—

Jemadar Balaji Mule to be Subadar and Havildar Laxuman Satam to be Jemadar, *vice* Sanbhaji Baidar, transferred to the pension establishment, with effect from the 1st May 1899.

No. 636.—*3rd Regiment of Bombay (Light) Infantry*—

Jemadar Gurdat Singh to be Subadar and Havildar Madu Powar to be Jemadar, *vice* Shaik Hussain, transferred to the pension establishment, with effect from the 1st November 1898.

No. 637.—*13th Regiment of Bombay Infantry*—

Havildar Assa Ram to be Jemadar, *vice* Muhammad Khan, seconded for service with the British East African Contingent, with effect from the 20th September 1898.

No. 638.—*24th (Baluchistan; Duchess of Connaught's Own) Regiment of Bombay Infantry*—

Jemadars Walai Khan and Tota Singh to be Subadars, to complete establishment, with effect from the 1st April 1899.

No. 640.—*2nd Regiment of Central India Horse*—

Jemadar Jawand Singh to be Ressaidar and Kot-Dafadar Sher Singh to be Jemadar, *vice* Sant Singh, resigned his commission, with effect from the 1st April 1899.

PUNJAB FRONTIER FORCE.

No. 641.—*6th Regiment of Punjab Infantry*—

Havildar Bishn Singh to be Jemadar, *vice* Sant Singh, transferred to the pension establishment, with effect from the 16th February 1899.

RETIREMENTS.

No. 642.—Lieutenant-Colonel Charles Thomas Peters, M.B., Indian Medical Service, Bombay, Civil Surgeon, Belgaum, Deputy Sanitary Commissioner, Southern Registration Districts, is permitted to retire from the service, with effect from the 24th June 1899, subject to Her Majesty's approval.

No. 643.—Lieutenant Maitland FitzRoy Kindersley, Indian Staff Corps, is permitted to resign the service, with effect from the 1st May 1899, subject to Her Majesty's approval.

VOLUNTEER CORPS.

APPOINTMENTS, PROMOTIONS, RETIREMENTS AND RESIGNATIONS.

No. 644.—*Central Bengal Light Horse*—

Major Charles Henry Pope, V.D., resigns his commission, and is granted the honorary rank of Lieutenant-Colonel on retirement, with permission to retain his rank and wear the uniform of the Corps.

(G. G. O. No. 40, dated the 13th January 1899, is hereby cancelled.)

No. 645.—*Punjab Light Horse*—

Captain Sidney Maddock Robinson resigns his commission.

Lieutenant Henry Thomas Pease to be Captain, *vice* Robinson, resigned.

No. 646.—*Assam Valley Light Horse*—

Lieutenant Richard Adam Fisher to be Captain, with effect from the 11th September 1898, *vice* Lloyd, promoted.

No. 647.—*Northern Bengal Mounted Rifles*—

Archdale Earle, Esquire, to be Captain, *vice* Thomas, resigned.

No. 648.—*1st Punjab Volunteer Rifles*—

Captain Frederick James Raynor to be Honorary Major.

Second-Lieutenant Lancelot Colin Glascock resigns his commission.

No. 649.—*Bangalore Rifle Volunteers*—

The appointments of Second-Lieutenants Farmer, Parkin, Roberts, and Gay, notified in G.G.O. No. 143 of 1899, have retrospective effect from the 27th January 1899, and they will take rank in the order named immediately above Second-Lieutenant Tate.

No. 650.—*Naini Tal Volunteer Rifles*—

Captain Charles Joseph Alexander Hoskins resigns his commission.

No. 651.—*Rangoon Volunteer Rifles*—

Captain William Touch, supernumerary list, resigns his commission.

Second-Lieutenant Thomas Roberts, Unattached List, resigns his commission.

No. 652.—*Nilgiri Volunteer Rifles*—

Charles Herbert Mounsey, Esquire, I.C.S., to be Captain, *vice* Winn, transferred to the supernumerary list.

No. 653.—*North Western Railway Volunteer Rifles*—

The following appointments are made, with effect from the 13th February 1899:

Walter Richard Pearce, Gentleman, to be Second-Lieutenant, *vice* Henderson, promoted.

Fred Hudson Miles, Gentleman, to be Second-Lieutenant, *vice* Millard, promoted.

Ernest Bruce Beatson, Gentleman, to be Second-Lieutenant, *vice* Stapleton, promoted.

No. 654.—*Rohilkhand Volunteer Rifles*—

Lieutenant Frederick Robert Harrington Eustace, Royal Engineers, to be Second-Lieutenant, *vice* Buchanan, promoted.

No. 655.—*South Andaman Volunteer Rifles*—

Lieutenant Henry Graham Tayler to be Captain, with effect from the 10th March 1899.

Second-Lieutenant Reginald Fendal Lowis to be Lieutenant, with effect from the 10th March 1899.

No. 656.—*Chittagong Volunteer Rifles*—

Thomas Evered Miller, and William Irvine Kelland Howard, Gentlemen, to be Second-Lieutenants, with effect from the 25th April 1899, on augmentation.

No. 657.—*Southern Mahratta Railway Volunteer Rifles*—

George Edward Grabham, Gentleman, to be Second-Lieutenant, *vice* Betham, resigned.

MARINE DEPARTMENT.

RETIREMENTS.

No. 21.—Lieutenant W. G. Windham, Royal Indian Marine, is permitted by the Secretary of State for India to retire temporarily from the service, with effect from the 17th June 1899.

P. J. MAITLAND, *Major-General,*
Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 3rd June, 1899.

No. 243.—Mr. W. Chadwick, Executive Engineer, 1st Grade, State Railways, is appointed to officiate as Engineer-in-Chief of the Indus Bridge Works and of the British Section of the Shadipalli-Balotra Railway, with the rank of Superintendent of Works, during the absence of Mr. E. I. Shadbolt on privilege leave, or until further orders.

The 6th June, 1899.

No. 244.—It is hereby notified for general information that Her Majesty's Secretary of State for India in Council has, in Despatch No. 39 Railway, dated the 27th April 1899, accorded sanction to an estimate amounting to Rs. 14,21,624 of the cost of constructing a branch of the Bengal-Nagpur Railway from Khargpur junction to Midnapore, a distance of 8 miles.

2. This branch will form the first section of the proposed extension of the Bengal-Nagpur Railway towards the Jherriah coal fields.

The 7th June, 1899.

No. 246.—The services of Lieutenant E. T. Rich, R.E., Assistant Engineer, 2nd Grade, State Railways, which were lent to the Burma Railways Company, Limited, are placed at the disposal of the Government of India in the Department of Revenue and Agriculture.

F. R. UPCOTT,

Secretary to the Government of India.

TELEGRAPHS.

The 9th June, 1899.

No. 248.—The following officiating and temporary promotions are made in the Superior Establishment of the Indian Telegraph Department, with effect from the dates specified and until further orders :

Name.	From	To	Date.
Mr. E. J. B. Hudson	Assistant Superintendent, Class VI, 1st Grade.	Superintendent, Class V, 2nd Grade, *temporary*.	26th April 1899.
Mr. W. Sutherland	Assistant Superintendent, Class VI, 2nd Grade.	Superintendent, Class V, 2nd Grade, *officiating*.	25th April 1899.

The 8th June, 1899.

No. 247.—The following is published for general information:

No. 512 C. W. I., dated Simla, the 2nd June, 1899.

RESOLUTION—By the Government of India, Public Works Department.

Review of the Revenue Report of Irrigation Works in Rajputana for 1897-98.

Read—

Letter No. 809 S., dated the 24th March 1899, from the Secretary to the Agent to the Governor General and Chief Commissioner, Rajputana, Public Works Department, forwarding the Revenue Report of Irrigation Works in Rajputana for the year 1897-98.

OBSERVATIONS.—The capital expenditure during the past financial year was incurred entirely on old and small new tanks in the Todgarh Sub-Collectorate of the Merwara District and amounted to Rs. 2,939, including indirect charges, as compared with Rs. 8,478 in 1896-97.

The total outlay up to the end of the year amounted to Rs. 24,55,222.

2. The results obtained from these works in 1897-98 and in the four previous years are shown in the following statement:

YEAR.		Area irrigated and protected.	Gross revenue collected.	Working expenses, direct and indirect.	Net revenue.	Percentage of net revenue on capital outlay to end of year.
		Acres.	Rs.	Rs.	Rs.	
1893-94	...	34,244	1,41,926	45,710	96,216	4·07
1894-95	...	33,920	1,34,769	40,055	94,714	3·91
1895-96	...	31,129	1,32,621	38,957	93,664	3·83
1896-97	...	36,703	1,33,283	48,508	84,775	3·45
Total	...	135,996	5,42,599	1,73,230	3,69,369	...
Average	...	33,999	1,35,650	43,308	92,342	3·81
1897-98	...	38,321	1,28,400	53,342	75,058	3·06

It appears from these figures that the net revenue has been steadily declining since 1893-94, and though the area of irrigation in 1897-98 was 38,321 acres as compared with the average of 33,999 acres for the previous four years, there was not a corresponding increase in the gross revenue.

Of the total area irrigated, 12,699 acres were under *kharif* and 13,911 acres under *rabi* crops.

The average water-revenue assessed per acre was Rs. 3·49 as compared with Rs. 3·59 in 1896-97.

3. The working expenses which were 23 per cent. in excess of the average of the last four years amounted to 41·5 per cent. of the gross revenue realized during the year. The cost of maintenance of these works shows a tendency to increase which has not been very fully explained.

4. The value of the crops irrigated is estimated at Rs. 6,60,843 against Rs. 10,58,326 in 1896-97, but the high value in the latter year was abnormal and was due to the unusually high prices of grain which prevailed during the famine.

5. Measurements taken to test the influence of the tanks on the spring level of wells show that out of a total of 484 wells measured, 269 were benefited by the tanks, the remainder being unaffected. Further details in regard to these observations are, however, required before any useful deductions can be drawn from them.

ORDER.—Ordered that a copy of this review be forwarded to the Agent to the Governor General and Chief Commissioner, Rajputana, for information.

Also, that a copy of the review and of the report be forwarded to the Revenue and Agricultural Department and to the Local Governments in the Public Works Department noted on the margin, for information.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, the Punjab and Burma.

Ordered, further, that this review be published in the *Gazette of India*, and that copies of this review and of the report be forwarded to Her Majesty's Secretary of State for India for information.

T. HIGHAM,

Joint Secretary to the Government of India.

4

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Memorandum on the snowfall in the mountain districts bordering Northern India and the abnormal features of the weather in India during the past year, with a forecast of the probable character of the south-west monsoon rains of 1899.

The present memorandum is drawn up in accordance with the practice of the past fifteen years, and includes, firstly, a brief summary of the information received from various officers relating to the snowfall of the past winter or cold weather in the Afghan mountains and the Himalayan area; secondly, a statement of the chief peculiarities or abnormal features of the meteorology of India during the past year; and, thirdly, a forecast of the probable character of the approaching south-west monsoon rains based on this information.

The forecast is based in part on the snowfall information and on the abnormal features of the weather during the past five months, and in part on a comparison with the meteorology of the previous twenty-two years, so far as it is available. It is necessary to point out that the forecast is a statement of probabilities and not of certainties, and that it is liable to error from the limitation and uncertainty of part of the data on which it is based. It has been drawn up after a consideration of all the available information, but it should, to use the words of the Famine Commission Report, "*be used with due caution.*"

The monsoon forecasts, as at present issued, necessarily leave out of consideration two important points on which the agricultural value of the monsoon rainfall largely depends, *viz.*:

(1) the probability of the occurrence of a prolonged break in the rains in July or August;

(2) the probability of the unusually early termination of the rains in North-Western and Central India or in Bengal;

and are hence imperfect every year to that extent.

The chief features or conditions which influence and determine the extension and general strength of the south-west monsoon currents are as follows:

1st.—The amount and time of occurrence of the cold weather snowfall in the mountain districts adjacent to Northern India.

2nd.—The local peculiarities of the weather in India immediately antecedent to the advance of the monsoon currents across the coasts of Bombay and Bengal into the interior, and which, it is found, are generally initiated during the hot weather, and are frequently more or less persistent in character. These abnormal features are, on the whole, best estimated by means of the variations of pressure from the normal.

3rd.—Local peculiarities in the Bay of Bengal and Arabian Sea, over which the monsoon currents pass before they reach India, and probably also the Indian Ocean, which is the source of the massive current of the south-west monsoon in India.

The first of these conditions or factors is mainly influential in determining the northern limits of the monsoon rains, heavy and prolonged snowfall in the Western Himalayan area either preventing or delaying the extension of the monsoon current over Upper India during the rainy season. Heavy and untimely snowfall in April and May especially exercises a very powerful influence in this way.

The second factor determines those large local district or provincial variations of rainfall during the monsoon, which are evidently due to persistent local

A

conditions or peculiarities, and not to general causes influencing the whole of India more or less.

The third and last factor is at least of equal importance with the preceding two, but it is that on which information is most difficult to obtain and is least in amount and longest in being received. In fact, information respecting the weather conditions in the Arabian Sea, Bay of Bengal or the Indian Ocean has hitherto been rarely received in time to be utilized in drawing up the annual forecasts. Special arrangements have been made to obtain telegraphic information from Zanzibar, Mauritius and the Seychelles in the hope that it might throw some light upon the conditions at present prevailing in the south-east trades region in the Indian Ocean.

REPORTS OF SNOWFALL ON THE AFGHAN MOUNTAINS AND HIMALAYAS DURING THE WINTER OF 1898-1899.

The whole of the information referring to the snowfall in the mountain districts bordering Northern India for each month of the year is now published as it is received in the India Monthly Weather Reviews.

The following gives a brief summary of the information relating to the snowfall of the past cold weather obtained up to date.

I.—AFGHAN MOUNTAIN DISTRICTS.

HILLS WEST OF DERA ISMAIL KHAN, INCLUDING WAZIRISTAN.

(1) WANA.

The following is a summary of the reports received from the Political Officer, Waziristan:

November.—No snow was reported.

December.—Light snow fell on the night of the 20th—21st on the highest peaks and heavy snow on the 24th, and during the period, 27th to the 29th, down to about 8,000 feet. Snow was lying to the depth of 3 to 6 inches on the peaks above 8,000 feet high at the end of the month.

January.—Light falls of snow occurred on the highest peaks on the 12th and 30th.

February.—Snow fell on the 3rd, 5th, 8th, 9th, 10th, 13th and 23rd of this month on the Marwattai hills above 7,500 feet. There was a slight accumulation of snow on the north faces of the hills at the end of the month.

March.—Snow fell on the 11th, 12th, 13th, 26th and 27th on the Marwattai hills. The falls were generally light and melted rapidly.

April.—No snow fell on the Marwattai hills. The snowfall of the past winter was much lighter than usual throughout the whole winter.

(2) DERA ISMAIL KHAN (KULACHI BORDER).

The following is a summary of the reports received through the Deputy Commissioner, Dera Ismail Khan District:

December.—Snow fell on the higher peaks of the Suleiman Range from the 28th to the 30th. The total fall varied in depth from 1½ feet to 3 feet on the higher peaks. It soon melted.

January.—Fine weather prevailed throughout the month until the 30th when a snowstorm gave 5 feet of snow to the higher peaks of the Suleiman Range.

February.—Frequent storms occurred during the month, and snow fell on the 2nd, 3rd, 4th, 8th, 9th, 10th, 14th and 15th on the Suleiman Range. The

total fall on the higher peaks is stated to have been 30 feet in depth. (This estimate is probably much exaggerated.)

The Deputy Commissioner states that "during the year 1898-99 the depth of the snowfall on the Suleiman Range amounted to 41 feet as against 23 feet in 1897-98."

(3) KURRAM.

The following is a summary of the reports received from the Superintendent of the Meteorological Observatory, Parachinar, and the Political Officer, Kurram Valley:

September.—Snow fell on the highest peaks of the Sufed Koh on the 15th, 17th and 28th.

November.—Light snow fell on the highest peaks on the 15th, 17th and 25th.

December.—Snow fell on eleven days during the month. The falls descended to heights varying from 16,000 feet at the beginning of the month to 8,000 feet at the end of the month. During the last storm of the month (on the 28th), which was very heavy, snow fell down as low as Kohat (elevation 1,767 feet).

January.—The month was much finer than usual. Snowstorms occurred on the 12th, 13th, 29th and 30th, but the falls were very light.

February.—Snow fell on the 4th and 5th and again from the 7th to the 10th and also from the 12th to the 14th and the 22nd to the 24th. 2½ feet of snow were reported to be lying on the Peiwar Kotal at the end of the month.

March.—There were snowstorms on the 2nd, 3rd, 9th, 11th, 12th, 15th, 16th and the 27th to the 29th. The last storm of the month occurred on the highest peaks of the Sufed Koh above 14,000 feet. About 6 inches of snow were lying on the Peiwar Kotal at the end of the month.

April.—Snow fell on six days in April, *viz.*, the 4th and the 14th to the 18th on peaks above 16,000 feet in elevation. There was practically no snow lying on the Sufed Koh on the 15th of May. The snowfall of the past winter was less than that of the preceding winter and below the normal.

(4) THAL SUB-DIVISION (KOHAT DISTRICT).

The Assistant Commissioner, Thal, writes that "during the past winter there has been no snowfall in any part of the sub-division, except the Samana Range, where the fall is estimated at 3 feet."

(5) KABUL.

The following is a summary of the information received from the Meteorological Observer, Kabul, through the British Agent:

December.—Snow fell on the 18th, 25th and 28th, but the falls were light. The Paghman and adjoining hills were covered with snow at the end of the month.

January.—A storm gave light falls of snow on the 29th and 30th.

February.—Snow fell on the 2nd, 8th, 9th, 10th, 13th, 14th and 23rd. The falls at Kabul were light, and the total of the month was only 14 inches. The storm of the 13th and 14th was severe and extended as far south as Ghazni, closing the passes for a fortnight. There was no snow accumulation in the valley at the end of the month. The Paghman hills were covered with snow throughout the month.

March.—Light snow fell on the 3rd, 9th and 15th. The Paghman mountains were covered with snow at the end of the month, but no information had been received of the depth of the accumulation. The snowfall of the past winter is considered by the inhabitants of Kabul to be considerably below the normal.

(6) KHYBER PASS DISTRICT.

The following is a summary of a report of the snowfall in this area during the months of January and February forwarded by the Political Officer:

"During the winter the snowfall, compared with former years, has been very slight indeed. At Lundi Kotal, *i.e.*, on the Loargi Plain (3,600 feet elevation), the snow in January melted as it fell, and there was no accumulation. The snowfall on Tor Sappar (5,260 feet) and what is shown on district maps as the Tartara Peak (6,775 feet) must have averaged on each occasion between 6 and 8 inches. There were three falls during the winter—one late in January and two in February. The snowfall in Maidan has also been scanty compared with former years.

"The inhabitants generally state that, compared with former years, they have had no snowfall at all this year."

(7) CHITRAL.

The following gives comparative data of the precipitation at the recently established observatories of Chitral and Drosh for the period November to April:

Chitral.

Year.	Rainfall.						
	November 1898.	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.	Total fall, November 1898 to April 1899.
	Inch.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
1896-97	0	0·02	4·88	2·94	4·65	4·20	16·69
1897-98	0	1·68	0·63	1·65	15·25	6·28	25·49
1898-99	0·05	1·55	0·10	2·28	3·11	2·10	9·14

Killa Drosh.

1897-98	0	1·98	1·45	1·26	12·12	5·34	22·15
1898-99	0	1·16	0	2·19	2·27	2 66	8·28

The data establish conclusively that the precipitation of the past winter was much less in amount at these stations than during the previous two winters, and suggest that the snowfall in that mountain district was very considerably below the normal and probably barely 50 per cent. of the normal fall.

The following report has been received from the officer in medical charge, Killa Drosh:—"The post of Drosh is about 4,500 feet high. Snowfall generally occurs in the territories of Drosh during the months of October, November, December, January, February, March and April and is of frequent occurrence on the higher mountain ranges and of occasional occurrence over the valley. There is one mountain to the east of Killa Drosh about 16,000 feet high. It is covered with snow during the whole year. To the west of Killa Drosh is a lower mountain range about 11,000 feet high. The Lawarai Pass, which is about 18 miles to the south of Drosh, is 10,000 feet high. Snow lies there more or less nearly throughout the whole year except the months of August and September. There were 21 falls of snow during the year on the following dates:—23rd October, 13th November, 12th, 16th, 17th and 24th December, 2nd and 14th of January,

14th and 23rd February, 2nd, 4th, 12th, 15th, 16th, 26th and 27th of March and the 10th, 11th, 16th and 17th of April. The falls from the 14th January to the 26th March extended to Drosh and the neighbouring hills. The remaining falls were received on the higher ranges only. The area over which these storms are known to have extended is about 50 miles to the north, east and west and about 30 miles to the south of Drosh.

"The total snowfall during the past winter at Drosh was 4 feet and 11 inches in amount. The depth of snow over the peaks of the highest mountains is not at present known, but is probably about 10 feet on the mountains situated to the east of Killa Drosh. The Lawarai Pass is covered with a considerable amount of snow at present; the depth of snow is estimated from 3 to 10 feet.

"The inhabitants of the country state that the snowfall during the past winter was less than in the corresponding period of the previous year."

II.—HIMALAYAS.

(A) THE PUNJAB AND KASHMIR HIMALAYAS.

(1) HAZARA.

The following report has been received from the Deputy Commissioner, Hazara District:

"The first fall of snow on the highest peaks occurred in October. It was, however, light and soon melted. The first heavy fall occurred on the 29th December down to 4,500 feet. The depth of the fall at a height of 10,000 feet was probably one foot. Light snow fell again down to 6,000 feet on the 6th and 7th January and more or less heavy snow on the 3rd, 5th, 6th, 7th, 10th, 11th, 14th and 15th February. The total fall at a height of 10,000 feet measured about 6 feet in depth. Snow fell down to 7,000 feet on the 6th, 9th, 12th, 13th, 14th and 16th March and on the higher mountains down to 8,000 feet on the 12th, 16th, 17th, 18th and 19th April. The total fall in April was from 1 to 3 feet.

"The storms extended over the whole of the ranges in this district and between the storms the weather was generally fine.

"There was about 2 feet of snow on the Babusar Pass on the 5th of May and some snow as far down as Narau in the Kagan Valley and on the hills over 10,000 feet high.

"The total fall of the winter was somewhat less than usual."

(2) MURREE.

The following tables give statements of the snowfall as measured at Murree and on the hills near Kahuta during the past and preceding winters for comparison:

Station.	TOTAL FALL OF SNOW IN THE MONTH OF					Total of period, 1898-99.
	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.

	1899.	1898.	1897.	1896.	1895.	1894.	1893.	1892.	1891.	1890.	1889.	
	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.
Murree .	7 6	6 8½	10 2½	7 5	11 10	15 9	29 4	0 5	29 0	3 8	7 3	11 9
Kahuta .	7 0	13 2	4 0	1 0	6 0	5 0	18 0	*Nil*	5 3	0 9	4 3	5 10

The data show that the snowfall at Murree was considerably below the normal and was comparable in amount with the falls in the cold weathers of 1898, 1896 and 1889. The fall at Kahuta was, on the other hand, slightly above the average of the past eleven years.

(3) Kashmir.

The following account of the snowfall in Kashmir during the early part of the winter was received from the Meteorological Reporter to the Kashmir State in February last:

"The Kashmiris say that a severe winter in the valley is usually followed by a mild one and *vice versâ*. Last year's winter was unusually dry, and it was therefore anticipated that during this winter heavy snow would fall, and this anticipation is now a realisation. The snowfall in and around the Kashmir Himalayas during this winter has been heavy, though not more than the average.

"Snow began to fall earlier than usual this winter, and a great deal fell in December and in February, whilst in January very little fell.

"In January the weather was generally colder but finer than usual. At the end of the month it was thought that the winter was over, but it suddenly changed on the 2nd February when a snowstorm occurred lasting 8 hours. Another snowstorm, more severe than the first, occurred on the 4th February and lasted for twenty-four hours, bringing down 2 feet of snow. Two other storms occurred on the 9th and 13th February, but were of moderate intensity.

"On the mountains surrounding the valley the snow lies very deep. On the Banihal Pass (9,200 feet) there are, it is said, 15 feet of snow and at Gulmarg 7 feet.

"Most of the snow melted as it fell in the valley in February. This, however, is not the case with snow falling on the hills surrounding the valley."

The following table shows the snowfall measured as rain during this winter and previous five winters for comparison:

Year.	Precipitation.						
	December.	January.	February.	March.	April.	May.	Total of period.
	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
1898-99 .	2·73	0·68	4·21	2·01	3·44	1·38	14·45
1897-98 . .	0·35	1·91	2·15	0·76	1·28	2·64	9·09
1896-97 . .	0·63	6·18	1·38	5·79	4·93	4·53	23·44
1895-96 . .	0·62	1·09	2·46	2·22	1·48	2·22	10·09
1894-95 . .	1·91	6·11	4·81	5·30	2·63	1·55	22·31
1893-94 . .	0·26	7·16	4·25	4·47	4·09	1·52	21·75

The comparison indicates clearly that the precipitation at Srinagar during the past winter was much less than during the winters of 1893-94, 1894-95 and

1896-97 and also so far as can be judged from the limited data below the normal by at least 20 per cent.

The following additional memorandum, dated the 23rd May, on the character of the snowfall in Kashmir during the past winter has been received from Dr. Mitra, Meteorological Reporter, Kashmir State:

"During the last winter 7·62 feet of snow fell in the valley, a detailed report of which was sent to the Meteorological office on the 20th February. No more snow has fallen in the valley since the submission of that report. On the 24th February, while it rained in the valley, heavy snow fell on the surrounding mountains. On that date over a quarter of a foot of snow was measured at Dras. Nearly 4 feet of snow fell at Dras in the month of March and over 3 feet in April, and on the 4th May a snowstorm occurred there bringing down 1¼ feet of snow. On the 11th March and 17th April snow fell heavily on the hills in Kashmir descending as low down as the Takht-i-Suleiman (6,000 feet). There is at present 3 feet of snow on some parts of the Banihal Range. At Gulmarg there was 1 foot of snow so late as 5th May. Over the Zoji-la Pass (11,300 feet) there is about 5 feet of snow, and on the Rajdangan Pass (11,800 feet) there are, it is said, 12 feet. All the mountains around the valley are covered with deep snow. The spring in the valley was unusually wet and cold and prolonged. From all accounts it appears that the snowfall on the higher ranges has been more than usual, and that it is lying on the higher as well as on the lower passes longer than usual. In the valley it is now colder than usual, and unsettled weather is the chief feature we notice this year. The river Jhelum is at present higher than usual. As it is still cold in the valley, the snow does not melt, and while it is raining in Srinagar, it is snowing on all the hills. Light showers of rain at intervals in June and July will melt the snow slowly on the mountains, but if there should occur a heavy rainfall by the middle of June, it is apprehended that a severe flood will occur.

"From the 18th May we have had hazy weather. On the 19th a heavy storm of wind occurred which dispelled the mist for a time, but it again came up after the storm was over."

(4) LEH.

Very full accounts of the snowfall during the past winter in Ladakh have been received from the Superintendent of the Leh Observatory. The following is a brief summary of these reports:

October.—Snow fell on the 23rd on the hills surrounding Leh down to an elevation of 12,500 feet. It also fell during the following night in the Indus Valley near Leh. It melted rapidly during the remainder of the month, and the snow-line was at a height of about 15,000 feet at the end of the month.

November.—No snow fell.

December.—Light showers of snow fell on the 8th, 10th and 13th. On the 16th there was no snow on the Karzong Pass (elevation 17,500 feet). Heavy snow fell over the whole Indus Valley in Ladakh from the 16th to the 18th. Light falls were received on the 19th, 21st and 22nd, and a second heavy general fall occurred from the 29th to the 31st.

January.—Light snow showers fell in Leh and the neighbourhood on the 1st, 13th, 17th, 25th and 31st. The falls on the mountain ranges to the south of Leh were apparently heavy.

February.—Snowstorms occurred on the 3rd, 9th, 10th, 18th, 19th and 24th. These storms were all general extending over the whole Upper Indus Valley and side valleys. Heavy snow fell over the neighbouring ranges down to 12,000 feet on the 15th.

March.—There was a severe snowstorm on the 6th and again from the 9th to the 12th. The fall melted rapidly in the valley which was free from snow again on the 15th.

April.—Snowstorms occurred on the 9th, 10th and 19th over the whole of Ladakh. There were also snowstorms on the higher ranges above 13,000 feet on

the 18th, 19th, 21st, 22nd, 24th and 25th. The depth of snow on the Karzong Pass at the end of April was about 4 feet.

May—During the period from the 1st to the 15th some rain showers fell in Leh. The snow-line never descended lower than 15,000 feet. The accumulation on the Karzong Pass on the 15th of the month was from 3 to 4 feet

The inhabitants of Leh consider that the snowfall of the past winter was similar in total amount to that of the winter of 1896-97 and considerably greater than that of the winter of 1897-98.

(5) LAHOUL.

The following gives a statement of the snowfall registered at the Observatory at Kailang in Lahoul during the past winter and also during the corresponding periods of the past five years for comparison :

Month.	Normal monthly precipitation measured as rainfall.	RAINFALL, 1898-99. Total precipitation of month measured as rainfall.	SNOWFALL, 1897-98. Total snowfall of month.		SNOWFALL, 1896-97. Total snowfall of month.		SNOWFALL, 1895-96. Total snowfall of month.		SNOWFALL, 1894-95. Total snowfall of month.		SNOWFALL, 1893-94. Total snowfall of month.	
		Inches.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.
December .	1·01	3·57	0	6½	1	9	*Nil*		4	0	0	3
January . .	3·07	0·42	0	6½	5	8	1	2	3	6	3	6
February . .	3·20	3·17	2	5½	1	2	3	1	2	0	4	3
March . .	3·39	3·13	0	3	6	10	0	10	3	6	5	4
April . . .	2·80	4·26	*Nil*		?		*Nil*		1	6	2	1
Total .	13·47	14·55	3	9½	15	5	5	1	14	6	15	5

The precipitation at Kailang during the period, December to April, was hence slightly above the normal (8 per cent.). It was equivalent to about 12 or 13 feet of snow, and hence was similar in amount to that of the corresponding periods in 1896-97, 1893-94 and 1894-95.

The Superintendent of the Observatory describes the winter as follows :

" We enjoyed very fine weather from October up to the beginning of December, but the weather broke up rather suddenly, and in the second-half of December we had very heavy snowfalls which entirely blocked up the Rotang Pass. January was bright and fine, the sky being almost always blue. February and March brought us a good amount of snow again, and so did April Taking verything into consideration, we had a favourable winter. Since the 25th of April we have had no snowfall whatever, but from the 10th to the 14th of May it rained pretty heavily, and on the night from the 13th to the 14th May we had a regular thunderstorm. This occurs very seldom at this height. "

(6) SIMLA HILL DISTRICTS.

The following is a summary of the data for these districts received from the Deputy Conservator of Forests, Bushahr Division :

September.—Snow fell on the 26th down to 10,000 feet and again on the 29th.

October.—Light snow fell above 10,000 feet on the 14th.

November.—Snow fell down to 6,500 feet on the 5th. The depth of snow on the Kanawar Range at 8,000 feet was about one foot at the end of the month, and the passes across these ranges were closed.

December.—Slight snow fell on the 12th, 13th, 16th and 17th above 7,000 feet. Moderate snow fell on the 20th and light snow on the 21st, 24th, 25th and 26th above 5,750 feet. There was a heavy fall on the 30th and 31st over the whole district down to 5,750 feet. All passes over 10,000 feet were closed throughout the month.

January.—Heavy snowfalls were received over the whole area above 5,750 feet on the 2nd, 3rd and 4th. Fine dry weather prevailed during the remainder of the month.

February.—Heavy falls of snow occurred on the 5th and 6th and again on the 26th above 5,750 feet. Slight falls were also received on the 4th, 9th, 13th, 14th, 15th and 24th above 9,000 feet. The weather was unusually cold in the Sutlej Valley after the storm of the 13th to the 15th.

March.—There were light falls on the 7th, 9th, 10th, 11th, 12th and 13th above 10,000 feet. All the passes over 12,000 feet in elevation were closed throughout the month.

April.—Light to moderate falls of snow occurred on the 1st, 6th, 8th, 9th, 10th, 12th, 13th, 14th and 15th above 9,000 feet and again from the 16th to the 23rd above 10,000 feet.

These snowstorms were accompanied by much thunder and lightning and were general over the whole of Bushahr. All the passes higher than 12,000 feet were closed up to the 15th of the month. The depth of snow at 10,000 feet on open slopes of the northern aspects of the ranges was 18 inches on that date.

May.—Light snow fell down to about 10,000 feet on the 12th and 15th and some sleet on the higher ranges from the 16th to the 18th. During the period from the 16th April to 18th May storms were of almost daily occurrence in Bushahr west of Kilba, and gave more or less snow on slopes above 10 000 feet. From the beginning of May the snow on the southern aspect of the hills melted rapidly, and the snow-line retired to 12,000 feet. In the intervals between the storms the weather was fine and the sky free from cloud. The chief character of the storms was that they were almost daily brought up by south to south-east winds, and as far as observed extended over the whole of the Simla hill tracts west of Kilba.

On the 5th of May there was an accumulation of about 5 feet on the Rupin Pass, of about 6 feet on the Borenda Pass, of 8 feet on the Bulder Pass, of 6 feet on the Shatul Pass from the Pabor Valley to Nachar in the Sutlej Valley and 1 to 3 feet on the Harung Pass.

The snowfall of the season was, in the opinion of the natives of the district, considered to be about twice as much as in years of ordinary snowfall.

(7) CHAMBA.

The Deputy Conservator of Forests, Chamba State, has sent complete snowfall reports for the past winter, of which the following is an abstract:

December.—Snow fell on the 8th, the 12th, the 19th to the 21st and the 29th to the 31st. The snow-line descended to 7,000 feet on the 12th, to 6,000 feet on the 21st and to 3,000 feet during the last snowstorm of the month. The snowfall was reported to be very heavy on the interior ranges, more especially during the last storm of the month. There was 3 feet of snow on the Padri Pass between Chamba and Badrawar Pass on the 15th of the month.

January.—Snowstorms visited these hill districts on the 2nd, 3rd, 5th, 6th, 26th and 29th. The weather was unusually bright and clear during the month.

February.—Light snow fell on the 2nd and moderate to heavy snow from the 5th to the 7th, the 9th and 10th, the 15th and 16th and the 24th to the 26th.

The snowfall on the 15th and 16th occurred down to 5,000 feet and on the 24th to the 26th down to 7,000 feet.

The snowfall of the month occurred chiefly on the higher and interior ranges above 7,000 feet. On the 15th February there was a depth of 2 feet of snow lying at Kalatop (8,000 feet) and 7 feet at Barmaur (elevation 8,000 feet).

March.—Snowstorms occurred on the 6th and 7th and the 16th on the high ranges. The snowfall did not descend below 9,000 feet on the 16th, and it melted quickly again up to 11,000 feet.

April.—Light snow fell on the 9th, 12th and 13th. A general storm occurred on the 18th when snow fell as low as 6,500 feet in the main Ravi Valley. Thunderstorms were of frequent occurrence and were accompanied by snow on the higher ranges.

May.—Snow fell on the 13th down to about 10,000 feet, but soon melted, and the snow-line on the 15th was about 12,000 feet high.

The Deputy Conservator, writing on the 15th May, says:—" The depth of snow is not known on any of the high passes or ranges. The accumulation of snow down to 10,000 feet on the main ranges and in ravines appears to be rather more than normal, and of course is much greater than at the same time last year. This I attribute to cloudy weather in April and the frequent storms in May.

" The snowfall on the interior ranges is considered to have been somewhat greater than usual and similar in total amount to that of 1895-96. The winter began earlier than usual, but a peculiar feature was the long fine breaks between the storms in the middle of the winter. The total fall was probably below the normal on the lower ranges."

The following statement gives the snowfall as measured at certain forest stations during the past winter in the Chamba State:

Month.	Dalhousie neighbourhood.		West of State.	Tisa Range, north of State.						Valley of Ravi.			
	Kalatop, 8,000 feet.	Surkhigalli, 5,000 feet.	Bhandal, 6,000 feet.	Tisa, 5,000 feet.	Kilangu, 7,000 feet.	Kundi.	Thanela, 7,000 feet.	Chanan, 6,500 feet.	Kilar, 8,000 feet.	Chitrari, 6,000 feet.	Ulansa, 7,000 feet.	Barmaur, 8,000 feet.
	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.

" " " 1895-96	8 0	?	3 10	...	...	?	8 11	3 10	16 6	?	?	?

(8) DALHOUSIE.

The Treasury Officer, Dalhousie, has sent the following report of the snowfall at that station and on the neighbouring hills:

" On the whole the fall of snow this year has been characterised by early commencement and early stoppage. Snow usually falls heavily or moderately in January and February, whereas this year the fall was confined chiefly to December. Out of a total fall of 5 feet, nearly 2 feet fell in the first week of January,

and there has been none since to record. The weather was mild and temperate in the months of January and February, which are usually the coldest months of the year. There is every sign of an early spring, and the prospects of crops around the station seem satisfactory.

"The total fall during past winter was about 5 feet in amount and hence approximately normal.

"No snow has fallen since the 8th January."

(9) KULU.

The following is a summary of reports received from the Assistant Commissioner, Kulu:

January.—Snow fell on the 2nd, 3rd, 5th, 6th and 30th in the Kulu Tahsil and on the 1st, the 3rd to the 7th and 30th in the Plach Tahsil. The falls of the 6th and 7th descended to 4,000 feet where the total amount was 4 inches.

February.—Snowstorms occurred on the 2nd, 5th, 6th, 14th, 15th, 24th and 25th in the Kulu Tahsil and on the 3rd, 5th, 6th, 7th, 11th, 15th, 16th, 24th and 25th in the Plach Tahsil. The falls on the 6th and 7th were unusually heavy and descended to an elevation of 3,000 feet where the total fall during the storm was 1 foot.

March.—Light snow fell on the higher ranges of Kulu on the 6th, 7th and from the 9th to the 18th. Some Lahoulis crossed the Rotang Pass in the middle of the month and nearly all passes in this district were open before the end of the month. The snow melted very rapidly during the last fortnight of the month.

April.—Snow fell on four days during the month on the higher ranges above 10,000 feet. The Rotang Pass was closed for three or four days, due to this snowfall.

May.—Rain fell slightly on the 1st, 11th, 12th and 13th in the Kulu Tahsil and on the 11th, 12th, 14th and 15th in the Plach Tahsil. During this period there was slight snowfall on the higher passes and peaks.

The Rotang Pass was not open for laden animals at the end of the month.

The snowfall of the past winter is generally considered to be heavier than usual.

The following table gives the depth of snow at the end of each month from January to May 1899 and also on the 25th May of the past eight years on seven of the passes in this district for comparison:

Tahsil.	Name of pass.	Elevation.	Depth of snow in					Depth of snow on the 25th May							
			January 1899.	February 1899.	March 1899	April 1899.	May 1899.	1898.	1897.	1896.	1895.	1894.	1893.	1892.	1891.
		Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet	Feet.	Feet.	Feet	Feet.
Kulu	Hamta	14,500	9	10	8	3	½	½	6	1	3	6	7	½	12
	Rotang	13,000	11	12	11	7	5	3	7	8	6	9	9	1	9
	Bhubhu	10,000	4½	7	5	2	*Nil*	*Nil*	1	*Nil*	*Nil*	1	1	?	*Nil*
Plach	Gargarasan	17,000	8	9	6	3	2	1	4	2	2	2	4	1	4
	Srikand	15,000	13	14	9	6	5	5	8	7	10	12	15	4	32
	Basleo	11,000	6	6	3	1	*Nil*	*Nil*	*Nil*	*Nil*	*Nil*	*Nil*	*Nil*	*Nil*	1
	Jalori	10,500	6	6	3	1	*Nil*	*Nil*	*Nil*	*Nil*	*Nil*	*Nil*	*Nil*	*Nil*	1

The preceding statement showing the depth of snow on the higher passes on the 25th of May 1899 indicates that it was less than on the corresponding date in the years 1897, 1894, 1893 and 1891, and suggests that it was less than usual at the end of May. This is confirmed by the appearance of the snows on the higher Kulu ranges as seen from Simla.

(B) NORTH-WESTERN PROVINCES HIMALAYAS.

KUMAON.

The following is a statement of the estimated snowfall in this district measured in the same manner as in former years in accordance with arrangements made in the year 1890:

Month.	Fall on Pindari and Panku a Peaks.		Fall on Ralumdhura and Utamdhura Passes.		Fall on Malla Byans, Chandan and Darma.	
	Ft.	In.	Ft.	In.	Ft.	In.
16th September to 15th October 1898	3	3	12	0	0	4
16th October to 15th November 1898	2	4	9	0	1	4
16th November to 15th December 1898	*Nil*		18	0	2	4
16th December 1898 to 15th January 1899	11	0	34	6	8	0
16th January to 15th February 1899	No return received.					
16th February to 15th March 1899	0	9	13	0	5	0
16th March to 15th April 1899	1	6	18	0	*Nil*	
Total fall in winter of 1899	?		?		?	
Total fall in winter of 1898	18	8	66	6	0	6
Total fall in winter of 1897	29	9	79	0	17	6
Total fall in winter of 1896	14	0	32	0	9	6
Total fall in winter of 1895	29	8	71	3	18	3
Total fall in winter of 1894	33	3	57	3	33	6

The snowfall of the past winter in Kumaon was considered by the natives of the district to be greater than in the winter of 1897-98.

This is confirmed by the preceding data which also show that the fall was similar in amount to that of the winters of 1896-97 and 1894-95.

(C) ASSAM HIMALAYAS.

The following brief reports have been received through the Government of Assam:

Hills north of Lakhimpur.—The snowfall in the interior of the hills is reported to have been heavier than in the preceding winter.

Hills north of Sadiya.—The snow in these hills began to fall unusually early in the season and was very heavy. There was a very heavy fall late in March over the whole of the neighbouring Himalayas.

Hills north of Darrang District.—Almost all the hill people, who have come down this year, state that the snowfall of the past winter was heavy and the winter exceptionally severe.

Hills north of Kamrup.—Snowstorms occurred at frequent intervals during the winter, and the falls were unusually heavy in the months of November, December and the early part of January. The amount of snowfall during the year under report was greater than that of the preceding year.

(D) PERSIA.

The data for this area are very scanty. Weather was much finer and drier than usual throughout the whole season, but more especially in December, January and March, and the rainfall was scanty and in large defect over the whole Persian area. So far as can be judged from the imperfect data, it is almost certain that the snowfall on the higher elevations was as largely below the normal as the precipitation at the stations in the plains.

The following table gives comparative data of the precipitation at several stations in the Persian area and also at Quetta and Kashgar:

Station.	Rainfall.												Rainfall of period, November 1898 to April 1899.		
	November 1898.		December 1898.		January 1899.		February 1899.		March 1899.		April 1899.

* Rainfall of period, November 1898 to March 1899.

The data establish conclusively that the rainfall at the stations typical of the large area including Mesopotamia, Persia and Baluchistan was much smaller in amount than usual. The winter was unusually dry throughout, and the total precipitation of the period, November 1898 to April 1899, probably barely half the normal fall of the period. No special information has been received of the snowfall on the higher ranges in Persia. It is, however, almost certain that the scanty rainfall was due to special meteorological conditions common to the whole of the Persian area, hills and plains, and hence that the deficiency in the precipitation was as marked on the mountain ranges (which are the chief sources of the water-supply of the rivers and canals upon which cultivation so largely depends in Persia) as in the plains.

PRECIPITATION ON THE OUTER RANGES OF THE HIMALAYAS.

The distribution of the precipitation of the period on the outer ranges of the whole Himalayan area is indicated very clearly by the data of the following table:

Station.	Precipitation.												Precipitation of period, November 1898 to April 1899.		
	November 1898.		December 1898.		January 1899.		February 1899.		March 1899.		April 1899.

The precipitation of the period was in considerable to large defect at the hill stations on the outer and middle ranges of the Punjab Himalayas. The deficiency probably averaged about 40 per cent. and was larger, both in actual amount and relatively to the normal, at Kilba than at Simla. The precipitation was in moderate excess, on the average of the three stations, on the outer ranges of the North-Western Provinces Himalayas and in large excess in Sikkim. The distribution of the rainfall, as indicated by these stations, is in full accordance, it will be seen, with the snowfall reports.

SUMMARY OF THE SNOWFALL DATA.

The whole of the available data bearing on the character and amount of the snowfall in the mountain regions to the north and north-west of India have been given above. They have been given in fuller detail than usual, as the conclusions are opposed to statements that have appeared in various quarters with respect to the snowfall of the past winter. The data are very consistent and show clearly a gradual transition in the amount and character of the distribution from west to east. The winter snowfall and precipitation was very largely below the normal in Persia, Afghanistan, Chitral and Baluchistan, in slight defect in the Kashmir and Punjab Himalayas (due almost entirely to less precipitation than usual on the lower ranges combined with normal or slightly heavier fall on the interior ranges), in slight to moderate excess in Kumaon and Garhwal (or the Himalayas of the North-Western Provinces) and in large excess in the Eastern Himalayas of Sikkim and Assam.

The chief features of the snowfall of the cold weather were:

(1) The winter commenced somewhat earlier than usual in Afghanistan and Kashmir. Weather was unusually fine and free from winter storms in Afghanistan and Baluchistan from November to February.

(2) The number of cold-weather disturbances from November to January was considerably less than usual. Most of the storms in this period originated either in Baluchistan or India and not in Persia, and were hence of slight intensity. One storm, that of the 29th December to the 1st January, was severe and gave heavy and general snowfall in the Western Himalayas. The snowfall up to the end of February in that area was considerably below the normal on the whole and was nowhere excessive.

(3) The number of depressions in February, March and April was much larger than usual. Baluchistan, Afghanistan, Chitral and North Kashmir had frequent light to moderate precipitation during the period. A disturbance of moderate intensity extending from the 4th to the 6th February gave moderate to heavy snow in Kashmir and the Punjab Himalayas. The snowfall during this period was in slight to moderate excess in the Western Himalayas, chiefly due to the frequent falls in March and April, the excess being probably most marked on the interior and higher ranges.

(4) The chief feature of the season was the frequent moderate falls in April over the whole of the Western Himalayas west of Kumaon. The fall was moderately heavy in the Simla hill districts and Lahoul. Snow fell down occasionally to 9,000 to 10,000 feet and caused extensions of the snow-clad surface in the hills for brief periods which affected the meteorological conditions in Upper India. The snow melted very rapidly during the hot weather of the last fortnight of May, and the snow-line on the 31st of May was at a mean elevation of from 13,000 feet to 14,000 feet in the Punjab Himalayas and 15,000 feet in Ladakh.

(5) The snowfall of the past season up to the end of May was, so far as can be judged from the data, much below the normal in Persia and Baluchistan and in moderate to considerable defect

in Afghanistan as represented by Kabul, Wana, the Kurram Valley, the Khyber Pass and the neighbouring mountain ranges.

(6) The total fall of the period up to the end of May was probably about normal in amount or in slight excess on the higher and interior ranges of the Kashmir and Punjab Himalayas. This appears to be fully established by the information received from Kashmir, Chamba and the Simla hill districts. The precipitation of the period was, on the other hand, in considerable to large defect on the outer and middle ranges. There were only two periods of heavy snowfall in the Upper India Himalayas, *viz.*, from the 29th December to the 1st January and the 4th to the 6th February. During the early part of the season the intervals of fine, dry, clear weather between the storms were much more prolonged than usual. On the other hand, weather was more frequently disturbed in March and April than usual, and numerous light falls of snow were received on the interior ranges. So far as can be judged from the actual data received, the accumulation on the higher elevations in Kashmir, Lahoul, Chamba and the Simla hill districts was probably about normal in amount, and in Kulu and probably Ladakh was somewhat less than the normal. There is, hence, no abnormal extension of the snow-clad surface, the snow-line at the end of the period being at about 13,500 feet.

(7) The data for Garhwal and Kumaon (including those of the hill stations of Mussooree and Ranikhet) establish that the snowfall of the period was above the normal and probably to a moderate extent.

(8) No information has been received for Sikkim and Nepal.

(9) The information relative to the snowfall in the Assam Himalayas is as usual scanty, but appears to indicate that the fall was considerably heavier than usual over the whole of the Assam Himalayas.

The snowfall accumulation in May 1898 was unusually small, due to the abnormally dry weather of the preceding winter. Little or no snow fell during the south-west monsoon period from June to August 1898, and the accumulation on the higher ranges in the Western Himalayas at the end of August was probably less than at the corresponding period of the previous 10 or 15 years. A very early and heavy fall occurred in the fourth week of September which brought down the snow-line in Kashmir to about 8,000 feet. No further snow fell until the end of December. The falls were much less frequent than usual and with long intervals of bright clear weather in January and February. Frequent light snow was received in March, April and the first fortnight of May, chiefly on the higher ranges. The whole of the available data indicate that the extent of the snow-clad surface and the depth of the accumulation are abnormally small on the higher ranges in Afghanistan and Chitral, and that they are probably somewhat less than usual in the Kashmir and Punjab Himalayas. The height of the snow-line is also probably somewhat higher than usual in the Upper India Himalayas. The snowfall conditions in Upper India and the Persian area are hence favourable to an early and strong monsoon and to its extension to its utmost limits in the Punjab. The snowfall in the Eastern Himalayas has, on the other hand, been much heavier than the normal. It is, however, uncertain how far heavy snowfall in the Eastern Himalayas affects the strength and extension of the monsoon currents, as sufficient data of a trustworthy nature are not yet available for discussing this question for that area. Theory appears to indicate that it would tend, under the conditions of the present year, to diminish the rainfall in North-Eastern India and give increased rain to North-Western India.

ABNORMAL FEATURES OF THE METEOROLOGY OF INDIA DURING THE PREVIOUS EIGHTEEN MONTHS.

The meteorology of the dry monsoon (January to May) 1898 was very similar in several respects to that of the corresponding period of the present

year. The most important features of the meteorology of India during the first five months of 1898 were as follows:

(1) The snowfall of the winter of 1897-98 was much less than usual over the whole of the Western Himalayas and probably also in Afghanistan, Chitral and in Baluchistan. There was a heavy and somewhat abnormal fall in the second week of May over the whole of the Western Himalayas.

(2) The pressure conditions in India during the first five months of 1898 were such as accompany higher temperature in Northern India and less snowfall than usual in the Western Himalayas and probably also the Eastern Himalayas. The chief features, which were remarkably persistent, were (*a*) general deficiency of pressure, (*b*) local deficiency in Northern India and Burma, most marked in Bengal and Burma, and (*c*) local excess in Western India, greatest in Sind, Kathiawar and the Konkan.

(3) The temperature conditions during these five months were such as usually accompany a more open and drier winter than usual and scanty snowfall in the Himalayan area. Temperature was largely in excess in April and in moderate excess in May. The excess in these months was, on the whole, most pronounced in North-Western India and the North Deccan.

(4) The air was throughout nearly the whole season much drier than usual and skies remarkably free from cloud.

(5) The air movement was more vigorous than usual in March and April, due to the intensified thermal conditions of the period in the interior of India.

(6) Some of the abnormal features of the meteorology of India during the period were related to abnormal conditions prevailing in Persia and South Eastern Europe. Anti-cyclonic conditions obtained to a most unusual degree in Southern Europe in November, December and February, and, as a consequence, cool dry north-west winds prevailed in Persia with remarkable persistence from November to February. This abnormal air movement extended across Baluchistan and the north of the Arabian Sea and undoubtedly contributed to the unusual dryness of the air and freedom from severe cold-weather storms of the period in Northern and Central India.

It was stated in the south-west monsoon forecast published in the *Gazette of India* for 3rd June 1898 that the meteorological conditions in India immediately antecedent to the monsoon were, on the whole, favourable over the greater part of India; and hence that if, as was anticipated from information received form South Africa, Zanzibar and Mauritius, the conditions over the sea area to the south were favourable, normal or favourable rain might be expected over the greater part of the area. This anticipation was fortunately verified.

The general conclusions in the forecast were "that the rainfall may be deficient to a slight or moderate extent, depending chiefly upon the strength of the monsoon, in Sind, Cutch, the North and West Punjab and West Rajputana; that it will very probably be at least normal in amount in Central India and the northern half of the Peninsula, except perhaps Berar, Khandesh and the West Deccan, and may be in moderate excess in the eastern half of the North-Western Provinces, Bihar, the Central Provinces and the eastern states of Central India. It will probably be normal or in excess in Burma, Assam and perhaps in East and North Bengal, and may be in slight defect in West Bengal."

The south-west monsoon currents in 1898 were, on the whole, favourable as rain-distributing winds.

The south-west monsoon rains commenced somewhat later than usual on the Malabar and Konkan Coasts and almost simultaneously on the 9th and 10th

along the whole west coast. They began on the 16th, and hence about the normal date on the Bengal Coast.

The humid currents extended rapidly into the interior and gave general rain in Northern and Central India between the 11th and 18th. The first burst of monsoon winds in the Arabian Sea was very feeble and the current fell off rapidly on the 17th and 18th. It withdrew temporarily from Upper India on the 19th, and the break in the rains gradually extended over practically the whole of India during the next four days. North and East Bengal received a heavy downpour on the 21st, 22nd and 23rd. The break was general from the 25th to the 28th on which day rain recommenced in North-Eastern India and extended over the greater part of the country by the end of the month.

The rainfall of the month was less than usual in Burma, Assam, Arakan, Berar, Khandesh and the greater part of Madras and was practically normal over the remainder of India.

The Bombay current was steady throughout July and was above its normal strength from the 13th to the 23rd and again from the 2 th to the end of the month. The Bengal current was strong but somewhat unsteady, and three storms formed during the month in the north of the Bay of Bengal.

The first storm (lasting from the 2nd to the 8th) advanced from the head of the Bay along a west by north track to Lower Sind. The second lasting from the 16th to the 21st formed in Central Bihar and advanced almost due westwards to Sind. Both these storms gave moderate to heavy rain in the districts over which they passed. The third storm formed off the coast of North Madras on the 22nd and broke up in the North Deccan on the 26th. The rainfall of the month was above the normal over the greater part of India, including Chota Nagpur, South Bihar, the North-Western Provinces, Punjab, the Bombay Coast, the Deccan, the Central Provinces and North Madras. There was a moderate deficiency in Upper Burma, the Assam Valley, Central and North Bengal and Bihar. The rainfall of the month was hence abundant and favourably distributed.

The Bombay current was considerably weaker than usual in August, and the rainfall of the month was more or less below the normal over the whole area chiefly or entirely dependent on that branch of the monsoon current. The rainfall of the month in that area was, relatively to the normal, most deficient in the Punjab, Rajputana, Berar, the Bombay Deccan and Mysore The Bay current was of normal strength, but was determined more largely to North-Eastern India than usual, and the rainfall of the month was in general excess in Burma (except perhaps Upper Burma), Assam, Bengal, the North-Western Provinces and the Central Provinces. The excess was, on the whole, most pronounced in Tenasserim (67 per cent), Arakan (70 per cent), the North-Western Provinces (58 per cent.), East Bengal (63 per cent) and Assam (24 per cent.).

The Bombay current was slightly stronger than usual in September, but was, as in August, diverted from Upper India and determined more largely than usual to the Peninsula. The rainfall of the month was, hence, very deficient in North-Western India, almost as largely as in August. It was, on the other hand, in moderate to large excess over the centre and south of the Peninsula and in slight to moderate defect in the north of the Peninsula. The Bay current was of normal strength, but was, as in August, more largely directed to North-Eastern India than usual. The distribution of the rainfall was partly determined by the two cyclonic storms of the month which advanced along a more northerly track than usual from the Bay into Bihar and the North-Western Provinces. The rainfall of the month was excessive in Bihar and more or less above the normal in Bengal, Chota Nagpur and the eastern and central districts of the North-Western Provinces.

The Peninsula (chiefly the southern districts) received moderate rain during the first nine days of October. A storm formed in the Bay on the 9th and 10th which proceeded along a northerly track and gave very heavy rain in North Madras and Bengal from the 10th to the 15th. This was the conclusion of the

monsoon rains of 1898 in North-Eastern India. Fine dry weather prevailed over the whole of India until the 23rd when rain recommenced in Southern India and continued during the remainder of the month. A cyclonic storm formed in the south-west of the Bay on the 4th and 5th of November. It advanced westwards across the South Coromandel Coast on the 6th. Its advance gave moderate to heavy rain over the southern and central districts of the Peninsula from the 6th to the 14th. Dry weather set in on the 16th and continued until the 25th when showery weather recommenced. A disturbance formed in the extreme south-west of the Bay on the 28th and 29th. Its advance westwards was followed by heavy and general rain over Southern India from the 30th of November to the 2nd of December when dry weather was re-established.

The rainfall during the retreating south-west monsoon period was hence abundant and favourable over the greater part of the Madras Presidency and the Deccan, and the excess was large in the coast districts from Nellore southwards.

The following statement gives rainfall data of the south-west monsoon and retreating south-west monsoon periods in thirteen larger provinces:

Province or Division.	South-west monsoon period, June to October 1898.				Retreating south-west monsoon period, November and December 1898.

Madras	34·84	34·20	+0·64	+2	11·87	7·55	+4·32	+57

Although the rainfall was in considerable defect in Berar and North Bombay, it was favourably distributed in every respect. The same was the case over a large part of the Punjab, and the only areas in which the rainfall was insufficient for the crops were parts of Rajputana (chiefly the western and central districts) and of the South and South-East Punjab.

The preceding data indicate generally the favourable character of the rainfall of the monsoon period from the end of May to the middle of October over the whole of India.

They also show that Madras received favourable and satisfactory rain during the period of the retreating monsoon. The rainfall during that period was, on the other hand, very scanty over the whole of North-Eastern and Central India and the North Deccan. Over the greater part of that area the total rainfall of the period was less than 20 per cent. of the normal.

The later or retreating south-west monsoon rains terminated in Southern India slightly earlier than usual in the beginning of December. The cold weather rains began in the last week of December in the Punjab and the adjacent mountain districts to the north and east.

November 1898 was even finer and more settled than usual in North-Western and Central India and the Deccan and the mountains to the north-west and north of the Punjab, and little or no snow fell in the Himalayan area during the month. Temperature was in considerable excess in the Central Provinces, Berar, North Bombay and Central India.

December was also finer than usual over the greater part of Northern India. Fine weather held steadily until the last week of the month when a disturbance gave moderately heavy snow in the Punjab hill districts. The chief feature of the month was the abnormally high temperature in the large central area including Khandesh, the Deccan, Berar, Hyderabad and the Central Provinces in which it ranged between 4° and 8° above the normal. The month was practically rainless except in South Madras which had moderate to heavy rain and in the greater part of North-Western India which had light to moderate rain.

The following is a brief summary of the chief features of the meteorology of India during the past five months:

January was remarkably free from cold-weather storms. Weather was disturbed at the commencement of the month, and snow fell from the 2nd to the 6th in the Punjab hills. The fall was heavy in the Simla hills and in Almora. Fine clear weather prevailed generally during the remainder of the month, and the chief features of the meteorology of the month were abnormal dryness of the air, deficient cloud and scanty rainfall. A strongly marked cool wave affected Northern India after the snowfall of the first week of the month. A second cool wave advanced across Northern India between the 15th and 18th. The mean temperature of the month, both by day and night, was more or less below the normal over nearly the whole of India. The deficiency was considerable over the whole of Northern and Central India, ranging between 2° and 5° for the month.

February was somewhat more disturbed than usual, due to a succession of five depressions and cold-weather storms which advanced across Northern India during the period. With one exception, they were very feeble and gave very little rain in the plains except in Upper India, Bengal and Assam. The rainfall of the month was hence very scanty and below the normal—more especially in Upper India. Pressure was in considerable defect over the whole of India by amounts averaging ·04 inch. Temperature was above the normal except in parts of Burma. The excess was considerable in North-Western India, ranging between 2° and 5°, and was small in North-Eastern India and the Peninsula. The air was much drier than usual—more especially in the interior, including Rajputana, Central India, Berar, the Central Provinces and North Deccan.

March.—A series of shallow depressions similar to those of the preceding month advanced across Northern India. They gave little or no rain except in Baluchistan, the North Punjab, the Punjab hills, Bengal and Assam. The month was much drier than usual—more especially in Berar, the Central Provinces and Deccan. Temperature was in general excess, the variations from the normal being small in the Peninsula, Burma and Bengal and moderate to considerable in amount (2° to 5°) in North-Western and Central India. The mean pressure of the Indian area was ·01 inch below the normal. Pressure was, as in January, relatively in slight defect in North-Eastern and Southern India and in slight excess in North-Western and Central India. The abnormal temperature features of the month were similar to those of the preceding month.

April.—The mean pressure of the Indian area only differed by ·001 inch from the normal. The abnormal features of the month were practically opposite to those of the preceding month. Pressure was locally in defect over the greater part of North-Western India and also in Burma and in excess in North Eastern India. The chief feature of the weather of the month was the occurrence of

unusually heavy rainfall over the south and centre of the Peninsula, accompanying series of thunderstorms of unusual frequency and intensity. The rainfall of the month was hence very largely above the normal over the whole of Madras, the Deccan and West Coast and to a less extent in North-Eastern India. Temperature was hence considerably below the normal over the whole of the interior of the Peninsula by amounts ranging between -° and 5°. It was in slight excess in Upper India and in moderate excess in Burma.

May—The mean pressure of the Indian area was slightly below the normal (·018 inch). Pressure was, relatively to the general condition, more or less in defect in North-Eastern India and Burma and in Upper India and was in excess in the remainder of India. This contrast of conditions between Upper and North-Eastern India and Western India, it may be noted, almost invariably obtains in years of strongly marked hot-weather conditions—more especially after milder winters than usual in the Western Himalayas. The local deficiency was most marked in Bengal and the West Punjab, and the local excess greatest in the western half of the Peninsula. The following gives data for stations in the areas of greatest excess and deficiency of pressure:

Station.	Pressure anomaly in May.			Station.	Pressure anomaly in May.		
	1899.	1898.	1897.		1899.	1898.	1897.
	Inch.	Inch.	Inch.		Inch.	Inch.	Inch.

Dera Ismail Khan	—·042	?	—·017				
Mooltan	—·043	+·008	—·027				

The pressure variations in May 1887, May 1894, May 1895, May 1896, May 1897 and 1898 were similar in general character to those of the corresponding month of the present year, the chief difference being that they were slightly more marked in the present year than in those preceding years. The large local deficiency in the West Punjab is a special feature of the present year.

The position of the trough of low pressure varied very considerably during the month. At the end of the month its axis was defined by the stations of Calcutta, Hazaribagh, Allahabad, Sirsa and Dera Ismail Khan, and was hence further north than usual.

The mean temperature of the month was in excess over the whole of Northern and Central India. The excess was large in the Punjab, North Bengal and Cachar. The excess averaged 5°·3 in the Punjab, 3° in North Bengal and 2½° in Cachar. It was in very slight defect in the Peninsula and in slight to moderate defect in Burma, due to the frequent general rain during the month in that province.

Frequent rain was received in Burma and occasional rain (much below the normal) in Assam and parts of Bengal.

The rainfall of the month was in excess in Burma and in considerable to large general defect in parts of Bengal and in Assam.

The meteorology of India during the past five months has been characterized by strongly marked abnormal features.

The following states the most important:

(1) Pressure was from January to May below the normal over the Indian area, as is shown by the following statement:

Month.	MEAN 8 A.M. PRESSURE ANOMALY OF INDIAN AREA.					
	1899.	1898.	1897.	1896.	1895.	1894.
	Inch.	Inch.	Inch.	Inch.	Inch.	Inch.
January . .	—·003	+·017	—·003	—·003	—·009	—·020

May . .	—·018	—·008	—·005	+·013	—·007	—·023

(2) Pressure has been, during the greater part of the period, in slight defect in Northern India and Burma. The following table gives data in illustration of this feature:

Division.	MEAN 8 A.M PRESSURE ANOMALY IN								
	October 1898.	November 1898.	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.	May 1899.	Mean of period.

Rajputana . . .	—·005	—·016	—·017	+·009	—·007	+·017	—·020	+·008	—·004

(3) Pressure has been generally in local excess in the Peninsula, Kathiawar, Berar, the Central Provinces and Central India, and there was a marked tendency to the establishment of an area of locally high pressure in Berar and the western districts of the Central Provinces in February, March and May. The area of greatest excess has varied slightly from month to month.. The following gives data:

Division.	MEAN 8 A.M. PRESSURE ANOMALY.								
	October 1898.	November 1893.	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.	May 1899.	Mean of period.

These conditions were established at the end of the rains in December and have been fairly persistent up to the present time.

(4) Pressure was generally in relative excess at the hill stations, or the vertical pressure anomalies were positive in February, March and May and in relative defect in January and April. On the mean of the period—January to May—pressure has been in moderate to considerable relative excess. The following gives data for seven pairs of stations:

Pair of stations.	MEAN 8 A.M. VERTICAL PRESSURE ANOMALY IN

(5) Temperature is, on the mean of the whole period, in excess over North-Western India. It was in general excess in February, March and May. The excess was moderate to considerable in North-Western India and large in Upper India in May. The disturbed weather of January and April reduced it below the normal. The following gives comparative data of the variations of the mean daily temperature for the whole of Burma, Northern and Central India and the Peninsula, month by month, from January to May 1898.

Province or Division.	VARIATION FROM NORMAL OF MEAN DAILY TEMPERATURE.

(6) The air has been much drier than usual during the greater part of the period over nearly the whole of the interior and more especially in Rajputana, Central India, Berar, the Central Provinces and Deccan. The decreased humidity was in part due to increased temperature and in part to the presence of a smaller amount of aqueous vapour than usual in the air.

The following gives comparative data for fourteen representative stations:

Station.	Variation from normal of mean relative humidity (i.e., percentage of saturation).						Mean of period.
	November 1898.	December 1898.	January 1899.	February 1899.	March 1899.	April 1899.

Bellary	−5	−2	−12	+3	−3	+3	−3

(7) The distribution of cold and hot weather rainfall has been unusual. The rainfall of both seasons was slightly above the normal in Bengal and Bihar. The cold weather rainfall was in considerable to large defect in the Punjab, Sind, Rajputana, Gujarat, Central India, the Central Provinces and Berar. Over the greater part of that area practically no rain fell. The rainfall was in excess in the hot weather season over nearly the whole of Northern India and Burma. The excess was considerable (over 30 per cent.) in Bihar, Chota Nagpur, Orissa, Sind and Berar.

The following gives comparative data showing its distribution in both seasons:

Province or Division.	Cold weather rainfall (January and February 1899).				Hot weather rainfall (from 26th February to 30th May 1899).

Summary.—The following is a summary of the chief features of the meteorology of India during the past five months, which are most likely to influence the advance of the monsoon currents and the distribution of the monsoon rainfall:

(1) The snowfall of the past winter has undoubtedly been much less than usual over the whole of the Western Himalayas and also in Afghanistan, Baluchistan and Persia. It was probably in local excess in Kashmir and also in Kumaon and Garhwal. The snowfall was distributed fairly throughout the season, and there is no abnormal accumulation at the end of May except perhaps on the higher ranges in Kashmir.

(2) The snowfall of the past winter has been heavier than usual in the Sikkim and Assam Himalayas.

(3) The pressure conditions in India during the past five months were such as accompany higher temperature in Northern India and less snowfall than usual in the Western Himalayas. The chief features, which have been fairly persistent, are (*a*) general

deficiency of pressure, (*b*) local deficiency in Northern India and Burma, most marked in Bengal and the Punjab, and (*c*) local excess in the Peninsula and Central India, greatest in Berar, the Konkan, Malabar and West Deccan.

(4) The temperature conditions during the past five months were such as usually accompany a drier winter than usual in the Himalayan area—more especially in the lower and middle ranges. Temperature was in moderate excess in February and March in Northern and Central India and in large excess in Upper India in May.

(5) The air has been throughout nearly the whole season much drier than usual and skies remarkably free from cloud.

(6) The air movement was more vigorous than usual in March and May, due to the intensified thermal conditions of the period in the interior of India.

(7) The snowfall in the Western Himalayan area has been of such a character as not to impress any conditions upon the pressure distribution, temperature and air movement in Northern and Central India unfavourable to the early or full extension of the monsoon currents in their progress northwards from the Equator.

(8) The influence of heavy snowfall in the Assam Himalayas has not yet, in the absence of sufficient reliable data, been investigated.

It may be noted that some of the abnormal features of the meteorology of India during the past seven months have been related to abnormal conditions prevailing in Persia and South-Eastern Europe. Anti-cyclonic conditions obtained to a most unusual degree in Southern Europe from November onward, and, as a consequence, cool dry north-west winds prevailed in Persia with remarkable persistence from November to February. This abnormal air movement extended across Baluchistan and the north of the Arabian Sea into North-Western India, and undoubtedly contributed to the unusual dryness of the air and freedom from severe cold-weather storms of the period in Northern and Central India.

COMPARISON WITH PREVIOUS YEARS.

During the past twenty-one years the snowfall in the Himalayas was below the average in the years 1879, 1880, 1881, 1882, 1890, 1892, 1896 and 1898. The deficiency in 1890 and 1892 was very large, and these years are not strictly comparable with the present year.

The conditions of the years 1881 and 1896 also differed largely from those of the present year and are not comparable.

The following gives a very brief statement of the chief features of the meteorology of the years 1879, 1880, 1882, 1887, 1890, 1892, 1894 and 1895:

1879.—The snowfall was very light and considerably below the normal in the North-Western Himalayas. Very heavy snow had fallen during the preceding winters of 1876-77 and 1877-78. Pressure was generally in defect, the deficiency being greatest in April and May, when it averaged ·03 inch for the whole of India. The local variations of pressure were not strongly marked or persistent.

In the month of May pressure were locally in defect in the west of the Peninsula, more especially in the Gulf of Cambay, and was in excess in Upper India. Temperature was in excess in January, February, April and May. The excess was large in amount in April and May, and averaged 4° in the Punjab, where it was greatest. The rains set in over Bengal fully on the 14th June and commenced at Bombay on the 1st, but were not strong before the 24th The rainfall of the south-west monsoon period was more or less in excess over the whole of India, except the Punjab, where it was in moderate defect, and in parts of Bengal and Madras, where it was slightly below the normal. The rains ceased in Upper India on the 29th September.

1880.—The winter snowfall was in moderate defect in the Western Himalayas and the cold-weather rainfall below the normal to a moderate extent in Northern India. Pressure was in general defect from January to May. The deficiency was largest in January (·033″) and averaged ·023″ for the whole period. Pressure was locally in excess in the Peninsula, the excess being most marked at the west coast stations from Bombay to Calicut. It was locally deficient in Northern India, the deficiency being most marked in the Punjab, where it averaged ·05″. These large local pressure variations were fairly persistent from March to May. The excess was most marked in the Punjab during the whole period. It averaged 7½° in March, 6° in April and 3½° in May. The rains commenced on the 2nd of June in Bengal and on the 6th at Bombay, but both currents were at first feeble. Very heavy rain fell in the Punjab in July, and the weather was stormy with much snow in the hill districts. This was followed by a prolonged break in the rains, lasting throughout nearly the whole of August. The rains ceased in Upper India on the 24th September. The rainfall of the south-west monsoon period was largely in defect in the Punjab, North-Western Provinces, Rajputana and Central India and in moderate defect in the Central Provinces and Berar. It was in excess in North-Eastern India, Burma and Madras.

1882.—The snowfall of the winter of 1881-82 in the Western Himalayas was below the normal (probably to a slight extent) and the winter rains in Northern India in moderate defect. The variations of pressure and temperature from the normal during the pre-monsoon period—January to May—were small and apparently of little importance. They, however, indicated the prevalence of approximately normal conditions. The rains commenced on the 2nd June at Bombay and on the 11th June in Bengal. The Bombay current was strong and gave very heavy rain in June and July. The Bengal current was feeble in these two months, but was vigorous in August. The rains ceased on the 15th September in Upper India The rainfall in the districts and provinces dependent on the Bombay current was abundant, whilst North-Eastern India (*i.e.*, Assam, Bengal, Bihar and the North-Western Provinces) obtained smaller amounts than usual. The deficiency was small, except in some parts of Bengal.

1887.—The cold weather was unusually free from cold-weather storms. Although little rain fell in the plains of Northern India, moderately heavy snow is stated to have fallen in January and March in the Western Himalayas. March and April were warmer than usual in North-Western India and the Central Provinces, and May was an excessively hot month in Upper and Central India. Pressure was in slight to moderate defect on the average of the whole of India during the period—January to May. It was, relatively to the general condition, in considerable defect in Northern India in May, the deficiency being large in Upper India (—·05″) and moderate in North-Eastern India. It was in considerable excess in the west of the Peninsula, the excess averaging ·06 inch in the Konkan and Malabar coast districts. The mean temperature of the month of May was 6° above the normal in the Punjab and 3° in the North-Western Provinces. The Bengal current set in earlier than usual at the end of May and the Bombay current about the normal time in the first week of June. Both currents gave fairly steady rain during the months of June, July and August. They retreated from Upper and Central India at the end of the third week of September. The monsoon rainfall was in slight defect in Arakan, Bengal, Assam and Orissa, normal in Burma and the Deccan and in excess over nearly the whole of North-Western and Central India and the Central Provinces.

1890.—The cold weather of 1889-90 was unusually dry in Northern India, and the snowfall in the Western Himalayas and Afghan mountains much below the normal amount. The snowfall in the Eastern Himalayas was also in slight to moderate defect. No rain fell in Rajputana in January and February 1890, and the North-Western Provinces and the Punjab received total average amounts of one-fifth and one-third of the normal amounts respectively. Temperature was considerably above the normal in January and February, the excess being greatest in Upper India, where it averaged 2½°. The hot weather was also drier than usual, and temperature was in moderate excess, averaging in the

Punjab, where it was greatest, 1½°. Pressure was generally in defect over India during this period by moderate amounts. Pressure was locally in defect in Northern India, the deficiency being most marked in the north of the Bay. It was locally in excess in the Peninsula and North-West India, the excess being largest in Kathiawar, Gujarat, Berar and the North Bombay Deccan, where it ranged from ·03 inch to ·044 inch. The rains commenced on the Bombay Coast on the 1st June and in Bengal feebly on the 7th and fully on the 19th. The rainfall of the south-west monsoon period (June to October) was more or less in excess in Northern India, the Konkan, the Central Provinces and Hyderabad, the excess being greatest in Bihar and the North-Western Provinces. It was in moderate defect in Burma, Southern India and Ceylon and in large defect in Gujarat, Sind and Cutch and to a less extent in Western Rajputana. The rains ceased in Upper India on the 27th of September.

1892.—The cold-weather rainfall of 1891-92 was abnormally small in amount and in large defect in Upper India. Pressure was in general defect at the level of the plains and was in considerable relative excess at the hill stations. Temperature was above the normal over the whole of India during the cold-weather by amounts averaging 2°. The excess was greatest in the Central Provinces, Berar and Central India. The air was much drier than usual and cloud in general defect.

The hot-weather conditions were very strongly marked. Temperature was in general excess and was most largely above the normal in Upper India, where the maximum temperature of the whole period—March to May—averaged about 6° above the normal and the minimum temperature 3½°. Burma and Assam received much heavier rain than usual and Bengal its normal amount. Over the remainder of India with the exception of the west coast districts the season was unusually dry and the rainfall very small in amount and much below the normal of the period.

The chief features of the pre-monsoon distribution of pressure were a considerable local deficiency in Northern India, greatest in amount in Upper India and a moderate to considerable local excess in the west of the Peninsula and North Bombay.

The rains commenced in the first week of June on the west coast and advanced very rapidly to Upper India. The advance was not permanent and the current withdrew from North-Western and Central India on the 17th and 18th. A first advance of the monsoon winds occurred in Bengal in the second week of the month. This was followed by their withdrawal in the third week of the month, and dry westerly winds prevailed over the Gangetic Plain until the end of the month. The permanent advance of the monsoon currents took place in the first week of July on the west coast and in the second week in Bengal. The currents extended rapidly over the whole of India and prevailed with unusual steadiness during the remainder of July and in August and September. The rainfall of the monsoon period—June to September—was more or less considerably in excess in the whole of India, with the exception of East, South and Central Bengal and Burma.

1894.—Moderate to heavy snow fell in the Western Himalayas in January and February. The snowfall in Baluchistan and Afghanistan was less than the normal. The snowfall did not come down to so low an elevation as in the preceding winter. Little or no rain fell in April and May. Temperature which was below the normal to a slight extent in Northern India during the cold weather increased rapidly in April and May and was largely in excess in the latter month, the area of greatest excess including Bihar, Chota Nagpur and the eastern districts of the Central Provinces. Pressure was in May locally in considerable defect in Northern India and in considerable excess in the western half of the Peninsula. The south-west monsoon rains set in somewhat later than usual during the first four days of June on the Malabar Coast. The monsoon currents advanced with unusual rapidity into the interior of Northern India and monsoon conditions were established over the whole of India before the end of the third week of the month. The rainfall was in general excess. It was very unequally distributed in June and July, due to the occurrence of a series of cyclonic storms of unusual

intensity. Those districts which received deficient rain in June and July, as a rule, obtained abundant and well-distributed rain in August and September, and the rainfall for the complete period—June to September—was on the whole favourable and well-distributed. The rains were, however, prolonged to the first week of November in the North-Western Provinces, and that area received a succession of downpours such as had not been experienced in those months during the previous fifty years.

1895.—The winter began earlier than usual in Baluchistan and Upper India. Numerous feeble disturbances in December and January gave heavy snow in the Punjab and Kashmir Himalayas. February was dry and temperature from 2° to 5° above the normal in Upper India. Weather was disturbed and showery over the hills in Upper India in March, but was abnormally dry in Cachar and East Bengal. It was disturbed with frequent series of thunderstorms in April in the Deccan and Southern India, and the rainfall of the month was in very large excess in these two areas. Burma received heavy rain in the last week of April (from a cyclonic storm) and in May. Pressure in May was in relative defect in Northern India and in excess in the Peninsula. The deficiency was greatest in the Punjab and the excess greatest in the Konkan and Malabar. Temperature was generally in excess—more especially in the Punjab (+6°) and Rajputana (+4°). The rains commenced nearly a fortnight later than usual on the Bombay Coast, and the monsoon currents were unusually feeble and unsteady.

The rainfall was in general defect in July. The currents withdrew from Upper India in the first week of September and from Bengal and Burma in the second week of October, and hence considerably earlier than usual over the whole of Northern and Central India. The monsoon rainfall was in defect over nearly the whole of India, and the deficiency was considerable in Upper and Central India.

GENERAL CONDITIONS IN THE INDIA MONSOON AREA AND INDIAN OCEAN.

The rainfall of the past year averaged 0·43 inch or one per cent. above the normal for the whole Indian area. It was pointed out in last year's forecast that the six years—1892-97—had been characterized by a cyclical variation of rainfall more prolonged in its period and of larger amount than has probably occurred in India during the present century. It was also stated in the forecast that the cycle was probably completed in 1897, and that a period of fairly normal conditions might be expected for some years in the Indian monsoon and the south-east trades region. This inference was in accordance with fact last year.

The experience of the cyclical period—1892-97—in India emphasized the necessity of considering the variations in the strength of the south-east trades circulation.

Theory indicates that any large and persistent variation in the strength of the south-east trades would be reproduced in the strength of the south-west monsoon. The variations in the strength of the south-east trades have been probably the chief or primary factor in determining the variations in the south-west monsoon in India during the past seven years. It is hence desirable to ascertain the chief meteorological features of the areas dominated by the south-east trades during the past three or four months, in the hope that this information may give a valuable indication, at the present time, of the probable strength of the approaching monsoon. The following is a summary of the information received, partly by telegrams from the Seychelles, Zanzibar, Mauritius and Cape Town and partly from the logs of ships regarding this important factor:

Seychelles.—The weather telegrams received during May from this station indicate that pressure was slightly higher than usual during the month, but normal at the end of the month. Winds were unsteady at the beginning of the month, but steady from south-east and stronger than usual during the last fortnight of the month. The weather at the end of the month was squally and showery. Vessels arriving from Madagascar reported stronger south-east trades than usual.

Zanzibar.—Pressure was above the normal to a slight extent throughout the month. Winds were normal in direction and somewhat stronger than the normal.

Mauritius.—Pressure was normal during the month, and gradients were normal or very slightly stronger than usual in the south-east trades region at the end of the month. Winds averaged about 20 per cent. above their normal velocity. The rainfall of the month was below the normal.

Logs of ships.—The information received up to the end of May from ships crossing the Equatorial belt of the Indian Ocean is very scanty. At the beginning of April south-east trade winds extended as far north as Lat. 8° S., and hence considerably further north than at the same date in the previous year. They advanced to Lat. 3° S. in the first week of May and to the Equator in the third week of the month. Light variable winds as usual obtained over a wide belt to the north of the south-east trades region and light to gentle north-west to west-south-west winds over the south and centre of the Arabian Sea up to the 15th May.

The mail steamer *Clyde* had moderate to strong monsoon winds in the last week of the month between Long. 54° and 59° E. The S.S. *Devonshire* on her passage from Mombassa to Bombay had squally weather with unsteady winds and much rain, thunder and lightning as far north as Lat. 5° N. in the south-west of the Arabian Sea. The China mail steamer *Coromandel* in her passage from Penang to Colombo (from the 20th to the 24th May) had moderate to strong south-west winds and frequent heavy rain squalls.

The information indicates that the south-east trades were probably slightly stronger than usual at the end of the month, and that conditions were favourable for their early extension as south-west monsoon winds into the Arabian Sea.

FORECAST OF THE SOUTH-WEST MONSOON OF 1899 IN INDIA.

In the preceding pages have been given, for future reference, the whole of the available data utilized in the preparation of the forecast.

Brief summaries of the more important features of the snowfall in the Himalayan area during the past winter, of the meteorology of India and the adjacent countries to the north-west and of the Indian Seas and the south-east trades region are given in pages 14, 15, 16, 24, 25, and 29.

Ordinary readers are referred to these summaries as containing the more important facts upon which the forecast is based.

As was pointed out in last year's forecast, the remarkable period (chiefly shown by cyclical variation of rainfall) through which India has recently passed terminated in 1897, and a period of fairly normal conditions appears to be now probable for two or three years at least.

The information from the Seychelles, Zanzibar and Mauritius, although very limited, indicates that the strength of the south-east trades, which is an important factor is above the normal, but to what extent cannot be judged.

The summary of the snowfall information indicates that in the Eastern Himalayas the snowfall has been greater than usual. Similar heavy snowfall was reported to have been received in the Assam Himalayas in the years 1887 and 1893. The monsoon rains were heavier than usual in both years, generally in India and also locally in Assam in 1893. In the absence of more definite and accurate information, it can only be accepted as probable that heavy snowfall in the Assam Himalayas exercises little influence on the distribution of the monsoon rainfall.

The snowfall in the Western Himalayas has undoubtedly been, on the whole, more or less below the normal. The deficiency was marked in the lower and middle ranges, and the extent of snow-clad surface is at the present time hence almost certainly not above and is probably below the normal. This is strongly confirmed by the pressure and temperature conditions in Upper India. The only unfavourable feature has been the frequent occurrence of light snow in March and April. Untimely snow in April and May chiefly affects the Bombay current. It usually retards the advent of that current more or less, and affects its strength unfavourably during the early stages (chiefly in the month of June). It is, however, very probable that any influence this late snowfall in April may have is very slight.

The most noteworthy feature of the past cold weather has been the scanty rain and snow in Baluchistan and Afghanistan and also in Persia. The precipitation in the Persian area (which occurs chiefly in the winter) has, so far as can be judged from the data of the four stations which supply the Meteorological Department with observations and weather telegrams, been more or less below the normal continuously during the past five years. The deficiency has been large and marked during the past two years. The conditions in Persia apparently exercise little direct influence on the distribution of the monsoon rainfall. They have, however, an important bearing, as they indicate that the deficient snowfall in the Western Himalayas, Afghanistan and Baluchistan during the past winter has not been due to local conditions in North-Western India, but to conditions extending over a very much larger area and hence probably of great persistence and importance.

Taking the above facts into consideration, it is very probable the monsoon currents will be at least of normal strength.

Judging only *from the conditions in India itself and the known conditions in the Indian Seas*, it is on the whole very probable that the monsoon currents will be of normal strength, and probably they will be somewhat stronger than usual. The Bombay current is more likely to be above its normal strength than the Bay current, but the probabilities for this are small, not exceeding 2 to 1.

Assuming that the currents will be of normal strength, the comparison with previous years of similar conditions (more especially 1880, 1887, 1892 and 1894) indicates that it is probable they will set in about the normal dates on both the Bengal and Bombay Coasts.

The rains will probably commence not later than the end of the first week of June on the Bombay Coast and in the latter part of the second week or the beginning of the third week of June on the Bengal Coast.

The chief features or local conditions in India which have to be taken into account in estimating the probable distribution of rainfall during the approaching monsoon due to normal or slightly stronger monsoon currents than usual are:

(1) The distribution of the winter snowfall in the mountain areas to the north and north-west of India (*vide* page 14).

(2) The abnormal features of the pressure, temperature and humidity conditions of the past five months and more especially in May (*vide* pages 21-25).

(3) Heavy local rainfall in Burma and Bengal in April and May 1899 and in the Peninsula in April. The former generally accompanies drier seasons than usual in Upper India, and although of unusual amount in the present year, it is not exceptional in character and is hence of no especial importance. Heavy rainfall in the Peninsula occurred in April 1878, May 1886 and April 1895. The rainfall of the monsoon of 1895 was chiefly determined by the causes producing the cyclical variation of 1892-97 and was considerably below the normal. The rains in 1878 and 1886 were generally favourable and in excess.

The following inferences respecting the distribution of the south-west monsoon rains of 1899 are deduced from the comparison of the antecedent conditions of the present year with those of previous years and are based chiefly on the facts and data stated above:

(1) The conditions in the Indian Seas and the Indian Ocean are, so far as can be ascertained, satisfactory and favourable, and indicate that the conditions in the south-east trades region are at least normal, and that the air movement in that area is somewhat stronger than usual.

(2) Conditions are favourable to the prevalence of monsoon currents of at least normal strength in the Bay of Bengal. The rains will probably commence slightly before or about the normal date in Bengal (*i.e.*, the 15th of June).

(3) Conditions are favourable to the prevalence of monsoon currents of at least normal strength in the Arabian Sea. They are also slightly more favourable in that sea than in the Bay. The influence of the late snowfall in April will very probably be very slight, and, so far as can be judged, the monsoon ought to set in on the Bombay Coast before the 8th of June.

(4) Conditions are favourable in Burma, and it will probably receive at least normal rain. The rainfall is more likely to be in excess in Lower Burma than in Upper Burma.

(5) Conditions are slightly unfavourable in North Bengal and Assam. The rainfall on the mean of the whole area will very probably not be above the normal and probably be in slight to moderate defect.

(6) Conditions are favourable in West, South and East Bengal—more especially in the two latter areas, and the rainfall of the south-west monsoon period will be very probably normal and probably in excess in South and East Bengal, and normal or in slight defect in West Bengal and Orissa.

(7) Conditions are slightly unfavourable in Bihar and Chota Nagpur, due to the deficiency of pressure in Bengal and Assam, and the rainfall on the average of the whole area will very probably not be above the normal and probably be in defect to a slight extent. Conditions are slightly more favourable in Chota Nagpur than Bihar.

(8) Conditions are, on the whole, favourable for normal rain in the North-Western Provinces. There is a slight probability, based chiefly on the pressure conditions in the Punjab, that the rainfall of the whole area may be in slight to moderate excess. It is more probable the rainfall will be in excess in the western than the eastern districts.

(9) Conditions are favourable in the Punjab. The pressure conditions of May (more especially the deficiency in the West Punjab) strongly resemble those of May 1880, 1892 and 1894. Comparison with these years indicates that the monsoon rainfall of the present year will probably be above the normal. The character of the rainfall in this area, however, depends chiefly on the general strength of the monsoon and not on the local conditions, and these conclusions should be suitably modified if the monsoon turns out to be much weaker than is anticipated in the forecast, in which case the rainfall may be below the normal to a moderate extent in the West and Central Punjab and normal or in slight defect in the East Punjab.

(10) Conditions are, on the whole, favourable in Rajputana—more especially in the eastern and central districts, due to the same conditions as in the Punjab. The monsoon rainfall will hence very probably be at least normal in the eastern and central districts and probably in moderate excess. It will probably be about normal in the western states. The rainfall in these areas, as in the Punjab, depends chiefly on the general strength of the monsoon and hence, if the Bombay monsoon current be weak, the rainfall will be normal or in slight defect.

(11) Conditions are about as favourable in Central India as in the North-Western Provinces, and it is probable that it will receive at least normal rainfall. The rainfall is more likely to be in excess in the eastern than the western states.

(12) Conditions are, on the whole, favourable in the Central Provinces and to a slightly less extent in Hyderabad. It is hence probable that they will receive at least normal rainfall. The conditions are more

favourable in the eastern than the western districts of the Central Provinces, and it is hence probable that the eastern districts may receive rainfall in slight to moderate excess of the normal.

(13) Conditions are not quite so favourable in Berar and Khandesh, and the rainfall in these areas will probably not be above the normal and may be in slight defect. They are also slightly unfavourable in the West Deccan, and that area will very probably not receive more than its normal fall and probably less.

(14) The conditions in the west coast districts are such as are in normal monsoons associated with at least normal rainfall. It is hence very probable that the rainfall of the present year's south-west monsoon will be at least normal in those districts, and probably it may be in slight to moderate excess.

(15) The variations of the rainfall in the North Madras coast districts are in at least five years out of six similar to those of Orissa and the Central Provinces. Conditions appear to be on the whole favourable, and it is probable those districts will receive about normal rain.

(16) A comparison of the conditions in the Madras Deccan, Mysore and the Carnatic with those of similar years indicates that the rainfall during the period—June to August—will probably be in slight defect—more especially in Mysore. It is, however, very difficult to forecast for this part of India, as rain in the southern half of the Peninsula during the monsoon proper occurs chiefly during the intervals of breaks in the rains of Northern India, and is hence essentially of irregular occurrence.

It should be carefully noted that the preceding probabilities are obtained on the assumption that the currents will be slightly stronger than usual, and that they will require to be suitably modified, if the monsoon currents should be weaker than usual. It should also be noted that the chances for an inference stated to be very probable are at least 5 to 1 and for an inference stated to be probable are at least 5 to 2.

The general conclusions are, 1st, that the rainfall over the Indian area during the approaching monsoon will on the average of the whole area probably be slightly above the normal, 2nd, that it may be in slight to moderate local defect in Assam, North Bengal, Bihar, Berar, the Bombay Deccan and Mysore, 3rd, about normal in Chota Nagpur, Orissa, West Bengal, the North-Western Provinces, the Central Provinces, and Hyderabad, and 4th, in slight to moderate excess in Lower Burma, South Bengal, the Punjab, Rajputana and Central India.

As already pointed out, these conclusions should be suitably modified if the monsoon currents should turn out to be considerably stronger or weaker than was anticipated in the forecast from the very imperfect and scanty data available on this point.

It is too early to estimate the probability of a longish break in the rains in July or August, but there are no indications at present of such an event.

JOHN ELIOT,

Meteorological Reporter to the Government of India and Director General of Observatories in India.

SIMLA;
Dated 6th June, 1899.

M. FINUCANE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 3rd, 1899.

Throughout the present week pressure has been low over Northern India and high in the extreme south-east, south and south-west At first gradients were steep and the winds strong, but as the week advanced, pressure increased in the north and decreased in the south, and barometric readings became more uniform. The most marked and the most important feature in the weather during the week under review has been the abnormally high pressure which has held steadily over a large part of North-Western and Western India during the greater part of the week. This area of abnormally high pressure apparently interrupted the flow of monsoon winds towards India, and the week was noticeable for a marked absence of rain along the west coasts of India and of Ceylon. On the opposite side of India conditions were less abnormal. Southerly winds from the Bay blew steadily over Burma and into Assam and North Bengal, and all over the area affected by these winds rain fell daily and in some cases heavily. With the exception of this region, the weather was fine, and consequently the heat was very generally greater than usual, as at this season a good deal of cooling rainfall is anticipated as the monsoon current advances northward along the west coast.

Daily Summary—*Sunday, May 28th.*—A small depression, in which the barometer read about 0·30 inch below the normal, lay over the Central Punjab, while pressure was high and about the normal in Malabar and Ceylon. Pressure differences were consequently large, and the winds, which blew from cyclonic directions in the Punjab, from west across India, from south-east in Burma and from east along the foot of the hills, were strong to a gale in force in some places. The weather was disturbed and showery over Burma, Assam, North Bengal and the south-west of the Peninsula. The amounts were large in Deltaic Burma. The heat was less than usual over North Bombay, the west of the Central Provinces and a large part of the Peninsula as well as over Lower Burma. Elsewhere the heat was excessive.

Monday, May 29th.—Pressure had increased fast in the North and West Punjab, and the depression noticed over that province had been pushed southward, but elsewhere there had been no important change, and pressure differences were still large. Northerly winds had appeared over the West Punjab, but in other parts of the country there had been no important change. The force remained high. The weather remained showery over Burma, East and North Bengal, Assam and the south-west of the Peninsula. The heaviest rainfall was reported from Tenasserim. The heat was greater than usual over West and South-West Bengal, North-West India, the Central Provinces and the Madras Coast, but was less than the normal elsewhere.

Tuesday, May 30th.—Pressure had increased everywhere. The change had been brisk to rapid in the north and centre and slight in the south, so that, though the general conditions of pressure were unchanged, the pressure differences had diminished. The winds were lighter than on the two preceding days, but an important change was in progress along the west coast where the wind direction was shifting toward north, and pressure had risen to above the normal. Cloudy, showery, weather had continued over Burma and North-East India and the south-west of the Peninsula, and unsettled weather with light thundershowers was reported from the North-West Himalayas. The mean temperature was low over the Indus Valley, North Bombay, Central India and part of the west of the Peninsula as well as over Lower Burma and Tenasserim. Elsewhere the heat was excessive.

Wednesday, May 31st.—Pressure had again increased. The rise had been greatest at some western stations, and the barometer read higher than usual over a large part of Western and North-Western India. There had been further northing in the winds over the Peninsula, etc., where the direction was nearly due north along the coast and north-west over the Central Provinces and the centre and east of the Peninsula. In most other places the winds were little changed, but over the Gangetic Plain calms and variable airs prevailed. Showers continued to be reported from Burma, Assam, parts of Bengal and the North-West Himalayas and the south-west of the Peninsula. The rainfall amounts were again heavy over Deltaic Burma. Elsewhere the weather was fine. The temperature distribution was little changed; the heat was generally less than usual over a large part of North-Western and Western India and Lower Burma and generally greater than usual elsewhere.

Thursday, June 1st.—Pressure had increased over North-West India and over Burma, but had decreased in the intervening region. Pressure remained abnormally high over a large part of Western India. North-westerly winds continued over the Peninsula, westerly winds in North Bombay and the South Gangetic Plain, south-westerly to south-easterly winds over Burma and Lower Bengal and easterly winds close to the hills. The westerly and north-westerly winds were fresh to strong. The weather had become finer, and the rain ceased along the west coast and over the North-West Himalayas, but showers continued to be reported from Burma and North-East India. The mean temperature remained low over North Bombay, part of the west of the Peninsula and over Lower Burma. Elsewhere the heat was excessive.

Friday, June 2nd.—Pressure had changed irregularly, but had on the whole fallen. Pressure remained lowest over Northern India and highest in the extreme south, but there was apparently at the same time an area of relatively low pressure and of unsettled weather over the Bay in about Lat. 14°N. The winds were practically unchanged, the most marked features of the wind circulation being the north-westerly winds over the Central Provinces and the Peninsula and the southerly winds in Burma. The force had fallen, and along the west coast the wind was unusually light. Showery weather continued in the north-east, but elsewhere the weather was fine, and along the west coast there was none of the usual heavy rain. Temperature conditions were little changed and, except in Burma, the West Punjab and a large part of Bombay, where the weather was cool, the heat was greater than usual.

Saturday, June 3rd.—The barometer had fallen over the Indus Valley, but had changed slightly and irregularly elsewhere. Pressure had become more uniform over the west of the Peninsula, but elsewhere there had been no important change. The northerly winds along the west coast had died down and been succeeded by variable south-westerly to south-easterly winds. In the Central Provinces and the centre and west of the Peninsula north-westerly winds continued, while in Burma and Bengal southerly and south-easterly winds were again reported. There had been no general rain except in Burma and Assam, but one or two showers were reported from the Peninsula. The air had become very dry in Upper India. Temperature had changed irregularly, and the variations from the normal were large in some parts of the country. The principal were —10·3° at Quetta, —6·6° at Jacobabad, +8·5° at Chanda, —5·6° at Coconada and —3·3° at Silchar.

Temperature.—There has, as mentioned above, been very little rain over India except in the north east, and the mean temperature of the whole country has been very generally excessive. It was, however, remarkable that an area of very low temperature appeared during the week over Baluchistan, and these low temperatures, carried by the north-north-westerly wind which prevailed over Western India, extended southward over the greater part of Bombay, so that, notwithstanding the absence of the usual rainfall along this coast, the heat remained less than usual. In Burma the temperature was lower than usual, particularly at the commencement of the week, but in the remaining provinces the heat was excessive, the greatest excess being reported from Chota Nagpur.

The following table gives the mean temperature variation data for the week:

Province.	28th May to 3rd June 1899.							Mean variation of week.
	28th	29th	30th	31st	1st June	2nd	3rd	
	°	°	°	°	°	°	°	°
Burma	—4·0	—0·3	—1·0	—0·2	—0·2	—0·5	+0·1	—0·9

Mean for whole of India	+1·1	+1·1	+1·2	+1·3	+1·8	+2·1	+1·5	+1·4

The mean temperature of the whole country on each day of the week was above the normal, the excess having been greatest on June 1st and 2nd.

The following were the highest maxima reported on each day:

May 28th	. . . . . .	118·0°	at	Jacobabad.
„ 29th	. . . . . .	114·2°	„	Do.
„ 30th	. . . . . .	112·7°	„	Do.
„ 31st	. . . . . .	112·2°	„	Do.
June 1st	. . . . . .	113·2°	„	Mainpuri.
„ 2nd	. . . . . .	113·6°	„	Cawnpore.
„ 3rd	. . . . . .	114·2°	„	Chanda.

Rain.—The rainfall of the week under review has been less general and less heavy than during the preceding week. Practically no rain fell over West Bengal, the North-West Provinces, the Punjab (except on and near the Hills), the central parts of India, North Bombay and some east coast districts. Rain was hence confined to Burma, Assam and Bengal proper, all of which districts were under the influence of the southerly and south-easterly winds, which blew up from the Bay bringing much moisture with them and to the west and south-west of the Peninsula which districts were under the influence of slight intermittent advances of moist wind from the Arabian Sea. In addition to the above, there were occasional showers during the week over the Punjab Hills and at some places in Madras, but these showers, which ordinarily accompanied dust or thunder storms, were local and generally light, so that they were only of slight importance. The rainfall returns show that during the week rain fell in Burma on each day; in Assam on each day; in East Bengal principally on the 2nd and in other parts of Bengal principally on the 29th, 30th and 31st; in the Punjab Hills on the 29th and 30th; in the west of the Peninsula on the 28th, 29th, 30th and 31st and in the Madras districts on the 28th. The rainfall table at the

close of the summary shows that effective rain fell during the week in twenty-nine of the rainfall divisions, while in the other twenty-eight divisions the rainfall was either actually or practically *nil*. Within the region of effective rainfall the average actual falls ranged from 10·04 inches in Tenasserim, 9·00 inches in Arakan, 7·76 inches in the Surma division of Assam, 7·57 inches in the Hill division of Assam, 6·34 inches in Deltaic Burma and 5·27 inches in the Bengal Hills, to 0·12 inch in Orissa, 0·13 inch in the North Punjab and Khandesh, 0·15 inch in the Bombay Deccan and 0·12 inch in Central Madras. Except in Tenasserim and parts of Assam and Bengal, where the rainfall as shown above was heavy, the average actual rainfall was lighter than usual, the principal cases of deficiency having been between one inch and one inch and a half in Central Burma, Upper Burma, Arakan, the Assam Valley, Deltaic Bengal, Central Bengal, Malabar and Coorg. On the other hand, there was an excess of over two inches in the Surma Valley and of over one inch in Tenasserim, Deltaic Burma and the Bengal Hills.

The following were the principal large totals recorded at individual stations during the week:

Burma . . .	Moulmein	10·04 inches.
	Kyaukpyu	12·43 „
Assam . . .	Cherra Poonjee	20·87 „
	Sunamgunj	15·56 „
Bengal . . .	Netrokona (Mymensingh) . .	8·35 „
	Matabhaza (Cooch Behar) . .	12·82 „
Malabar . . .	Cannanore	6·12 „
Konkan . . .	Bhatkal (Karwar)	8·09 „
Madras . . .	Tirupathur (Madura) . . .	2·22 „

The three concluding columns of the table show the average actual and average normal rainfall for the whole period from February 26th to June 3rd. The total actual fall has been short of the total normal fall by 20 per cent. or more in South Bihar, the west submontane division of the North-West Provinces, the hill division of the North-West Provinces, all the Punjab divisions, the west and central divisions of the Central Provinces, Gujarat, Kathiawar, Central India, Rajputana and Hyderabad (South). In all the other divisions the rainfall was about normal or more or less in excess. In Western Rajputana no rain whatever has fallen throughout the whole period, and in Gujarat, Kathiawar and the West and South Punjab the total amount for the whole period has been insignificant. March was a dry month almost everywhere, the only exceptions being Sind on the one side and Assam and North Bengal on the other and on the 1st of April only six divisions exhibited any excess of rain, while many divisions had received either no rain whatever or only insignificant amounts. April was a much more disturbed month—more especially over the Peninsula, and at the end of the month the rainfall showed an excess except in Burma, the North-West Provinces, the Punjab, the central districts and North Bombay. May was wetter than usual in the north east, but elsewhere the rainfall was about normal, though quite at the close of the month the burst of rain which occasionally occurs along the Malabar Coast was wanting on this occasion.

PROVINCE.	DIVISION.	Rainfall data for week ending June 3rd, 1899.			Rainfall data from February 26th to June 3rd, 1899.

W. L. DALLAS,
for *Meteorological Reporter to the Government of India.*

SIMLA, *8th June, 1899.*

M. FINUCANE,
Offg. Secretary to the Government of India.

K

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 3rd June.*—There was moderate rainfall on the West Coast and on the hills and scattered showers elsewhere. The rainfall to date has generally exceeded the average. The water-supply is normal for the season and is improving in parts. Ploughing is general and sowing has begun on the West Coast. The standing crops are in good condition. Pasture is scanty, but fodder is available. Cattle are in normal condition. Prices are almost stationary.

Bombay.—*For week ending 8th June.*—There was rain in ten districts during the week, but the fall was generally light. Preparations for monsoon cultivation are progressing generally, and sowing is going on in seven districts. Fodder is sufficient, except in parts of Sind and Baroda territory. Agricultural stock is healthy. Prices have risen in seven and fallen in six districts; elsewhere they are stationary.

Bengal.—*For week ending 5th June.*—There was good general rain in the north and east of the Province; in other parts hot weather prevailed throughout the week and only scattered showers are reported. The general agricultural prospects continue satisfactory, but want of rain is felt in some districts. Ploughing and early sowings are proceeding and autumn rice and jute already sown are doing well. Sugarcane and other crops in the ground are in good condition. In the Sadar sub-division of Dacca the young paddy plants are being destroyed by locusts and insects, and insects have also appeared in places in Backergunge. Prices continue almost stationary. There is no want of fodder, except in one thana in Manbhum, as previously reported.

North-Western Provinces and Oudh.—*For week ending 7th June.*—Except for slight showers in a few districts, the weather during the week has been clear. Harvesting of extra crops continues in parts. Irrigation of indigo and sugarcane and weeding of the latter continue. Preparations for the autumn crop sowings are still in progress. Supplies and fodder are sufficient. Prices have slightly risen in a few districts, but otherwise they are stationary to falling.

Punjab.—*For week ending 8th June.*—Slight rain has fallen in parts of the Sialkot and Rawalpindi districts. Harvesting of the spring crops is nearly finished, and watering of extra spring crops and weeding of sugarcane, tobacco, and cotton are in progress. Rain is badly wanted for autumn sowings. The outturn of the spring crops is reported average or below average. Prospects of the extra spring crops are fair. The standing autumn crops are generally in fair condition. Cattle are getting lean, owing to the scarcity of fodder in Delhi, Shahpur, and parts of Hissar and Dera Ismail Khan; their condition is reported good from other districts. Fodder is scarce in Delhi, Shahpur, and parts of Hissar, Peshawar, and Dera Ismail Khan; but is sufficient elsewhere. Prices—especially of wheat—are rising in Umballa, Amritsar, and Rawalpindi; falling in Peshawar and Dera Ismail Khan; and are unchanged elsewhere. Wheat is selling from 16½ to 22½; gram 20 to 21; maize 28 to 33; barley 32; bulrush-millet 18 to 26; great millet 24; and rice 13½ to 14½ seers per rupee.

Central Provinces.—*For week ending 6th June.*—The weather has been very hot and occasionally cloudy. 3,522 and 2,237 persons are in receipt of relief in the Saugor and Damoh districts, respectively. Preparation of land for autumn sowings is in progress, and sowing of rice has commenced in parts of Bhandara and Sambalpur. Scarcity of water continues to be felt in parts of Saugor, Mandla, Chhindwara, Chanda, Bhandara, Nagpur, and Raipur. Fodder is scarce in parts of seven districts. The price of wheat, gram, rice, and *juar* has fallen in some districts and has risen in others. The cheapest prices are—wheat 21, gram 37, rice 21, and *juar* 29 seers per rupee; the dearest prices are—wheat 13, gram 18, rice 10, and *juar* 21 seers per rupee.

Burma.—*For week ending 3rd June.*—In Lower Burma ploughing for wet weather paddy has commenced in most districts. In Upper Burma reaping of dry weather paddy continues in parts of Pakôkku, Minbu, the Singu township of Mandalay, Katha, and Lower Chindwin, and is completed in the Yesagyo township of Pakôkku, Bhamo, and the Upper Chindwin. Sowing of paddy on the hill-sides of the Northern districts continues. Ploughing and sowing of early sesamum, cotton, and peas; and ploughing for early paddy crops continue in most districts. The early crop is being transplanted in Kyaukse. The condition of standing crops is generally good, but dry weather paddy has been injured by excessive rain in Minbu, the Bhamo sub-division of Bhamo, in three townships of Katha, and in the Legayaing sub-division of the Upper Chindwin. Price of paddy has fallen largely in Akyab; slightly in Myingyan; and has risen in Thaton and Thayetmyo; elsewhere it is stationary and generally below normal, except in Amherst and the Upper Chindwin.

Assam.—*For week ending 6th June.*—The weather is wet. Ploughing for late rice; sowing of early rice; planting of sugarcane; and plucking and manufacture of tea are in progress. Prospects of tea are fair, but blight is prevalent in parts of Darrang and Sibsagar. Early rice is partly damaged by insects and rain in Nowgong. Prices—common rice—Silchar and Dhubri 16, Sylhet 21, Gauhati 17, Tezpur, Sibsagar, and Dibrugarh 12, and Nowgong 15 seers per rupee.

Mysore and Coorg.—*For week ending 7th June.*—MYSORE: Rainfall—48 cents in the Civil and Military station and rain general in the Province. Prices have slightly risen in Kolar and Shimoga and fallen in Bangalore, Hassan, and Kadur. Paddy has been sown in Kolar, Tumkur, and Chitaldrug.

COORG: Rainfall—66 cents. Ploughing for rice and *ragi* (*Eleusine coracana*) continues. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 7th June.*—BERAR: The weather is warm and cloudy. Preparation of land for the monsoon crop continues. Fodder is scarce in the Wun district. The water-supply is insufficient in parts of five districts. Prices are steady.

HYDERABAD: Rainfall during the week—3 cents. The winter rice harvest is over. Preparations for the autumn sowings are going on. Prices of grain are steady. Prices—wheat 10, coarse rice 10½, and *jowari* 25¼ seers per current sicca rupee.

Central India.—*For week ending 7th June.*—Partial rain fell during the week in the Bhopal Agency. Agricultural operations have been completed in Gwalior, Bundelkhand, and Bhopawar. Agricultural stock and pasturage are in good condition. Prices are above normal in Bundelkhand and normal elsewhere.

Rajputana.—*For week ending 7th June.*—Rainfall—11 cents in Bikanir. Agricultural operations are proceeding satisfactorily. Agricultural stock is in fair to good condition, but is getting lean and emaciated in Kherwara. Fodder is scarce throughout the greater part of Rajputana. Prices are rising in two States, and there is a slight rise in Ajmere; they are fluctuating in Jhallawar and are steady elsewhere. Seven persons emigrated from Ajmere during the week. The total emigration from Merwara to date numbers—4,431. The numbers employed on relief works were—Ajmere 617, Merwara 5,292, and Marwar 950. There are also 311 on ordinary works and 237 on gratuitous relief in Ajmere-Merwara. Prices—Ajmere 18⅝, Beawar 18⅛, and Marwar 15 seers per rupee.

Kashmir.—*For week ending 6th June.*—The weather is fine. Prospects of spring crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

JAMMU PROVINCE.—*For week ending 7th June.*—No rain. Prices are generally stationary. Prices—wheat from 16 to 19 and maize 25 to 29 seers per rupee. The condition of the standing crops is fair. The spring crops are still being threshed and housed in some places. Sowings of autumn crops are still going on. Fodder is sufficient.

Nepal.—*For week ending 3rd June.*—Rainfall—0·95 inch. The weather is very warm. Wheat is being harvested. Rice—9½ seers per rupee.

M. FINUCANE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

INVENTIONS and DESIGNS.

Calcutta, the 9th June 1899.

NOTIFICATIONS.

No. 1758 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 3rd June 1899:—

No. 202 of 1899.—Basil John Atterbury, engineer, of New Malden, Surrey, England, and Thomas Macalpine, doctor of science and research chemist, of Chiswick, England. *New or improved production of acetylene compounds and of ethylene.*

No. 203 of 1899.—George Cornwall Winterbottom, gate-keeper, British India Steam Navigation Company, limited, Mazagon dock, Mazagon, Bombay. *Improvements in apparatus for the reduction of curry stuff to powder.*

No. 204 of 1899.—The Electric Resistance and Heating Company, limited, manufacturers, of 130 Dashwood House, New Broad street, in the city of London, England. *Electrical heating appliances formed of artificial stone.*

No. 205 of 1899.—The Electric Resistance and Heating Company, limited, manufacturers, of 130 Dashwood House, New Broad street, in the city of London, England. *Electrical resistances of artificial stone composition.*

No. 1759 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 296 of 1898.—B. L. Rajak, B.C.E., temporary engineer, State railways, at present at Pad Idan, N. W. Railway, Sind. *Recording the running condition of a railway, to be called "The running recorder."* (Specification filed 27 May 1899.)

No. 353 of 1898.—C. F. G. Dobson, of the postal department, General Post Office, Calcutta. *A filtering army water-bottle.* (Specification filed 10 May 1899.)

No. 361 of 1898.—Amrita Lal Chowdhuri, ferrule-maker, of 111 Musjidbari street, Calcutta. *A screwdown stop ferrule.* (Specification filed 17 April 1899.)

No. 86 of 1899.—Reginald Belfield, electrician, of 32 Victoria street, in the city of Westminster, England. *Improvements in electric brakes.* (Specification filed 26 May 1899.)

No. 128 of 1899.—Horace Lenoard Short, consulting mechanical engineer, of New Malden, in the County of Surrey, England. *Improvements in methods of, and apparatus for, increasing the volume of sounds from telephonic or phonographic instruments, and transmitting such sounds to distances.* (Specification filed 26 May 1899.)

No. 1760 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 254 of 1889.—Sandford James Kilby. *A combined weighing stand platform and hopper for facilitating the weighing and discharging of salt and other commodities.* (From 28 May 1899 to 28 May 1900.)

No. 90 of 1892.—Peter Ferguson, and William Young Fleming. *Improvements in motive power engines actuated by steam or other fluid pressure.* (From 18 July 1899 to 18 July 1900.)

No. 223 of 1893.—James Allen Magill. *A self adjustable metal packing ring for stuffing boxes used in locomotive engines.* (From 1 June 1899 to 1 June 1900.)

No. 352 of 1893.—Henry Thompson. *A new or improved process for rolling tea, and improvements in tea rolling and curling machines applicable thereto.* (From 27 June 1899 to 27 June 1900.)

No. 38 of 1894.—Narayan Chimnaji Divadkar. *Divadkar's perspective apparatus.* (From 28 May 1899 to 28 May 1900.)

No. 330 of 1894.—Charles Robert Pitt, and Charles Bee. *A punkah pulling machine to be styled the "Bee Punkah Puller."* (From 3 June 1899 to 3 June 1900.)

No. 124 of 1895.—The Deutsche Metallpatronenfabrik. *Improvements in storing and packing opium, and in appliances therefor.* (From 22 October 1899 to 22 October 1900.)

No. 1761 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorising others so to do, has ceased :—

No. 237 of 1894.—Ludwig Grote. *Improvements in the manufacture of artificial stone, marble, preservative paint and other analogous materials.* (Specification filed 28 February 1895.)

No. 58 of 1895.—The Badische Anilin and Soda Fabrik. *The manufacture and production of new compounds suited for use in the preparation of diazo-compounds and their application in the production of dyes.* (Specification filed 2 March 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 366 of 1893.—George Eastwood. *Improvements in the production of matrices or moulds for stereotyping, and in apparatus employed therein.* (Specification filed 2 March 1894.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of R50 for the above invention.

No. 73 of 1892.—Edward Lennon Cantwell. *An improved huller for rice, coffee and grain, and for scouring and cleaning rice, wheat and every description of grain.* (Specification filed 1 March 1893.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,
Offg. Secy. under the Inventions and Designs Act, 1888.

THOMASON COLLEGE, ROORKEE.

NOTIFICATION.

Dated Roorkee, 31st May, 1899.

At the annual examination of the students of this College, which will be held in July, 1899, it is anticipated that about 15* Upper and 50 Lower Subordinates will qualify for the appointments of 2nd and 3rd grade Overseer and 3rd grade Sub-Overseer respectively. Officers requiring men are requested, with reference to Public Works Department Code, Chapter I, para. 51, and Director General, Military Works, Circular No. 35 A., dated 12th October, 1893, to inform the Principal of the extent of their requirements in these grades.

Early intimation will enable the Principal to select men suitable for service in particular localities and on special works. Many of the men now being trained promise to turn out good subordinates, and it is proposed, as far as possible, to appoint the best men in the order in which applications are received.

2. When candidates are taken, it is particularly requested that they may be placed for training during their period of probation under judicious and competent officers. It is certain that the future of a subordinate depends quite as much on the nature of his early training on works as on his previous theoretical education.

3. The selection of suitable men will be greatly facilitated if the following particulars are supplied :—

No. of candidates required.	Grade or class.	For what locality.	Nature of employment, survey or works.	Temporary employment or probation for permanent.	If temporary, probable duration.	Rate of pay and travelling allowance.

N.B.—Men can be supplied qualified as :—

2nd grade Overseer . . . . . Draftsman and Computor.
3rd „ „ . . . . . Mechanical Foreman.
3rd „ Sub-Overseer . . . . Press Manager.
Photo Mechanical Operator.

4. In all cases travelling allowance at the rate of two annas per mile by road and double third class fair by rail, for the distance from Roorkee to their respective destinations, will be advanced by the Principal of the College to passed Lower Subordinate students on their first appointment to the Public Works Department and travelling allowance under the Civil Service Regulations to Overseers, to be refunded to him by the Executive Engineer under whom they are appointed to serve.

J. CLIBBORN, *Lieut.-Col., I.S.C.*,
Principal, Thomason College.

* In excess of the guaranteed appointments.

For Midnapore and Orissa at 6-30 A.M.

The letter-box will be cleared for the evening Mails without late fee at the following hours, *viz.*:—

For E. I. Railway Loop Mail at 2-30 P.M. and up to 2-55 P.M. with a late fee of ½ anna.

For Darjeeling and Assam at 3-25 P.M. without late fee, and 3-50 P.M. with late fee of ½ anna.

For the Bombay Mail *viâ* Jubbulpore carrying also Mails for Ceylon at 6 P.M.

For the Punjab at 7-30 P.M.

For Midnapur District only at 7-30 P.M.

For Khulna Mail . . 7-30 P.M.

For Goalundo Mail . . 7-30 P.M.

Late letters bearing a fee of ½ anna will be received for the Bombay Mail *viâ* Jubbulpore up to 6-30 P.M. and for other Mails from 7-30 to 8 P.M., and from 8-0 to 8-45 P.M. with a late fee of 1 anna for the Punjab Mails only.

Late registered articles will be received between the following hours:—

For Offices served by the Bombay Mail *viâ* Allahabad and Jubbulpore from 5 P.M. to 6-15 P.M.

For Offices served by the Punjab Mail from 6 P.M. to 7 P.M.

For Offices served by the Goalundo Mail from 6 P.M. to 7 P.M.

For Offices served by the Khulna Mail from 6 P.M. to 7 P.M.

The late fee on each registered letter will be two annas, which must be prepaid in stamps on the letter.

Articles for Burma and for Port Blair by Sea are received without late fee up to 7-30 P.M., after which hour they are received fully prepaid and bearing an extra stamp of ½ anna up to 8 P.M.

On the latest safe day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6 P.M., and late letters and papers fully prepaid will be received up to 6-30 P.M.

On the day of despatch of the Mail for Europe (Thursday), the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6-30 P.M., and late letters and papers fully prepaid will be received up to 6-45 P.M. Late registered articles will be received from 5 to 6 P.M. On other days the letter-box for Foreign articles will be cleared for the last time without the late fee at 6 P.M., and late letters and papers will be received up to 6-30 P.M. for despatch by any Foreign Mails *viâ* Tuticorin, Madras, or Bombay the same night and up to 8-30 P.M., late letters and papers up to 9 P.M., for any Foreign Mails despatched by Sea. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

P. J. GORMAN,

Offg. Presidency Postmaster, Calcutta.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, I.S.C.*,
Principal, Thomason College.

NOTICE.

It is notified, for information of Military and Civil officers, that services of Shams-ul-Ulama, Shaikh Mahmud Gilani, Persian Instructor, and Mr. R. F. Azoo, Arabic Instructor, have been specially retained by Government for giving instruction to candidates intending to present themselves for examinations in Arabic and Persian before the Board of Examiners. Gentlemen requiring their tuition should communicate with them at the office of the Board of Examiners.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8;* per eight-ounce tin, *R5;* per pound tin, *R10.* The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the undernoted rates: per four-ounce tin, *R3;* per eight-ounce tin, *R6;* per pound tin, *R12.* This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فيوج يعني تپ بهگانے
والي سنکونا *

سنکونا فبري فيوج کلکته کے بوتانکل گاردن يعنے کمپنی باغ کے سپرنتندنت صاحب سے هر ايک ملازم سرکاري اور ايک مشت چهه پونڈ تلک لينے والا هر آدمی حسب نرخ ذيل خريد کرسکتا هی :— يعنے چار اونس والا تين بقيمت دو روپيه آتهه آنه ؛ آتهه اونس اولا تين بقيمت پانچ روپيه ؛ ايک پونڈ والا تين بقيمت دس روپيه *

عام آدميون کو يهه دوا بوتانکل گاردن يعنے کمپنی باغ کے سپرنتندنت صاحب سے بقيمت نقد حسب نرخ ذيل مل سکتي هی - يعنے چار اونس والا تين بمقيمت تين روپيه ؛ آتهه اونس والا تين بقيمت چهه روپيه ؛ ايک پونڈ والا تين بقيمت باره روپيه *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1898, the price of this Quinine will be as follows:—

1-pound tin,	R17,	or,	post-free,	R17-12.
½	"	R8-8,	"	R9-0.
¼	"	R4-4,	"	R4-12.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত
বিশুদ্ধ কুইনাইন।

১৮৯৮ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পোণ্ড টিন	১৭, বা ডাকমাশুল বিনা	১৭৷৷৷০		
৷৷ আধ ,, ,,	৮৷৷০	,,	৯,	
৷ শিকি ,, ,,	৪৷০	,,	৪৷৷৷০	

পরিক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনাডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials,	R2-6.
"	II.	Masonry,	R1-4.
"	III.	Carpentry (1889),	R1-4.
"	IV.	Earthwork (1892),	R1-4.
"	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings. (In the Press.)	
"	VII.	Bridges,	R4-4.
"	VIII.	Roads,	R1-8.
"	IX.	Railways (1891),	R1-4.
"	X.	Irrigation Works. (Under revision.)	

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7.

" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

* Date of Edition on sale.

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition, with Curve Table). R3.

XIII. **Drawing** (by Lieut. R. Pulford, R.E.). † R8.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.

XIV. **Simple Applied Mechanics**, Parts I and II in one (in the Press)

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.

VI. **Earthwork Estimating**, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. Say R1.

XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Shelly's Workshop appliances. R1-8.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Notes on Chemistry of Building Materials. R2-0.

Tate's Mechanism. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunnya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 12a.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12a.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. (In the Press.)

Wooden Bridges and Designs. By Rai Kunnya Lal. (In the Press.)

Blasting under Water (2nd edition). 10a.

Waugh's Instructions for Topographical Surveying R1.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-8.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R2-0.

Banerman's Descriptive Mineralogy. R3.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time). 4a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.

Cape's Geometry. R1-4.

Cape's Mechanics. 8a.

Todhunter's Plane Trigonometry. R2-12.

Todhunter's Differential Calculus. R2-8.

Military Topography. 8a.

† Originally published at R15, reduced to R8.

HINDUSTANI.

Elements of Hindustani Grammar. 8a.

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II. Each Part 3a.

Short Account of Ganges Canal (English and Urdu). 4a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large. R1-4.

Surveying Field-Books (ruled). 14a.

Levelling Field-Books (English Pattern). R1-4.

" " (Canal "). R1-4.

" " (College "). R2-0.

P. W. D. Note-Book. R1-4.

" **Measurement Book.** R1-4

Circular Card-board Protractors, 12 inches. R2.

MISCELLANEOUS.

Distributary, Velocity and Discharge Table. By Capt. Allan Cunningham. 8a.

Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") R1-8.

Ditto ditto in Urdu. R1-4.

Perspective (fully explained). By Col. A. M. Brandreth, R.E. R1-12.

Thomason College Calendars for 1892,* 1895,† 1896† and 1897. Each R2.

Ditto ditto for 1898, Pt. I. R3-6.

Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English (very old). 4a.

Memo. of Instructions for Road Project. R1.

Project for College Mess (sample Project). R1.

Quarterly Number 41A of Vol. X. 8a. each, exclusive of packing and postage.

Cloth covers for Volumes of 1st and 2nd Series, at 4a. each.

(THIRD SERIES.)

Quarterly Nos. 13 and 15, at 8a. each, exclusive of packing and postage.

Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2a. each, and loose papers, 3rd Series, 3a. each, exclusive of packing and postage.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of admission to the different classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason Civil Engineering College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
For the Calcutta Series	10	0	0	12	8	0

" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	a.	p.	R	a.	p.
For the Calcutta Series; per copy . .	0	8	9	0	10	0
" each of the Madras, Bombay, and Allahabad Series; per copy	0	5	3	0	5	9
" the Calcutta Series. For the year . .	7	2	6	8	6	3
" each of the Madras, Bombay, and Allahabad Series. For the year . . .	4	4	6	4	11	0

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
" three issues . . .	" 55	" 36	" 24
" six " . . .	" 100	" 68	" 45
" nine " . . .	" 145	" 96	" 64
" twelve " . . .	" 180	" 120	" 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
Bengal Law Reports, for one year . .	20	0	0	22	8	0
Single copies, R2 per copy.						
Full Bench Rulings, Parts I and II . .	20	0	0	22	8	3

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

MISCELLANEOUS.

REVIEW OF THE REVENUE AND EXPENDITURE RECORDED UNDER THE HEADS "CIVIL WORKS", "FAMINE RELIEF" AND "MISCELLANEOUS PUBLIC IMPROVEMENTS" IN THE ACCOUNTS OF THE GOVERNMENT OF INDIA FOR THE OFFICIAL YEAR 1897-98.

No. 506 C. W.—M., dated Simla, the 1st June 1899.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Note by A. R. Becher, Esq., Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure recorded under the heads "Civil Works", "Famine Relief" and "Miscellaneous Public Improvements" in the accounts of the Government of India for 1897-98.

RESOLUTION.—The total revenue derived from these works in 1897-98 amounted to Rx. 615,262 as compared with Rx. 634,946 in 1896-97 and

A

Rx. 664,133 in 1895-96, the average for the five past years being Rx. 633,655. The falling off was mainly under the heads "Ferry receipts" and "Tolls on roads." The former of these heads accounts for half of the total receipts, the amount collected under it being Rx. 306,993 against Rx. 311,709 in the previous year. Road tolls produced a revenue of Rx. 82,711 as compared with Rx. 103,656, in the previous year, the decrease of 20 per cent. being attributed to the effect of the plague in Bombay and the famine in other provinces. The receipts credited under "Rents of buildings" increased, on the other hand, from Rx. 57,507 in 1896-97 to Rx. 64,814 in the year under review.

2. The net return on the capital cost of buildings for which rent is charged was 1·77 per cent. as compared with 1·56 last year. The value of these buildings was higher in Burma than in any other province and the return yielded on them was 3 per cent. A return of over 2½ per cent. was obtained in Madras and Central India, while over 2 per cent. was returned in Bombay, the Punjab and the North-Western Provinces. In Bengal, on the other hand, the cost of repairs exceeded the rents realized by Rx. 1,008, or 16 per cent., while in Assam the cost of repairs was nearly 80 per cent. in excess of the rents.

The accounts furnish no explanation of these unsatisfactory results, but it would appear from paragraph 1 (4) of the Accountant General's note that they were due in no small degree to the disastrous earthquake of June 1897 which destroyed a large number of the buildings in Assam and damaged many of those in Bengal so seriously as to render them uninhabitable until they could be renovated. The consequence was a very large increase in the cost of repairs accompanied by a large loss of revenue, as rents could not be assessed from tenants who were forced to vacate their houses. The introduction of revised rules in connection with these buildings, which are now under consideration, will, it is hoped, remove many unsatisfactory features in the annual returns of Government rentable buildings.

3. The total expenditure on "45—Civil Works" during the year was Rx. 4,482,024 as compared with Rx. 4,868,721 in 1896-97. Excluding expenditure under Excluded Local Funds and Contributions, the actuals, compared with those of last year and with the average of the last five years, were as follows:—

—	1897-98.	1896-97.	Average of five years ending 1896-97.
	Rx.	*Rx.*	*Rx.*
Imperial	428,523	809,383	767,550
Provincial	2,258,018	2,131,781	2,093,036
Local	1,564,010	1,685,125	1,710,717
TOTAL	4,250,551	4,626,289	4,571,303

These figures show that there was a great reduction in the expenditure under Imperial and a slight reduction under Local, while under Provincial the outlay exceeded that of last year by Rx. 126,237 and the average by Rx. 164,982.

Of the total outlay on new works the expenditure on buildings was Rx. 724,262 against Rx. 961,520 last year and on roads Rx. 473,763 against Rx. 590,330 in 1896-97.

4. The expenditure on famine relief works amounted to Rx. 3,356,290, of which Rx. 407,011 were spent on Railway and Irrigation Works, while the balance was distributed as follows :—

—	Imperial.	Provincial.	Local.	Excluded Local.	TOTAL.
	Rx.	*Rx.*	*Rx.*	*Rx.*	*Rx.*
Communications . . .	2,101,207	3,751	22	...	2,104,980
Miscellaneous Public Improvements	777,274	48,423	2,738	3,923	832,358
Civil Buildings . . .	11,899	42	...	...	11,941
TOTAL .	2,890,380	52,216	2,760	3,923	2,949,279

5. The percentage of establishment charges on the outlay on works and repairs by Public Works officers rose from 28·18 in 1896-97 to 31·23 in the year under review. While the total expenditure on works and repairs, omitting Excluded Local Funds and contributions, was less than in the previous year by Rx. 219,841, the establishment charges increased by Rx. 5,356. The provinces in which the increase is most noticeable are Madras, Bombay, North-Western Provinces and Oudh and Central Provinces, the percentage in Madras having risen from 27·36 to 47·59. The increase was due to increased expenditure on establishment required for famine relief works and to the restriction of expenditure on Civil Works in order to provide funds for relief works.

The Government of India observe with satisfaction that the income derived from the Royal Indian Engineering College at Cooper's Hill exceeded the cost of upkeep by £2,754.

The Governments of Madras and Bombay (General), Bengal, the North-Western Provinces and Oudh, the Punjab, and Burma.
The Chief Commissioners of the Central Provinces, Assam, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Superintendent of Port Blair and Chief Commissioner, Andaman and Nicobar Islands.
The Accountant General, Public Works Department.
The Director General of Military Works.

ORDER.—Ordered that the foregoing, with a copy of the note, be forwarded to the Local Governments, Administrations and officers noted in the margin for information.

Ordered, also, that a copy of the Resolution and note be forwarded to the Finance Department, and that the papers be published in the Supplement to the *Gazette of India*.

T. HIGHAM,

Joint Secretary to the Government of India.

Documents accompanying.

Note by Accountant General, Public Works Department, with accompaniment.

Accompaniment to P. W. D. No. 506 C. W. M., dated 1st June 1899.

Note by A. R. Becher, Esq., Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure recorded under the heads "XXXII and 45.—Civil Works," "33.—Famine Relief Works," and "50.—Miscellaneous Public Improvements" in the accounts of the Government of India for 1897-98.

General.

The amount of Revenue and Expenditure exhibited in these accounts and reviewed in the following paragraphs is :—

	33.—Famine Relief Works.	45.—Civil Works.	50.—Miscellaneous Public Improvements.	TOTAL.
	Rx.	Rx.	Rx.	Rx.
Revenue . .	...	615,262	...	615,262
Expenditure .	3,356,290 *	4,482,024 †	4,105	7,842,419

There were four main causes that affected the transactions under review : (1) Famine, (2) Restriction of expenditure, (3) Plague, and (4) Earthquake. Famine and the restriction of expenditure affected nearly every province in India. Plague only directly affected Bombay. Earthquake caused damage to buildings and roads in Assam and Bengal only. The effects are stated in some detail in the following paragraphs :—

(1) *Famine.*—The provinces in which the famine was most acutely felt were the Central Provinces, the North-Western Provinces and Oudh, Madras, and Bombay; the expenditure on relief operations during the year in these four provinces amounted to about Rx. 917,000, 727,000, 658,000 and 713,000, respectively, or a total of Rx. 3,015,000 as compared with an expenditure of Rx. 3,352,000 for the whole of India.

(2) *Restriction of expenditure.*—This lasted till the 31st December 1897, and was necessitated by the depletion of Treasury balances consequent on the unusually heavy demands on Government for the relief of distress caused by the famine. After the withdrawal of the restriction, Government regranted in some instances the funds previously withdrawn or withheld; but it was found impracticable to spend in three months a sum of money which should have spread over nine months.

(3) *Plague.*—This, as has been stated, only directly affected Bombay; but there is little doubt that the dislocation of business caused thereby in so important a seaport town must have told, to some extent, on other provinces, particularly those bordering on Bombay. In Bombay itself, business was almost entirely paralysed; and this led to a great falling-off in revenue under "Tolls on roads" and "Ferry receipts," and to a great scarcity of labour and materials required for use on works.

(4) *Earthquake.*—The only provinces directly affected by this calamity were Assam and Bengal, particularly the former. The greater part of the damage was due to the first and severest shock, which occurred on the 12th June 1897. The expenditure in making good the damages during the year amounted to Rx. 146,300, of which Rx. 107,800 was incurred in Assam ‡ and Rx. 38,400 in Bengal.

REVENUE.

1. The *Revenue* credited in the accounts of the Government of India for 1897-98 under the head "XXXII.—Civil Works," which amounted to Rx. 615,262, was brought to account as follows :—

	Rx.	
	166,142	by Public Works Officers in India.
	403,929	by Officers of other Departments in India.
	45,191	in England.
TOTAL .	615,262	

* Includes outlay from Excluded Local Funds, amounting to Rx. 3,923.
† Includes outlay from Excluded Local Funds, Contributions, and Local Loans, amounting to Rx. 281,473.
‡ In Assam the figures are approximate.

2. The principal heads are detailed in the table below :—

Sources of Revenue.	Collections.								Grand Total.
	By Public Works Officers.				By Officers of other Departments.

GRAND TOTAL .	...	...	...	...	...	...	...	...	615,262
For details by Provinces, see page of accounts . . .	V	VII	VII	...	V	VII	VII	...	...

A comparison of the actual revenue realized under "XXXII.—Civil Works" with the Budget and Revised Estimates is given below :—

Year.		Budget Estimate.	Revised Estimate.	Actuals.
		Rx.	Rx.	Rx.
1897-98	. . . . .	629,600	609,700	615,262

For the decrease of Rx 14,338 in the actual realisations as compared with the Budget Estimate, Bombay is chiefly responsible, the revenue having been worse than the Estimate by Rx. 33,195; on the other hand the Punjab and Burma were better by Rx. 10,698 and Rx. 5,756 respectively. The decrease in Bombay is entirely due to the great falling-off under "Tolls on roads" and "Ferry receipts," and is one of the effects of famine and plague. The increase in the Punjab is due to the North Western Railway having purchased for Rx. 4,655 the Lunatic Asylum, Lahore, and to certain receipts under "Serais" being budgetted for under "XXXV.—Miscellaneous," but accounted for under "XXXII.—Civil Works." The increase in Burma is due to the recovery of a sum of Rx. 1,350 from the lessee of the Government saw mills at Mandalay, which were destroyed by fire, and to improved realisations under "Ferry receipts" and "Staging bungalows."

The increase of Rx. 5,562 in the actual realisations as compared with the Revised Estimate was contributed chiefly by Bengal (6,511), Burma (2,906), Punjab (3,098), while in Bombay there was a falling off (7,494). The increases in Burma and the Punjab, and the decrease in Bombay, are due to the causes which affected the comparison with the Budget Estimate. The

increase in Bengal is due to the increased profits from the Darjeeling-Himalayan Railway and to larger recoveries of rents of buildings and ferry tolls.

3. ***Rents of buildings, Rx. 64,814.***—The receipts from this source compare as follows with the realizations in the four preceding years:—

YEARS.	By Public Works Officers.	By Officers of other Departments.	TOTAL.
	Rx.	Rx.	Rx.
1893-94	49,973	4,405	54,378
1894-95	49,092	4,898	53,990
1895-96	53,720	4,935	58,655
1896-97	53,087	4,420	57,507
1897-98	56,714	8,100	64,814

The net receipts on the capital cost of buildings set apart as residences, in the Buildings and Roads and Irrigation Branches excluding those allotted rent-free, is 1·77 per cent., as shown below, against 1·56 per cent. in the previous year:—

PROVINCES.		CAPITAL COST OF BUILDINGS FROM EXAMINER'S ACCOUNTS.				Rents realized.	COST OF REPAIRS.		Net return excluding repairs to rent-free buildings.	Percentage of net return on Capital cost excluding rent-free buildings.
		Year of the account.	AMOUNT.				Rent-free buildings.	Other buildings.		
			Rent-free buildings.	Other buildings.	Total.

Note.—The financial results of buildings borne on the returns of the Irrigation Branch have been, for convenience, included in the above statement. The figures for Irrigation Buildings are:—Capital cost Rx. 74,349, Rent realized Rx. 3,800, Repairs Rx. 3,340, Net return Rx. 460, and Percentage of net return ·62 :

4. *Ferry Receipts, Rx. 306,993.*—This is the principal source of revenue credited under the head "Civil Works;" the major portion of it, amounting to Rx. 300,288, was realized by Civil Officers.

The realizations under this head during the last four years are shown in the following table:—

YEARS.	By Public Works Officers.	By Civil Officers.	TOTAL.
	Rx.	Rx.	Rx.
1894-95	6,268	296,897	303,165
1895-96	7,133	309,214	316,347
1896-97	6,250	305,459	311,709
1897-98	6,705	300,288	306,993

The following Provinces contributed the largest amounts under this head:—

PROVINCES.	Amount.
	Rx.
Assam	14,850
Bombay	13,382
Punjab	34,981
North-Western Provinces and Oudh	54,912
Bengal	70,509
Madras	95,007
Burma	16,134

The incidence of the revenue is—

	Rx.
Imperial	...
Provincial	105,111
Local	201,882
TOTAL	306,993

EXPENDITURE.

5. *The Expenditure* recorded in the accounts for 1897-98 under the head "45.—Civil Works", amounts to Rx. 4,482,024. Of this sum—

	Rx.	3,152,494	were expended by Officers of the Public Works Department;
	"	1,208,500	by Officers of other Departments;
	"	4,360,994	
	"	121,030	in England, including exchange, but exclusive of Rx. 5,373, the value of stores supplied to India, included in the outlay upon the works concerned.
TOTAL.	"	4,482,024	

6. The following table compares the actuals of the year (exclusive of outlay from Excluded Local Funds, Contributions and Local Loans) with the Budget and Revised Estimates:—

FUNDS.	Budget Estimate.	Revised Estimate.	Actuals.
	Rx.	Rx.	Rx.
Imperial	472,100	482,300	428,523
Provincial	2,291,000	2,219,000	2,258,018
Local	1,785,800	1,595,900	1,564,010
TOTAL	4,548,900	4,297,200	4,250,551

Imperial outlay, Rx. 428,523.

The actuals fell short of the Budget Estimate by Rx. 43,577, of which Rx. 19,280 occurred under India and Rx. 24,297 under England and Exchange. The decrease in India was due partly to a write-back of Rx. 10,847 from Imperial to Provincial on account of suspense balances appertaining to Civil Works in Upper Burma and partly to the requirements in Bengal, Madras and Bombay having been over-estimated. The decrease in England and Exchange was chiefly due to the non-receipt of English stores in connection with the Bangalore water-supply. In Assam the Budget Estimate was exceeded by Rx. 9,399 due partly (about Rx. 5,800) to the reconstruction and repairs of Imperial Buildings damaged by earthquake, ard partly (about Rx. 3,600) to irregular expenditure towards the close of the year on the Nichuguard-Manipur road.

Compared with the Revised Estimate, the actuals show a decrease of Rx. 53,777, chiefly due to an over-estimate by about (Rx. 26,800) of the expenditure chargeable to Civil Works on account of the Bangalore water-supply scheme, and to stores (to the value of about Rx. 9,300) paid for by the Secretary of State not having arrived till after 31st March 1898. The expenditure in Bengal and the Punjab was also over-estimated.

Provincial outlay, Rx. 2,258,018.

The actuals fell short of the Budget Estimate by Rx. 32,982, of which Departmental Officers contributed Rx. 24,330, and Civil Officers Rx. 8,652. There was a large excess in Assam (Rx. 87,936) due to additional funds being granted for repairs rendered necessary by the earthquake, but this was more than counterbalanced by the following savings, due generally to the restriction of expenditure :—

	Rx.
Burma	18,381
Bengal	13,329
North-Western Provinces and Oudh	12,412
Punjab	24,608
Bombay	34,872

The excess outlay over the Revised Estimate was Rx. 39,018 which was the net result of an excess of Rx. 40,170 in the expenditure under Departmental Officers and a lapse of Rx. 1,152 of grant for expenditure under Civil Officers. The excess of Rx. 40,170 was mainly contributed by Assam (7,536), Bengal (14,171), Punjab (15,392) and Madras (10,936), partly counterbalanced by a saving in the North-Western Provinces and Oudh (13,812).

Incorporated Local Fund outlay, Rx. 1,564,010.

The decrease of Rx. 221,790 in the actuals as compared with the Budget Estimate was chiefly due to restriction of expenditure. Lapses from the Revised Estimate of Rx. 14,124 under Departmental Officers and of Rx. 17,766 under Civil Officers were due to an over-estimate of the requirements of the year.

7. The total expenditure of the year, including the outlay from Excluded Local Funds, Contributions and Local Loans, has been charged in the accounts under the following heads :—

		Rx.
New works		1,522,707
Repairs		1,848,495
Tools and plant		52,409
Suspense		*—13,616*
Miscellaneous (Contributions to Municipalities, etc.) . .		57,321
Establishment		893,678
Add—		4,360,994 (a)
In England—		
Payment	Rx. 77,429	
Exchange	„ 43,601	
		121,030
TOTAL .		4,482,024

(a) Includes £3,437 on account of English stores, *plus* Rx. 1,936 exchange thereon.

The services on which this sum was spent and the funds from which it was provided are shown below. The outlay from Excluded Local Funds, Contributions and Local Loans Rx. 231,473, represents money expended mainly on works requiring professional skill, carried out by the Public Works Department for local bodies and institutions:—

Service and Departmental Heads.	Imperial.	Provincial.	Incorporated Local.	Excluded Local, Local Loans and Contributions.	Total.

Madras		1,711,556
Bombay		4,632,755
	GRAND TOTAL	20,828,479

9. *Outlay in England.*—The outlay in England, exclusive of the value of stores charged to works, compares as follows with the actuals of the previous four years:—

DETAILS.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.
	£	£	£	£	£
Salaries of President, Professors, etc., and other Charges of the Royal Indian Civil Engineering College, Cooper's Hill	30,330	26,944	26,489	25,995	26,157
Furlough pay and absentee allowances of Officers of the Public Works Department	49,729	47,091	52,749	55,312	46,360
Salaries, etc., of passed students detained in England	3,683	3,847	3,999	3,709	3,752
Passage to India of Officers on appointment	611	611	656	545	711
Salaries, etc., of Indian Officers of the Public Works Department undergoing training in England	354	87	165	42	449
Remuneration for professional services	379	...	...	...	...
	85,086	78,580	84,058	85,603	77,429
Exchange	55,294	65,377	63,865	56,570	43,601
TOTAL	140,380	143,957	147,923	142,173	121,030

10. The direct charge to the State under the head "Civil Works" on account of the Royal Indian Civil Engineering College at Cooper's Hill was:—

	Charge in sterling.	Income in sterling.		Net charge.
	£	£		£
In 1897-98	26,157	28,911	=	—2,754
„ 1896-97	25,994	26,224	=	—230
„ 1895-96	26,489	24,724	=	1,765
„ 1894-95	26,944	25,342	=	1,602
„ 1893-94	30,330	25,828	=	4,502
„ 1892-93	28,184	27,704	=	480
„ 1891-92	28,017	27,197	=	820
„ 1890-91	24,905	24,878	=	27

There was a small increase in expenditure over the previous year; but the income was the largest that has been realized during the period of eight years for which figures are given above, and the net result was a credit of £2,754.

11. Omitting the outlay from Excluded Local Funds and Contributions, in regard to which the Public Works Department is merely the executive agency employed to carry out the work, the outlay in India on "Civil Works" during 1897-98 compares as follows with that incurred during the four preceding years :—

Heads of Service.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.
	Rx.	Rx.	Rx.	Rx.	Rx.

GRAND TOTAL	4,489,900	4,200,974	(a) 4,456,651	(b) 4,484,116	(c) 4,129,521

(a) Includes £2,317 on account of English stores, *plus* exchange thereon.
(b) Includes £5,768 " " " "
(c) Includes £3,437 " " " "

12. The expenditure on Establishment bears the following ratio to the outlay on works and repairs by Public Works Officers :—

1893-94	27·98
1894-95	31·69
1895-96	29·86
1896-97	28·18
1897-98	31·23

There has been an increase in the percentage as compared with the previous year.

13. The Provinces, in which the percentages are highest, are given below:—

	Percentage on outlay on works and repairs.
Central India	61·06
Madras	47·59
Central Provinces	42·92
Rajputana	41·82
North-Western Provinces and Oudh	40·22

The high rates in Central India and Rajputana are due to exceptional circumstances. A comparatively large establishment has to be maintained owing to the scattered nature of the works. Those in the Central Provinces and North-Western Provinces and Oudh are due to the increased charges on account of the allowances, etc., of officers transferred to the Province for duty on famine works. While in Madras the high percentage this year is due to the restriction of outlay on works and repairs which was necessary to admit of adequate provision being made for famine relief works.

The rate for work done under the control of the Director-General of Military Works is very low, being only 4·05 per cent., and is stated to be attributable to the non-adjustment of certain charges in connection with the expenditure on the Bangalore Water-supply. The adjustment due to *end* of 1898-99 will be carried out in the accounts for that year.

14. Of the total outlay under Public Works Officers—

		Against in	
		1896-97.	1895-96.
22	per cent. was expended on new Buildings	27 per cent.	26 per cent.
11	" " " " Roads	12 "	13 "

22	" Total on Establishment, Miscellaneous, etc.	18 "	16 "
100	Total	100	100

15. In Burma, Bengal, and the North-Western Provinces and Oudh large sums were spent on new buildings; but in all provinces the bulk of the expenditure was devoted to the construction and repairs of roads. From Imperial Funds, a sum of Rx. 56,858 (exclusive of Expenditure in England and Exchange) was expended on the Bangalore water-supply.

The principal figures are given in the table below:—

Province.	New Buildings.	New Roads.	Repairs to Roads.	Total expenditure under "45.—Civil Works."
	Rx.	Rx.	Rx.	Rx.
Burma	155,144	93,725	137,685	461,117
Bengal	173,121	71,184	270,808	634,501
North-Western Provinces and Oudh	82,752	41,468	175,479	372,170
Central Provinces . . .	19,327	38,824	46,327	118,111
Assam	43,125	75,935	118,450	274,802
Punjab	48,168	30,209	125,380	256,127
Madras	73,633	59,753	280,895	499,811
Bombay	71,533	45,434	177,080	394,008

16. A few of the principal works, on which outlay from Imperial Funds was incurred, and their localities are noted below:—

In Military Works Department—

Buildings—New Roman Catholic Church at Quetta.
Miscellaneous Public Improvements—Bangalore Water-supply Project.

In Port Blair and Nicobars—

Buildings—Cellular Jail at Aberdeen.

In Baluchistan—

Buildings—New Residency, Quetta.
Roads—Converting Kuch-Ziarat road into a tonga road.

In Assam—

Roads—Nichuguard-Manipur road.

In Bengal—

Buildings—New office for Comptroller of Post Offices, Calcutta.

In Punjab—

Buildings—Public Works Department New Secretariat Offices at Simla.

17. The outlay from Provincial Funds by Officers of the Public Works Department was expended in the following proportions:—

		Against in 1896-97.	Against in 1895-96.
25 per cent.	on new Buildings	30 per cent.	29 per cent.
9 „	„ Roads	7 „	7 „
1 „	„ Works of Miscellaneous Public Improvement	2 „	3 „
35 „	Total on new Works	39 „	39 „
11 „	on Repairs to Buildings	10 „	10 „
25 „	„ „ to Roads	24 „	24 „
1 „	„ „ to Works of Miscellaneous Public Improvement	1 „	1 „
37 „	Total on Repairs	35 „	35 „
26 „	of the total outlay has gone in payments to Establishment	24 „	26 „
2 „	on Tools and Plant and Suspense	2 „	...
28 „	Total on Establishment and Tools and Plant, etc.	26 „	26 per cent.
100	Total	100	100

18. Burma, Bengal, the North-Western Provinces and Oudh, Madras, and Bombay show considerably larger outlay on new buildings than on new roads. On the other hand, in the Central Provinces, Burma, Assam, Bengal, the North-Western Provinces and Oudh, Punjab, and Bombay, the bulk of the expenditure was incurred on the maintenance of roads; there being, in comparison, but a trifling sum devoted to new roads, in all the provinces, except the Central Provinces, Burma, and Assam. The outlay by officers of other Departments was comparatively small, and it was chiefly incurred on works of Miscellaneous Public Improvement.

19. The principal works under construction on which outlay was incurred were:—

In Central Provinces—

Buildings—Special repairs, additions and alterations to Police lines, Nagpur.
Roads—Betul-Chhindwara road, 2nd, 3rd, and 4th sections.
Dindori-Birsinghpur road, 1st section, from Dindori to Shahapura.

In Burma—

Buildings—Extension of Toungoo Jail.
Extension of Jail at Bassein.
Constructing main west entrance, Jail, Bassein.
Conversion of Paungde Reformatory into a District Jail.
Military Post at Sadôn.
Barracks and lines for Military Police at Myitkyina.
District Court-house at Thatôn.
Constructing quarters for Government clerks at Rangoon.
Roads—Cart-road over Bhamo-Mahoi section of Bhamo-Namkhan road.
Indin-Falam road.
Roads and drains for Maymyo station.
Raising and bridging 19 miles of road from Kyauksè to Samôn *viâ* Kunse.
Ruby Mines road from Thabeitkyin to Mogôk.
